Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can also be used to calculate the cost of the increased labor cost to state and local government entities in Missouri. Using the data from January 2010 to December 2011 Outgoing Rotation Group (ORG) CPS, I calculated that 17,089 state and local government workers would be affected by the minimum wage increase. I defined affected workers as those individuals earning between $7.00 and $8.24 per hour. Though the minimum wage was $7.25 per hour during this period, I also included those workers reporting earnings of $7.00 to $7.24 since some individuals may round their wage rate. I calculated the annual wage cost for each state and local government worker (i) in the ORG CPS as:

$$Annual\ Wage\ Cost_i = (\$8.25 - current\ wage_i) * weekly\ hours_i * 52.$$[2]

The average annual wage cost increase was $870. I summed the cost over each worker (i) to obtain the total wage cost to state and local government entities in Missouri of $14,866,430.

The increased wage cost is not the only labor cost to state and local government entities of the minimum wage increase. Employers are required to pay 7.65% of their wage costs in Social Security and Medicare taxes. Thus, the total labor cost of the minimum wage increase will be 1.0765 times $14,866,430 or $16,003,712.

---

[2] I assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour.

C. Unemployment Benefit Impact

The higher minimum wage will cause firms to reduce their level of employment.[3] As a result, the number of unemployed workers will increase. Thus, another important fiscal cost of the minimum wage increase is the cost of the unemployment insurance benefits for the workers laid off as a result of the minimum wage increase.

To calculate the cost to the unemployment benefits program, I first calculated the number of workers laid off. To do so, I calculated a probability of job loss for each affected Missouri worker (i) in the January 2010 to December 2011 ORG CPS:

$$Probability\ Job\ Loss_{\ i} = \frac{(\$8.25 - Current\ Wage_i)}{Current\ Wage_i} * elasticity_i.$$

I used the preferred employment elasticity (i.e., sensitivity of employment to wage changes) contained in Sabia and Burkhauser (2010), which was -0.6 for individuals aged 16 to 29 without a high school degree and -0.2 for all other individuals. The sole exception was for state and local government workers, where I assumed an elasticity of zero.[4] The sum across all affected workers yielded an estimated job loss of 5,745 jobs.

The next step was to calculate the weekly benefit for the average unemployed worker. Using the benefits calculator on the Missouri unemployment benefits web site and the wage income of average private-sector affected worker ($10,937), yields an average weekly benefit of $109.36[5]. The state of Missouri pays the first 20 weeks of benefits.[6] Thus, each eligible unemployed worker could receive a total of $2,187.20 in

---

[3] For a survey of research regarding the effect of the minimum wage on employment, see David Neumark and William L. Wascher, *Minimum Wages* (Cambridge, MA: MIT Press, 2008).
[4] Joseph J. Sabia and Richard V. Burkhauser, "Minimum Wages and Poverty: Will a $9.50 Federal Minimum Wage Really Help the Working Poor?" *Southern Economic Journal* (January 2010): 592-623.
[5] http://www.labor.mo.gov/DES/Claims/calculator.asp
[6] See http://www.labor.mo.gov/DES/Claims/

benefits paid for by the state of Missouri. These jobs are permanently eliminated and so it is appropriate to calculate the full amount of benefits for each worker.

Unemployment insurance, however, does not cover all unemployed workers. For example, it does not cover people who leave a job voluntarily, people looking for their first job, and re-entrants who previously left the labor force voluntarily. Furthermore, some individuals don't apply for benefits even though they are eligible. I assume that 35% of the unemployed workers will receive unemployment benefits based on analysis by Wenger (2001).[7]

The last step is to calculate the total cost to the Missouri unemployment benefits program. This done by multiplying the number of jobs lost (5,745) times the average benefit amount ($2,187.20) times the percent of unemployed individuals collecting benefits (35%). This calculation yields a figure of $4,397,510. This cost would be borne only during the first year of the minimum wage increase. The inflation adjustments in the minimum wage will also yield costs to the unemployment insurance program, but it is not possible to estimate the amount.

D. Impact on State Income Tax Revenue

The state of Missouri will gain increased revenue through higher income tax taxes paid by workers affected by the minimum wage who remain employed. However, it will

[7] Jeffery Wenger. "Divided We Fall: Deserving Workers Slip through America's Patchwork Unemployment Insurance System." *Economic Policy Institute*, 2001. Sabia and Burkhauser (2010) make the same assumption in their calculation of the amount of unemployment benefits generated by a minimum wage increase.

suffer reduced corporate income tax revenue to the extent the higher wage cost lowers profits of businesses.

To calculate the impact on individual income tax revenue, I again used data from January 2010 to December 2011 ORG CPS. I defined affected workers as those Missouri individuals earning between $7.00 and $8.24 per hour.[8] I used the following formula to estimate the change in income tax revenue:

$$\Delta Tax\ Revenue_i = (Tax_After_i - Tax_Before_i) - Prob_Job_Loss_i * Tax_Before_i,$$

where Tax_After_i is the income tax paid by worker i after the minimum wage increase. Tax_Before_i is the income tax paid by worker i after the minimum wage increase, and $Prob_Job_Loss_i$ is the probability of job loss for worker i. The first term shows the change in individual income tax revenue assuming no job loss and the second term shows the loss in tax revenue due to the employment loss caused by the minimum wage increase.

The income tax calculations were based on two assumptions.[9] First, the 50% percent of affected workers who were under the age 25 who were assumed to be dependents on another person's tax return. As a result, it was assumed that the affected workers' earnings were taxable at the maximum Missouri income tax rate of 6% both and after the minimum wage increase.[10] Second, all persons age 25 and older were assumed to be paying little or no income tax after exemptions and deductions. Thus, about 50% of the earnings increase will be taxed at a rate of 6%.

---

[8] I again assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour. The annual earnings level was calculated as the worker's wage rate times usual weekly hours worked times 52.

[9] The same assumptions are used in the State Auditor's fiscal notes for the initiatives.

[10] This assumption will overstate the revenue increase as 20% of affected workers under the age 25 are living by themselves and some of these individuals will not be a dependent on another person's tax return.

The tax calculations reveal an increase in income tax revenue increase to the state. Assuming no workers were laid off by the minimum wage increase, income tax revenue would rise by $6,043,534. However, the state will lose $1,965,446 in income tax revenue due to the lost earnings of private-sector workers no longer employed due to the minimum wage hike.[11] Thus, the net increase in individual income tax revenue is $4,078,088.

Businesses have three options to respond to the higher labor costs of a higher minimum wage. They can reduce their profits, raise prices, or lay off workers. Based on the 2010-2011 ORG CPS data, the minimum wage increase will raise private-sector labor costs by $192,620,900 if employment levels are not reduced. However, labor costs will be lowered by $55,240,790 due to the reduction in employment. Thus, labor costs will, on net, rise by $137,380,110. These increased labor costs may be either passed on to consumers through higher prices or reduced profits or more likely some combination of higher prices and reduced profits. Assuming that businesses absorbed all of the higher costs through reduced profits, the corporate income tax revenue would fall by the Missouri corporate income tax of 6.25% times the rise in labor costs of $137,380,110 * 1.0765 (to account for employer-paid Social Security and Medicare taxes) or $9,243,106.[12] Alternatively, if half of the higher labor costs were passed on to consumers, then corporate income tax revenue would fall by $4,621,553.

[11] The probability of job loss was calculated in the same manner as in the prior section.
[12] The corporate income tax for Missouri is available at: http://dor.mo.gov/business/corporate/

E. Impact on State and Local Sales Tax Revenue

To calculate the impact on state and local sales tax revenue the following approach was undertaken.[13] First, the total increase in worker earnings, adjusted for employment reductions, was calculated using the 2010-2011 ORG CPS. This figure was $152,246,540. Second, the increase in Missouri taxable sales was calculated as 25% of the earnings increase or $38,061,635. Third, the increase in sales tax revenue was calculated by multiplying the taxable sales change times the average state and local rate of 7.67% or $2,919,327.[14]

The higher minimum wage may decrease sales tax revenue to the extent that it reduces business profits, which will lower spending by business owners.

VI. Summary and Conclusions

I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

[13] The same general approach is used in the State Auditor's fiscal notes for the initiatives.
[14] The average rate comes from http://taxfoundation.org/news/show/27023.html

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

Presented, "Aging at Work: Employment Determination, Firm Strategies, and Public Policy in the United States," at the Western Economic Association meetings, July 1994.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Western Economic Association meetings, July 1992.

Presented "Plant Size and the Decline of Unionism," at the Southern Economic Association meetings, 1989, with William Even.

Panel Discussant, Southern Economic Association meetings, November 1989.

Presented "The Labor Force Participation and Earnings Profiles of Married Female Immigrants," at the Southern Economic Association meetings, November 1988.

Presented "Pensions, Screening, and the Gender Wage Gap," at the Southern Economic Association meetings, November 1988.

Session Chair and Panel Discussant at the Southern Economic Association meetings, November 1988.

Participation in Invited Seminars, Conferences, and other Presentations

Presented, "Teaching Macroeconomics During Troubled Times," at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2012.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Pennsylvania State University, April 2010.

Presented, "The Parallels Between the Japanese Economic Crisis of the 1990s and the US Today" at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2010.

Chair "Minimum Wage & EITC" Session at Society of Labor Economists meetings, May 2009.

Presented "Participant Direction in Defined Contribution Plans," at Lehigh University, April 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Association of Private Enterprise Education meetings, April 2009.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Trinity University, October 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Georgia State University, April 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Association of Private Enterprise Education meetings, April 2008.
Presented, "Improving Pension Coverage at Small Firms," at Hudson Institute, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Society of Labor Economics meetings, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Association of Private Enterprise Education meetings, April 2006.

Presented, "Participant Direction in Defined Contribution Plans," at University of Wisconsin-Milwaukee, April 2006.

Invited Panel Participant for Pepper Foundation and Center Symposium on pension reform, Washington, DC, February 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at West Virginia University, April 2005.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at the University of Kentucky, November 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the Federal Reserve Bank of Atlanta, April 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the University of Oklahoma, February 2004.

Presented, "Tracking Union and Nonunion Wages in the U.S.: Can the Evidence be Reconciled?" at the Middlebury Annual Conference on Economic Issues, April 2002.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Miami University Center for Pension and Retirement Research Conference, June 2001.

Presented, "Benefits and Worker Productivity," Benefits for the Workplace of Tomorrow Conference, Wharton School, University of Pennsylvania, May 2001.

Participant, Innovations in Managing the Financial Risks of Retirement Conference, Wharton School, University of Pennsylvania, May 2000.

Presented "Using Hi-Tech in Large Lectures," at Association of Private Enterprise Education meetings, April 2000.

Presented "Employee Participation in 401(k) Plans," at University of Wisconsin-Milwaukee, October 1999.

Presented "Gender, Race, and Ethnicity in the Labor Market," as part of the Smith Chair course in Labor Economics at Brigham Young University, September 1999.

Presented, "The Decline in Pension Coverage Among Less Educated Workers," at the Florida State University Economics Department Seminar Series, 1996.

Presented, "Children's Effects on Women's Labor Market Attachment and Earnings" at the Conference on the Changes in Working Time in Canada and the United States, Canadian Employment Research Forum, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Ohio State University Economics Department Seminar Series, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Florida State University Economics Department Seminar Series, 1995.

Presented, "Employer Size and Labor Turnover: The Role of Pensions," at Syracuse University, 1995.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" while visiting scholar at the Federal Reserve Bank of Cleveland, 1995.

Presented, "Trends in Individual and Household Pension Coverage," at the Miami University Center for Pension and Retirement Research Conference, 1994.

Presented, "Racial Composition, Quality Sorting, and the Black-White Wage Gap" at the University of Wisconsin, Institute for Research on Poverty, Small Grants Workshop, 1993, with Barry Hirsch.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Florida State University Economics Department Seminar Series, 1992.

Participant at National Bureau of Economic Research (NBER) Labor Studies meetings of the Summer Institute, 1992.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Miami University Conference on Current Pension Policy Issues, 1992.

Organizer and participant at conference on "Contemporary Issues in Pension Economics," hosted by the Center for Pension and Retirement Research, Miami University, 1990.

Presented "The Effect of International Competition on Union and Nonunion Wages," at the University of Cincinnati Seminar Series, 1987.

Fiscal Note Summary

State and local governments estimate no direct costs or savings from the proposal, but operating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $13.1 million decrease to a $278 million increase depending on business decisions.

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Richard Von Glahn regarding a proposed statutory amendment to Chapter 290, Version 5 (2018-200)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Richard Von Glahn on April 3, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri:

Section 290.502 of the Revised Statutes of Missouri is amended and a new section to be known as section 290.529 is enacted to read as follows:

290.502. 1. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, effective January 1, 2007, every employer shall pay to each employee wages at the rate of $6.50 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher.

2. The minimum wage shall be increased or decreased on January 1, 2008, and on January 1 of successive years, by the increase or decrease in the cost of living. On September 30, 2007, and on each September 30 of each successive year, the director shall measure the increase or decrease in the cost of living by the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) or successor index as published by the U.S. Department of Labor or its successor agency, with the amount of the minimum wage increase or decrease rounded to the nearest five cents.

3. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, and notwithstanding subsection (1) of this section, effective January 1, 2019, every employer shall pay to each employee wages at the rate of not less than $9.00 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher. Thereafter, the minimum wage established by this subsection shall be increased each year by $1.00 per hour, effective January 1 of each of the next three years, until it reaches $12.00 per hour, effective January 1, 2022. Thereafter, the minimum wage established by this subsection shall be increased or decreased on January 1, 2023, and on January 1 of successive years, per the method set forth in subsection (2) of this section. If at any time the federal minimum wage rate is above or is thereafter increased above the minimum wage then in effect under this subsection, the minimum wage required by this subsection shall continue to be increased pursuant to this subsection (3), but the higher federal rate shall immediately become the minimum wage required by this subsection and shall be increased or decreased per the method set forth in subsection (2) for so long as it remains higher than the state minimum wage required and increased pursuant to this subsection.

4. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (3) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsections (1) and (2) of this section shall continue to be subject to those subsections.

290.529. Except in the circumstances set forth in section 290.523, all the provisions of sections 290.500 to 290.530 are severable. If any provision, including any section, subsection, subdivision, paragraph, sentence, or clause, of sections 290.500 to 290.530, or the application thereof to any person or circumstance, is found by a court of competent jurisdiction to be invalid, unconstitutional, or unconstitutionally enacted, such decision shall not affect other provisions or applications of sections 290.500 to 290.530 that can be given effect without the invalid, unconstitutional, or unconstitutionally enacted provision or application.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-200)

Subject

Initiative petition from Richard Von Glahn regarding a proposed amendment to Chapter 290 of the Revised Statutes of Missouri. (Received April 4, 2017)

Date

April 24, 2017

Description

This proposal would amend Chapter 290 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis,** the **St. Louis County Board of Elections,** the **Board of Election**

Commissioners City of St. Louis, the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners**.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided information as proponents of the proposal to the State Auditor's office.

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations. They do not expect that the enactment of this proposal would result in any other increased costs to their office.

Officials from the **Department of Agriculture** indicated there is no fiscal impact to their department for this initiative petition.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department since public employers are exempt from the new provisions proposed.

Officials from the **Department of Health and Senior Services** indicated this proposal would have no direct fiscal impact on their department since government employees are exempt from its provisions. However, employees of certain entities that receive funding through the department's budget would be impacted, such as Medicaid Home and Community Based Services vendors/providers and Area Agencies on Aging.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department defers to the Office of Administration to determine the fiscal impact of this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department. Their department defers to the Office of Administration for a state impact.

Officials from the **Department of Public Safety - Office of the Director** indicated they will defer to the response provided for this initiative petition by the Office of Administration - Human Resources.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration.

Officials from the **Governor's office** indicated there should be no added cost or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Officials from the **Office of Administration** indicated the proposal amends Sections 290.502 and adds Section 290.529, RSMo.

Section 290.502, RSMo, increases the minimum wage to $9.00 per hour, beginning January 1, 2019 and by another $1.00 per hour each year until it reaches $12.00 per hour beginning January 1, 2022. Thereafter, the minimum wage will be adjusted annually based on the increase/decrease in the cost of living.

The proposal exempts public employers from the requirements; therefore, there would be no cost to the State of Missouri.

Because no tax rates are affected, there is no direct impact on general and total state revenues. However, these proposals may have several indirect affects, which could impact revenue collections by an unknown amount, including but not limited to:

- Increased wages for certain employees. According to the US BLS, in 2015, Missouri had 57,000 hourly employees earning wages at or below the federal minimum wage;[1]
- Increased consumption by those employees;
- Lower overall employment (if employers choose to hold costs steady);

[1] http://www.bls.gov/opub/reports/minimum-wage/2015/home.htm

- Lower business investment (if employers' payrolls increase);
- Increased prices as firms pass–through labor costs.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated they do not predict an immediate fiscal impact upon their office if Missouri's minimum wage rate were increased to $12.00 per hour. However, the potential future impact of applying cost of living increases and/or increases in the federal minimum wage to a Missouri minimum wage of $12.00 per hour, as called for elsewhere in Section 290.502, RSMo., is unknown.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this petition may have a small negative fiscal impact on their city as a result of the increased hourly minimum wage being higher than the hourly rate paid some city employees.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they are not able to estimate any significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact since they are excluded under the public employer definition in section 4.

Officials from the **Missouri State University** indicated no fiscal impact.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated the wording is unclear as to whether Colleges/Universities are included in this petition. In assuming they are included, they calculate the following significant fiscal impact to their university. The proposal will have a detrimental impact on the operations of the university. Beginning in 2019 with a minimum wage increase of $9.00 and continuing with $1.00 increases through 2022 their payroll expenditures will increase steadily and conclude in 2022 with a payroll budget increase exceeding $2,000,000.00. This negative impact on the university's budget would be detrimental.

Officials from the **Kansas City Board of Election Commissioners** indicated no fiscal effect on their operations.

Officials from the **Platte County Board of Elections** indicated no fiscal impact.

Officials from the **Jackson County Election Board** indicated this petition does not have a fiscal impact on their office.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided the following information as proponents of this initiative petition.

Version 33	2018 - 199	$13 by 2023 (Start at $9; $1/year)	Yes	Yes	60%	Yes

This letter is from Lara Granich and Missouri Jobs with Justice Voter Action, proponents of the above-referenced Minimum Wage Initiative Petitions. Pursuant to RSMo. Section 116.175, we write to submit the following fiscal impact information to assist your office in its analysis of the fiscal impact of the above-mentioned seven proposed Minimum Wage Initiative Petitions.

Our analysis estimates the impact of the proposed Minimum Wage Initiative Petitions on state and local sales and personal income tax revenue in Missouri. We follow the process that has been used in the past to estimate the impact of minimum initiative petitions on state and local sales and personal income tax revenue, with some refinements. We also address certain claims that have been made by opponents of similar initiative petitions in the past.

As these petitions exclude public workers from the proposed minimum wage increases, we do not include in our analysis an estimate of the impact on state and local payroll costs of the proposed Minimum Wage Initiative Petitions.

I. Estimate of Number of Workers Affected Statewide and the Impact on Their Wages

Table 1. Summary of the Number of Affected Workers and Aggregate Wage Increases for Missouri in the Final Year of Minimum Wage Implementation.

Proposal	Year of Peak Minimum Wage (MW)	Proposed Peak MW	Tipped MW in Peak MW Year	Workers Affected by MW increase	Aggregate Annual Wage Increase in Nominal Dollars
13,14,15[a]	2023	$ 12.00	$ 6.00	835,350	$4,358,798,129
16,17,18[a]	2024	$ 12.00	$ 6.00	819,652	$4,209,438,048
19,20,21[a]	2025	$ 13.00	$ 6.50	900,788	$5,309,336,662
22,23,24[a]	2022	$ 11.00	$ 5.50	738,515	$3,347,138,756
25	2021	$ 11.00	$ 5.50	761,164	$3,469,534,559
26	2022	$ 12.00	$ 6.00	852,284	$4,510,285,824
27	2023	$ 13.00	$ 6.50	949,801	$5,667,065,534
28	2024	$ 12.00	$ 9.60	832,328	$4,288,614,460
29	2025	$ 13.00	$ 7.80	905,942	$5,332,471,496
30	2022	$ 12.00	$ 8.40	864,090	$4,558,317,729
31	2022	$ 12.00	$ 6.84	855,887	$4,523,341,931

32	2023	$ 13.00	$ 9.75	948,421	$5,745,051,956
33	2023	$ 13.00	$ 7.54	942,566	$5,685,951,766

Notes: Author's Analysis of American Community Survey (ACS) Data from 2014.
(a) Since these proposals only vary on non-economic factors, their economic and fiscal impacts are treated as equal for the purposes of this report.

Across the proposals analyzed, the total aggregate wage increase for workers in Missouri ranges from a low of $3.347 billion (Proposals 22-24) to a high of $5.745 billion under Proposal 32. While some proposals have the same final impact numbers, they have different impacts in the initial years (not listed) based on the relative pace of increases in earlier years. A full, year-by-year impact analysis is presented in Appendix Tables A1 through A13 below.

The wage impact of an increase in the minimum wage for the state of Missouri is calculated using the following procedure. The American Community Survey (ACS) Public Use Micro Sample for the most recent year available (2014) for the state of Missouri was downloaded from the US Census Bureau. The American Community Survey was chosen over the Current Population survey because the ACS has a significantly larger sample. We followed the method of Perry, Thomason, and Bernhardt (2016) for calculating an hourly wage rate from the ACS based on observed total annual wage income, typical hours worked each week and weeks worked per year. Since ACS income figures are clustered around whole-numbers, we smoothed the wage distribution by randomly adding or subtracting $0.25 from each wage figure.

Wage adjustments were made only for those individuals earning less than the proposed minimum wage, or proposed tipped minimum wage. We did not make additional adjustments for the "ripple effect" of minimum wage increases on workers earning slightly above the new threshold. Recent evidence suggests that workers earning up to 15 percent above of the minimum wage also receive small increases in response to a minimum wage increase. (See Wicks-Lim (2006) and Dube, Giuliano and Leonard (2015).) Thus, the estimated impacts listed above are likely to be smaller than the actual impact of increasing the minimum wage to the proposed level.

The proposed minimum wage increases exclude public employees. However, it was not practicable to exclude public employees from these calculations because the ACS does not have a published variable that allows for identification of public employees. Nonetheless, this inclusion of public employees should have only a minimal impact on our results, since their numbers are small and most already earn more than the proposed minimum wage increases.[1]

All wages from the 2014 survey were adjusted upward to account for inflation between the time of the survey and the time of measurement of the impact. Actual rates of inflation were used to adjust wages up to 2016. For all subsequent years between 2017 and 2028, baseline wages were adjusted using the projected annual average rate of change in the Consumer Price Index for Urban Workers (CPI-U) for the Midwest region. The 2015 and 2016 Missouri Minimum wage of $7.65 was adjusted by the same factor prior to measuring the impact of a change to the proposed minimum wage in 2019.

After these adjustments, the resulting hourly wage of all employees was compared to the proposed minimum wage. A total of twenty-one proposals were analyzed. For each proposal, we constructed a baseline wage scenario that used only basic wage changes from expected inflation rates to predict each ACS respondent's hourly wage rate in each year

[1] For Missouri's state employees, this can be validated by viewing the earnings of all state employees at: http://mapyourtaxes.mo.gov/MAP/Employees/. In larger counties and cities most all public employees already earn more than the highest proposed minimum wage. Smaller counties and towns may have some public employees who earn less than the highest proposed minimum.

between 2019 and 2028. We then constructed a counterfactual, or "proposed" wage distribution for each worker under all twenty-one minimum wage proposed scenarios. Since the minimum wage proposals offer nine different paths for raising the minimum wage for all non-tipped private sector workers, and different wage paths for tipped workers, we create separate minimum wage changes for tipped and non-tipped workers. Specifically, we used information on a worker's occupation and observed wage levels to separately identify tipped workers and assign them the proposed tipped minimum wage in each year, rather than the higher non-tipped minimum wage.[2]

If the proposed minimum wage was less than the inflation-adjusted hourly earnings of an employee, then no impact was calculated. If the proposed minimum wage was more than the hourly earnings for an employee, then the difference between the inflation-adjusted hourly earnings (i.e. baseline) and the proposed minimum wage was calculated. That difference was multiplied by the number of hours the employee worked in the year to calculate the annual impact for that employee. The result was then multiplied by a weighing factor for that employee in the population. The total impact for the state of Missouri was then summed across all affected workers to generate a total estimated increase in wage income in the state.

We do not include an estimate of job losses due to minimum wage changes. Existing research is clear that past minimum wage increases have had no measurable effect on aggregate employment levels. Larger minimum wage increases, such as those in Los Angeles, Seattle, and other jurisdictions, have not yet been studied to detect a clear disemployment effect. While it is possible that there may be some employment losses due to automation or other factors, this potential negative effect is likely offset by the positive potential job growth stemming from multiplier effects of the spending of minimum wage workers who receive substantial raises. There is substantial research to indicate that increases in the minimum wage have multiplier effects that increase the direct effects. For this reason and because of the likely increases in wages for individuals who earn above the proposed minimum wage rates, the impacts summarized in the table are considered conservative estimates relative to the total impact that would occur as a result of increasing the minimum wage to the proposed levels.

II. Economic Literature on the Impact of Minimum Wage Increases on Employment

Next, it is necessary to review the economic literature on the impact of minimum wage increases on employment. Opponents often claim that minimum wage increases may reduce employment in a state. If that is true, then those employment reductions would result in reductions in state income and sales tax revenue. However, review of the most credible recent empirical research on the minimum wage shows that increases in the minimum wage have had no discernible impact on employment. We thus conclude that it is not appropriate to project that the proposed initiative petitions would result in any detectable employment reduction, and resulting losses in income and sales tax revenue, or increases in unemployment-related costs to the state.

Economists have conducted hundreds of studies of the employment impact of the minimum wage. A recent meta-study – a formal statistical study of studies – by Doucouliagos and Stanley (2009) reviewed all the research conducted over the last three decades on the employment impact of minimum wage increases on teenagers in the United States. The researchers concluded that the minimum wage has little or no discernible effect on the employment prospects of low-wage workers. Their study followed a rigorous, peer-reviewed procedure and has the advantage of using a set of predetermined, objective criteria for weighing the validity of statistical findings across studies with different results.

[2] We defined tipped workers as those employed in occupations that typically receive a large share of income as tips. These occupations were 'Bartenders' (4040), 'Waiters and Waitresses', 'Food Servers, Non-restaurant' and 'Miscellaneous food preparation and serving related workers including dining room and cafeteria attendants and bartender helpers'.

(Source: Doucouliagos, Hristos and T. D. Stanley. 2009. "Publication Selection Bias in Minimum-Wage Research? A Meta-Regression Analysis." British Journal of Industrial Relations,vol. 47, no. 2, pp. 406-428.)

Recent theoretical and empirical research emphasizes several explanations for the consistently negligible employment impacts of moderate increases in the minimum wage. First, relative to total wage costs, minimum-wage increases are small. Second, employers and workers appear to respond to minimum-wage increases in many ways that reduce the direct cost to employers and substantially reduce or eliminate the need to cut employment.

Probably the most important economic response to a higher minimum wage is a reduction in turnover. At higher wages, employers fill vacancies faster and retain employees longer, boosting total employment and average productivity per worker while reducing direct and indirect training costs. Dube, Lester, and Reich (2012), for example, examined the effect of the minimum wage on labor turnover among teens and restaurant workers. They find "...striking evidence that separations, new hires, and turnover rates for teens and restaurant workers fall substantially following a minimum wage increase..." (p. 2). Their findings, using nationally representative data, are consistent with local case studies of the minimum wage and related "living wage" laws, including Dube, Naidu, and Reich's (2007) analysis of the San Francisco city-wide minimum wage; Fairris's (2005) study of local government contractors in Los Angeles; Howes (2005) on homecare workers in California; and Reich, Hall, and Jacobs (2005) on workers at the San Francisco airport.

"Living Wage Policies at the San Francisco Airport: Impacts on Workers and Businesses." *Industrial Relations*, vol. 44, no. 1, pp. 106-138.)

Employers also appear to respond to increases in the minimum wage by taking measures to boost productivity. Hirsch, Kaufman, and Zelenska's (2011) study of the impact of the federal minimum wage increase on 81 fast-food restaurants in Georgia and Alabama, for example, asked fast-food managers about the scope for efficiency improvements in response to the minimum-wage rise. About 90 percent of managers indicated that they planned to respond to the minimum wage increase with increased performance standards such as "requiring a better attendance and on-time record, faster and more proficient performance of job duties, taking on additional tasks, and faster termination of poor performers." (p. 27) Roughly the same share of managers said that they sought to "boost morale" by presenting the minimum wage increase as a "challenge to the store" and using this as a way "to energize employees to improve productivity." (pp. 28-29) Based on their interviews with store managers, the researchers concluded that a minimum wage increase may function as a "catalyst or shock that forces managers to step out of the daily routine and think about where cost savings can occur." (p. 29) (Source: Hirsch, Barry T., Bruce Kaufman, and Tetyana Zelenska, "Minimum Wage Channels of Adjustment." IZA Discussion Paper No. 6132. Germany: Institute for the Study of Labor. http://www2.gsu.edu/~ecobth/IZA_HKZ_MinWageCoA_dp6132.pdf)

A higher minimum wage may also motivate workers to work harder, independently of any actions by employers to increase productivity. According to "efficiency wage" theory, wages above the competitive-market rate may elicit greater work effort for several reasons. As Carl Shapiro and Joseph Stiglitz (1984) have argued, higher pay increases the cost to workers of losing their job, potentially inducing greater effort from workers in order to reduce their chances of

being fired. George Akerlof (1982), arguing from a more sociological point of view, has suggested that workers may see higher wages as a gift from employers, leading workers to reciprocate by working harder. (Sources: Shapiro, Carl and Joseph E. Stiglitz. 1984. "Equilibrium unemployment as a worker discipline device." *American Economic Review*, vol. 74, no. 3, pp. 433-444; Akerlof, George A. 1982. "Labor contracts as partial gift exchange." *Quarterly Journal of Economics*, vol. 97, no. 4, pp. 543-569.)

We therefore conclude that the proposed increase in the Missouri minimum wage would have no discernible impact on the employment levels of low-wage workers. Accordingly, we do not factor in reductions in employment, or any resulting decrease in sales tax or income tax. We also do not project any increased unemployment insurance costs – both because we do not project any resulting job losses, and, additionally, because unemployment insurance costs are paid for by employer premiums, and so are ultimately not a cost to the state.

For similar reasons, we do not believe that the proposed increase will have any significant adverse economic impact on small businesses or, by extension, on corporate income tax revenue. In fact, many small businesses already pay little if any corporate income tax.

III. State and Local Sales and Personal Income Tax Revenue Impact of Raising the Minimum Wage

Based on the wage impact figures calculated above, and the understanding that the minimum wage increases would be unlikely to result in offsetting job losses, we next calculate the impact of the projected wage increases on state and local sales and personal income tax revenue in Missouri. We project only the direct impact of the various minimum wage increase scenarios on such tax revenue. We do not attempt to project the additional impact through a GDP multiplier effect, or the potentially higher sales taxes generated if employers offset wage increases with higher prices (which would be taxable).

Personal Income Tax Revenue. In order to determine the projected increase in personal income tax revenues that would result directly from the increased wages, we had to develop assumptions about the effective income tax rates of the affected workers. We made the following assumptions with respect to the effective tax rate:

1. That 25% of affected workers can be claimed as a dependent on another party's Missouri income tax return and, as a result, would pay an effective tax rate of 6.0% on the increase in income;
2. That 50% of the affected workers would file as single taxpayers, would claim one deduction of $2,100, and would be entitled to a standard deduction of $5,800. This would result in an effective tax rate of 2.47%;
3. The remaining 25% would, we assumed, pay no additional Missouri income tax.

In light of these assumptions, the increased Missouri income tax revenue for each petition version can be calculated as follows: (total wage increase * 25% * 6.0%) + (total wage increase * 50% * 2.47%) + (total wage increase *25% * 0%).

Sales Tax Revenue. The state of Missouri imposes a 4.225% state sales tax on those items that are not exempt from the sales tax base. In addition, the average local sales tax rate is 2.95%. As a result, the average Missouri net sales tax rate is 7.175%. To estimate the share of income that is spent on goods and services that are subject to sales taxes, we used data from the 2015 Consumer Expenditure Survey (CES) for the US to estimate the share of income spent on categories that are subject to sales taxes. The CES summary tables list average spending per consumer across 20 different

categories (e.g. housing, transportation, food away from home) and we categorized each spending item as taxable or non-taxable and then calculated the share of spending that we taxable.[3] The resulting rate was 30.3 percent.

Based upon the above assumptions, and the total wage increase calculations for each version of the petition, we estimate that the increase in state income tax revenue resulting from the increased wages would be as follows:

Table 2. Summary of the Impact of Minimum Wage Increases on State and Local Sales and Income Taxes in Year of Full Minimum Wage Final Implementation.

Proposal	State Sales Tax (4.225%)	Local Sales Tax Revenue (2.95%)	Total Sales Tax Revenue Increase	Personal Income Tax Revenue	Total Sales and Personal Income Tax Revenue Increase
13,14,15[a]	$55,814,587	$38,971,132	$94,785,719	$119,213,129	$213,998,848

Note: Author's Analysis of American Community Survey (ACS) data from 2014 and fiscal impact assumptions described above. All dollars are in nominal figures. (a) Since these proposals only vary on non-economic factors, their economic and fiscal impacts are treated as equal for the purposes of this report.

As described in Table 2 above, the fiscal impact of the proposed minimum wage increases varies based on the ultimate level of the minimum wage and the degree of tipped minimum wage phase out. The estimates of the total fiscal benefit range from $164 million to $282 million annually. Appendix tables A1 through A13 provide a year-by-year summary of the fiscal benefits.

[3] Specifically, the categories we assumed to be subject to state and local sales taxes are: food, household furnishings and equipment, vehicle purchases, gasoline and motor oil, entertainment, and all other expenditures. We assumed that 50 percent of the spending on the category "apparel and services" was taxable.

We hope that this information is useful to your office as your prepare your analyses of the petitions.

Respectfully submitted,

Lara Granich

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided the following information as an opponent of this initiative petition.

These corrections were subsequently provided to the submitted information

In the table on the bottom of page 7 and top of page 8, both averages for 2023 should be based on a 5 year phase-in. Accordingly, the figure on that table should state for 2023 ($12) Average Annual Unemployment Premiums Paid by State of $16,269,523.52.

The corresponding change on the table on page 12 would be to state, for 2023 ($12) Total Net Loss to State Government from Taxes and Unemployment Insurance of ($19,137,851.76).

Re: Initiative Petitions 2018-196 through 2018-216

Dear Mr. Halwes,

I write on behalf of Robert Bonney. Mr. Bonney is the Chief Executive Officer of the Missouri Restaurant Association. Please consider this letter and the accompanying studies as his fiscal impact statement as an opponent of Initiative Petitions 2018-196 through 2018-216 (the "Initiative Petitions"). If passed, any of these twenty-one initiatives would have a substantial negative impact on state and local governments, as well as Missouri small businesses. Those effects are both direct (as noted in Section 1) and secondary (as noted in Sections 2 through 5). The direct effects stem from higher labor and contracting costs that the state and its political subdivisions will incur, despite the Initiatives' effort to exclude government workers from the mandate.

The indirect effects will present a debate this Office has seen before. The proponents of the Initiative Petitions will once again rely on data sourced from political activist groups who claim increases in the minimum wage only serve to create new taxable income. The reality is that such groups approach this issue with political bias. Their analysis is one-sided because it completely ignores the fact that a wage increase does not "create" income from thin air; instead, it is an economic transfer from Missouri businesses to workers. Missouri businesses must pay the new wages "created" by the increases. Political activists' models fail to account, then, for two specific manifestations of the "debit" side of this transfer: reductions in employment, and the reduction in corporate income tax paid based upon business done in Missouri.

The failure to account for any employment effect at any proposed wage increase—even a drastic increase of the minimum wage to $13—is particularly puzzling, because Missouri's most populous areas border Illinois and Kansas. These states, respectively, have minimum wages of $8.25 and $7.25. Neither state adjusts the minimum wage for inflation. Likewise, the second effect—loss of corporate income tax revenues—is a mathematical certainty. Missouri businesses will be the source of the wage increase, which will lower their own taxable income. Assuming a one-to-one substitution of "created" wages for lost corporate income, the difference in the rates

at which these two types of income are taxed will result in a net decrease in state revenue. A dollar from increased wages is taxable by state government in Missouri at 6% or substantially less, whereas Missouri's corporate income tax rate is 6.25%.

On top of these two types of negative outcomes—lower employment and lower state tax revenues—there may be second-order effects to small businesses because they lack the access to capital to weather price fluctuations; they may not survive at all because they may not have the flexibility to simply cut employment, shifting their reliance to capital instead of labor resources, or suffering a decrease in production and revenue.

In short, much of the fiscal impact regarding the current crop of wage-related ballot measures is secondary: they cause transfers of wealth within (or out of) the state economy, and those transfers of wealth then create second-order effects for state and local governments via their collection of tax revenues and provision of welfare services for the unemployed or less-employed. Because these fiscal notes call for the Auditor operate in the area of secondary effects, it is critical that she treat both sides of the wealth transfer equally, and refrain from assessing only one half of the wage increase equation.

1. Direct Labor Cost Impact on State and Local Government Budgets

As noted to the State Auditor's Office previously by Dr. David Macpherson, a nationally prominent labor and economics expert, there are two ways to measure labor cost on state and local government budgets. First, one can use the information included in fiscal note responses from state and local government entities. It is important to note that these fiscal notes provide an incomplete and, therefore, too-low estimate of labor cost. Few state and local government entities respond to requests for a fiscal note response, and those that do respond often ignore important effects.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can be used to calculate increased labor cost to state and local government entities in Missouri. To combat this time-honored analysis, and in a blatant attempt to manipulate the fiscal note process, the Initiative Petitions provide that they will raise the minimum wage for private workers, but not for workers employed by state or local governmental entities. No conceivable justification exists for solely raising the minimum wage on private businesses. Whatever the disparity between the value of total compensation at a private business and at a government employer, that disparity does not approach the wage adjustments at issue here, ranging from an inflation adjusted wage increase of 51.16% (($13-$8.60)/$8.60) in Initiative Petitions 2018-198 through 2018-201 to a wage increase of 30.17% (($11-$8.45)/$8.45) in Initiative Petitions 2018-213 through 2018-215.

Moreover, it is unreasonable to assume that on a sustained basis public employers, as defined in the Initiative Petitions, would be able to maintain dramatically lower wage levels than private businesses. Public employers would lose staff employable at higher rates in the private market, imposing substantial costs on government productivity. Using the method traditionally employed by labor economists and followed by the Auditor's office, one can calculate the annual

wage costs to state and local governmental entities, based on the annual wage cost for each state and local government worker in the ORG CPS, as detailed on page 6 of Dr. Macpherson's 2012 report, attached hereto as **Exhibit A**. Even if the auditor finds that a specific estimate of costs is not determinable, the auditor should note that state and local government "operating costs could increase by an unknown annual amount that could be significant," through the form of higher wage costs and higher contracting costs.

The proponents of the Initiative Petitions may argue that the Auditor should abandon any state and local cost estimates altogether. The proponents will argue that provisions they have inserted in the statute would mean that state and local government entities will not have to pay higher wages to their employees. Setting aside unjustifiable discrimination against private employers (and "public employees"), the provision is of uncertain legal effect and constitutionality. A "public employer," defined in the initiatives as "the state or a political subdivision of the state" still incurs substantial costs for wages of individuals that are "private employees," rather than "public employees." Cleaning services, food service, and other essential services often rely on state contracts with outside vendors. Sometimes, a contract rate may vary depending on the cost of labor. Even if the contract rate is fixed, it must be re-bid periodically, and that bidding process would take into account the new minimum wage. Plainly, the initiative would impose higher costs for state and local governments in contracting with any private entity and its employees. As a matter of law, it would be insufficient and unfair for the Auditor's fiscal note or summary to simply assume that these costs to state and local governmental entities do not exist.

2. Cost of Unemployment Benefits

a) The effect of inflation on Missouri's minimum wage

CPS–ORG data show that between 2007 and 2015, median nominal wages for adult (25–59 years old) workers in the U.S. grew by 1.68 percent a year. However, Missouri's minimum wage is currently adjusted using "the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W)." Section 290.502, RSMo. Coincidentally (or perhaps not), the CPI-W, over the period from 2006 to 2016, also increased at an average rate of 1.68 percent a year.

Year	CPI-W	Observed inflation %
2006	199.2	
2007	203.7	0.022590361
2008	216.304	0.061875307
2009	210.526	-0.0267124

2010	213.898	0.016017024
2011	222.686	0.041085003
2012	225.568	0.01294199
2013	230.084	0.02002057
2014	234.525	0.019301646
2015	233.806	-0.00306577
2016	234.771	0.004127353

Using Missouri's current inflation-adjusted minimum wage rate and an assumed, constant 1.68 percent increase in the CPI-W, the minimum wage in Missouri will be as follows:

Year	Estimated Minimum Wage
2016	$7.65 (observed)
2017	$7.70 (observed)
2018	$7.85
2019	$8.00
2020	$8.15
2021	$8.30
2022	$8.45
2023	$8.60
2024	$8.75
2025	$8.90
2026	$9.05

b) Calculating job loss attributable to increased minimum wage

At least one outside economist, James Sherk, has already provided an estimate for job loss in Missouri based on a $15 minimum wage. Mr. Sherk calculated the effect of a $15 minimum wage implemented in 2021. Mr. Sherk's figures accounted for inflation by estimating the present value of $15.00 in 2021, rather than estimating an absolute figure for wage inflation in Missouri. Mr. Sherk calculated the present value of $15.00 in 2021 to be $13.57, per hour, based on wage inflation of 1.68 percent. Mr. Sherk evaluated the change from $7.65 per hour to $13.57 per hour (a 77.39% increase), exclusive of agricultural workers. Cumulatively, Mr. Sherk calculated this 77.39 percent increase in wages to reduce employment in the affected workforce by (0.7739*0.677) 52.39%.

Graves Garrett LLC

Mr. Sherk calculated that approximately 40.9% of Missouri's Wage and Salary Workers would be affected by such a $15 minimum wage. Mr. Sherk's calculations reveal that a $15 minimum wage in 2021 would be expected to reduce the number of full-time equivalent jobs in Missouri by approximately 218,000. Based on CPS–ORG data, these figures reveal an affected workforce of approximately 416,086 workers impacted by a $15 minimum wage increase in 2021.

However, in 2014, Dr. Macpherson found, using more conservative, national-level Congressional Budget Office data, that an increase to a $10.10 minimum wage, effective January 1, 2015, would eliminate about 15,700 jobs in Missouri. Dr. Macpherson analyzed the effect of a Missouri $10.10 minimum wage using a model suitable to a national analysis. This analysis predicted a loss of 15,700 Missouri jobs based on a wage increase from $7.50 in 2014 to $10.10 in 2015 (a 34.67% increase).

On the whole, the analysis by Mr. Sherk is more instructive here, since it is more recent, Missouri-specific, and anticipates larger wage changes contemplated by the Initiative Petitions. The most accurate way to determine the estimate of Workers Affected would be to analyze the CPS–ORG data. However, without such data readily available in the time constraints imposed by the fiscal note process, it is reasonable for estimation purposes to assume Mr. Sherk's figures are evenly distributed. Assuming that worker data follows an equal distribution, the Initiative Petitions would be expected to result in the following job losses:

Year of final prescribed wage increase	Wage without IP	Wage mandated by IP	Percentage increase	Percentage of affected workers who lose jobs (Percentage Increase x 0.677 Elasticity)	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by Initiative
2021	$8.30	$11.00	32.53%	22.02%	174,897	38,512
2022	$8.45	$11.00	30.18%	20.43%	162,262	33,150
2022	$8.45	$12.00	42.01%	28.44%	225,866	64,236
2023	$8.60	$12.00	39.53%	26.77%	212,532	56,895
2023	$8.60	$13.00	51.16%	34.64%	275,061	95,281
2024	$8.75	$12.00	37.14%	25.15%	199,683	50,220
2024	$8.75	$13.00	48.57%	32.88%	261,136	85,861
2025	$8.90	$13.00	46.07%	31.19%	247,695	77,256
2026	$9.05	$13.00	43.65%	29.55%	234,683	69,349

c) The best estimate for a price elasticity of demand for low-skilled labor is -0.677.

As noted by Mr. Sherk, starting wages of $15.00 per hour mean that full-time employee must create at least $38,700 a year in value for his or her employer (including wages, employer payroll taxes, and mandatory healthcare benefits). High minimum wages and mandatory benefit costs make it much harder for less-experienced and less-skilled workers to find jobs, particularly full-time work.

Recent labor economics scholarship has revealed that, accounting for publication bias, a state-specific elasticity of demand for less-skilled workers is, on average, approximately -0.677, though some estimates are even higher, around -1.0.[1] "[E]conomists have extensively studied how businesses respond to higher wages overall, not just minimum-wage increases. On average these studies find a 10 percent increase in labor costs causes firms to reduce employment of less-skilled workers by 6.8 percent in the long run."[2]

While these elasticity estimates are substantial in absolute terms, there is reason to believe that such estimates might still understate the impact of a Missouri state-specific effort to increase the minimum wage. This is so for several reasons. First, traditionally, labor economists view labor as a reasonably difficult input to substitute; however, Missouri businesses have readily available options. There are relatively few barriers to doing business in Missouri's border states, and businesses can easily relocate across a state line to take advantage of more favorable wage (and tax laws). Additionally, substantially raising the cost for Missouri labor, relative to labor sources in other states and other countries, is likely to force many manufacturing jobs in Missouri to disappear entirely. Automation is also a significant risk. The substitution of labor is becoming increasingly easy due to technology advancements and the "sharing" economy, where fewer individuals are "employees" covered by the minimum wage. Finally, a labor "price shock" may result in significant decreases in the demand for goods and services. People make behavioral changes to avoid higher costs, including eating out less often and generally decreasing consumption (or shifting their activities to consumption involving comparatively low amounts of labor) wherever possible.

[1] Sherk, James, "How $15-per-Hour Minimum Starting Wages Would Affect Each State," The Heritage Foundation, http://report.heritage.org/ib4601.

[2] "The coefficients on these estimates imply an elasticity of –0.677 for a study published in 2012 (the most recent year in their data) of long-run unconditional labor demand for low-skilled labor in the U.S., estimated using industry-level administrative panel data and a structural form model." "Estimates that do not account for publication bias tend to slow a long-run elasticity closer to –1.0. See, for example, George Borjas, Labor Economics, 6th ed. (Columbus, OH: McGraw-Hill, 2013), Chapter 4: 'The evidence also suggests that the estimates of the long-run labor demand elasticity cluster around –1, so the long-run labor demand curve is indeed more elastic than the short-run curve.' " Sherk, available at http://report.heritage.org/ib4601.

Graves Garrett LLC

d) Unemployment Benefit Costs

We derived an average unemployment payout by calculating the expected weekly unemployment benefit amount. Based on current data, the expected unemployment weekly benefit amount of a worker making $7.65 an hour, on a 40 hour workweek, is $159.12 per week, for 20 weeks.[3] The expected unemployment weekly benefit amount of a worker making $10.99 an hour is $228.59 per week. The expected unemployment weekly benefit amount of a worker making $11.99 an hour is $249.39 per week. The expected unemployment weekly benefit amount of a worker making $12.99 an hour is $270.19 per week. We assume that workers will seek unemployment insurance for the full twenty weeks authorized under Missouri law, because unemployment attributable to an increase in the minimum wage is structural. In this case, structural unemployment occurs because workers' job skills do not meet the established "price floor" of labor, rendering the worker's skills unmarketable. Assuming an even distribution of workers affected, the average unemployment benefit cost to the state for a worker is calculated as follows:

- For Initiative Petitions 2018-213 through 2018-216, [($159.12+$228.59)/2]*20 = $3,877.10
- For Initiative Petitions 2018-196, 2018-197, 2018-200, 2018-202, and 2018-204 through 209, [($159.12+$249.39)/2]*20 = $4,085.10
- For Initiative Petitions 2018-198, 2018-199, 2018-201, 2018-203, 2018-210 through 2018-212, [($159.12+$270.19)/2]*20 = $4,293.10

Consistent with Dr. Macpherson's 2012 report, it would be reasonable for the Auditor to assume that 35% of unemployed workers will receive unemployment benefits. Combining these numbers leads to the following estimates:

Year of final prescribed wage increase	Estimate of Missouri Workers Unemployed by Initiative	Estimated Unemployment Amount Per Worker	Estimated Total Unemployment Premiums Paid	Average Annual Unemployment Premiums Paid by State
2021 ($11)	38,512	3,877.10	$52,260,206.32	$17,420,068.77
2022 ($11)	33,150	3,877.10	$44,984,052.75	$11,246,013.19
2022 ($12)	64,236	4,085.10	$91,843,669.26	$22,960,917.32
2023 ($12)	56,895	4,085.10	$81,347,617.58	$20,336,904.39

[3] https://labor.mo.gov/DES/Claims/calculator. A 2015 law decreased the unemployment benefit period from 20 weeks to 13 weeks, but the Supreme Court of Missouri struck down the law in July 2016.

2023 ($13)	95,281	4,293.10	$143,167,801.39	$28,633,560.28
2024 ($12)	50,220	4,085.10	$71,803,802.70	$11,967,300.45
2024 ($13)	85,861	4,293.10	$129,013,450.69	$21,502,241.78
2025 ($13)	77,256	4,293.10	$116,083,706.76	$16,583,386.68
2026 ($13)	69,349	4,293.10	$104,202,767.17	$13,025,345.90

3. Impact on State Income Tax Revenue

The 2012 analysis prepared by Dr. Macpherson may also be used as a reference in calculating the effect of the initiative petitions on state income tax revenue. Here, again, it is reasonable to assume that our "affected workers" are evenly distributed, though precise CPS–ORG data would also provide a reliable estimate. Here, the increased income tax revenue is the additional income tax paid by workers whose wages increase. There is a loss of revenue, however, in the form of decreased income tax paid by workers whose wages decrease and businesses who absorb the increased cost of labor, rather than passing it along to customers.

For the purposes of these estimates, we assume that workers work 40 hours a week and 52 weeks per year:

Year of final prescribed wage increase	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by IP	Estimate of Missouri Workers with Increased Wages	Annual Increase in Wages Paid to Workers who get Wage Increase in Final Year	Annual Decrease in Wages Paid to Workers now Unemployed
2021 ($11)	174,897	38,512	136,385	$382,969,080.00	$108,141,696.00

2022 ($11)	162,262	33,150	129,112	$342,405,024.00	$87,913,800.00
2022 ($12)	225,866	64,236	161,630	$596,737,960.00	$237,159,312.00
2023 ($12)	212,532	56,895	155,637	$550,332,432.00	$201,180,720.00
2023 ($13)	275,061	95,281	179,780	$822,673,280.00	$436,005,856.00
2024 ($12)	199,683	50,220	149,463	$505,184,940.00	$169,743,600.00
2024 ($13)	261,136	85,861	175,275	$774,715,500.00	$379,505,620.00
2025 ($13)	247,695	77,256	170,439	$726,750,021.03	$329,419,584.00
2026 ($13)	234,683	69,349	165,334	$679,192,072.00	$284,885,692.00

These net wage increases will lead to corresponding increases in state income tax collections. Traditionally, it has been assumed that about 50% of affected workers will pay 6% income tax, while the other 50% of workers pay no state income tax. This assumption may be less accurate at the higher wage increases contemplated by the Initiative Petitions. Accordingly, figures are also displayed assuming that about 75% of affected workers will pay 6% income tax, while the other 25% of workers pay no state income tax.

Annual Net Increase in Wages Paid To Workers	Annual Income Tax Increase from Wage Increase (50% pay tax)	Annual Income Tax Increase from Wage Increase (75% pay tax)
$274,827,384.00	$8,244,821.52	$12,367,232.28
$254,491,224.00	$7,634,736.72	$11,452,105.08
$359,578,648.00	$10,787,359.44	$16,181,039.16
$349,151,712.00	$10,474,551.36	$15,711,827.04
$386,667,424.00	$11,600,022.72	$17,400,034.08
$335,441,340.00	$10,063,240.20	$15,094,860.30
$395,209,880.00	$11,856,296.40	$17,784,444.60
$397,330,437.03	$11,919,913.11	$17,879,869.67
$394,306,380.00	$11,829,191.40	$17,743,787.10

Graves Garrett LLC

Based on these figures, Missouri businesses must also decide whether to pass along any increase in wage costs (wages and mandatory payments).[4]

Year of final prescribed wage increase	Annual Cost to Business from Increased Wage	Annual Decreased Corporate Income Tax if cost is fully absorbed	Annual Decreased Corporate Income Tax if cost is 50% absorbed
2021 ($11)	$412,266,214.62	$25,766,638.41	$12,883,319.21
2022 ($11)	$368,599,008.34	$23,037,438.02	$11,518,719.01
2022 ($12)	$642,388,413.94	$40,149,275.87	$20,074,637.94
2023 ($12)	$592,432,863.05	$37,027,053.94	$18,513,526.97
2023 ($13)	$885,607,785.92	$55,350,486.62	$27,675,243.31
2024 ($12)	$543,831,587.91	$33,989,474.24	$16,994,737.12
2024 ($13)	$833,981,235.80	$52,123,827.23	$26,061,913.62
2025 ($13)	$782,346,397.64	$48,896,649.85	$24,448,324.93
2026 ($13)	$731,150,265.50	$45,696,891.59	$22,848,445.80

Assuming businesses absorb half of the cost of increased wages, and 75 percent of affected workers pay the new, higher taxes, the effect on state income tax collections is estimated to be:

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss
2021 ($11)	($516,086.93)
2022 ($11)	($66,613.93)
2022 ($12)	($3,893,598.78)
2023 ($12)	($2,801,699.93)
2023 ($13)	($10,275,209.23)
2024 ($12)	($1,899,876.82)
2024 ($13)	($8,277,469.02)
2025 ($13)	($6,568,455.26)
2026 ($13)	($5,104,658.70)

[4] A healthcare benefit cost estimate is not available based on the time limitations imposed by this fiscal note.

Graves Garrett LLC

4. Sales tax revenue gain or loss

Projecting any increase in sales tax revenue resulting from an increased minimum wage would require the auditor's office to conclude, based on data separate and apart from the sheer conjecture typically offered by political activist groups: (1) the net effect on consumer disposable income and (2) the percentage of a consumer's disposable income that is spent on goods subject to the sales tax, taking into consideration that the scope of Missouri's sales tax has been truncated by a voter-approved constitutional amendment from November 2016.

Typically, the Auditor's office multiplies the total increase in worker earnings (which should be adjusted for employment reductions) and multiplies the result by 25 percent, then multiplying that figure by the Missouri the population weighted combined average state and local sales tax in Missouri, 7.81%.[5] Based on this estimate, the population-weighted combined average local sales tax is 3.585%.

However, it would be deceptive to fail to account for sales tax losses from workers whose wages are eliminated or sales tax losses from reduced business profits (attributable to the higher wages paid), which will lower spending by business owners. The first figure is calculable by determining the total annual wages (adjusted for employment deductions) for all workers who lose jobs due to a minimum wage hike, multiplied by 25 percent. The second number is calculable by multiplying the total increase in worker earnings (multiplied by 1.0765 to account for Social Security and Medicare taxes) by approximately 15 percent.[6]

Year of final prescribed wage increase	Annual Net Increase in Wages Paid To Workers	New Wages Spent on Sales Tax Items	Annual Cost to Business from Increased Wage	Annual Business Income No Longer Included in Sales Tax Base (50% passed-through)
2021 ($11)	$274,827,384	$68,706,846	$412,266,214.62	($61,839,932)
2022 ($11)	$254,491,224	$63,622,806	$368,599,008.34	($55,289,851)
2022 ($12)	$359,578,648	$89,894,662	$642,388,413.94	($96,358,262)
2023 ($12)	$349,151,712	$87,287,928	$592,432,863.05	($88,864,929)

[5] http://taxfoundation.org/sites/taxfoundation.org/files/docs/LOST--2015.png.
[6] This estimate would also need to be adjusted to reflect certain employers' mandate under the Affordable Care Act to provide healthcare coverage and pay 60 percent of such coverage.

2023 ($13)	$386,667,424	$96,666,856	$885,607,785.92	($132,841,168)
2024 ($12)	$335,441,340	$83,860,335	$543,831,587.91	($81,574,738)
2024 ($13)	$395,209,880	$98,802,470	$833,981,235.75	($125,097,185)
2025 ($13)	$397,330,437	$99,332,609	$782,346,397.64	($117,351,960)
2026 ($13)	$394,306,380	$98,576,595	$731,150,265.51	($109,672,540)

Accordingly, the annual estimations of the effects on state and local revenue, and total state economic impact are as follows:

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss	Annual Net Effect on State Sales Tax	Total Annual Effect on State Tax Revenue	Total Net Loss to State Government from Taxes and Unemployment Insurance	Annual Net Effect on Local Sales Tax
2021 ($11)	($516,086.93)	$290,127.11	($225,959.82)	($17,646,028.59)	$246,178.86
2022 ($11)	($66,613.93)	$352,067.34	$285,453.41	($10,960,559.78)	$298,736.43
2022 ($12)	($3,893,598.78)	($273,087.10)	($4,166,685.88)	($27,127,603.19)	($231,720.06)
2023 ($12)	($2,801,699.93)	($66,628.31)	($2,868,328.24)	($23,205,232.64)	($56,535.50)
2023 ($13)	($10,275,209.23)	($1,528,364.68)	($11,803,573.91)	($40,437,134.18)	($1,296,849.08)
2024 ($12)	($1,899,876.82)	$96,566.47	($1,803,310.36)	($13,770,610.81)	$81,938.65
2024 ($13)	($8,277,469.02)	($1,110,951.72)	($9,388,420.74)	($30,890,662.52)	($942,665.55)
2025 ($13)	($6,136,139.31)	($761,317.55)	($6,897,456.87)	($23,480,843.55)	($645,993.71)
2026 ($13)	($5,104,658.70)	($468,803.67)	($5,573,462.37)	($18,598,808.26)	($397,789.62)

5. Damage to small business

Additionally, any proponent or opponent fiscal note submission is required, pursuant to Missouri law, to state the impact of the initiative on small businesses. According to analysis by the Employment Policies Institute, 40 percent of the minimum wage workforce is employed at businesses with fewer than 50 employees. [7] The impact on extra costs to small business may be more significant than even this 40% figure suggests. Small businesses are more easily shut down by input price increases than large businesses, which have greater access to capital to weather the

[7] https://www.epionline.org/oped/who-really-employs-minimum-wage-workers/

storm. Clearly, small businesses that do not shut down due to increases in the minimum wage will pay higher costs, estimated at about 40% of business' total increased costs, described above.

Conclusion

In conclusion, the State Auditor should attempt to quantify the increased cost to be borne by state and local government entities through increased contracting costs as a result of an increase to the minimum wage. This direct cost is outlined in Section 1.

Indirect costs are outlined in Sections 2 through 5, and show a net loss. Although such second-order effects more difficult to predict, a net loss is easily the most likely outcome. Significantly, this result is only obtainable if the Auditor reviews both the "credit" and "debit" sides of the transfer of wealth from businesses to workers. The Auditor should refrain from taking the proponents' likely invitation to consider and present only the "credit," side, and should attempt to provide a complete picture of all effects of a minimum wage increase, including the loss of revenue to state and local governments from individuals who lose employment. Only conveying (or quantifying) the potential for gain, without fairly conveying the likelihood of net loss, would be deceptive and unfair.

The State Auditor's previous 2018 fiscal notes are a good model. Each of the fiscal notes for the Initiative Petitions should follow the already-established format and state that:

> "[O]perating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $## million decrease to a $## million increase depending on business decisions."

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

ABOUT THE MISSOURI RESTAURANT ASSOCIATION

With origins dating back to 1916, the Missouri Restaurant Association (MRA) is a statewide trade association representing over 1,500 member establishments. The association's membership is diverse, and includes full service, fast casual, and quick service restaurants, cafeterias, hotels, schools, institutions, contract feeders, and ancillary foodservice providers such as theme parks. The association has been successful in securing support from virtually every segment of the foodservice and hospitality industry.

MRA includes seven chapters as extensions of the parent organization, each with its own Officers, Board of Directors, and limited budget. The association is governed by a Board of Directors comprised of five Officers, 33 Directors, and each President of the seven affiliated chapters.

MRA is dedicated to serving the needs of the foodservice and hospitality industry, enhancing and improving its growth and development, assisting and educating its members in operating more effectively, improving the political and social environment in which the industry conducts business, for the benefit of its members, patrons, employees, and the well-being of the community.

David A. Macpherson is the E.M. Stevens Professor of Economics at Trinity University. He received undergraduate and doctoral degrees in economics from Pennsylvania State University.

Dr. Macpherson has published over 60 articles in leading economics and real estate journals including Review of Economics and Statistics, Industrial and Labor Relations Review, Journal of Labor Economics, Journal of Human Resources, and Journal of Real Estate Economics and Finance. His research has been funded by a variety of entities including the National Science Foundation, Florida Legislature, and the National Association of Realtors. He is co-author of the undergraduate labor economics text, Contemporary Labor Economics, as well as the principles of economics text, Economics: Private and Public Choice. He is included in Who's Who in Economics, Fourth Edition, which includes the 1,200 most frequently cited economists.

THE IMPACT OF A $10.10 MINIMUM WAGE ON JOBS AND TAXPAYER COSTS IN MISSOURI

June 2014

Technical Appendix 7

EXECUTIVE SUMMARY

Missouri's minimum wage of $7.50 is linked to rise in most years with the inflation rate. But some state legislators and labor unions would like to raise that figure even higher. For instance, a recent labor union-organized bus tour in the state promoted a $10.10 minimum wage in St. Louis.

Proponents have enthusiastically pointed to the benefits of the $10.10 policy. But there's been far less discussion of the costs involved with a $10.10-an-hour minimum wage—both the cost on employment, and the cost to taxpayers.

In this study, labor economist David Macpherson of Trinity University uses Census Bureau data to estimate the impact on Missouri's labor market and budget from raising the minimum wage to $10.10 an hour. He also provides separate results for the St. Louis metropolitan area.

Dr. Macpherson's employment estimates follow the methodology used by the nonpartisan Congressional Budget Office in its report earlier this year estimating the impact of a $10.10 minimum wage nationwide, which in turn relied on 60 different empirical studies to formulate its estimates.

Statewide, he finds that over 15,000 jobs would be lost at the $10.10 wage level—with 9,300 of those jobs being held by women. In the St. Louis metropolitan area, approximately 4,800 jobs would be lost from a $10.10 minimum wage.

The cost to taxpayers would be significant: There are approximately 40,000 state and local employees whose wages would be affected by the $10.10 increase in Missouri, for a combined cost to taxpayers of $87 million annually.

Raising wages is an admirable goal, but the evidence suggests that accomplishing this goal with a blunt wage mandate could do more harm than good.

RESULTS

The minimum wage is one of the most hotly-debated topics in the political world. Some legislators claim that a higher base wage will stimulate the economy; others claim that it will reduce jobs when affected employers can't offset the higher costs through higher prices.

Economists, who have studied the issue since the late 1940s, tend to take a skeptical view of minimum wage increases. Since the early 1990s, for instance, roughly 85 percent of the most credible research on the minimum wage points to job loss for less-skilled groups. The nonpartisan Congressional Budget Office (CBO), in an evaluation of President Obama's proposed $10.10 minimum wage increase, reviewed 60 different studies and concluded that the policy would eliminate 500,000 jobs if enacted.

The estimates that follow, of the employment impact of a higher minimum wage on Missouri's labor market, were performed by Dr. David Macpherson of Trinity University. Dr. Macpherson followed closely the methodology used by the CBO in its 2014 report. Dr. Macpherson also estimates the taxpayer costs of a higher minimum wage, as many state and local public employees will see their earnings increase when the minimum wage rises.

Dr. Macpherson's methodology is presented in detail in a technical appendix.

Estimated Employment Effects of a $10.10 Minimum Wage in Missouri

Statewide, Dr. Macpherson finds that increasing the minimum wage to $10.10 would eliminate over 15,000 jobs—approximately 60 percent of which are jobs held by women. The bulk of the job losses would be concentrated among individuals with a high school degree or less, and among people who work in the retail or leisure & hospitality industries.

(Note: Totals have slight discrepancies due to rounding.)

City-Specific Minimum Wage Employment Impacts

The city of St. Louis has been the subject of a number of protests calling for a higher minimum wage. Dr. Macpherson analyzed the employment impact of a $10.10 minimum wage in the St. Louis metropolitan area, providing breakouts by gender and education where the data permits. He estimates that the wage hike would eliminate approximately 5,000 jobs—just over half of which would be jobs held by women.

RESULTS CONTINUED

Missouri Taxpayer Costs of a $10.10 Minimum Wage

Dr. Macpherson estimates that approximately forty thousand state & local public employees would be affected by a minimum wage increase to $10.10 an hour. These additional wage costs translate to new costs for state and local taxpayers. Following the methodology described in detail in the technical appendix, Dr. Macpherson estimates both the straight wage cost of a $10.10 minimum wage, as well as the total compensation cost with Social Security, Medicare, workers compensation, and unemployment insurance included. Statewide, taxpayers would shoulder an additional $87 million in costs if the base wage was increased to $10.10 an hour and public employees were covered by the new wage.

Missouri Taxpayer Costs of a $10.10 Minimum Wage	
# of State & Local Workers	304,588
# Affected By $10.10 MW	40,103
Annual Wage Cost	$79,629,374
Annual Compensation Cost	$87,004,355

Note: Annual compensation costs include the cost of worker's compensation, FICA, and unemployment insurance benefits.

TECHNICAL APPENDIX

Estimating Employment Loss and the Cost to State and Local Government of an Increase in the Minimum Wage

Dr. David Macpherson
E.M. Stevens Professor of Economics
Trinity University

This paper describes how we estimate the employment loss and the cost to state and local governments of a proposed increase in the minimum wage effective on January 1, 2015.

Data and Sample

First, we use data from the Current Population Survey (CPS) Outgoing Rotation Groups (ORG) from January 2011 through December 2013. For each worker in the sample, we calculate their wage rate. We also adjust the wage rate to reflect a forecast of wages in 2015. This is done in two steps. First, based on legislation enacted as of April 2014, we estimate the minimum wage that would be in effect in January 2015 for each state and city that we consider. If a state or city has an indexed minimum wage, we increase the January 2014 state or city minimum wage by the Congressional Budget Office (CBO) inflation forecast for 2014 of 1.7%.

Since we use data from 2011 through 2013, we also follow the CBO approach for forecasting what the wage distribution would be in 2015. This is done in two steps. First, we adjust wages observed prior to 2013 to reflect 2013 minimum wage legislation. For example, if the minimum wage in a state was $7.25 in 2011 and grew to $8.00 by 2013, anyone who earned between $7.25 and $8.00 in 2011 would have their wage increased to $8.00. After wages are adjusted to 2013 levels, we assume that all wages grow by 2.9% in 2014. Using the resulting 2015 distribution of wages, we adjust for minimum wage legislation that would increase the minimum between 2013 and 2015. Anyone earning a wage between the 2013 and 2015 minimum wage is assigned a wage matching the 2015 minimum wage.

After generating the forecast 2015 distribution of wages reflecting wage growth and existing minimum wage legislation, we identify workers who would be affected by additional changes to the 2015 minimum wage as those with wages between the predicted minimum wage legislated for 2015 (or up to $.25 below it) and the proposed minimum.

To estimate the number of affected workers, we take two steps. First, for each state, we estimate the number of affected workers for 2013. Second, we adjust the weights in the 2011 and 2012 data so that the state-specific number of affected workers implied by the 2011 and 2012 data matches that for 2013. This adjustment is designed to correct for the changing economic climate as the economy recovers from the great recession and to generate estimates that are as close as possible to the most recent data (2013). After we adjust the 2011 and 2012 weights, we estimate the number of affected workers by summing their earnings weights and dividing the total by 36 (the number of months of data).

[1] Also, following CBO, anyone earning up to $.25 less than the 2011 minimum wage would have their wage increased by the amount that the minimum wage increased (i.e. a $7.00 wage would be increased to $7.75 in this example). This approach is used to adjust for the fact that many workers round their answers when asked about their wage.

TECHINCAL APPENDIX CONTINUED

Employment Loss

To estimate employment loss, for each affected worker we compute:

L = e *(Proposed Min Wage /Min Wage 2015 – 1)

where e is an assumed elasticity of employment with respect to changes in the minimum wage, Min Wage 2015 is the minimum wage currently legislated for 2015, and Proposed Min Wage is the minimum wage that is being proposed for 2015. Thus, for example, if a worker is projected to earn the federal minimum of $7.25 in 2015, the expected reduction in employment resulting from a $10.10 minimum wage in 2015 if e=.45 is .45*(10.10/7.25 – 1) = .18. That is, for every 100 workers currently earning the federal minimum, the expectation is that 18 would lose a job if the minimum wage elasticity is .45.

To estimate the aggregate employment loss in the economy, we use earnings weights to sum L across workers. We also follow the Congressional Budget Office (2014) and use an elasticity of 0.15 for non-teenagers and 0.45 for teenagers.

Cost to State and Local Government

We use the same data to estimate the cost to state and local government of a proposed minimum wage hike. We apply the same definition of affected workers described above and estimate the number of state and local government workers affected by a minimum wage hike. We do not, however, assume that there is any job loss for state and local workers as we do not have an appropriate elasticity estimate specific to state and local workers. To the extent that state or local governments reduce hours or employment in response tothe minimum wage hike, our estimate of the cost of the hike would be overstated.

To estimate the increase in annual payroll cost resulting from an increase in the minimum wage, we estimate the increase in annual cost for each worker as:

(Proposed Min Wage-Min Wage 2015)*weekly hours*52

We then multiply the increase in annual cost by the earnings weight for each worker and sum across workers. Since an increase in wages also requires increased employer contributions for Social Security, Medicare, workers' compensation and unemployment insurance, we apply an estimate of the payroll tax rate for these mandatory programs to calculate the additional cost for these programs.

For each state and city considered, we provide tables summarizing the number of affected workers, employment loss, and the distribution of employment loss by sex, education, race, age and industry. Given that we use three years of data, a rule of thumb for minimum sample size required to achieve a reasonably accurate estimate of the employment loss is to require at least 30,000 people be in the relevant category. For example, if there are fewer than 30,000 people projected to be in a particular industry category, the Bureau of Labor Statistics would not report the estimate due to a lack of reliability based on the variance of the estimate relative to its mean.

In addition to the estimate of employment loss, for each state or city considered, we estimate the number of state and local workers that would be affected by the minimum wage hike and the total annual cost to government in terms of wages and total compensation. As with the employment estimates, we advise caution in interpreting estimates that are based on fewer than 30,000 affected workers.

[3] Congressional Budget Office, "The Effects of a Minimum-Wage Increase on Employment and Family Income," February 2014.

[4] For workers paid by the hour the reported hourly wage was used. For workers who are not paid by the hour, we calculate the hourly wage by dividing usual weekly earnings by usual weekly hours. Overtime pay was calculated as time and one-half for hours above 40 hours for hourly workers.

[5] The assumed payroll tax for Medicare and Social Security is 7.65 percent. To estimate the payroll tax for workers' compensation and unemployment insurance, we use unpublished data from the 2010 Employer Cost of Employee Compensation database for state and local workers in the relevant region in 2010.

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

Prepared for

Victor Allred versus Robin Carnahan and Thomas Schweich
Circuit Court of Cole County, Missouri

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

I. Introduction

This report was undertaken at the request of counsel representing plaintiffs in the case of Victor Allred versus Robin Carnahan and Thomas Schweich. As part of the basis of the lawsuit, the plaintiffs allege that the fiscal note summaries for proposed statutory initiative petitions 2012-084 and 2012-085 are insufficient and unfair. I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will

range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

The report is organized as follows. My qualifications to prepare this report are contained in Section II. Section III describes the data and records I relied upon for this report. Section IV reviews the estimated fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085. A summary and my conclusions are provided in Section VI.

II. Qualifications

I am currently the E.M. Stevens Professor of Economics at Trinity University in San Antonio, Texas. Previously, I was employed by Florida State University as Director of the Pepper Institute on Aging and Public Policy and the Rod and Hope Brim Eminent Scholar in Economics. I have taught both undergraduate and graduate Econometrics (statistical analysis of economic data), and Labor Economics. I have published over 50 articles in peer-reviewed professional journals.

I am currently serving on the editorial board of the *Journal of Forensic Economics*, which is a peer-reviewed journal. I have also served as a reviewer or 'referee' for 24 peer-reviewed journals, including the *Journal of Human Resources, Journal of Labor Economics, Quarterly Journal of Economics,* and the *Review of Economics and Statistics*. Based upon these experiences, I am very familiar with the scholarly and professional research process and the concept of peer review.

I have prepared numerous analyses and reports that use statistical methods as applied to specific questions. I have been responsible for developing the techniques and approaches required for these analyses. I routinely use computers and statistical software packages to assist me in my analytical work. I have been qualified as an expert witness on statistical analysis of employment discrimination and economic damages in state courts in Florida and Georgia and Federal Courts, and I have given expert testimony. I have prepared analyses and offered testimony on behalf of both plaintiffs and defendants.

Details of my qualifications are reflected in my current resume and legal cases, attached as Appendix A to the report.

III. Data and Records

I reviewed the following materials in preparing this report.

- Plaintiff's Complaint
- Material cited in footnotes below.

IV. Fiscal Impact

A. Overview

The proposed statutory initiative petitions 2012-084 and 2012-085 contain many elements in common. Both initiatives would increase the Missouri minimum wage to $8.25 per hour, alter the exemption for retail and service firms, raise the cash wage of tipped workers from 50% to 60% of the minimum wage, and increase the statute of limitation from two to three year for underpayment claims.

The initiatives differ in their linkage to the federal minimum wage. Initiative petition 2012-084 requires that the state minimum wage be automatically increased to the

federal minimum wage if it is higher than the state minimum wage. Initiative petition 2012-085 does not have such a linkage. It only requires that workers be paid the higher of the state minimum wage or the federal minimum wage. The linkage to the federal minimum wage will cause the state minimum wage to be higher under initiative petition 2012-084 over time. This is because the state minimum wage, in contrast to the federal minimum wage, is adjusted for inflation as measured by the Consumer Price Index.

An increase in the minimum wage in Missouri will affect state and local government entities in two ways. First, it will directly increase the cost of labor to state and local government entities. This will occur due to the increase in wages of state and local government workers earning between the existing minimum wage of $7.25 and the new minimum wage of $8.25.[1] In addition, workers laid off due to the minimum wage increase can collect unemployment benefits. The state government will bear the cost of unemployment benefits of these workers for the first 20 weeks. Second, state and local government may gain increased revenue through higher income tax and sales taxes paid by workers affected by the minimum wage who remain employed. However, state and local government will suffer reduced tax revenue to the extent the higher wage cost lowers profits of businesses.

The following sections estimate the cost and revenue effects to state and local government entities of the proposed minimum wage increase.

[1] Information about the minimum wage in Missouri is available at http://www.labor.mo.gov/DLS/minimumwage/.

B. Direct Labor Cost Impact on State and Local Government Budgets

There are two possible ways to measure the direct labor cost on state and local government budgets. First, one can use the information included in the fiscal notes prepared by the State Auditor regarding the proposed initiatives. It is important to note that the fiscal notes provide an incomplete and thus too low estimate of the direct labor cost. The fiscal notes indicate that the Office of Administration's (OA) Division of Personnel reported that as of September 2011 there were 834 state workers who would be affected by an increase of the minimum wage to $8.25 and the "approximate annual cost" would be more than $540,000.

This OA estimate excludes seasonal workers such as State Fair employees, State Parks Employees, and tax season staff. The Division of Revenue noted its labor cost would rise by $40,000. The Division of Natural Resources stated they have over 500 workers who would be affected by the increase, but did not provide an estimate of the cost. The State Fair hired 745 workers that would be affected, but no cost estimate was provided.

Thus, the cost to state government, based on the fiscal notes, would be more than $580,000.

The fiscal notes also provide an incomplete and thus too low measure of the cost to local government and public educational institutions. Many cities and educational institutions did not respond to Office of Auditor's survey or provide an estimate of the cost of the higher minimum wage. The City of Columbia, City of Jefferson, City of

Joseph, Linn State Technical College, and Metropolitan Community College did provide such an estimate. The total cost to these five institutions is $772,182.

Based on the fiscal notes, the cost to state and local government entities of the increase in the minimum wage to $8.25 will be more than $1,352,182.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can also be used to calculate the cost of the increased labor cost to state and local government entities in Missouri. Using the data from January 2010 to December 2011 Outgoing Rotation Group (ORG) CPS, I calculated that 17,089 state and local government workers would be affected by the minimum wage increase. I defined affected workers as those individuals earning between $7.00 and $8.24 per hour. Though the minimum wage was $7.25 per hour during this period, I also included those workers reporting earnings of $7.00 to $7.24 since some individuals may round their wage rate. I calculated the annual wage cost for each state and local government worker (i) in the ORG CPS as:

$$Annual\ Wage\ Cost_i = (\$8.25 - current\ wage_i) * weekly\ hours_i * 52.$$[2]

The average annual wage cost increase was $870. I summed the cost over each worker (i) to obtain the total wage cost to state and local government entities in Missouri of $14,866,430.

The increased wage cost is not the only labor cost to state and local government entities of the minimum wage increase. Employers are required to pay 7.65% of their wage costs in Social Security and Medicare taxes. Thus, the total labor cost of the minimum wage increase will be 1.0765 times $14,866,430 or $16,003,712.

---

[2] I assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour.

C. Unemployment Benefit Impact

The higher minimum wage will cause firms to reduce their level of employment.[3] As a result, the number of unemployed workers will increase. Thus, another important fiscal cost of the minimum wage increase is the cost of the unemployment insurance benefits for the workers laid off as a result of the minimum wage increase.

To calculate the cost to the unemployment benefits program, I first calculated the number of workers laid off. To do so, I calculated a probability of job loss for each affected Missouri worker (i) in the January 2010 to December 2011 ORG CPS:

$$Probability\ Job\ Loss_{\ i} = \frac{(\$8.25 - Current\ Wage_i)}{Current\ Wage_i} * elasticity_i.$$

I used the preferred employment elasticity (i.e., sensitivity of employment to wage changes) contained in Sabia and Burkhauser (2010), which was -0.6 for individuals aged 16 to 29 without a high school degree and -0.2 for all other individuals. The sole exception was for state and local government workers, where I assumed an elasticity of zero.[4] The sum across all affected workers yielded an estimated job loss of 5,745 jobs.

The next step was to calculate the weekly benefit for the average unemployed worker. Using the benefits calculator on the Missouri unemployment benefits web site and the wage income of average private-sector affected worker ($10,937), yields an average weekly benefit of $109.36[5]. The state of Missouri pays the first 20 weeks of benefits.[6] Thus, each eligible unemployed worker could receive a total of $2,187.20 in

---

[3] For a survey of research regarding the effect of the minimum wage on employment, see David Neumark and William L. Wascher, *Minimum Wages* (Cambridge, MA: MIT Press, 2008).
[4] Joseph J. Sabia and Richard V. Burkhauser, "Minimum Wages and Poverty: Will a $9.50 Federal Minimum Wage Really Help the Working Poor?" *Southern Economic Journal* (January 2010): 592-623.
[5] http://www.labor.mo.gov/DES/Claims/calculator.asp
[6] See http://www.labor.mo.gov/DES/Claims/

benefits paid for by the state of Missouri. These jobs are permanently eliminated and so it is appropriate to calculate the full amount of benefits for each worker.

Unemployment insurance, however, does not cover all unemployed workers. For example, it does not cover people who leave a job voluntarily, people looking for their first job, and re-entrants who previously left the labor force voluntarily. Furthermore, some individuals don't apply for benefits even though they are eligible. I assume that 35% of the unemployed workers will receive unemployment benefits based on analysis by Wenger (2001).[7]

The last step is to calculate the total cost to the Missouri unemployment benefits program. This done by multiplying the number of jobs lost (5,745) times the average benefit amount ($2,187.20) times the percent of unemployed individuals collecting benefits (35%). This calculation yields a figure of $4,397,510. This cost would be borne only during the first year of the minimum wage increase. The inflation adjustments in the minimum wage will also yield costs to the unemployment insurance program, but it is not possible to estimate the amount.

D. Impact on State Income Tax Revenue

The state of Missouri will gain increased revenue through higher income tax taxes paid by workers affected by the minimum wage who remain employed. However, it will

[7] Jeffery Wenger. "Divided We Fall: Deserving Workers Slip through America's Patchwork Unemployment Insurance System." *Economic Policy Institute*, 2001. Sabia and Burkhauser (2010) make the same assumption in their calculation of the amount of unemployment benefits generated by a minimum wage increase.

suffer reduced corporate income tax revenue to the extent the higher wage cost lowers profits of businesses.

To calculate the impact on individual income tax revenue, I again used data from January 2010 to December 2011 ORG CPS. I defined affected workers as those Missouri individuals earning between $7.00 and $8.24 per hour.[8] I used the following formula to estimate the change in income tax revenue:

$$\Delta Tax\ Revenue_i = (Tax_After_i - Tax_Before_i) - Prob_Job_Loss_i * Tax_Before_i,$$

where Tax_After_i is the income tax paid by worker i after the minimum wage increase. Tax_Before_i is the income tax paid by worker i after the minimum wage increase, and $Prob_Job_Loss_i$ is the probability of job loss for worker i. The first term shows the change in individual income tax revenue assuming no job loss and the second term shows the loss in tax revenue due to the employment loss caused by the minimum wage increase.

The income tax calculations were based on two assumptions.[9] First, the 50% percent of affected workers who were under the age 25 who were assumed to be dependents on another person's tax return. As a result, it was assumed that the affected workers' earnings were taxable at the maximum Missouri income tax rate of 6% both and after the minimum wage increase.[10] Second, all persons age 25 and older were assumed to be paying little or no income tax after exemptions and deductions. Thus, about 50% of the earnings increase will be taxed at a rate of 6%.

---

[8] I again assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour. The annual earnings level was calculated as the worker's wage rate times usual weekly hours worked times 52.

[9] The same assumptions are used in the State Auditor's fiscal notes for the initiatives.

[10] This assumption will overstate the revenue increase as 20% of affected workers under the age 25 are living by themselves and some of these individuals will not be a dependent on another person's tax return.

The tax calculations reveal an increase in income tax revenue increase to the state. Assuming no workers were laid off by the minimum wage increase, income tax revenue would rise by $6,043,534. However, the state will lose $1,965,446 in income tax revenue due to the lost earnings of private-sector workers no longer employed due to the minimum wage hike.[11] Thus, the net increase in individual income tax revenue is $4,078,088.

Businesses have three options to respond to the higher labor costs of a higher minimum wage. They can reduce their profits, raise prices, or lay off workers. Based on the 2010-2011 ORG CPS data, the minimum wage increase will raise private-sector labor costs by $192,620,900 if employment levels are not reduced. However, labor costs will be lowered by $55,240,790 due to the reduction in employment. Thus, labor costs will, on net, rise by $137,380,110. These increased labor costs may be either passed on to consumers through higher prices or reduced profits or more likely some combination of higher prices and reduced profits. Assuming that businesses absorbed all of the higher costs through reduced profits, the corporate income tax revenue would fall by the Missouri corporate income tax of 6.25% times the rise in labor costs of $137,380,110 * 1.0765 (to account for employer-paid Social Security and Medicare taxes) or $9,243,106.[12] Alternatively, if half of the higher labor costs were passed on to consumers, then corporate income tax revenue would fall by $4,621,553.

[11] The probability of job loss was calculated in the same manner as in the prior section.
[12] The corporate income tax for Missouri is available at: http://dor.mo.gov/business/corporate/

E. Impact on State and Local Sales Tax Revenue

To calculate the impact on state and local sales tax revenue the following approach was undertaken.[13] First, the total increase in worker earnings, adjusted for employment reductions, was calculated using the 2010-2011 ORG CPS. This figure was $152,246,540. Second, the increase in Missouri taxable sales was calculated as 25% of the earnings increase or $38,061,635. Third, the increase in sales tax revenue was calculated by multiplying the taxable sales change times the average state and local rate of 7.67% or $2,919,327.[14]

The higher minimum wage may decrease sales tax revenue to the extent that it reduces business profits, which will lower spending by business owners.

VI. Summary and Conclusions

I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

[13] The same general approach is used in the State Auditor's fiscal notes for the initiatives.
[14] The average rate comes from http://taxfoundation.org/news/show/27023.html

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

Ph.D., Economics, The Pennsylvania State University.
B.S., Economics, The Pennsylvania State University.

Current Positions

E.M. Stevens Professor of Economics, Trinity University, 2009-
Research Fellow, Institute for the Study of Labor (IZA), Bonn, 2004-.

Previous Positions

Rod and Hope Brim Eminent Scholar in Economics, FSU 2004-2009.
Director, Pepper Institute on Aging and Public Policy, FSU, 2003-2009.
Abba P. Lerner Professor of Economics, FSU, 2000-2009.
Professor, Department of Economics, Florida State University, 1996-2009.
Director of Research, Pepper Institute on Aging and Public Policy, FSU, 1995-2000.
Associate Professor, Department of Economics, Florida State University, 1993-1996.
Research Associate, Pepper Institute on Aging and Public Policy, FSU, 1993-2001, 2003-2009.
Visiting Associate Professor, Department of Economics, Florida State University, 1992-1993.
Research Affiliate, Pepper Institute on Aging and Public Policy, FSU, 1992-1993, 2001-2003.
Associate Professor, Department of Economics, Miami University, 1991-1993.
Assistant Professor, Department of Economics, Miami University, 1987-1991.

Research Areas

Labor Economics, Labor Market Aspects of Pensions, Labor Unions, Racial and Gender Differences in the Labor Market, Minimum Wage, Deregulation.

Teaching Areas

Principles of Microeconomics and Macroeconomics, Intermediate Microeconomics, Money and Banking, Econometrics (undergraduate and graduate), Labor Economics and Labor Relations (undergraduate and graduate).

Books

Miami University Faculty Research Grant, 6/1990-8/1990, $4,000, "The Role of Firm Size in Pension Coverage and Options."

Miami University Faculty Research Grant, 6/1989-8/1989, $4,000, "Declining Unionism and the Gender Wage Gap," with William Even.

Participation in National Meetings

Panel Discussant, American Real Estate and Urban Economics Association/ASSA meetings, January 2008.

Presented, "Employee Turnover in the Long-Term Care Industry," at Academy Health Annual Research Meetings, June 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at International Atlantic Economic Society meetings, October 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at International Atlantic Economic Society meetings, October 2005.

Presented, "Replacing Earnings After Termination: Evidence from the Displaced Worker Survey," at the Allied Social Science Association/National Association of Forensic Economics, January 2002.

Presented, "Labor Market Transitions of Older Workers," at the Allied Social Science Association/Society of Government Economists meetings, January 1999.

Presented, "Why has the Loss in Pension Coverage Accelerated Among Less Educated Workers?" at the American Economic Association Meetings, 1995.

Presented, "Wages and Gender Composition: Why Do Women's Jobs Pay Less?" at the American Economic Association Meetings, 1994, with Barry Hirsch.

Presented, "Pensions, Labor Turnover, and Employer Size" at the American Economic Association Meetings, 1993, with William Even.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the American Economic Association meetings, 1992, with William Even.

Participation in Regional Meetings

Presented "Unions and Pension Performance: The Role of Pension Design," at Southern Economics Association meetings, November 2009.

Panel member, "Recent Federal Reserve Policy: An Evaluation" at Southern Economics Association meetings, November 2009.

Discussant, "Topics in Health Economics," at Southern Economics Association meetings, November 2009.

Discussant, "Teacher Pay, Principals, and Schooling," at Southern Economics Association meetings, November 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Western Economic Association meetings, July 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Eastern Economic Association meetings, February 2009.

Panel Discussant at the Southern Economic Association meetings, November 2008.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Southern Economic Association meetings, November 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Western Economic Association meetings, July 2008.

Chair "Pensions and Retirement" Session at Southern Economic Association meetings, November 2007.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Southern Economic Association meetings, November 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Southern Economic Association meetings, November 2006.

Panel Discussant, Southern Economic Association meetings, November 2005.

Presented, "Do Pensions Impede Phased Retirement?" at the Southern Economic Association meetings, November 2004.

Presented, "When Will the Gender Gap in Retirement Income Narrow?" at the Southern Economic Association meetings, November 2003.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Southern Economic Association meetings, November 2002.

Presented, "Racial Composition, Wages, and Quality Sorting," at the Southern Economic Association meetings, November 1999.

Presented, "Racial and Ethnic Differences in Pension Coverage and Benefit Levels," at the Southern Economic Association meetings, November 1998.

Presented, "Factors Influencing Participation and Contribution Levels in 401(k) Plans," at the Western Economics Association meetings, July 1998.

Presented, "Aging at Work: Employment Determination, Firm Strategies, and Public Policy in the United States," at the Western Economic Association meetings, July 1994.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Western Economic Association meetings, July 1992.

Presented "Plant Size and the Decline of Unionism," at the Southern Economic Association meetings, 1989, with William Even.

Panel Discussant, Southern Economic Association meetings, November 1989.

Presented "The Labor Force Participation and Earnings Profiles of Married Female Immigrants," at the Southern Economic Association meetings, November 1988.

Presented "Pensions, Screening, and the Gender Wage Gap," at the Southern Economic Association meetings, November 1988.

Session Chair and Panel Discussant at the Southern Economic Association meetings, November 1988.

Participation in Invited Seminars, Conferences, and other Presentations

Presented, "Teaching Macroeconomics During Troubled Times," at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2012.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Pennsylvania State University, April 2010.

Presented, "The Parallels Between the Japanese Economic Crisis of the 1990s and the US Today" at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2010.

Chair "Minimum Wage & EITC" Session at Society of Labor Economists meetings, May 2009.

Presented "Participant Direction in Defined Contribution Plans," at Lehigh University, April 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Association of Private Enterprise Education meetings, April 2009.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Trinity University, October 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Georgia State University, April 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Association of Private Enterprise Education meetings, April 2008.
Presented, "Improving Pension Coverage at Small Firms," at Hudson Institute, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Society of Labor Economics meetings, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Association of Private Enterprise Education meetings, April 2006.

Presented, "Participant Direction in Defined Contribution Plans," at University of Wisconsin-Milwaukee, April 2006.

Invited Panel Participant for Pepper Foundation and Center Symposium on pension reform, Washington, DC, February 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at West Virginia University, April 2005.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at the University of Kentucky, November 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the Federal Reserve Bank of Atlanta, April 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the University of Oklahoma, February 2004.

Presented, "Tracking Union and Nonunion Wages in the U.S.: Can the Evidence be Reconciled?" at the Middlebury Annual Conference on Economic Issues, April 2002.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Miami University Center for Pension and Retirement Research Conference, June 2001.

Presented, "Benefits and Worker Productivity," Benefits for the Workplace of Tomorrow Conference, Wharton School, University of Pennsylvania, May 2001.

Participant, Innovations in Managing the Financial Risks of Retirement Conference, Wharton School, University of Pennsylvania, May 2000.

Presented "Using Hi-Tech in Large Lectures," at Association of Private Enterprise Education meetings, April 2000.

Presented "Employee Participation in 401(k) Plans," at University of Wisconsin-Milwaukee, October 1999.

Presented "Gender, Race, and Ethnicity in the Labor Market," as part of the Smith Chair course in Labor Economics at Brigham Young University, September 1999.

Presented, "The Decline in Pension Coverage Among Less Educated Workers," at the Florida State University Economics Department Seminar Series, 1996.

Presented, "Children's Effects on Women's Labor Market Attachment and Earnings" at the Conference on the Changes in Working Time in Canada and the United States, Canadian Employment Research Forum, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Ohio State University Economics Department Seminar Series, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Florida State University Economics Department Seminar Series, 1995.

Presented, "Employer Size and Labor Turnover: The Role of Pensions," at Syracuse University, 1995.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" while visiting scholar at the Federal Reserve Bank of Cleveland, 1995.

Presented, "Trends in Individual and Household Pension Coverage," at the Miami University Center for Pension and Retirement Research Conference, 1994.

Presented, "Racial Composition, Quality Sorting, and the Black-White Wage Gap" at the University of Wisconsin, Institute for Research on Poverty, Small Grants Workshop, 1993, with Barry Hirsch.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Florida State University Economics Department Seminar Series, 1992.

Participant at National Bureau of Economic Research (NBER) Labor Studies meetings of the Summer Institute, 1992.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Miami University Conference on Current Pension Policy Issues, 1992.

Organizer and participant at conference on "Contemporary Issues in Pension Economics," hosted by the Center for Pension and Retirement Research, Miami University, 1990.

Presented "The Effect of International Competition on Union and Nonunion Wages," at the University of Cincinnati Seminar Series, 1987.

Fiscal Note Summary

State and local governments estimate no direct costs or savings from the proposal, but operating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $4.4 million decrease to a $221 million increase depending on business decisions.

Jefferson City, MO 65101

RE: Petition approval request from Richard Von Glahn regarding a proposed statutory amendment to Chapter 290, Version 4 (2018-199)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Richard Von Glahn on April 3, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that the proposed law changes, repeals, or modifies by implication, or may be construed by some persons to change, repeal, or modify by implication, the following provisions of the Missouri Revised Statutes: Section 285.055 and Sections 290.502, 290.512, 290.527, and 290.528. The proposed law enacts two new sections to be known as sections 290.526 and 290.529.

Be it enacted by the people of the state of Missouri:

Sections 290.502, 290.512, and 290.527 of the Revised Statutes of Missouri are amended, and two new sections to be known as sections 290.526 and 290.529 are enacted to read as follows:

290.502. 1. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, effective January 1, 2007, every employer shall pay to each employee wages at the rate of $6.50 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher.

2. The minimum wage shall be increased or decreased on January 1, 2008, and on January 1 of successive years, by the increase or decrease in the cost of living. On September 30, 2007, and on each September 30 of each successive year, the director shall measure the increase or decrease in the cost of living by the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) or successor index as published by the U.S. Department of Labor or its successor agency, with the amount of the minimum wage increase or decrease rounded to the nearest five cents.

3. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, and notwithstanding subsection (1) of this section, effective January 1, 2019, every employer shall pay to each employee wages at the rate of not less than $9.00 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher. Thereafter, the minimum wage established by this subsection shall be increased each year by $1.00 per hour, effective January 1 of each of the next four years, until it reaches $13.00 per hour, effective January 1, 2023. Thereafter, the minimum wage established by this subsection shall be increased or decreased on January 1, 2024, and on January 1 of successive years, per the method set forth in subsection (2) of this section. If at any time the federal minimum wage rate is above or is thereafter increased above the minimum wage then in effect under this subsection, the minimum wage required by this subsection shall continue to be increased pursuant to this subsection (3), but the higher federal rate shall immediately become the minimum wage required by this subsection and shall be increased or decreased per the method set forth in subsection (2) for so long as it remains higher than the state minimum wage required and increased pursuant to this subsection.

4. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (3) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsections (1) and (2) of this section shall continue to be subject to those subsections.

290.512. 1. [No] Except as provided in subsection (2) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of fifty percent of the minimum wage rate specified in sections 290.500 to 290.530, however, total compensation for such employee shall total at least the minimum wage specified in sections 290.500 to 290.530, the difference being made up by the employer.

2. Beginning January 1, 2019 and effective on the dates set forth below in this subsection, and notwithstanding the percentage established in subsection (1) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of the percent set forth below in this subsection of the minimum wage rate specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530:

(1) fifty-one percent, effective January 1, 2019;
(2) fifty-three percent, effective January 1, 2020;
(3) fifty-five percent, effective January 1, 2021;
(4) fifty-seven percent, effective January 1, 2022;
(5) fifty-eight percent, effective January 1, 2023;
(6) sixty percent, effective January 1, 2024;

however, in all cases, total compensation for such employee shall total at least the minimum wage specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530, the difference being made up by the employer.

3. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (2) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsection (1) of this section shall continue to be subject to that subsection at the percentage set forth therein of the minimum wage rate specified in subsections (1) and (2) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530.

[2.] 4. If an employee receives and retains compensation in the form of goods or services as an incident of his employment and if he is not required to exercise any discretion in order to receive the goods or services, the employer is required to pay only the difference between the fair market value of the goods and services and the minimum wage otherwise required to be paid by sections 290.500 to 290.530. The fair market value of the goods and services shall be computed on a weekly basis. The director shall provide by regulation a method of valuing the goods and services received by any employee in lieu of the wages otherwise required to be paid under the provisions of sections 290.500 to 290.530. He shall also provide by regulation a method of determining those types of goods and services that are an incident of employment the receipt of which does not require any discretion on the part of the employee.

290.526. Notwithstanding any other provision of law, as of the effective date of this section, municipalities, cities, counties, towns, and villages shall have the power to establish, mandate, or otherwise require an employer to pay wages to an employee who performs work while physically present within the boundaries of the municipality, city, county, town, or village, including employees not subject to the state or federal minimum wage, at a minimum rate per hour that exceeds the rate set under state or federal law, except that such a requirement shall not apply to employees employed by another local, state, or federal government entity or instrumentality.

290.527. Any employer who pays any employee less wages than the wages to which the employee is entitled under or by virtue of sections 290.500 to 290.530 shall be liable to the employee affected for the full amount of the wage rate and an additional [equal] amount equal to twice the unpaid wages as liquidated damages, less any amount actually paid to the employee by the employer and for costs and such reasonable attorney fees as may be allowed by the court or jury. The employee may bring any legal action necessary to collect the claim. Any agreement between the employee and the employer to work for less than the wage rate shall be no defense to the action. All actions for the collection of any deficiency in wages shall be commenced within [two] three years of the accrual of the cause of action.

290.529. Except in the circumstances set forth in section 290.523, all the provisions of sections 290.500 to 290.530 are severable. If any provision, including any section, subsection, subdivision, paragraph, sentence, or clause, of sections 290.500 to 290.530, or the application thereof to any person or circumstance, is found by a court of competent jurisdiction to be invalid, unconstitutional, or unconstitutionally enacted, such decision shall not affect other provisions or applications of sections 290.500 to 290.530 that can be given effect without the invalid, unconstitutional, or unconstitutionally enacted provision or application.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-199)

Subject

Initiative petition from Richard Von Glahn regarding a proposed amendment to Chapter 290 of the Revised Statutes of Missouri. (Received April 4, 2017)

Date

April 24, 2017

Description

This proposal would amend Chapter 290 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis,** the **St. Louis County Board of Elections,** the **Board of Election**

Commissioners City of St. Louis, the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners**.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided information as proponents of the proposal to the State Auditor's office.

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations. They do not expect that the enactment of this proposal would result in any other increased costs to their office.

Officials from the **Department of Agriculture** indicated there is no fiscal impact to their department for this initiative petition.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department since public employers are exempt from the new provisions proposed.

Officials from the **Department of Health and Senior Services** indicated this proposal would have no direct fiscal impact on their department since government employees are exempt from its provisions. However, employees of certain entities that receive funding through the department's budget would be impacted, such as Medicaid Home and Community Based Services vendors/providers and Area Agencies on Aging.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department defers to the Office of Administration to determine the fiscal impact of this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department. Their department defers to the Office of Administration for a state impact.

Officials from the **Department of Public Safety - Office of the Director** indicated they will defer to the response provided for this initiative petition by the Office of Administration - Human Resources.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration.

Officials from the **Governor's office** indicated there should be no added cost or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Officials from the **Office of Administration** indicated the proposal amends Sections 290.502, 290.512, 290.527, RSMo and adds Sections 290.526 and 290.529, RSMo.

Section 290.502, RSMo, increases the minimum wage to $9.00 per hour, beginning January 1, 2019 and by another $1.00 per hour each year until it reaches $13.00 per hour beginning January 1, 2023. Thereafter, the minimum wage will be adjusted annually based on the increase/decrease in the cost of living.

Section 290.512, RSMo, increases the base salary for tipped employees. Effective January 1, 2019, employers must pay at least 51% of the minimum wage rate to tipped employees. Each year thereafter the rate increases until January 1, 2024 when tipped employees should be paid 60% of the minimum wage as established in Section 290.502, RSMo.

The proposal exempts public employers from both requirements; therefore there would be no cost to the State of Missouri.

Section 290.526 allows municipalities, cities, counties, towns and villages to implement a minimum wage that exceeds the state or federal minimum wage rate, but exempts local, state or federal government entities from the higher minimum wage rate.

Because no tax rates are affected, there is no direct impact on general and total state revenues. However, these proposals may have several indirect affects which could impact revenue collections by an unknown amount, including but not limited to:

- Increased wages for certain employees. According to the US BLS, in 2015, Missouri had 57,000 hourly employees earning wages at or below the federal minimum wage;[1]
- Increased consumption by those employees;
- Lower overall employment (if employers choose to hold costs steady);
- Lower business investment (if employers' payrolls increase);
- Increased prices as firms pass–through labor costs.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

[1] http://www.bls.gov/opub/reports/minimum-wage/2015/home.htm

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office, as it would not apply to state employees.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this petition may have a small negative fiscal impact on their city as a result of the increased hourly minimum wage being higher than the hourly rate paid some city employees.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they are not able to estimate any significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact since they are excluded under the public employer definition in section 4.

Officials from the **Missouri State University** indicated no fiscal impact.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated the wording is unclear as to whether Colleges/Universities are included in this petition. In assuming they are included, they calculate the following significant fiscal impact to their university. The proposal will have a detrimental impact on the university. As proposed increasing minimum wage to $9.00 an hour up to and including $13.00 per hour by 2023 their payroll increases would escalate to a minimum of $455,840.00 to $2,039,200.00. These additional expenditures would be devastating to the university's overall operations.

Officials from the **Kansas City Board of Election Commissioners** indicated no fiscal effect on their operations.

Officials from the **Platte County Board of Elections** indicated no fiscal impact.

Officials from the **Jackson County Election Board** indicated this petition does not have a fiscal impact on their office.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided the following information as proponents of this initiative petition.

Version 31	2018 - 197	$12 by 2022 (Start at $9; $1/year)	Yes	Yes	60%	Yes
Version 32	2018 - 198	$13 by 2023 (Start at 9; $1/year)	Yes	Yes	100%	Yes

Version 33	2018 - 199	$13 by 2023 (Start at $9; $1/year)	Yes	Yes	60%	Yes

This letter is from Lara Granich and Missouri Jobs with Justice Voter Action, proponents of the above-referenced Minimum Wage Initiative Petitions. Pursuant to RSMo. Section 116.175, we write to submit the following fiscal impact information to assist your office in its analysis of the fiscal impact of the above-mentioned seven proposed Minimum Wage Initiative Petitions.

Our analysis estimates the impact of the proposed Minimum Wage Initiative Petitions on state and local sales and personal income tax revenue in Missouri. We follow the process that has been used in the past to estimate the impact of minimum initiative petitions on state and local sales and personal income tax revenue, with some refinements. We also address certain claims that have been made by opponents of similar initiative petitions in the past.

As these petitions exclude public workers from the proposed minimum wage increases, we do not include in our analysis an estimate of the impact on state and local payroll costs of the proposed Minimum Wage Initiative Petitions.

I. Estimate of Number of Workers Affected Statewide and the Impact on Their Wages

Table 1. Summary of the Number of Affected Workers and Aggregate Wage Increases for Missouri in the Final Year of Minimum Wage Implementation.

Proposal	Year of Peak Minimum Wage (MW)	Proposed Peak MW	Tipped MW in Peak MW Year	Workers Affected by MW increase	Aggregate Annual Wage Increase in Nominal Dollars
13,14,15[a]	2023	$ 12.00	$ 6.00	835,350	$4,358,798,129
16,17,18[a]	2024	$ 12.00	$ 6.00	819,652	$4,209,438,048
19,20,21[a]	2025	$ 13.00	$ 6.50	900,788	$5,309,336,662
22,23,24[a]	2022	$ 11.00	$ 5.50	738,515	$3,347,138,756
25	2021	$ 11.00	$ 5.50	761,164	$3,469,534,559
26	2022	$ 12.00	$ 6.00	852,284	$4,510,285,824
27	2023	$ 13.00	$ 6.50	949,801	$5,667,065,534
28	2024	$ 12.00	$ 9.60	832,328	$4,288,614,460
29	2025	$ 13.00	$ 7.80	905,942	$5,332,471,496
30	2022	$ 12.00	$ 8.40	864,090	$4,558,317,729
31	2022	$ 12.00	$ 6.84	855,887	$4,523,341,931

32	2023	$ 13.00	$ 9.75	948,421	$5,745,051,956
33	2023	$ 13.00	$ 7.54	942,566	$5,685,951,766

Notes: Author's Analysis of American Community Survey (ACS) Data from 2014.
(a) Since these proposals only vary on non-economic factors, their economic and fiscal impacts are treated as equal for the purposes of this report.

Across the proposals analyzed, the total aggregate wage increase for workers in Missouri ranges from a low of $3.347 billion (Proposals 22-24) to a high of $5.745 billion under Proposal 32. While some proposals have the same final impact numbers, they have different impacts in the initial years (not listed) based on the relative pace of increases in earlier years. A full, year-by-year impact analysis is presented in Appendix Tables A1 through A13 below.

The wage impact of an increase in the minimum wage for the state of Missouri is calculated using the following procedure. The American Community Survey (ACS) Public Use Micro Sample for the most recent year available (2014) for the state of Missouri was downloaded from the US Census Bureau. The American Community Survey was chosen over the Current Population survey because the ACS has a significantly larger sample. We followed the method of Perry, Thomason, and Bernhardt (2016) for calculating an hourly wage rate from the ACS based on observed total annual wage income, typical hours worked each week and weeks worked per year. Since ACS income figures are clustered around whole-numbers, we smoothed the wage distribution by randomly adding or subtracting $0.25 from each wage figure.

Wage adjustments were made only for those individuals earning less than the proposed minimum wage, or proposed tipped minimum wage. We did not make additional adjustments for the "ripple effect" of minimum wage increases on workers earning slightly above the new threshold. Recent evidence suggests that workers earning up to 15 percent above of the minimum wage also receive small increases in response to a minimum wage increase. (See Wicks-Lim (2006) and Dube, Giuliano and Leonard (2015).) Thus, the estimated impacts listed above are likely to be smaller than the actual impact of increasing the minimum wage to the proposed level.

The proposed minimum wage increases exclude public employees. However, it was not practicable to exclude public employees from these calculations because the ACS does not have a published variable that allows for identification of public employees. Nonetheless, this inclusion of public employees should have only a minimal impact on our results, since their numbers are small and most already earn more than the proposed minimum wage increases.[1]

All wages from the 2014 survey were adjusted upward to account for inflation between the time of the survey and the time of measurement of the impact. Actual rates of inflation were used to adjust wages up to 2016. For all subsequent years between 2017 and 2028, baseline wages were adjusted using the projected annual average rate of change in the Consumer Price Index for Urban Workers (CPI-U) for the Midwest region. The 2015 and 2016 Missouri Minimum wage of $7.65 was adjusted by the same factor prior to measuring the impact of a change to the proposed minimum wage in 2019.

After these adjustments, the resulting hourly wage of all employees was compared to the proposed minimum wage. A total of twenty-one proposals were analyzed. For each proposal, we constructed a baseline wage scenario that used only basic wage changes from expected inflation rates to predict each ACS respondent's hourly wage rate in each year

[1] For Missouri's state employees, this can be validated by viewing the earnings of all state employees at: http://mapyourtaxes.mo.gov/MAP/Employees/. In larger counties and cities most all public employees already earn more than the highest proposed minimum wage. Smaller counties and towns may have some public employees who earn less than the highest proposed minimum.

between 2019 and 2028. We then constructed a counterfactual, or "proposed" wage distribution for each worker under all twenty-one minimum wage proposed scenarios. Since the minimum wage proposals offer nine different paths for raising the minimum wage for all non-tipped private sector workers, and different wage paths for tipped workers, we create separate minimum wage changes for tipped and non-tipped workers. Specifically, we used information on a worker's occupation and observed wage levels to separately identify tipped workers and assign them the proposed tipped minimum wage in each year, rather than the higher non-tipped minimum wage.[2]

If the proposed minimum wage was less than the inflation-adjusted hourly earnings of an employee, then no impact was calculated. If the proposed minimum wage was more than the hourly earnings for an employee, then the difference between the inflation-adjusted hourly earnings (i.e. baseline) and the proposed minimum wage was calculated. That difference was multiplied by the number of hours the employee worked in the year to calculate the annual impact for that employee. The result was then multiplied by a weighing factor for that employee in the population. The total impact for the state of Missouri was then summed across all affected workers to generate a total estimated increase in wage income in the state.

We do not include an estimate of job losses due to minimum wage changes. Existing research is clear that past minimum wage increases have had no measurable effect on aggregate employment levels. Larger minimum wage increases, such as those in Los Angeles, Seattle, and other jurisdictions, have not yet been studied to detect a clear disemployment effect. While it is possible that there may be some employment losses due to automation or other factors, this potential negative effect is likely offset by the positive potential job growth stemming from multiplier effects of the spending of minimum wage workers who receive substantial raises. There is substantial research to indicate that increases in the minimum wage have multiplier effects that increase the direct effects. For this reason and because of the likely increases in wages for individuals who earn above the proposed minimum wage rates, the impacts summarized in the table are considered conservative estimates relative to the total impact that would occur as a result of increasing the minimum wage to the proposed levels.

II. Economic Literature on the Impact of Minimum Wage Increases on Employment

Next, it is necessary to review the economic literature on the impact of minimum wage increases on employment. Opponents often claim that minimum wage increases may reduce employment in a state. If that is true, then those employment reductions would result in reductions in state income and sales tax revenue. However, review of the most credible recent empirical research on the minimum wage shows that increases in the minimum wage have had no discernible impact on employment. We thus conclude that it is not appropriate to project that the proposed initiative petitions would result in any detectable employment reduction, and resulting losses in income and sales tax revenue, or increases in unemployment-related costs to the state.

Economists have conducted hundreds of studies of the employment impact of the minimum wage. A recent meta-study – a formal statistical study of studies – by Doucouliagos and Stanley (2009) reviewed all the research conducted over the last three decades on the employment impact of minimum wage increases on teenagers in the United States. The researchers concluded that the minimum wage has little or no discernible effect on the employment prospects of low-wage workers. Their study followed a rigorous, peer-reviewed procedure and has the advantage of using a set of predetermined, objective criteria for weighing the validity of statistical findings across studies with different results.

[2] We defined tipped workers as those employed in occupations that typically receive a large share of income as tips. These occupations were 'Bartenders' (4040), 'Waiters and Waitresses', 'Food Servers, Non-restaurant' and 'Miscellaneous food preparation and serving related workers including dining room and cafeteria attendants and bartender helpers'.

(Source: Doucouliagos, Hristos and T. D. Stanley. 2009. "Publication Selection Bias in Minimum-Wage Research? A Meta-Regression Analysis." British Journal of Industrial Relations,vol. 47, no. 2, pp. 406-428.)

Recent theoretical and empirical research emphasizes several explanations for the consistently negligible employment impacts of moderate increases in the minimum wage. First, relative to total wage costs, minimum-wage increases are small. Second, employers and workers appear to respond to minimum-wage increases in many ways that reduce the direct cost to employers and substantially reduce or eliminate the need to cut employment.

Probably the most important economic response to a higher minimum wage is a reduction in turnover. At higher wages, employers fill vacancies faster and retain employees longer, boosting total employment and average productivity per worker while reducing direct and indirect training costs. Dube, Lester, and Reich (2012), for example, examined the effect of the minimum wage on labor turnover among teens and restaurant workers. They find "...striking evidence that separations, new hires, and turnover rates for teens and restaurant workers fall substantially following a minimum wage increase..." (p. 2). Their findings, using nationally representative data, are consistent with local case studies of the minimum wage and related "living wage" laws, including Dube, Naidu, and Reich's (2007) analysis of the San Francisco city-wide minimum wage; Fairris's (2005) study of local government contractors in Los Angeles; Howes (2005) on homecare workers in California; and Reich, Hall, and Jacobs (2005) on workers at the San Francisco airport.
(Sources: Dube, Arindrajit, T. William Lester, and Michael Reich. 2012. "Minimum Wage Shocks, Employment Flows and Labor Market Frictions." Berkeley, CA: Institute for Research on Labor and Employment. http://escholarship.org/uc/item/76p927ks; Dube, Arindrajit, Suresh Naidu, and Michael Reich. 2007. "The Economic Effects of a Citywide Minimum Wage." *Industrial and Labor Relations Review*, vol. 60, no. 4, pp. 522-543; Fairris, David. 2005. "The Impact of Living Wages on Employers: A Control Group Analysis of the Los Angeles Ordinance." *Industrial Relations*, vol. 44, no. 1, pp. 84-105; Howes, Candace. 2005. "Living Wages and the Retention of Home Care Workers in San Francisco." *Industrial Relations*, vol. 44, 5 no. 1, pp. 139-163; Reich, Michael, Peter Hall, and Ken Jacobs. 2005. "Living Wage Policies at the San Francisco Airport: Impacts on Workers and Businesses." *Industrial Relations*, vol. 44, no. 1, pp. 106-138.)

Employers also appear to respond to increases in the minimum wage by taking measures to boost productivity. Hirsch, Kaufman, and Zelenska's (2011) study of the impact of the federal minimum wage increase on 81 fast-food restaurants in Georgia and Alabama, for example, asked fast-food managers about the scope for efficiency improvements in response to the minimum-wage rise. About 90 percent of managers indicated that they planned to respond to the minimum wage increase with increased performance standards such as "requiring a better attendance and on-time record, faster and more proficient performance of job duties, taking on additional tasks, and faster termination of poor performers." (p. 27) Roughly the same share of managers said that they sought to "boost morale" by presenting the minimum wage increase as a "challenge to the store" and using this as a way "to energize employees to improve productivity." (pp. 28-29) Based on their interviews with store managers, the researchers concluded that a minimum wage increase may function as a "catalyst or shock that forces managers to step out of the daily routine and think about where cost savings can occur." (p. 29) (Source: Hirsch, Barry T., Bruce Kaufman, and Tetyana Zelenska, "Minimum Wage Channels of Adjustment." IZA Discussion Paper No. 6132. Germany: Institute for the Study of Labor. http://www2.gsu.edu/~ecobth/IZA_HKZ_MinWageCoA_dp6132.pdf)

A higher minimum wage may also motivate workers to work harder, independently of any actions by employers to increase productivity. According to "efficiency wage" theory, wages above the competitive-market rate may elicit greater work effort for several reasons. As Carl Shapiro and Joseph Stiglitz (1984) have argued, higher pay increases the cost to workers of losing their job, potentially inducing greater effort from workers in order to reduce their chances of

being fired. George Akerlof (1982), arguing from a more sociological point of view, has suggested that workers may see higher wages as a gift from employers, leading workers to reciprocate by working harder. (Sources: Shapiro, Carl and Joseph E. Stiglitz. 1984. "Equilibrium unemployment as a worker discipline device." *American Economic Review*, vol. 74, no. 3, pp. 433-444; Akerlof, George A. 1982. "Labor contracts as partial gift exchange." *Quarterly Journal of Economics*, vol. 97, no. 4, pp. 543-569.)

We therefore conclude that the proposed increase in the Missouri minimum wage would have no discernible impact on the employment levels of low-wage workers. Accordingly, we do not factor in reductions in employment, or any resulting decrease in sales tax or income tax. We also do not project any increased unemployment insurance costs – both because we do not project any resulting job losses, and, additionally, because unemployment insurance costs are paid for by employer premiums, and so are ultimately not a cost to the state.

For similar reasons, we do not believe that the proposed increase will have any significant adverse economic impact on small businesses or, by extension, on corporate income tax revenue. In fact, many small businesses already pay little if any corporate income tax.

III. State and Local Sales and Personal Income Tax Revenue Impact of Raising the Minimum Wage

Based on the wage impact figures calculated above, and the understanding that the minimum wage increases would be unlikely to result in offsetting job losses, we next calculate the impact of the projected wage increases on state and local sales and personal income tax revenue in Missouri. We project only the direct impact of the various minimum wage increase scenarios on such tax revenue. We do not attempt to project the additional impact through a GDP multiplier effect, or the potentially higher sales taxes generated if employers offset wage increases with higher prices (which would be taxable).

Personal Income Tax Revenue. In order to determine the projected increase in personal income tax revenues that would result directly from the increased wages, we had to develop assumptions about the effective income tax rates of the affected workers. We made the following assumptions with respect to the effective tax rate:

1. That 25% of affected workers can be claimed as a dependent on another party's Missouri income tax return and, as a result, would pay an effective tax rate of 6.0% on the increase in income;
2. That 50% of the affected workers would file as single taxpayers, would claim one deduction of $2,100, and would be entitled to a standard deduction of $5,800. This would result in an effective tax rate of 2.47%;
3. The remaining 25% would, we assumed, pay no additional Missouri income tax.

In light of these assumptions, the increased Missouri income tax revenue for each petition version can be calculated as follows: (total wage increase * 25% * 6.0%) + (total wage increase * 50% * 2.47%) + (total wage increase *25% * 0%).

Sales Tax Revenue. The state of Missouri imposes a 4.225% state sales tax on those items that are not exempt from the sales tax base. In addition, the average local sales tax rate is 2.95%. As a result, the average Missouri net sales tax rate is 7.175%. To estimate the share of income that is spent on goods and services that are subject to sales taxes, we used data from the 2015 Consumer Expenditure Survey (CES) for the US to estimate the share of income spent on categories that are subject to sales taxes. The CES summary tables list average spending per consumer across 20 different

categories (e.g. housing, transportation, food away from home) and we categorized each spending item as taxable or non-taxable and then calculated the share of spending that we taxable.[3] The resulting rate was 30.3 percent.

Based upon the above assumptions, and the total wage increase calculations for each version of the petition, we estimate that the increase in state income tax revenue resulting from the increased wages would be as follows:

Table 2. Summary of the Impact of Minimum Wage Increases on State and Local Sales and Income Taxes in Year of Full Minimum Wage Final Implementation.

Proposal	State Sales Tax (4.225%)	Local Sales Tax Revenue (2.95%)	Total Sales Tax Revenue Increase	Personal Income Tax Revenue	Total Sales and Personal Income Tax Revenue Increase

Note: Author's Analysis of American Community Survey (ACS) data from 2014 and fiscal impact assumptions described above. All dollars are in nominal figures. (a) Since these proposals only vary on non-economic factors, their economic and fiscal impacts are treated as equal for the purposes of this report.

As described in Table 2 above, the fiscal impact of the proposed minimum wage increases varies based on the ultimate level of the minimum wage and the degree of tipped minimum wage phase out. The estimates of the total fiscal benefit range from $164 million to $282 million annually. Appendix tables A1 through A13 provide a year-by-year summary of the fiscal benefits.

[3] Specifically, the categories we assumed to be subject to state and local sales taxes are: food, household furnishings and equipment, vehicle purchases, gasoline and motor oil, entertainment, and all other expenditures. We assumed that 50 percent of the spending on the category "apparel and services" was taxable.

We hope that this information is useful to your office as your prepare your analyses of the petitions.

Respectfully submitted,

Lara Granich

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided the following information as an opponent of this initiative petition.

These corrections were subsequently provided to the submitted information

In the table on the bottom of page 7 and top of page 8, both averages for 2023 should be based on a 5 year phase-in. Accordingly, the figure on that table should state for 2023 ($12) Average Annual Unemployment Premiums Paid by State of $16,269,523.52.

The corresponding change on the table on page 12 would be to state, for 2023 ($12) Total Net Loss to State Government from Taxes and Unemployment Insurance of ($19,137,851.76).

Re: Initiative Petitions 2018-196 through 2018-216

Dear Mr. Halwes,

I write on behalf of Robert Bonney. Mr. Bonney is the Chief Executive Officer of the Missouri Restaurant Association. Please consider this letter and the accompanying studies as his fiscal impact statement as an opponent of Initiative Petitions 2018-196 through 2018-216 (the "Initiative Petitions"). If passed, any of these twenty-one initiatives would have a substantial negative impact on state and local governments, as well as Missouri small businesses. Those effects are both direct (as noted in Section 1) and secondary (as noted in Sections 2 through 5). The direct effects stem from higher labor and contracting costs that the state and its political subdivisions will incur, despite the Initiatives' effort to exclude government workers from the mandate.

The indirect effects will present a debate this Office has seen before. The proponents of the Initiative Petitions will once again rely on data sourced from political activist groups who claim increases in the minimum wage only serve to create new taxable income. The reality is that such groups approach this issue with political bias. Their analysis is one-sided because it completely ignores the fact that a wage increase does not "create" income from thin air; instead, it is an economic transfer from Missouri businesses to workers. Missouri businesses must pay the new wages "created" by the increases. Political activists' models fail to account, then, for two specific manifestations of the "debit" side of this transfer: reductions in employment, and the reduction in corporate income tax paid based upon business done in Missouri.

The failure to account for any employment effect at any proposed wage increase—even a drastic increase of the minimum wage to $13—is particularly puzzling, because Missouri's most populous areas border Illinois and Kansas. These states, respectively, have minimum wages of $8.25 and $7.25. Neither state adjusts the minimum wage for inflation. Likewise, the second effect—loss of corporate income tax revenues—is a mathematical certainty. Missouri businesses will be the source of the wage increase, which will lower their own taxable income. Assuming a one-to-one substitution of "created" wages for lost corporate income, the difference in the rates

at which these two types of income are taxed will result in a net decrease in state revenue. A dollar from increased wages is taxable by state government in Missouri at 6% or substantially less, whereas Missouri's corporate income tax rate is 6.25%.

On top of these two types of negative outcomes—lower employment and lower state tax revenues—there may be second-order effects to small businesses because they lack the access to capital to weather price fluctuations; they may not survive at all because they may not have the flexibility to simply cut employment, shifting their reliance to capital instead of labor resources, or suffering a decrease in production and revenue.

In short, much of the fiscal impact regarding the current crop of wage-related ballot measures is secondary: they cause transfers of wealth within (or out of) the state economy, and those transfers of wealth then create second-order effects for state and local governments via their collection of tax revenues and provision of welfare services for the unemployed or less-employed. Because these fiscal notes call for the Auditor operate in the area of secondary effects, it is critical that she treat both sides of the wealth transfer equally, and refrain from assessing only one half of the wage increase equation.

1. Direct Labor Cost Impact on State and Local Government Budgets

As noted to the State Auditor's Office previously by Dr. David Macpherson, a nationally prominent labor and economics expert, there are two ways to measure labor cost on state and local government budgets. First, one can use the information included in fiscal note responses from state and local government entities. It is important to note that these fiscal notes provide an incomplete and, therefore, too-low estimate of labor cost. Few state and local government entities respond to requests for a fiscal note response, and those that do respond often ignore important effects.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can be used to calculate increased labor cost to state and local government entities in Missouri. To combat this time-honored analysis, and in a blatant attempt to manipulate the fiscal note process, the Initiative Petitions provide that they will raise the minimum wage for private workers, but not for workers employed by state or local governmental entities. No conceivable justification exists for solely raising the minimum wage on private businesses. Whatever the disparity between the value of total compensation at a private business and at a government employer, that disparity does not approach the wage adjustments at issue here, ranging from an inflation adjusted wage increase of 51.16% (($13-$8.60)/$8.60) in Initiative Petitions 2018-198 through 2018-201 to a wage increase of 30.17% (($11-$8.45)/$8.45) in Initiative Petitions 2018-213 through 2018-215.

Moreover, it is unreasonable to assume that on a sustained basis public employers, as defined in the Initiative Petitions, would be able to maintain dramatically lower wage levels than private businesses. Public employers would lose staff employable at higher rates in the private market, imposing substantial costs on government productivity. Using the method traditionally employed by labor economists and followed by the Auditor's office, one can calculate the annual

wage costs to state and local governmental entities, based on the annual wage cost for each state and local government worker in the ORG CPS, as detailed on page 6 of Dr. Macpherson's 2012 report, attached hereto as **Exhibit A**. Even if the auditor finds that a specific estimate of costs is not determinable, the auditor should note that state and local government "operating costs could increase by an unknown annual amount that could be significant," through the form of higher wage costs and higher contracting costs.

The proponents of the Initiative Petitions may argue that the Auditor should abandon any state and local cost estimates altogether. The proponents will argue that provisions they have inserted in the statute would mean that state and local government entities will not have to pay higher wages to their employees. Setting aside unjustifiable discrimination against private employers (and "public employees"), the provision is of uncertain legal effect and constitutionality. A "public employer," defined in the initiatives as "the state or a political subdivision of the state" still incurs substantial costs for wages of individuals that are "private employees," rather than "public employees." Cleaning services, food service, and other essential services often rely on state contracts with outside vendors. Sometimes, a contract rate may vary depending on the cost of labor. Even if the contract rate is fixed, it must be re-bid periodically, and that bidding process would take into account the new minimum wage. Plainly, the initiative would impose higher costs for state and local governments in contracting with any private entity and its employees. As a matter of law, it would be insufficient and unfair for the Auditor's fiscal note or summary to simply assume that these costs to state and local governmental entities do not exist.

2. Cost of Unemployment Benefits

a) The effect of inflation on Missouri's minimum wage

CPS–ORG data show that between 2007 and 2015, median nominal wages for adult (25–59 years old) workers in the U.S. grew by 1.68 percent a year. However, Missouri's minimum wage is currently adjusted using "the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W)." Section 290.502, RSMo. Coincidentally (or perhaps not), the CPI-W, over the period from 2006 to 2016, also increased at an average rate of 1.68 percent a year.

Year	CPI-W	Observed inflation %
2006	199.2	
2007	203.7	0.022590361
2008	216.304	0.061875307
2009	210.526	-0.0267124

2010	213.898	0.016017024
2011	222.686	0.041085003
2012	225.568	0.01294199
2013	230.084	0.02002057
2014	234.525	0.019301646
2015	233.806	-0.00306577
2016	234.771	0.004127353

Using Missouri's current inflation-adjusted minimum wage rate and an assumed, constant 1.68 percent increase in the CPI-W, the minimum wage in Missouri will be as follows:

Year	Estimated Minimum Wage
2016	$7.65 (observed)
2017	$7.70 (observed)
2018	$7.85
2019	$8.00
2020	$8.15
2021	$8.30
2022	$8.45
2023	$8.60
2024	$8.75
2025	$8.90
2026	$9.05

b) Calculating job loss attributable to increased minimum wage

At least one outside economist, James Sherk, has already provided an estimate for job loss in Missouri based on a $15 minimum wage. Mr. Sherk calculated the effect of a $15 minimum wage implemented in 2021. Mr. Sherk's figures accounted for inflation by estimating the present value of $15.00 in 2021, rather than estimating an absolute figure for wage inflation in Missouri. Mr. Sherk calculated the present value of $15.00 in 2021 to be $13.57, per hour, based on wage inflation of 1.68 percent. Mr. Sherk evaluated the change from $7.65 per hour to $13.57 per hour (a 77.39% increase), exclusive of agricultural workers. Cumulatively, Mr. Sherk calculated this 77.39 percent increase in wages to reduce employment in the affected workforce by (0.7739*0.677) 52.39%.

Graves Garrett LLC

Mr. Sherk calculated that approximately 40.9% of Missouri's Wage and Salary Workers would be affected by such a $15 minimum wage. Mr. Sherk's calculations reveal that a $15 minimum wage in 2021 would be expected to reduce the number of full-time equivalent jobs in Missouri by approximately 218,000. Based on CPS–ORG data, these figures reveal an affected workforce of approximately 416,086 workers impacted by a $15 minimum wage increase in 2021.

However, in 2014, Dr. Macpherson found, using more conservative, national-level Congressional Budget Office data, that an increase to a $10.10 minimum wage, effective January 1, 2015, would eliminate about 15,700 jobs in Missouri. Dr. Macpherson analyzed the effect of a Missouri $10.10 minimum wage using a model suitable to a national analysis. This analysis predicted a loss of 15,700 Missouri jobs based on a wage increase from $7.50 in 2014 to $10.10 in 2015 (a 34.67% increase).

On the whole, the analysis by Mr. Sherk is more instructive here, since it is more recent, Missouri-specific, and anticipates larger wage changes contemplated by the Initiative Petitions. The most accurate way to determine the estimate of Workers Affected would be to analyze the CPS–ORG data. However, without such data readily available in the time constraints imposed by the fiscal note process, it is reasonable for estimation purposes to assume Mr. Sherk's figures are evenly distributed. Assuming that worker data follows an equal distribution, the Initiative Petitions would be expected to result in the following job losses:

Year of final prescribed wage increase	Wage without IP	Wage mandated by IP	Percentage increase	Percentage of affected workers who lose jobs (Percentage Increase x 0.677 Elasticity)	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by Initiative
2021	$8.30	$11.00	32.53%	22.02%	174,897	38,512
2022	$8.45	$11.00	30.18%	20.43%	162,262	33,150
2022	$8.45	$12.00	42.01%	28.44%	225,866	64,236
2023	$8.60	$12.00	39.53%	26.77%	212,532	56,895
2023	$8.60	$13.00	51.16%	34.64%	275,061	95,281
2024	$8.75	$12.00	37.14%	25.15%	199,683	50,220
2024	$8.75	$13.00	48.57%	32.88%	261,136	85,861
2025	$8.90	$13.00	46.07%	31.19%	247,695	77,256
2026	$9.05	$13.00	43.65%	29.55%	234,683	69,349

c) The best estimate for a price elasticity of demand for low-skilled labor is -0.677.

As noted by Mr. Sherk, starting wages of $15.00 per hour mean that full-time employee must create at least $38,700 a year in value for his or her employer (including wages, employer payroll taxes, and mandatory healthcare benefits). High minimum wages and mandatory benefit costs make it much harder for less-experienced and less-skilled workers to find jobs, particularly full-time work.

Recent labor economics scholarship has revealed that, accounting for publication bias, a state-specific elasticity of demand for less-skilled workers is, on average, approximately -0.677, though some estimates are even higher, around -1.0.[1] "[E]conomists have extensively studied how businesses respond to higher wages overall, not just minimum-wage increases. On average these studies find a 10 percent increase in labor costs causes firms to reduce employment of less-skilled workers by 6.8 percent in the long run."[2]

While these elasticity estimates are substantial in absolute terms, there is reason to believe that such estimates might still understate the impact of a Missouri state-specific effort to increase the minimum wage. This is so for several reasons. First, traditionally, labor economists view labor as a reasonably difficult input to substitute; however, Missouri businesses have readily available options. There are relatively few barriers to doing business in Missouri's border states, and businesses can easily relocate across a state line to take advantage of more favorable wage (and tax laws). Additionally, substantially raising the cost for Missouri labor, relative to labor sources in other states and other countries, is likely to force many manufacturing jobs in Missouri to disappear entirely. Automation is also a significant risk. The substitution of labor is becoming increasingly easy due to technology advancements and the "sharing" economy, where fewer individuals are "employees" covered by the minimum wage. Finally, a labor "price shock" may result in significant decreases in the demand for goods and services. People make behavioral changes to avoid higher costs, including eating out less often and generally decreasing consumption (or shifting their activities to consumption involving comparatively low amounts of labor) wherever possible.

[1] Sherk, James, "How $15-per-Hour Minimum Starting Wages Would Affect Each State," The Heritage Foundation, http://report.heritage.org/ib4601.

[2] "The coefficients on these estimates imply an elasticity of –0.677 for a study published in 2012 (the most recent year in their data) of long-run unconditional labor demand for low-skilled labor in the U.S., estimated using industry-level administrative panel data and a structural form model." "Estimates that do not account for publication bias tend to slow a long-run elasticity closer to –1.0. See, for example, George Borjas, Labor Economics, 6th ed. (Columbus, OH: McGraw-Hill, 2013), Chapter 4: 'The evidence also suggests that the estimates of the long-run labor demand elasticity cluster around –1, so the long-run labor demand curve is indeed more elastic than the short-run curve.' " Sherk, available at http://report.heritage.org/ib4601.

Graves Garrett LLC

d) Unemployment Benefit Costs

We derived an average unemployment payout by calculating the expected weekly unemployment benefit amount. Based on current data, the expected unemployment weekly benefit amount of a worker making $7.65 an hour, on a 40 hour workweek, is $159.12 per week, for 20 weeks.[3] The expected unemployment weekly benefit amount of a worker making $10.99 an hour is $228.59 per week. The expected unemployment weekly benefit amount of a worker making $11.99 an hour is $249.39 per week. The expected unemployment weekly benefit amount of a worker making $12.99 an hour is $270.19 per week. We assume that workers will seek unemployment insurance for the full twenty weeks authorized under Missouri law, because unemployment attributable to an increase in the minimum wage is structural. In this case, structural unemployment occurs because workers' job skills do not meet the established "price floor" of labor, rendering the worker's skills unmarketable. Assuming an even distribution of workers affected, the average unemployment benefit cost to the state for a worker is calculated as follows:

- For Initiative Petitions 2018-213 through 2018-216, [($159.12+$228.59)/2]*20 = $3,877.10
- For Initiative Petitions 2018-196, 2018-197, 2018-200, 2018-202, and 2018-204 through 209, [($159.12+$249.39)/2]*20 = $4,085.10
- For Initiative Petitions 2018-198, 2018-199, 2018-201, 2018-203, 2018-210 through 2018-212, [($159.12+$270.19)/2]*20 = $4,293.10

Consistent with Dr. Macpherson's 2012 report, it would be reasonable for the Auditor to assume that 35% of unemployed workers will receive unemployment benefits. Combining these numbers leads to the following estimates:

Year of final prescribed wage increase	Estimate of Missouri Workers Unemployed by Initiative	Estimated Unemployment Amount Per Worker	Estimated Total Unemployment Premiums Paid	Average Annual Unemployment Premiums Paid by State
2021 ($11)	38,512	3,877.10	$52,260,206.32	$17,420,068.77
2022 ($11)	33,150	3,877.10	$44,984,052.75	$11,246,013.19
2022 ($12)	64,236	4,085.10	$91,843,669.26	$22,960,917.32
2023 ($12)	56,895	4,085.10	$81,347,617.58	$20,336,904.39

[3] https://labor.mo.gov/DES/Claims/calculator. A 2015 law decreased the unemployment benefit period from 20 weeks to 13 weeks, but the Supreme Court of Missouri struck down the law in July 2016.

2023 ($13)	95,281	4,293.10	$143,167,801.39	$28,633,560.28
2024 ($12)	50,220	4,085.10	$71,803,802.70	$11,967,300.45
2024 ($13)	85,861	4,293.10	$129,013,450.69	$21,502,241.78
2025 ($13)	77,256	4,293.10	$116,083,706.76	$16,583,386.68
2026 ($13)	69,349	4,293.10	$104,202,767.17	$13,025,345.90

3. Impact on State Income Tax Revenue

The 2012 analysis prepared by Dr. Macpherson may also be used as a reference in calculating the effect of the initiative petitions on state income tax revenue. Here, again, it is reasonable to assume that our "affected workers" are evenly distributed, though precise CPS–ORG data would also provide a reliable estimate. Here, the increased income tax revenue is the additional income tax paid by workers whose wages increase. There is a loss of revenue, however, in the form of decreased income tax paid by workers whose wages decrease and businesses who absorb the increased cost of labor, rather than passing it along to customers.

For the purposes of these estimates, we assume that workers work 40 hours a week and 52 weeks per year:

Year of final prescribed wage increase	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by IP	Estimate of Missouri Workers with Increased Wages	Annual Increase in Wages Paid to Workers who get Wage Increase in Final Year	Annual Decrease in Wages Paid to Workers now Unemployed
2021 ($11)	174,897	38,512	136,385	$382,969,080.00	$108,141,696.00

2022 ($11)	162,262	33,150	129,112	$342,405,024.00	$87,913,800.00
2022 ($12)	225,866	64,236	161,630	$596,737,960.00	$237,159,312.00
2023 ($12)	212,532	56,895	155,637	$550,332,432.00	$201,180,720.00
2023 ($13)	275,061	95,281	179,780	$822,673,280.00	$436,005,856.00
2024 ($12)	199,683	50,220	149,463	$505,184,940.00	$169,743,600.00
2024 ($13)	261,136	85,861	175,275	$774,715,500.00	$379,505,620.00
2025 ($13)	247,695	77,256	170,439	$726,750,021.03	$329,419,584.00
2026 ($13)	234,683	69,349	165,334	$679,192,072.00	$284,885,692.00

These net wage increases will lead to corresponding increases in state income tax collections. Traditionally, it has been assumed that about 50% of affected workers will pay 6% income tax, while the other 50% of workers pay no state income tax. This assumption may be less accurate at the higher wage increases contemplated by the Initiative Petitions. Accordingly, figures are also displayed assuming that about 75% of affected workers will pay 6% income tax, while the other 25% of workers pay no state income tax.

Annual Net Increase in Wages Paid To Workers	Annual Income Tax Increase from Wage Increase (50% pay tax)	Annual Income Tax Increase from Wage Increase (75% pay tax)
$274,827,384.00	$8,244,821.52	$12,367,232.28
$254,491,224.00	$7,634,736.72	$11,452,105.08
$359,578,648.00	$10,787,359.44	$16,181,039.16
$349,151,712.00	$10,474,551.36	$15,711,827.04
$386,667,424.00	$11,600,022.72	$17,400,034.08
$335,441,340.00	$10,063,240.20	$15,094,860.30
$395,209,880.00	$11,856,296.40	$17,784,444.60
$397,330,437.03	$11,919,913.11	$17,879,869.67
$394,306,380.00	$11,829,191.40	$17,743,787.10

Graves Garrett LLC

Based on these figures, Missouri businesses must also decide whether to pass along any increase in wage costs (wages and mandatory payments).[4]

Year of final prescribed wage increase	Annual Cost to Business from Increased Wage	Annual Decreased Corporate Income Tax if cost is fully absorbed	Annual Decreased Corporate Income Tax if cost is 50% absorbed
2021 ($11)	$412,266,214.62	$25,766,638.41	$12,883,319.21
2022 ($11)	$368,599,008.34	$23,037,438.02	$11,518,719.01
2022 ($12)	$642,388,413.94	$40,149,275.87	$20,074,637.94
2023 ($12)	$592,432,863.05	$37,027,053.94	$18,513,526.97
2023 ($13)	$885,607,785.92	$55,350,486.62	$27,675,243.31
2024 ($12)	$543,831,587.91	$33,989,474.24	$16,994,737.12
2024 ($13)	$833,981,235.80	$52,123,827.23	$26,061,913.62
2025 ($13)	$782,346,397.64	$48,896,649.85	$24,448,324.93
2026 ($13)	$731,150,265.50	$45,696,891.59	$22,848,445.80

Assuming businesses absorb half of the cost of increased wages, and 75 percent of affected workers pay the new, higher taxes, the effect on state income tax collections is estimated to be:

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss
2021 ($11)	($516,086.93)
2022 ($11)	($66,613.93)
2022 ($12)	($3,893,598.78)
2023 ($12)	($2,801,699.93)
2023 ($13)	($10,275,209.23)
2024 ($12)	($1,899,876.82)
2024 ($13)	($8,277,469.02)
2025 ($13)	($6,568,455.26)
2026 ($13)	($5,104,658.70)

[4] A healthcare benefit cost estimate is not available based on the time limitations imposed by this fiscal note.

Graves Garrett LLC

4. Sales tax revenue gain or loss

Projecting any increase in sales tax revenue resulting from an increased minimum wage would require the auditor's office to conclude, based on data separate and apart from the sheer conjecture typically offered by political activist groups: (1) the net effect on consumer disposable income and (2) the percentage of a consumer's disposable income that is spent on goods subject to the sales tax, taking into consideration that the scope of Missouri's sales tax has been truncated by a voter-approved constitutional amendment from November 2016.

Typically, the Auditor's office multiplies the total increase in worker earnings (which should be adjusted for employment reductions) and multiplies the result by 25 percent, then multiplying that figure by the Missouri the population weighted combined average state and local sales tax in Missouri, 7.81%.[5] Based on this estimate, the population-weighted combined average local sales tax is 3.585%.

However, it would be deceptive to fail to account for sales tax losses from workers whose wages are eliminated or sales tax losses from reduced business profits (attributable to the higher wages paid), which will lower spending by business owners. The first figure is calculable by determining the total annual wages (adjusted for employment deductions) for all workers who lose jobs due to a minimum wage hike, multiplied by 25 percent. The second number is calculable by multiplying the total increase in worker earnings (multiplied by 1.0765 to account for Social Security and Medicare taxes) by approximately 15 percent.[6]

Year of final prescribed wage increase	Annual Net Increase in Wages Paid To Workers	New Wages Spent on Sales Tax Items	Annual Cost to Business from Increased Wage	Annual Business Income No Longer Included in Sales Tax Base (50% passed-through)
2021 ($11)	$274,827,384	$68,706,846	$412,266,214.62	($61,839,932)
2022 ($11)	$254,491,224	$63,622,806	$368,599,008.34	($55,289,851)
2022 ($12)	$359,578,648	$89,894,662	$642,388,413.94	($96,358,262)
2023 ($12)	$349,151,712	$87,287,928	$592,432,863.05	($88,864,929)

[5] http://taxfoundation.org/sites/taxfoundation.org/files/docs/LOST--2015.png.
[6] This estimate would also need to be adjusted to reflect certain employers' mandate under the Affordable Care Act to provide healthcare coverage and pay 60 percent of such coverage.

2023 ($13)	$386,667,424	$96,666,856	$885,607,785.92	($132,841,168)
2024 ($12)	$335,441,340	$83,860,335	$543,831,587.91	($81,574,738)
2024 ($13)	$395,209,880	$98,802,470	$833,981,235.75	($125,097,185)
2025 ($13)	$397,330,437	$99,332,609	$782,346,397.64	($117,351,960)
2026 ($13)	$394,306,380	$98,576,595	$731,150,265.51	($109,672,540)

Accordingly, the annual estimations of the effects on state and local revenue, and total state economic impact are as follows:

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss	Annual Net Effect on State Sales Tax	Total Annual Effect on State Tax Revenue	Total Net Loss to State Government from Taxes and Unemployment Insurance	Annual Net Effect on Local Sales Tax
2021 ($11)	($516,086.93)	$290,127.11	($225,959.82)	($17,646,028.59)	$246,178.86
2022 ($11)	($66,613.93)	$352,067.34	$285,453.41	($10,960,559.78)	$298,736.43
2022 ($12)	($3,893,598.78)	($273,087.10)	($4,166,685.88)	($27,127,603.19)	($231,720.06)
2023 ($12)	($2,801,699.93)	($66,628.31)	($2,868,328.24)	($23,205,232.64)	($56,535.50)
2023 ($13)	($10,275,209.23)	($1,528,364.68)	($11,803,573.91)	($40,437,134.18)	($1,296,849.08)
2024 ($12)	($1,899,876.82)	$96,566.47	($1,803,310.36)	($13,770,610.81)	$81,938.65
2024 ($13)	($8,277,469.02)	($1,110,951.72)	($9,388,420.74)	($30,890,662.52)	($942,665.55)
2025 ($13)	($6,136,139.31)	($761,317.55)	($6,897,456.87)	($23,480,843.55)	($645,993.71)
2026 ($13)	($5,104,658.70)	($468,803.67)	($5,573,462.37)	($18,598,808.26)	($397,789.62)

5. Damage to small business

Additionally, any proponent or opponent fiscal note submission is required, pursuant to Missouri law, to state the impact of the initiative on small businesses. According to analysis by the Employment Policies Institute, 40 percent of the minimum wage workforce is employed at businesses with fewer than 50 employees. [7] The impact on extra costs to small business may be more significant than even this 40% figure suggests. Small businesses are more easily shut down by input price increases than large businesses, which have greater access to capital to weather the

[7] https://www.epionline.org/oped/who-really-employs-minimum-wage-workers/

storm. Clearly, small businesses that do not shut down due to increases in the minimum wage will pay higher costs, estimated at about 40% of business' total increased costs, described above.

Conclusion

In conclusion, the State Auditor should attempt to quantify the increased cost to be borne by state and local government entities through increased contracting costs as a result of an increase to the minimum wage. This direct cost is outlined in Section 1.

Indirect costs are outlined in Sections 2 through 5, and show a net loss. Although such second-order effects more difficult to predict, a net loss is easily the most likely outcome. Significantly, this result is only obtainable if the Auditor reviews both the "credit" and "debit" sides of the transfer of wealth from businesses to workers. The Auditor should refrain from taking the proponents' likely invitation to consider and present only the "credit," side, and should attempt to provide a complete picture of all effects of a minimum wage increase, including the loss of revenue to state and local governments from individuals who lose employment. Only conveying (or quantifying) the potential for gain, without fairly conveying the likelihood of net loss, would be deceptive and unfair.

The State Auditor's previous 2018 fiscal notes are a good model. Each of the fiscal notes for the Initiative Petitions should follow the already-established format and state that:

> "[O]perating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $## million decrease to a $## million increase depending on business decisions."

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

ABOUT THE MISSOURI RESTAURANT ASSOCIATION

With origins dating back to 1916, the Missouri Restaurant Association (MRA) is a statewide trade association representing over 1,500 member establishments. The association's membership is diverse, and includes full service, fast casual, and quick service restaurants, cafeterias, hotels, schools, institutions, contract feeders, and ancillary foodservice providers such as theme parks. The association has been successful in securing support from virtually every segment of the foodservice and hospitality industry.

MRA includes seven chapters as extensions of the parent organization, each with its own Officers, Board of Directors, and limited budget. The association is governed by a Board of Directors comprised of five Officers, 33 Directors, and each President of the seven affiliated chapters.

MRA is dedicated to serving the needs of the foodservice and hospitality industry, enhancing and improving its growth and development, assisting and educating its members in operating more effectively, improving the political and social environment in which the industry conducts business, for the benefit of its members, patrons, employees, and the well-being of the community.

David A. Macpherson is the E.M. Stevens Professor of Economics at Trinity University. He received undergraduate and doctoral degrees in economics from Pennsylvania State University.

Dr. Macpherson has published over 60 articles in leading economics and real estate journals including Review of Economics and Statistics, Industrial and Labor Relations Review, Journal of Labor Economics, Journal of Human Resources, and Journal of Real Estate Economics and Finance. His research has been funded by a variety of entities including the National Science Foundation, Florida Legislature, and the National Association of Realtors. He is co-author of the undergraduate labor economics text, Contemporary Labor Economics, as well as the principles of economics text, Economics: Private and Public Choice. He is included in Who's Who in Economics, Fourth Edition, which includes the 1,200 most frequently cited economists.

THE IMPACT OF A $10.10 MINIMUM WAGE ON JOBS AND TAXPAYER COSTS IN MISSOURI

June 2014

Economic Analysis by **Dr. David Macpherson**
Trinity University

Index

Executive Summary 4
Results 5
Technical Appendix 7

EXECUTIVE SUMMARY

Missouri's minimum wage of $7.50 is linked to rise in most years with the inflation rate. But some state legislators and labor unions would like to raise that figure even higher. For instance, a recent labor union-organized bus tour in the state promoted a $10.10 minimum wage in St. Louis.

Proponents have enthusiastically pointed to the benefits of the $10.10 policy. But there's been far less discussion of the costs involved with a $10.10-an-hour minimum wage—both the cost on employment, and the cost to taxpayers.

In this study, labor economist David Macpherson of Trinity University uses Census Bureau data to estimate the impact on Missouri's labor market and budget from raising the minimum wage to $10.10 an hour. He also provides separate results for the St. Louis metropolitan area.

Dr. Macpherson's employment estimates follow the methodology used by the nonpartisan Congressional Budget Office in its report earlier this year estimating the impact of a $10.10 minimum wage nationwide, which in turn relied on 60 different empirical studies to formulate its estimates.

Statewide, he finds that over 15,000 jobs would be lost at the $10.10 wage level—with 9,300 of those jobs being held by women. In the St. Louis metropolitan area, approximately 4,800 jobs would be lost from a $10.10 minimum wage.

The cost to taxpayers would be significant: There are approximately 40,000 state and local employees whose wages would be affected by the $10.10 increase in Missouri, for a combined cost to taxpayers of $87 million annually.

Raising wages is an admirable goal, but the evidence suggests that accomplishing this goal with a blunt wage mandate could do more harm than good.

RESULTS

The minimum wage is one of the most hotly-debated topics in the political world. Some legislators claim that a higher base wage will stimulate the economy; others claim that it will reduce jobs when affected employers can't offset the higher costs through higher prices.

Economists, who have studied the issue since the late 1940s, tend to take a skeptical view of minimum wage increases. Since the early 1990s, for instance, roughly 85 percent of the most credible research on the minimum wage points to job loss for less-skilled groups. The nonpartisan Congressional Budget Office (CBO), in an evaluation of President Obama's proposed $10.10 minimum wage increase, reviewed 60 different studies and concluded that the policy would eliminate 500,000 jobs if enacted.

The estimates that follow, of the employment impact of a higher minimum wage on Missouri's labor market, were performed by Dr. David Macpherson of Trinity University. Dr. Macpherson followed closely the methodology used by the CBO in its 2014 report. Dr. Macpherson also estimates the taxpayer costs of a higher minimum wage, as many state and local public employees will see their earnings increase when the minimum wage rises.

Dr. Macpherson's methodology is presented in detail in a technical appendix.

Estimated Employment Effects of a $10.10 Minimum Wage in Missouri

Statewide, Dr. Macpherson finds that increasing the minimum wage to $10.10 would eliminate over 15,000 jobs—approximately 60 percent of which are jobs held by women. The bulk of the job losses would be concentrated among individuals with a high school degree or less, and among people who work in the retail or leisure & hospitality industries.

(Note: Totals have slight discrepancies due to rounding.)

City-Specific Minimum Wage Employment Impacts

The city of St. Louis has been the subject of a number of protests calling for a higher minimum wage. Dr. Macpherson analyzed the employment impact of a $10.10 minimum wage in the St. Louis metropolitan area, providing breakouts by gender and education where the data permits. He estimates that the wage hike would eliminate approximately 5,000 jobs—just over half of which would be jobs held by women.

RESULTS CONTINUED

Missouri Taxpayer Costs of a $10.10 Minimum Wage

Dr. Macpherson estimates that approximately forty thousand state & local public employees would be affected by a minimum wage increase to $10.10 an hour. These additional wage costs translate to new costs for state and local taxpayers. Following the methodology described in detail in the technical appendix, Dr. Macpherson estimates both the straight wage cost of a $10.10 minimum wage, as well as the total compensation cost with Social Security, Medicare, workers compensation, and unemployment insurance included. Statewide, taxpayers would shoulder an additional $87 million in costs if the base wage was increased to $10.10 an hour and public employees were covered by the new wage.

Missouri Taxpayer Costs of a $10.10 Minimum Wage

TECHNICAL APPENDIX

Estimating Employment Loss and the Cost to State and Local Government of an Increase in the Minimum Wage

Dr. David Macpherson
E.M. Stevens Professor of Economics
Trinity University

This paper describes how we estimate the employment loss and the cost to state and local governments of a proposed increase in the minimum wage effective on January 1, 2015.

Data and Sample

First, we use data from the Current Population Survey (CPS) Outgoing Rotation Groups (ORG) from January 2011 through December 2013. For each worker in the sample, we calculate their wage rate. We also adjust the wage rate to reflect a forecast of wages in 2015. This is done in two steps. First, based on legislation enacted as of April 2014, we estimate the minimum wage that would be in effect in January 2015 for each state and city that we consider. If a state or city has an indexed minimum wage, we increase the January 2014 state or city minimum wage by the Congressional Budget Office (CBO) inflation forecast for 2014 of 1.7%.

Since we use data from 2011 through 2013, we also follow the CBO approach for forecasting what the wage distribution would be in 2015. This is done in two steps. First, we adjust wages observed prior to 2013 to reflect 2013 minimum wage legislation. For example, if the minimum wage in a state was $7.25 in 2011 and grew to $8.00 by 2013, anyone who earned between $7.25 and $8.00 in 2011 would have their wage increased to $8.00. After wages are adjusted to 2013 levels, we assume that all wages grow by 2.9% in 2014. Using the resulting 2015 distribution of wages, we adjust for minimum wage legislation that would increase the minimum between 2013 and 2015. Anyone earning a wage between the 2013 and 2015 minimum wage is assigned a wage matching the 2015 minimum wage.

After generating the forecast 2015 distribution of wages reflecting wage growth and existing minimum wage legislation, we identify workers who would be affected by additional changes to the 2015 minimum wage as those with wages between the predicted minimum wage legislated for 2015 (or up to $.25 below it) and the proposed minimum.

To estimate the number of affected workers, we take two steps. First, for each state, we estimate the number of affected workers for 2013. Second, we adjust the weights in the 2011 and 2012 data so that the state-specific number of affected workers implied by the 2011 and 2012 data matches that for 2013. This adjustment is designed to correct for the changing economic climate as the economy recovers from the great recession and to generate estimates that are as close as possible to the most recent data (2013). After we adjust the 2011 and 2012 weights, we estimate the number of affected workers by summing their earnings weights and dividing the total by 36 (the number of months of data).

[1] Also, following CBO, anyone earning up to $.25 less than the 2011 minimum wage would have their wage increased by the amount that the minimum wage increased (i.e. a $7.00 wage would be increased to $7.75 in this example). This approach is used to adjust for the fact that many workers round their answers when asked about their wage.

TECHINCAL APPENDIX CONTINUED

Employment Loss

To estimate employment loss, for each affected worker we compute:

L = e *(Proposed Min Wage /Min Wage 2015 – 1)

where e is an assumed elasticity of employment with respect to changes in the minimum wage, Min Wage 2015 is the minimum wage currently legislated for 2015, and Proposed Min Wage is the minimum wage that is being proposed for 2015. Thus, for example, if a worker is projected to earn the federal minimum of $7.25 in 2015, the expected reduction in employment resulting from a $10.10 minimum wage in 2015 if e=.45 is .45*(10.10/7.25 – 1) = .18. That is, for every 100 workers currently earning the federal minimum, the expectation is that 18 would lose a job if the minimum wage elasticity is .45.

To estimate the aggregate employment loss in the economy, we use earnings weights to sum L across workers. We also follow the Congressional Budget Office (2014) and use an elasticity of 0.15 for non-teenagers and 0.45 for teenagers.

Cost to State and Local Government

We use the same data to estimate the cost to state and local government of a proposed minimum wage hike. We apply the same definition of affected workers described above and estimate the number of state and local government workers affected by a minimum wage hike. We do not, however, assume that there is any job loss for state and local workers as we do not have an appropriate elasticity estimate specific to state and local workers. To the extent that state or local governments reduce hours or employment in response tothe minimum wage hike, our estimate of the cost of the hike would be overstated.

To estimate the increase in annual payroll cost resulting from an increase in the minimum wage, we estimate the increase in annual cost for each worker as:

(Proposed Min Wage-Min Wage 2015)*weekly hours*52

We then multiply the increase in annual cost by the earnings weight for each worker and sum across workers. Since an increase in wages also requires increased employer contributions for Social Security, Medicare, workers' compensation and unemployment insurance, we apply an estimate of the payroll tax rate for these mandatory programs to calculate the additional cost for these programs.

For each state and city considered, we provide tables summarizing the number of affected workers, employment loss, and the distribution of employment loss by sex, education, race, age and industry. Given that we use three years of data, a rule of thumb for minimum sample size required to achieve a reasonably accurate estimate of the employment loss is to require at least 30,000 people be in the relevant category. For example, if there are fewer than 30,000 people projected to be in a particular industry category, the Bureau of Labor Statistics would not report the estimate due to a lack of reliability based on the variance of the estimate relative to its mean.

In addition to the estimate of employment loss, for each state or city considered, we estimate the number of state and local workers that would be affected by the minimum wage hike and the total annual cost to government in terms of wages and total compensation. As with the employment estimates, we advise caution in interpreting estimates that are based on fewer than 30,000 affected workers.

[3] Congressional Budget Office, "The Effects of a Minimum-Wage Increase on Employment and Family Income," February 2014.

[4] For workers paid by the hour the reported hourly wage was used. For workers who are not paid by the hour, we calculate the hourly wage by dividing usual weekly earnings by usual weekly hours. Overtime pay was calculated as time and one-half for hours above 40 hours for hourly workers.

[5] The assumed payroll tax for Medicare and Social Security is 7.65 percent. To estimate the payroll tax for workers' compensation and unemployment insurance, we use unpublished data from the 2010 Employer Cost of Employee Compensation database for state and local workers in the relevant region in 2010.

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

Prepared for

Victor Allred versus Robin Carnahan and Thomas Schweich
Circuit Court of Cole County, Missouri

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

I. Introduction

This report was undertaken at the request of counsel representing plaintiffs in the case of Victor Allred versus Robin Carnahan and Thomas Schweich. As part of the basis of the lawsuit, the plaintiffs allege that the fiscal note summaries for proposed statutory initiative petitions 2012-084 and 2012-085 are insufficient and unfair. I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will

range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

The report is organized as follows. My qualifications to prepare this report are contained in Section II. Section III describes the data and records I relied upon for this report. Section IV reviews the estimated fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085. A summary and my conclusions are provided in Section VI.

II. Qualifications

I am currently the E.M. Stevens Professor of Economics at Trinity University in San Antonio, Texas. Previously, I was employed by Florida State University as Director of the Pepper Institute on Aging and Public Policy and the Rod and Hope Brim Eminent Scholar in Economics. I have taught both undergraduate and graduate Econometrics (statistical analysis of economic data), and Labor Economics. I have published over 50 articles in peer-reviewed professional journals.

I am currently serving on the editorial board of the *Journal of Forensic Economics*, which is a peer-reviewed journal. I have also served as a reviewer or 'referee' for 24 peer-reviewed journals, including the *Journal of Human Resources, Journal of Labor Economics, Quarterly Journal of Economics,* and the *Review of Economics and Statistics*. Based upon these experiences, I am very familiar with the scholarly and professional research process and the concept of peer review.

I have prepared numerous analyses and reports that use statistical methods as applied to specific questions. I have been responsible for developing the techniques and approaches required for these analyses. I routinely use computers and statistical software packages to assist me in my analytical work. I have been qualified as an expert witness on statistical analysis of employment discrimination and economic damages in state courts in Florida and Georgia and Federal Courts, and I have given expert testimony. I have prepared analyses and offered testimony on behalf of both plaintiffs and defendants.

Details of my qualifications are reflected in my current resume and legal cases, attached as Appendix A to the report.

III. Data and Records

I reviewed the following materials in preparing this report.

- Plaintiff's Complaint
- Material cited in footnotes below.

IV. Fiscal Impact

A. Overview

The proposed statutory initiative petitions 2012-084 and 2012-085 contain many elements in common. Both initiatives would increase the Missouri minimum wage to $8.25 per hour, alter the exemption for retail and service firms, raise the cash wage of tipped workers from 50% to 60% of the minimum wage, and increase the statute of limitation from two to three year for underpayment claims.

The initiatives differ in their linkage to the federal minimum wage. Initiative petition 2012-084 requires that the state minimum wage be automatically increased to the

federal minimum wage if it is higher than the state minimum wage. Initiative petition 2012-085 does not have such a linkage. It only requires that workers be paid the higher of the state minimum wage or the federal minimum wage. The linkage to the federal minimum wage will cause the state minimum wage to be higher under initiative petition 2012-084 over time. This is because the state minimum wage, in contrast to the federal minimum wage, is adjusted for inflation as measured by the Consumer Price Index.

An increase in the minimum wage in Missouri will affect state and local government entities in two ways. First, it will directly increase the cost of labor to state and local government entities. This will occur due to the increase in wages of state and local government workers earning between the existing minimum wage of $7.25 and the new minimum wage of $8.25.[1] In addition, workers laid off due to the minimum wage increase can collect unemployment benefits. The state government will bear the cost of unemployment benefits of these workers for the first 20 weeks. Second, state and local government may gain increased revenue through higher income tax and sales taxes paid by workers affected by the minimum wage who remain employed. However, state and local government will suffer reduced tax revenue to the extent the higher wage cost lowers profits of businesses.

The following sections estimate the cost and revenue effects to state and local government entities of the proposed minimum wage increase.

[1] Information about the minimum wage in Missouri is available at http://www.labor.mo.gov/DLS/minimumwage/.

B. Direct Labor Cost Impact on State and Local Government Budgets

There are two possible ways to measure the direct labor cost on state and local government budgets. First, one can use the information included in the fiscal notes prepared by the State Auditor regarding the proposed initiatives. It is important to note that the fiscal notes provide an incomplete and thus too low estimate of the direct labor cost. The fiscal notes indicate that the Office of Administration's (OA) Division of Personnel reported that as of September 2011 there were 834 state workers who would be affected by an increase of the minimum wage to $8.25 and the "approximate annual cost" would be more than $540,000.

This OA estimate excludes seasonal workers such as State Fair employees, State Parks Employees, and tax season staff. The Division of Revenue noted its labor cost would rise by $40,000. The Division of Natural Resources stated they have over 500 workers who would be affected by the increase, but did not provide an estimate of the cost. The State Fair hired 745 workers that would be affected, but no cost estimate was provided.

Thus, the cost to state government, based on the fiscal notes, would be more than $580,000.

The fiscal notes also provide an incomplete and thus too low measure of the cost to local government and public educational institutions. Many cities and educational institutions did not respond to Office of Auditor's survey or provide an estimate of the cost of the higher minimum wage. The City of Columbia, City of Jefferson, City of

Joseph, Linn State Technical College, and Metropolitan Community College did provide such an estimate. The total cost to these five institutions is $772,182.

Based on the fiscal notes, the cost to state and local government entities of the increase in the minimum wage to $8.25 will be more than $1,352,182.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can also be used to calculate the cost of the increased labor cost to state and local government entities in Missouri. Using the data from January 2010 to December 2011 Outgoing Rotation Group (ORG) CPS, I calculated that 17,089 state and local government workers would be affected by the minimum wage increase. I defined affected workers as those individuals earning between $7.00 and $8.24 per hour. Though the minimum wage was $7.25 per hour during this period, I also included those workers reporting earnings of $7.00 to $7.24 since some individuals may round their wage rate. I calculated the annual wage cost for each state and local government worker (i) in the ORG CPS as:

$$Annual\ Wage\ Cost_i = (\$8.25 - current\ wage_i) * weekly\ hours_i * 52.$$[2]

The average annual wage cost increase was $870. I summed the cost over each worker (i) to obtain the total wage cost to state and local government entities in Missouri of $14,866,430.

The increased wage cost is not the only labor cost to state and local government entities of the minimum wage increase. Employers are required to pay 7.65% of their wage costs in Social Security and Medicare taxes. Thus, the total labor cost of the minimum wage increase will be 1.0765 times $14,866,430 or $16,003,712.

---

[2] I assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour.

C. Unemployment Benefit Impact

The higher minimum wage will cause firms to reduce their level of employment.[3] As a result, the number of unemployed workers will increase. Thus, another important fiscal cost of the minimum wage increase is the cost of the unemployment insurance benefits for the workers laid off as a result of the minimum wage increase.

To calculate the cost to the unemployment benefits program, I first calculated the number of workers laid off. To do so, I calculated a probability of job loss for each affected Missouri worker (i) in the January 2010 to December 2011 ORG CPS:

$$Probability\ Job\ Loss_{\ i} = \frac{(\$8.25 - Current\ Wage_i)}{Current\ Wage_i} * elasticity_i.$$

I used the preferred employment elasticity (i.e., sensitivity of employment to wage changes) contained in Sabia and Burkhauser (2010), which was -0.6 for individuals aged 16 to 29 without a high school degree and -0.2 for all other individuals. The sole exception was for state and local government workers, where I assumed an elasticity of zero.[4] The sum across all affected workers yielded an estimated job loss of 5,745 jobs.

The next step was to calculate the weekly benefit for the average unemployed worker. Using the benefits calculator on the Missouri unemployment benefits web site and the wage income of average private-sector affected worker ($10,937), yields an average weekly benefit of $109.36[5]. The state of Missouri pays the first 20 weeks of benefits.[6] Thus, each eligible unemployed worker could receive a total of $2,187.20 in

---

[3] For a survey of research regarding the effect of the minimum wage on employment, see David Neumark and William L. Wascher, *Minimum Wages* (Cambridge, MA: MIT Press, 2008).
[4] Joseph J. Sabia and Richard V. Burkhauser, "Minimum Wages and Poverty: Will a $9.50 Federal Minimum Wage Really Help the Working Poor?" *Southern Economic Journal* (January 2010): 592-623.
[5] http://www.labor.mo.gov/DES/Claims/calculator.asp
[6] See http://www.labor.mo.gov/DES/Claims/

benefits paid for by the state of Missouri. These jobs are permanently eliminated and so it is appropriate to calculate the full amount of benefits for each worker.

Unemployment insurance, however, does not cover all unemployed workers. For example, it does not cover people who leave a job voluntarily, people looking for their first job, and re-entrants who previously left the labor force voluntarily. Furthermore, some individuals don't apply for benefits even though they are eligible. I assume that 35% of the unemployed workers will receive unemployment benefits based on analysis by Wenger (2001).[7]

The last step is to calculate the total cost to the Missouri unemployment benefits program. This done by multiplying the number of jobs lost (5,745) times the average benefit amount ($2,187.20) times the percent of unemployed individuals collecting benefits (35%). This calculation yields a figure of $4,397,510. This cost would be borne only during the first year of the minimum wage increase. The inflation adjustments in the minimum wage will also yield costs to the unemployment insurance program, but it is not possible to estimate the amount.

D. Impact on State Income Tax Revenue

The state of Missouri will gain increased revenue through higher income tax taxes paid by workers affected by the minimum wage who remain employed. However, it will

[7] Jeffery Wenger. "Divided We Fall: Deserving Workers Slip through America's Patchwork Unemployment Insurance System." *Economic Policy Institute*, 2001. Sabia and Burkhauser (2010) make the same assumption in their calculation of the amount of unemployment benefits generated by a minimum wage increase.

suffer reduced corporate income tax revenue to the extent the higher wage cost lowers profits of businesses.

To calculate the impact on individual income tax revenue, I again used data from January 2010 to December 2011 ORG CPS. I defined affected workers as those Missouri individuals earning between $7.00 and $8.24 per hour.[8] I used the following formula to estimate the change in income tax revenue:

$$\Delta Tax\ Revenue_i = (Tax_After_i - Tax_Before_i) - Prob_Job_Loss_i * Tax_Before_i,$$

where Tax_After_i is the income tax paid by worker i after the minimum wage increase. Tax_Before_i is the income tax paid by worker i after the minimum wage increase, and $Prob_Job_Loss_i$ is the probability of job loss for worker i. The first term shows the change in individual income tax revenue assuming no job loss and the second term shows the loss in tax revenue due to the employment loss caused by the minimum wage increase.

The income tax calculations were based on two assumptions.[9] First, the 50% percent of affected workers who were under the age 25 who were assumed to be dependents on another person's tax return. As a result, it was assumed that the affected workers' earnings were taxable at the maximum Missouri income tax rate of 6% both and after the minimum wage increase.[10] Second, all persons age 25 and older were assumed to be paying little or no income tax after exemptions and deductions. Thus, about 50% of the earnings increase will be taxed at a rate of 6%.

---

[8] I again assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour. The annual earnings level was calculated as the worker's wage rate times usual weekly hours worked times 52.

[9] The same assumptions are used in the State Auditor's fiscal notes for the initiatives.

[10] This assumption will overstate the revenue increase as 20% of affected workers under the age 25 are living by themselves and some of these individuals will not be a dependent on another person's tax return.

The tax calculations reveal an increase in income tax revenue increase to the state. Assuming no workers were laid off by the minimum wage increase, income tax revenue would rise by $6,043,534. However, the state will lose $1,965,446 in income tax revenue due to the lost earnings of private-sector workers no longer employed due to the minimum wage hike.[11] Thus, the net increase in individual income tax revenue is $4,078,088.

Businesses have three options to respond to the higher labor costs of a higher minimum wage. They can reduce their profits, raise prices, or lay off workers. Based on the 2010-2011 ORG CPS data, the minimum wage increase will raise private-sector labor costs by $192,620,900 if employment levels are not reduced. However, labor costs will be lowered by $55,240,790 due to the reduction in employment. Thus, labor costs will, on net, rise by $137,380,110. These increased labor costs may be either passed on to consumers through higher prices or reduced profits or more likely some combination of higher prices and reduced profits. Assuming that businesses absorbed all of the higher costs through reduced profits, the corporate income tax revenue would fall by the Missouri corporate income tax of 6.25% times the rise in labor costs of $137,380,110 * 1.0765 (to account for employer-paid Social Security and Medicare taxes) or $9,243,106.[12] Alternatively, if half of the higher labor costs were passed on to consumers, then corporate income tax revenue would fall by $4,621,553.

[11] The probability of job loss was calculated in the same manner as in the prior section.
[12] The corporate income tax for Missouri is available at: http://dor.mo.gov/business/corporate/

E. Impact on State and Local Sales Tax Revenue

To calculate the impact on state and local sales tax revenue the following approach was undertaken.[13] First, the total increase in worker earnings, adjusted for employment reductions, was calculated using the 2010-2011 ORG CPS. This figure was $152,246,540. Second, the increase in Missouri taxable sales was calculated as 25% of the earnings increase or $38,061,635. Third, the increase in sales tax revenue was calculated by multiplying the taxable sales change times the average state and local rate of 7.67% or $2,919,327.[14]

The higher minimum wage may decrease sales tax revenue to the extent that it reduces business profits, which will lower spending by business owners.

VI. Summary and Conclusions

I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

[13] The same general approach is used in the State Auditor's fiscal notes for the initiatives.
[14] The average rate comes from http://taxfoundation.org/news/show/27023.html

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

Abba P. Lerner Professor of Economics, FSU, 2000-2009.
Professor, Department of Economics, Florida State University, 1996-2009.
Director of Research, Pepper Institute on Aging and Public Policy, FSU, 1995-2000.
Associate Professor, Department of Economics, Florida State University, 1993-1996.
Research Associate, Pepper Institute on Aging and Public Policy, FSU, 1993-2001, 2003-2009.
Visiting Associate Professor, Department of Economics, Florida State University, 1992-1993.
Research Affiliate, Pepper Institute on Aging and Public Policy, FSU, 1992-1993, 2001-2003.
Associate Professor, Department of Economics, Miami University, 1991-1993.
Assistant Professor, Department of Economics, Miami University, 1987-1991.

Research Areas

Labor Economics, Labor Market Aspects of Pensions, Labor Unions, Racial and Gender Differences in the Labor Market, Minimum Wage, Deregulation.

Teaching Areas

Principles of Microeconomics and Macroeconomics, Intermediate Microeconomics, Money and Banking, Econometrics (undergraduate and graduate), Labor Economics and Labor Relations (undergraduate and graduate).

Books

Economics: Private and Public Choice, 14th edition, Southwestern: Cincinnati, OH, 2013, with James Gwartney, Richard Stroup, and Russell Sobel. Co-author on 10th, 11th, 12th, and 13th editions as well.

Instructor's Manual for *Economics: Private and Public Choice*, 14th edition, Southwestern: Cincinnati, OH, 2013. Author for instructor's manual for 10th, 11th, 12th, and 13th editions as well.

Union Membership and Earnings Data Book: Compilations from the Current Population Survey (2011 Edition), Bureau of National Affairs, Washington, D.C., with Barry Hirsch.

Previous Editions: *Union Membership and Earnings Data Book: Compilations from the Current Population Survey* (Washington: Bureau of National Affairs, 1994-2010).

Tables derived from the *Data Book* are included in U.S. Department of Commerce, *Statistical Abstract of the United States 2011,* 130th Edition (Washington: GPO, 2011), Tables 663, 665; *Statistical Abstract of the United States 2010,* 129th Edition (Washington: GPO, 2010), Tables 648, 650; *Statistical Abstract of the United States 2009,* 128th Edition (Washington: GPO, 2009), Tables 642, 644; *Statistical Abstract of the United States 2008,* 127th Edition (Washington: GPO, 2008), Tables 642, 644; *Statistical Abstract of the United States 2007*, 126th Edition (Washington: GPO, 2006), Tables 645, 647; *Statistical Abstract of the United States 2006*, 125th Edition (Washington: GPO, 2005), Tables 647, 649; *Statistical Abstract 2004-2005*, Tables 638, 640; *Statistical Abstract 2003*, Tables 656, 658; *Statistical Abstract 2002*, Tables 628, 630; *Statistical Abstract 2001*, Tables 637, 639; *Statistical Abstract 2000*, Tables 712, 714; *Statistical Abstract 1999*, Tables 718, 720; *Statistical Abstract 1998*, Tables 712, 714; *Statistical Abstract 1997*, Tables 688, 690; *Statistical Abstract 1996*, Tables 681, 683; *Statistical Abstract 1995*, Tables 695, 697; and in U.S. Department of Commerce, *State and Metropolitan Area Data Book, 1997-98*, 5th Edition (Washington: GPO, 1998), Table A-22.

Contemporary Labor Economics, 9th edition, McGraw-Hill: New York, NY, 2010, with Campbell McConnell and Stanley Brue. Co-author on 5th, 6th, 7th, and 8th editions as well.

Pensions and Productivity, W.E. Upjohn Institute for Employment Research: Kalamazoo, MI, 1998, with Christopher Cornwell and Stuart Dorsey.

Journal Publications (Economics)

"Computing Lost Profits in Business Interruption Litigation: A General Model," *Journal of Business Valuation and Economic Loss Analysis*, forthcoming, with Stanley Stephenson and Gauri Prakash-Canjels.

"Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," *Southern Economic Journal*, forthcoming, April 2012, with William Even.

"Growth of Participant Direction in Defined Contribution Plans," April 2010, pp. 190-208, *Industrial Relations*, with William Even.

"Managing Risk Caused by Pension Investments in Company Stock," *National Tax Journal*, September 2009, pp. 439-453, with William Even.

"Pension Investments in Employer Stock," *Journal of Pension Economics and Finance*, March 2008, pp. 67-93, with William Even.

"Defined Contribution Plans and the Distribution of Pension Wealth," *Industrial Relations*, July 2007, pp. 551-581, with William Even.

"Lost Profits Damages to New Businesses: Adjusting for Survival," *Journal of Business Valuation and Economic Loss Analysis*, October 2006, pp. 1-12, with Stanley Stephenson.

"Determinants and Effects of Employer Matching Contributions in 401(k) Plans," *Industrial Relations*, July 2005, pp. 525-549, with William Even.

"When Will the Gender Gap in Retirement Income Narrow?" *Southern Economic Journal*, July 2004, pp. 182-200, with William Even.

"Company Stock in Pension Funds," *National Tax Journal*, June 2004, pp. 299-313, with William Even.

"Wages, Sorting on Skill, and the Racial Composition of Jobs," *Journal of Labor Economics*, January 2004, pp.189-210, with Barry Hirsch.

"Racial and Ethnic Differences in Pension Wealth," *Research in Labor Economics*, 2003, pp. 203-226, with William Even.

"Do Terminated Employees Catch Up? Evidence From the Displaced Worker Survey," *Journal of Forensic Economics*, Spring/Summer 2003, pp. 185-199, with Michael Piette.

"Union Membership and Coverage Database from the Current Population Survey: Note," *Industrial and Labor Relations Review*, January 2003, pp. 349-354, with Barry Hirsch.

"The Wage and Employment Dynamics of Minimum Wage Workers," *Southern Economic Journal,* January 2003, pp. 676-690, with William Even.

"State-Level Estimates of Union Density, 1964 to Present," *Monthly Labor Review*, July 2001, pp. 51-55, with Barry Hirsch and Wayne Vroman (accompanying data online).

"The Changing Distribution of Pension Coverage," *Industrial Relations*, April 2000, pp. 199-227, with William Even.

"Occupational Age Structure and Access for Older Workers," *Industrial and Labor Relations Review*, April 2000, pp. 401-418, with Barry Hirsch and Melissa Hardy.

"Earnings, Rents, and Competition in the Airline Labor Market," *Journal of Labor Economics*, January 2000, pp. 125-155, with Barry Hirsch.

"Estimating Wage Differentials: When Does Cost-of-Living Matter?" *Economic Inquiry*, October 1999, pp. 577-598, with Mike DuMond and Barry Hirsch.

"Worker's Compensation Recipency in Union and Nonunion Workplaces," *Industrial and Labor Relations Review*, January 1997, pp. 213-236, with Barry Hirsch and Michael DuMond.

"Pensions and Training," *Industrial Relations*, January 1997, pp. 81-96, with Stuart Dorsey.

"The Consequences of Indexing Minimum Wages," *Contemporary Economic Policy,* October 1996, pp. 67-77, with William Even.

"Employer Size and Labor Turnover: The Role of Pensions," *Industrial and Labor Relations Review*, July 1996, pp. 707-728, with William Even.

"The Consequences of Non-FICA Status in State and Local Pensions," *Proceedings of National Tax Association Meetings*, 1996, with William Even.

"Wages and Gender Composition: Why Do Women's Jobs Pay Less?" *Journal of Labor Economics*, July 1995, pp. 426-471, with Barry Hirsch.

"Employer Size and Compensation: The Role of Worker Characteristics," *Applied Economics*, September 1994, pp. 897-907, with William Even

Victor Marshall, Walter Heinz, Helga Krueger, and Anil Verma, University of Toronto Press, 2001.

"The Effect of a Job Loss on the Employment Experience, Benefits, and Retirement Savings of Bank Officers," with Jill Quadagno and Jennifer Keene, in *Ensuring Health and Income Security for an Aging Workforce*, ed. Peter P. Budetti, W.E. Upjohn Institute, 2001.

"Earnings and Employment in Trucking: Deregulating a Naturally Competitive Industry," with Barry Hirsch, in *Regulatory Reform and Labor Markets*, ed. James Peoples, Kluwer Publishers, 1998.

"Gender-Related Differences in Pension Coverage," with William Even, in *Women and Work: A Handbook*, Garland Publishing, New York, NY, 1996.

"The Pension Coverage of Young and Mature Workers", with William Even, in *Pension Coverage Issues for the '90s*, eds. Richard Hinz, John Turner, and Phyllis Fernandez, U.S. Government Printing Office, Washington, D.C, 1994.

Working Papers (Economics)

"Deferred Compensation vs. Efficiency Wages: An Experimental Test of Effort Provision and
Self-Selection," with Tim Salmon and Kislaya Prasad, under review, *Journal of Business and Economic Organization*

"What Do Unions Do to Pension Performance?" with William Even, September 2011, under revision

"Teacher Salaries, State Collective Bargaining Laws, and Union Coverage" March 2011, with Barry Hirsch and John Winters.

"The Effects of the 2007-2009 Federal Minimum Wage Increases on Teen Employment," with William Even, under revision, July 2010.

"Participant Direction in Defined Contribution Plans," April 2006, with William Even, under revision.

"Do Pensions Impede Phased Retirement?" September 2004, with William Even, under revision.

Working Papers (Real Estate and Insurance)

"An Empirical Analysis of Socio-Demographic Factors and the Mispricing of Homeowners Insurance in Florida," under review *Journal of Financial Services Research*, with Ronald Cheung, Charles Nyce, Kathleen McCullough, and Cassandra Cole.

"The Impact of No-Fault Legislation on Automobile Insurance Premiums," revised and resubmitted to *North American Actuarial Journal*, with Cassandra Cole, Kevin Eastman, Patrick Maroney, and Kathleen McCullough.

Funded Projects

Employment Policies Institute, 5/2010-7/2010, $16,500 (Trinity University portion), "Employment Effects of the 2007-2009 Federal Minimum Wage Increases," with William Even.

National Science Foundation, 9/2009-8/2012, $125,866 (Trinity University portion), "Incentives in the Workplace: An Experimental Examination of How Wage Differences Across Time and Among Peers Affect Productivity and Self-Selection," with Tim Salmon, Kislaya Prasad, and Hyejin Ku.

Florida Legislature, 10/2007-6/2009, $175,000, "Child Support Guidelines," with Stefan Norrbin and Thomas McCaleb.

Florida Legislature (through University of Florida), 12/2006-9/2007, $223,000, "Analysis of Save our Homes Amendment," with Dean Gatzlaff.

U.S. Administration on Aging (through University of South Florida), 5/2005-9/2007, $175,000, "Employment in the Long-Term Care Industry: The Importance of Recruitment and Retention," with William Even.

Florida Legislature, 2/2003-8/2004, $175,000, "Child Support Guidelines," with Stefan Norrbin and Thomas McCaleb.

Florida Department of Environmental Protection, 6/2002-2/2003, $94,157, "Affordability Index," with Stefan Norrbin and William Serow.

University of South Carolina, 4/2000-11/2000, $10,000, "Minority Homeownership in South Carolina," with Stacy Sirmans.

Florida Department of Business and Professional Regulation, 3/1999-6/1999, $21,739, "Forecasting Housing Demand in Florida," with Stacy Sirmans.

University of South Carolina, 4/1999-11/1999, $10,000, "Forecasting Housing Demand in South Carolina," with Stacy Sirmans.

Florida State University, 6/1999-8/1999, $7,500, "Support for Preparing ECO 2000 as a Web-Based Course."

TIAA-CREF, 8/1998-8/1999, $23,000, "Determinants of Savings in Supplemental Pension Plans: A Case Study of Pension Choices in Higher Education," with Melissa Hardy and Larry Hazelrigg.

Florida Department of Business and Professional Regulation, 4/1998-6/1998, $16,638, "Forecasting Seniors' Demand for Housing in Florida," with Stacy Sirmans.

Florida Department of Business and Professional Regulation, 12/1997-6/1998, $18,472, "Housing Price Appreciation in Orlando and Tampa," with Stacy Sirmans.

Florida State University, 6/1998-8/1998, $7,500, "Support for Preparing ECO 2000 as a Web-Assisted Course."

Florida Department of Business and Professional Regulation, 3/1997-6/1997, $17,898, "Minority Homeownership in Florida," with Stacy Sirmans.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 12/1996-8/1997, $20,000, "The Impact of Rising 401(k) Pension Coverage on Retirement Income," with William Even.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 3/1996-6/1997, $15,000, "The Determinants of 401(k) Participation and Contribution Levels," with William Even.

Florida Department of Business and Professional Regulation, 4/1996-6/1996, $22,702, "Forecasting the Number of New Florida Real Estate Licensees," with Stacy Sirmans.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 3/1995-6/1996, $15,000, "Explaining the Decline in Pension Coverage of Less Educated Workers," with William Even.

Florida State University COFRS Grant, 6/1994-8/1994, $8,000, "The Relative Compensation and Quality of Public and Private Sector Workers."

W.E. Upjohn Institute for Employment Research, 3/1994-12/1995, $35,000, "Pensions and Productivity," with Stuart Dorsey and Christopher Cornwell.

Florida Division of Workers' Compensation, 1/94-12/1995, $100,000, "Worker's Compensation Recipency in Union and Nonunion Workplaces," part of a service contract titled "Research Partnership with the Division of Workers' Compensation," co-investigator (one of several).

University of Wisconsin Institute for Research on Poverty Small Grant Program, 7/1993-6/1994, $15,000, "Racial Composition, Wages, and Quality Sorting," with Barry Hirsch.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 7/1993-6/1993, $10,000, "Trends in Individual and Family Pension Coverage," with William Even.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 6/1992-5/1993, $10,000, "The Pension Coverage of Young and Mature Workers," with William Even.

U.S. Department of Labor, Pension Welfare and Benefit Administration and American Society of Pension Actuaries, 6/1991-5/1992, $10,000, "A Conference on Current Pension Policy Issues," with William Even.

Miami University Faculty Research Grant, 6/1991-8/1991, $4,000, "Projected Growth in Retiree Health Insurance Liabilities."

Ohio Board of Regents Research Challenge Grant, 1/1990-12/1990, $4,980, "Proposal to Enhance the Data Library of the Center of Pension and Retirement Research," with William Even and Samuel Williamson.

Miami University Faculty Research Grant, 6/1990-8/1990, $4,000, "The Role of Firm Size in Pension Coverage and Options."

Miami University Faculty Research Grant, 6/1989-8/1989, $4,000, "Declining Unionism and the Gender Wage Gap," with William Even.

Participation in National Meetings

Panel Discussant, American Real Estate and Urban Economics Association/ASSA meetings, January 2008.

Presented, "Employee Turnover in the Long-Term Care Industry," at Academy Health Annual Research Meetings, June 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at International Atlantic Economic Society meetings, October 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at International Atlantic Economic Society meetings, October 2005.

Presented, "Replacing Earnings After Termination: Evidence from the Displaced Worker Survey," at the Allied Social Science Association/National Association of Forensic Economics, January 2002.

Presented, "Labor Market Transitions of Older Workers," at the Allied Social Science Association/Society of Government Economists meetings, January 1999.

Presented, "Why has the Loss in Pension Coverage Accelerated Among Less Educated Workers?" at the American Economic Association Meetings, 1995.

Presented, "Wages and Gender Composition: Why Do Women's Jobs Pay Less?" at the American Economic Association Meetings, 1994, with Barry Hirsch.

Presented, "Pensions, Labor Turnover, and Employer Size" at the American Economic Association Meetings, 1993, with William Even.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the American Economic Association meetings, 1992, with William Even.

Participation in Regional Meetings

Presented "Unions and Pension Performance: The Role of Pension Design," at Southern Economics Association meetings, November 2009.

Panel member, "Recent Federal Reserve Policy: An Evaluation" at Southern Economics Association meetings, November 2009.

Discussant, "Topics in Health Economics," at Southern Economics Association meetings, November 2009.

Discussant, "Teacher Pay, Principals, and Schooling," at Southern Economics Association meetings, November 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Western Economic Association meetings, July 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Eastern Economic Association meetings, February 2009.

Panel Discussant at the Southern Economic Association meetings, November 2008.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Southern Economic Association meetings, November 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Western Economic Association meetings, July 2008.

Chair "Pensions and Retirement" Session at Southern Economic Association meetings, November 2007.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Southern Economic Association meetings, November 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Southern Economic Association meetings, November 2006.

Panel Discussant, Southern Economic Association meetings, November 2005.

Presented, "Do Pensions Impede Phased Retirement?" at the Southern Economic Association meetings, November 2004.

Presented, "When Will the Gender Gap in Retirement Income Narrow?" at the Southern Economic Association meetings, November 2003.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Southern Economic Association meetings, November 2002.

Presented, "Racial Composition, Wages, and Quality Sorting," at the Southern Economic Association meetings, November 1999.

Presented, "Racial and Ethnic Differences in Pension Coverage and Benefit Levels," at the Southern Economic Association meetings, November 1998.

Presented, "Factors Influencing Participation and Contribution Levels in 401(k) Plans," at the Western Economics Association meetings, July 1998.

Presented, "Aging at Work: Employment Determination, Firm Strategies, and Public Policy in the United States," at the Western Economic Association meetings, July 1994.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Western Economic Association meetings, July 1992.

Presented "Plant Size and the Decline of Unionism," at the Southern Economic Association meetings, 1989, with William Even.

Panel Discussant, Southern Economic Association meetings, November 1989.

Presented "The Labor Force Participation and Earnings Profiles of Married Female Immigrants," at the Southern Economic Association meetings, November 1988.

Presented "Pensions, Screening, and the Gender Wage Gap," at the Southern Economic Association meetings, November 1988.

Session Chair and Panel Discussant at the Southern Economic Association meetings, November 1988.

Participation in Invited Seminars, Conferences, and other Presentations

Presented, "Teaching Macroeconomics During Troubled Times," at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2012.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Pennsylvania State University, April 2010.

Presented, "The Parallels Between the Japanese Economic Crisis of the 1990s and the US Today" at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2010.

Chair "Minimum Wage & EITC" Session at Society of Labor Economists meetings, May 2009.

Presented "Participant Direction in Defined Contribution Plans," at Lehigh University, April 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Association of Private Enterprise Education meetings, April 2009.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Trinity University, October 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Georgia State University, April 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Association of Private Enterprise Education meetings, April 2008.
Presented, "Improving Pension Coverage at Small Firms," at Hudson Institute, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Society of Labor Economics meetings, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Association of Private Enterprise Education meetings, April 2006.

Presented, "Participant Direction in Defined Contribution Plans," at University of Wisconsin-Milwaukee, April 2006.

Invited Panel Participant for Pepper Foundation and Center Symposium on pension reform, Washington, DC, February 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at West Virginia University, April 2005.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at the University of Kentucky, November 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the Federal Reserve Bank of Atlanta, April 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the University of Oklahoma, February 2004.

Presented, "Tracking Union and Nonunion Wages in the U.S.: Can the Evidence be Reconciled?" at the Middlebury Annual Conference on Economic Issues, April 2002.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Miami University Center for Pension and Retirement Research Conference, June 2001.

Presented, "Benefits and Worker Productivity," Benefits for the Workplace of Tomorrow Conference, Wharton School, University of Pennsylvania, May 2001.

Participant, Innovations in Managing the Financial Risks of Retirement Conference, Wharton School, University of Pennsylvania, May 2000.

Presented "Using Hi-Tech in Large Lectures," at Association of Private Enterprise Education meetings, April 2000.

Presented "Employee Participation in 401(k) Plans," at University of Wisconsin-Milwaukee, October 1999.

Presented "Gender, Race, and Ethnicity in the Labor Market," as part of the Smith Chair course in Labor Economics at Brigham Young University, September 1999.

Presented, "The Decline in Pension Coverage Among Less Educated Workers," at the Florida State University Economics Department Seminar Series, 1996.

Presented, "Children's Effects on Women's Labor Market Attachment and Earnings" at the Conference on the Changes in Working Time in Canada and the United States, Canadian Employment Research Forum, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Ohio State University Economics Department Seminar Series, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Florida State University Economics Department Seminar Series, 1995.

Presented, "Employer Size and Labor Turnover: The Role of Pensions," at Syracuse University, 1995.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" while visiting scholar at the Federal Reserve Bank of Cleveland, 1995.

Presented, "Trends in Individual and Household Pension Coverage," at the Miami University Center for Pension and Retirement Research Conference, 1994.

Presented, "Racial Composition, Quality Sorting, and the Black-White Wage Gap" at the University of Wisconsin, Institute for Research on Poverty, Small Grants Workshop, 1993, with Barry Hirsch.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Florida State University Economics Department Seminar Series, 1992.

Participant at National Bureau of Economic Research (NBER) Labor Studies meetings of the Summer Institute, 1992.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Miami University Conference on Current Pension Policy Issues, 1992.

Organizer and participant at conference on "Contemporary Issues in Pension Economics," hosted by the Center for Pension and Retirement Research, Miami University, 1990.

Presented "The Effect of International Competition on Union and Nonunion Wages," at the University of Cincinnati Seminar Series, 1987.

Fiscal Note Summary

State and local governments estimate no direct costs or savings from the proposal, but operating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $13.1 million decrease to a $279 million increase depending on business decisions.

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Richard Von Glahn regarding a proposed statutory amendment to Chapter 290, Version 3 (2018-198)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Richard Von Glahn on April 3, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that the proposed law changes, repeals, or modifies by implication, or may be construed by some persons to change, repeal, or modify by implication, the following provisions of the Missouri Revised Statutes: Section 285.055 and Sections 290.502, 290.512, 290.527, and 290.528. The proposed law enacts two new sections to be known as sections 290.526 and 290.529.

Be it enacted by the people of the state of Missouri:

Sections 290.502, 290.512, and 290.527 of the Revised Statutes of Missouri are amended, and two new sections to be known as sections 290.526 and 290.529 are enacted to read as follows:

290.502. 1. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, effective January 1, 2007, every employer shall pay to each employee wages at the rate of $6.50 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher.

2. The minimum wage shall be increased or decreased on January 1, 2008, and on January 1 of successive years, by the increase or decrease in the cost of living. On September 30, 2007, and on each September 30 of each successive year, the director shall measure the increase or decrease in the cost of living by the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) or successor index as published by the U.S. Department of Labor or its successor agency, with the amount of the minimum wage increase or decrease rounded to the nearest five cents.

3. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, and notwithstanding subsection (1) of this section, effective January 1, 2019, every employer shall pay to each employee wages at the rate of not less than $9.00 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher. Thereafter, the minimum wage established by this subsection shall be increased each year by $1.00 per hour, effective January 1 of each of the next four years, until it reaches $13.00 per hour, effective January 1, 2023. Thereafter, the minimum wage established by this subsection shall be increased or decreased on January 1, 2024, and on January 1 of successive years, per the method set forth in subsection (2) of this section. If at any time the federal minimum wage rate is above or is thereafter increased above the minimum wage then in effect under this subsection, the minimum wage required by this subsection shall continue to be increased pursuant to this subsection (3), but the higher federal rate shall immediately become the minimum wage required by this subsection and shall be increased or decreased per the method set forth in subsection (2) for so long as it remains higher than the state minimum wage required and increased pursuant to this subsection.

4. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (3) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsections (1) and (2) of this section shall continue to be subject to those subsections.

290.512. 1. [No] Except as provided in subsection (2) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of fifty percent of the minimum wage rate specified in sections 290.500 to 290.530, however, total compensation for such employee shall total at least the minimum wage specified in sections 290.500 to 290.530, the difference being made up by the employer.

2. Beginning January 1, 2019 and effective on the dates set forth below in this subsection, and notwithstanding the percentage established in subsection (1) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of the percent set forth below in this subsection of the minimum wage rate specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530:

(1) fifty-five percent, effective January 1, 2019;
(2) sixty percent, effective January 1, 2020;
(3) sixty-five percent, effective January 1, 2021;
(4) seventy percent, effective January 1, 2022;
(5) seventy-five percent, effective January 1, 2023;
(6) eighty percent, effective January 1, 2024;
(7) eighty-five percent, effective January 1, 2025;
(8) ninety percent, effective January 1, 2026;
(9) ninety-five percent, effective January 1, 2027;
(10) one hundred percent, effective January 1, 2028;

however, in all cases, total compensation for such employee shall total at least the minimum wage specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530, the difference being made up by the employer.

3. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (2) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsection (1) of this section shall continue to be subject to that subsection at the percentage set forth therein of the minimum wage rate specified in subsections (1) and (2) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530.

[2.] 4. If an employee receives and retains compensation in the form of goods or services as an incident of his employment and if he is not required to exercise any discretion in order to receive the goods or services, the employer is required to pay only the difference between the fair market value of the goods and services and the minimum wage otherwise required to be paid by sections 290.500 to 290.530. The fair market value of the goods and services shall be computed on a weekly basis. The director shall provide by regulation a method of valuing the goods and services received by any employee in lieu of the wages otherwise required to be paid under the provisions of sections 290.500 to 290.530. He shall also provide by regulation a method of determining those types of goods and services that are an incident of employment the receipt of which does not require any discretion on the part of the employee.

290.526. Notwithstanding any other provision of law, as of the effective date of this section, municipalities, cities, counties, towns, and villages shall have the power to establish, mandate, or otherwise require an employer to pay wages to an employee who performs work while physically present within the boundaries of the municipality, city, county, town, or village, including employees not subject to the state or federal minimum wage, at a minimum rate per hour that exceeds the rate set under state or federal law, except that such a requirement shall not apply to employees employed by another local, state, or federal government entity or instrumentality.

290.527. Any employer who pays any employee less wages than the wages to which the employee is entitled under or by virtue of sections 290.500 to 290.530 shall be liable to the employee affected for the full amount of the wage rate and an additional [equal] amount equal to twice the unpaid wages as liquidated damages, less any amount actually paid to the employee by the employer and for costs and such reasonable attorney fees as may be allowed by the court or jury. The employee may bring any legal action necessary to collect the claim. Any agreement between the employee and the employer to work for less than the wage rate shall be no defense to the action. All actions for the collection of any deficiency in wages shall be commenced within [two] three years of the accrual of the cause of action.

290.529. Except in the circumstances set forth in section 290.523, all the provisions of sections 290.500 to 290.530 are severable. If any provision, including any section, subsection, subdivision, paragraph, sentence, or clause, of sections 290.500 to 290.530, or the application thereof to any person or circumstance, is found by a court of competent jurisdiction to be invalid, unconstitutional, or unconstitutionally enacted, such decision shall not affect other provisions or applications of sections 290.500 to 290.530 that can be given effect without the invalid, unconstitutional, or unconstitutionally enacted provision or application.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-198)

Subject

Initiative petition from Richard Von Glahn regarding a proposed amendment to Chapter 290 of the Revised Statutes of Missouri. (Received April 4, 2017)

Date

April 24, 2017

Description

This proposal would amend Chapter 290 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis,** the **St. Louis County Board of Elections,** the **Board of Election**

Commissioners City of St. Louis, the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners**.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided information as proponents of the proposal to the State Auditor's office.

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations. They do not expect that the enactment of this proposal would result in any other increased costs to their office.

Officials from the **Department of Agriculture** indicated there is no fiscal impact to their department for this initiative petition.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department since public employers are exempt from the new provisions proposed.

Officials from the **Department of Health and Senior Services** indicated this proposal would have no direct fiscal impact on their department since government employees are exempt from its provisions. However, employees of certain entities that receive funding through the department's budget would be impacted, such as Medicaid Home and Community Based Services vendors/providers and Area Agencies on Aging.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department defers to the Office of Administration to determine the fiscal impact of this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department. Their department defers to the Office of Administration for a state impact.

Officials from the **Department of Public Safety - Office of the Director** indicated they will defer to the response provided for this initiative petition by the Office of Administration - Human Resources.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration.

Officials from the **Governor's office** indicated there should be no added cost or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Officials from the **Office of Administration** indicated the proposal amends Sections 290.502, 290.512, 290.527, RSMo and adds Sections 290.526 and 290.529, RSMo.

Section 290.502, RSMo, increases the minimum wage to $9.00 per hour, beginning January 1, 2019 and by another $1.00 per hour each year until it reaches $13.00 per hour beginning January 1, 2023. Thereafter, the minimum wage will be adjusted annually based on the increase/decrease in the cost of living.

Section 290.512, RSMo, increases the base salary for tipped employees. Effective January 1, 2019, employers must pay at least 55% of the minimum wage rate to tipped employees. Each year thereafter the rate increases by five percent until January 1, 2028 when tipped employees should be paid 100% of the minimum wage as established in Section 290.502, RSMo.

The proposal exempts public employers from both requirements; therefore there would be no cost to the State of Missouri.

Section 290.526 allows municipalities, cities, counties, towns and villages to implement a minimum wage that exceeds the state or federal minimum wage rate, but exempts local, state or federal government entities from the higher minimum wage rate.

Because no tax rates are affected, there is no direct impact on general and total state revenues. However, these proposals may have several indirect affects which could impact revenue collections by an unknown amount, including but not limited to:

- Increased wages for certain employees. According to the US BLS, in 2015, Missouri had 57,000 hourly employees earning wages at or below the federal minimum wage;[1]
- Increased consumption by those employees;
- Lower overall employment (if employers choose to hold costs steady);
- Lower business investment (if employers' payrolls increase);
- Increased prices as firms pass–through labor costs.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office, as it would not apply to state employees.

[1] http://www.bls.gov/opub/reports/minimum-wage/2015/home.htm

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this petition may have a small negative fiscal impact on their city as a result of the increased hourly minimum wage being higher than the hourly rate paid some city employees.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they are not able to estimate any significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact since they are excluded under the public employer definition in section 4.

Officials from the **Missouri State University** indicated no fiscal impact.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated the wording is unclear as to whether Colleges/Universities are included in this petition. In assuming they are included they calculate the following significant fiscal impact to their university.

Combined Work Study Students and Non-Exempt Staff Minimum Wage Increase:
Proposed $9.00: increases our payroll by $ 455,840.00 annually
Proposed $10.00: increases our payroll by $ 835,360.00 annually
Proposed $11.00: increases our payroll by $1,251,928.00 annually
Proposed $12.00: increases our payroll by $1,701,646.00 annually
Proposed $13.00: increases our payroll by $2,039,200.00 annually

This proposal would be detrimental to the operations of their university.

Officials from the **Kansas City Board of Election Commissioners** indicated no fiscal effect on their operations.

Officials from the **Platte County Board of Elections** indicated no fiscal impact.

Officials from the **Jackson County Election Board** indicated this petition does not have a fiscal impact on their office.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided the following information as proponents of this initiative petition.

Re: Fiscal Impact Analysis of Minimum Wage Initiative Petitions

Summary of Proposed Minimum Wage Initiatives						
Version Number		**Initiative Summary**				
Version Number Used in This Impact Analysis	**Version Number Assigned by the Secretary of State**	**Minimum Wage Level**	**Matches the Federal Minimum Wage When It Is Higher**	**Stronger Penalty for Wage Violations**	**Tipped Worker Minimum Wage (as a % of Full Minimum Wage)**	**Allows Localities to Enact a Local Minimum Wage**
Version 13	2018 - 204	$12 by 2023 *(Start at $8.60 and $.85/year)*	Yes	Yes	No Change	No
Version 14	2018 - 205	$12 by 2023 *(Start at $8.60 and $.85/year)*	Yes	No	No Change	No
Version 15	2018 - 206	$12 by 2023 *(Start at $8.60 and $.85/year)*	No	No	No Change	No
Version 16	2018 - 207	$12 by 2024 *(Start at $8.50 and $.70/year)*	Yes	Yes	No Change	No
Version 17	2018 - 208	$12 by 2024 *(Start at $8.50 and $.70/year)*	Yes	No	No Change	No
Version 18	2018 - 209	$12 by 2024 *(Start at $8.50 and $.70/year)*	No	No	No Change	No

Version 19	2018 - 210	$13 by 2025 *(Start at $8.50 and $.75/year)*	Yes	Yes	No Change	No
Version 20	2018 - 211	$13 by 2025 *(Start at $8.50 and $.75/year)*	Yes	No	No Change	No
Version 21	2018 - 212	$13 by 2025 *(Start at $8.50 and $.75/year)*	No	No	No Change	No
Version 22	2018 - 213	$11 by 2022 (Start at $8.75 and $.75/year)	Yes	Yes	No Change	No
Version 23	2018 - 214	$11 by 2022 (Start at $8.75 and $.75/year)	Yes	No	No Change	No
Version 24	2018 - 215	$11 by 2022 (Start at $8.75 and $.75/year)	No	No	No Change	No
Version 25	2018 - 216	$11 by 2021 (Start at $9; $1/year)	Yes	Yes	No Change	No
Version 26	2018 - 200	$12 by 2022 (Start at $9; $1/year)	Yes	No	No Change	No
Version 27	2018 - 201	$13 by 2023 (Start at $9; $1/year)	Yes	No	No Change	No
Version 28	2018 - 202	$12 by 2024 (Start at $8.25; .75/year)	Yes	Yes	100%	No
Version 29	2018 - 203	$13 by 2025 (Start at $8.50; .75/year)	Yes	Yes	60%	No
Version 30	2018 - 196	$12 by 2022 (Start at $9; $1/year)	Yes	Yes	100%	Yes
Version 31	2018 - 197	$12 by 2022 (Start at $9; $1/year)	Yes	Yes	60%	Yes
Version 32	2018 - 198	$13 by 2023 (Start at 9; $1/year)	Yes	Yes	100%	Yes

Version 33	2018 - 199	$13 by 2023 (Start at $9; $1/year)	Yes	Yes	60%	Yes

This letter is from Lara Granich and Missouri Jobs with Justice Voter Action, proponents of the above-referenced Minimum Wage Initiative Petitions. Pursuant to RSMo. Section 116.175, we write to submit the following fiscal impact information to assist your office in its analysis of the fiscal impact of the above-mentioned seven proposed Minimum Wage Initiative Petitions.

Our analysis estimates the impact of the proposed Minimum Wage Initiative Petitions on state and local sales and personal income tax revenue in Missouri. We follow the process that has been used in the past to estimate the impact of minimum initiative petitions on state and local sales and personal income tax revenue, with some refinements. We also address certain claims that have been made by opponents of similar initiative petitions in the past.

As these petitions exclude public workers from the proposed minimum wage increases, we do not include in our analysis an estimate of the impact on state and local payroll costs of the proposed Minimum Wage Initiative Petitions.

I. Estimate of Number of Workers Affected Statewide and the Impact on Their Wages

Table 1. Summary of the Number of Affected Workers and Aggregate Wage Increases for Missouri in the Final Year of Minimum Wage Implementation.

Proposal	Year of Peak Minimum Wage (MW)	Proposed Peak MW	Tipped MW in Peak MW Year	Workers Affected by MW increase	Aggregate Annual Wage Increase in Nominal Dollars
13,14,15[a]	2023	$ 12.00	$ 6.00	835,350	$4,358,798,129
16,17,18[a]	2024	$ 12.00	$ 6.00	819,652	$4,209,438,048
19,20,21[a]	2025	$ 13.00	$ 6.50	900,788	$5,309,336,662
22,23,24[a]	2022	$ 11.00	$ 5.50	738,515	$3,347,138,756
25	2021	$ 11.00	$ 5.50	761,164	$3,469,534,559
26	2022	$ 12.00	$ 6.00	852,284	$4,510,285,824
27	2023	$ 13.00	$ 6.50	949,801	$5,667,065,534
28	2024	$ 12.00	$ 9.60	832,328	$4,288,614,460
29	2025	$ 13.00	$ 7.80	905,942	$5,332,471,496
30	2022	$ 12.00	$ 8.40	864,090	$4,558,317,729
31	2022	$ 12.00	$ 6.84	855,887	$4,523,341,931

32	2023	$ 13.00	$ 9.75	948,421	$5,745,051,956
33	2023	$ 13.00	$ 7.54	942,566	$5,685,951,766

Notes: Author's Analysis of American Community Survey (ACS) Data from 2014.
(a) Since these proposals only vary on non-economic factors, their economic and fiscal impacts are treated as equal for the purposes of this report.

Across the proposals analyzed, the total aggregate wage increase for workers in Missouri ranges from a low of $3.347 billion (Proposals 22-24) to a high of $5.745 billion under Proposal 32. While some proposals have the same final impact numbers, they have different impacts in the initial years (not listed) based on the relative pace of increases in earlier years. A full, year-by-year impact analysis is presented in Appendix Tables A1 through A13 below.

The wage impact of an increase in the minimum wage for the state of Missouri is calculated using the following procedure. The American Community Survey (ACS) Public Use Micro Sample for the most recent year available (2014) for the state of Missouri was downloaded from the US Census Bureau. The American Community Survey was chosen over the Current Population survey because the ACS has a significantly larger sample. We followed the method of Perry, Thomason, and Bernhardt (2016) for calculating an hourly wage rate from the ACS based on observed total annual wage income, typical hours worked each week and weeks worked per year. Since ACS income figures are clustered around whole-numbers, we smoothed the wage distribution by randomly adding or subtracting $0.25 from each wage figure.

Wage adjustments were made only for those individuals earning less than the proposed minimum wage, or proposed tipped minimum wage. We did not make additional adjustments for the "ripple effect" of minimum wage increases on workers earning slightly above the new threshold. Recent evidence suggests that workers earning up to 15 percent above of the minimum wage also receive small increases in response to a minimum wage increase. (See Wicks-Lim (2006) and Dube, Giuliano and Leonard (2015).) Thus, the estimated impacts listed above are likely to be smaller than the actual impact of increasing the minimum wage to the proposed level.

The proposed minimum wage increases exclude public employees. However, it was not practicable to exclude public employees from these calculations because the ACS does not have a published variable that allows for identification of public employees. Nonetheless, this inclusion of public employees should have only a minimal impact on our results, since their numbers are small and most already earn more than the proposed minimum wage increases.[1]

All wages from the 2014 survey were adjusted upward to account for inflation between the time of the survey and the time of measurement of the impact. Actual rates of inflation were used to adjust wages up to 2016. For all subsequent years between 2017 and 2028, baseline wages were adjusted using the projected annual average rate of change in the Consumer Price Index for Urban Workers (CPI-U) for the Midwest region. The 2015 and 2016 Missouri Minimum wage of $7.65 was adjusted by the same factor prior to measuring the impact of a change to the proposed minimum wage in 2019.

After these adjustments, the resulting hourly wage of all employees was compared to the proposed minimum wage. A total of twenty-one proposals were analyzed. For each proposal, we constructed a baseline wage scenario that used only basic wage changes from expected inflation rates to predict each ACS respondent's hourly wage rate in each year

[1] For Missouri's state employees, this can be validated by viewing the earnings of all state employees at: http://mapyourtaxes.mo.gov/MAP/Employees/. In larger counties and cities most all public employees already earn more than the highest proposed minimum wage. Smaller counties and towns may have some public employees who earn less than the highest proposed minimum.

between 2019 and 2028. We then constructed a counterfactual, or "proposed" wage distribution for each worker under all twenty-one minimum wage proposed scenarios. Since the minimum wage proposals offer nine different paths for raising the minimum wage for all non-tipped private sector workers, and different wage paths for tipped workers, we create separate minimum wage changes for tipped and non-tipped workers. Specifically, we used information on a worker's occupation and observed wage levels to separately identify tipped workers and assign them the proposed tipped minimum wage in each year, rather than the higher non-tipped minimum wage.[2]

If the proposed minimum wage was less than the inflation-adjusted hourly earnings of an employee, then no impact was calculated. If the proposed minimum wage was more than the hourly earnings for an employee, then the difference between the inflation-adjusted hourly earnings (i.e. baseline) and the proposed minimum wage was calculated. That difference was multiplied by the number of hours the employee worked in the year to calculate the annual impact for that employee. The result was then multiplied by a weighing factor for that employee in the population. The total impact for the state of Missouri was then summed across all affected workers to generate a total estimated increase in wage income in the state.

We do not include an estimate of job losses due to minimum wage changes. Existing research is clear that past minimum wage increases have had no measurable effect on aggregate employment levels. Larger minimum wage increases, such as those in Los Angeles, Seattle, and other jurisdictions, have not yet been studied to detect a clear disemployment effect. While it is possible that there may be some employment losses due to automation or other factors, this potential negative effect is likely offset by the positive potential job growth stemming from multiplier effects of the spending of minimum wage workers who receive substantial raises. There is substantial research to indicate that increases in the minimum wage have multiplier effects that increase the direct effects. For this reason and because of the likely increases in wages for individuals who earn above the proposed minimum wage rates, the impacts summarized in the table are considered conservative estimates relative to the total impact that would occur as a result of increasing the minimum wage to the proposed levels.

II. Economic Literature on the Impact of Minimum Wage Increases on Employment

Next, it is necessary to review the economic literature on the impact of minimum wage increases on employment. Opponents often claim that minimum wage increases may reduce employment in a state. If that is true, then those employment reductions would result in reductions in state income and sales tax revenue. However, review of the most credible recent empirical research on the minimum wage shows that increases in the minimum wage have had no discernible impact on employment. We thus conclude that it is not appropriate to project that the proposed initiative petitions would result in any detectable employment reduction, and resulting losses in income and sales tax revenue, or increases in unemployment-related costs to the state.

Economists have conducted hundreds of studies of the employment impact of the minimum wage. A recent meta-study – a formal statistical study of studies – by Doucouliagos and Stanley (2009) reviewed all the research conducted over the last three decades on the employment impact of minimum wage increases on teenagers in the United States. The researchers concluded that the minimum wage has little or no discernible effect on the employment prospects of low-wage workers. Their study followed a rigorous, peer-reviewed procedure and has the advantage of using a set of predetermined, objective criteria for weighing the validity of statistical findings across studies with different results.

[2] We defined tipped workers as those employed in occupations that typically receive a large share of income as tips. These occupations were 'Bartenders' (4040), 'Waiters and Waitresses', 'Food Servers, Non-restaurant' and 'Miscellaneous food preparation and serving related workers including dining room and cafeteria attendants and bartender helpers'.

(Source: Doucouliagos, Hristos and T. D. Stanley. 2009. "Publication Selection Bias in Minimum-Wage Research? A Meta-Regression Analysis." British Journal of Industrial Relations,vol. 47, no. 2, pp. 406-428.)

Recent theoretical and empirical research emphasizes several explanations for the consistently negligible employment impacts of moderate increases in the minimum wage. First, relative to total wage costs, minimum-wage increases are small. Second, employers and workers appear to respond to minimum-wage increases in many ways that reduce the direct cost to employers and substantially reduce or eliminate the need to cut employment.

Probably the most important economic response to a higher minimum wage is a reduction in turnover. At higher wages, employers fill vacancies faster and retain employees longer, boosting total employment and average productivity per worker while reducing direct and indirect training costs. Dube, Lester, and Reich (2012), for example, examined the effect of the minimum wage on labor turnover among teens and restaurant workers. They find "...striking evidence that separations, new hires, and turnover rates for teens and restaurant workers fall substantially following a minimum wage increase..." (p. 2). Their findings, using nationally representative data, are consistent with local case studies of the minimum wage and related "living wage" laws, including Dube, Naidu, and Reich's (2007) analysis of the San Francisco city-wide minimum wage; Fairris's (2005) study of local government contractors in Los Angeles; Howes (2005) on homecare workers in California; and Reich, Hall, and Jacobs (2005) on workers at the San Francisco airport.
(Sources: Dube, Arindrajit, T. William Lester, and Michael Reich. 2012. "Minimum Wage Shocks, Employment Flows and Labor Market Frictions." Berkeley, CA: Institute for Research on Labor and Employment. http://escholarship.org/uc/item/76p927ks; Dube, Arindrajit, Suresh Naidu, and Michael Reich. 2007. "The Economic Effects of a Citywide Minimum Wage." *Industrial and Labor Relations Review*, vol. 60, no. 4, pp. 522-543; Fairris, David. 2005. "The Impact of Living Wages on Employers: A Control Group Analysis of the Los Angeles Ordinance." *Industrial Relations*, vol. 44, no. 1, pp. 84-105; Howes, Candace. 2005. "Living Wages and the Retention of Home Care Workers in San Francisco." *Industrial Relations*, vol. 44, 5 no. 1, pp. 139-163; Reich, Michael, Peter Hall, and Ken Jacobs. 2005. "Living Wage Policies at the San Francisco Airport: Impacts on Workers and Businesses." *Industrial Relations*, vol. 44, no. 1, pp. 106-138.)

Employers also appear to respond to increases in the minimum wage by taking measures to boost productivity. Hirsch, Kaufman, and Zelenska's (2011) study of the impact of the federal minimum wage increase on 81 fast-food restaurants in Georgia and Alabama, for example, asked fast-food managers about the scope for efficiency improvements in response to the minimum-wage rise. About 90 percent of managers indicated that they planned to respond to the minimum wage increase with increased performance standards such as "requiring a better attendance and on-time record, faster and more proficient performance of job duties, taking on additional tasks, and faster termination of poor performers." (p. 27) Roughly the same share of managers said that they sought to "boost morale" by presenting the minimum wage increase as a "challenge to the store" and using this as a way "to energize employees to improve productivity." (pp. 28-29) Based on their interviews with store managers, the researchers concluded that a minimum wage increase may function as a "catalyst or shock that forces managers to step out of the daily routine and think about where cost savings can occur." (p. 29) (Source: Hirsch, Barry T., Bruce Kaufman, and Tetyana Zelenska, "Minimum Wage Channels of Adjustment." IZA Discussion Paper No. 6132. Germany: Institute for the Study of Labor. http://www2.gsu.edu/~ecobth/IZA_HKZ_MinWageCoA_dp6132.pdf)

A higher minimum wage may also motivate workers to work harder, independently of any actions by employers to increase productivity. According to "efficiency wage" theory, wages above the competitive-market rate may elicit greater work effort for several reasons. As Carl Shapiro and Joseph Stiglitz (1984) have argued, higher pay increases the cost to workers of losing their job, potentially inducing greater effort from workers in order to reduce their chances of

being fired. George Akerlof (1982), arguing from a more sociological point of view, has suggested that workers may see higher wages as a gift from employers, leading workers to reciprocate by working harder. (Sources: Shapiro, Carl and Joseph E. Stiglitz. 1984. "Equilibrium unemployment as a worker discipline device." *American Economic Review*, vol. 74, no. 3, pp. 433-444; Akerlof, George A. 1982. "Labor contracts as partial gift exchange." *Quarterly Journal of Economics*, vol. 97, no. 4, pp. 543-569.)

We therefore conclude that the proposed increase in the Missouri minimum wage would have no discernible impact on the employment levels of low-wage workers. Accordingly, we do not factor in reductions in employment, or any resulting decrease in sales tax or income tax. We also do not project any increased unemployment insurance costs – both because we do not project any resulting job losses, and, additionally, because unemployment insurance costs are paid for by employer premiums, and so are ultimately not a cost to the state.

For similar reasons, we do not believe that the proposed increase will have any significant adverse economic impact on small businesses or, by extension, on corporate income tax revenue. In fact, many small businesses already pay little if any corporate income tax.

III. State and Local Sales and Personal Income Tax Revenue Impact of Raising the Minimum Wage

Based on the wage impact figures calculated above, and the understanding that the minimum wage increases would be unlikely to result in offsetting job losses, we next calculate the impact of the projected wage increases on state and local sales and personal income tax revenue in Missouri. We project only the direct impact of the various minimum wage increase scenarios on such tax revenue. We do not attempt to project the additional impact through a GDP multiplier effect, or the potentially higher sales taxes generated if employers offset wage increases with higher prices (which would be taxable).

Personal Income Tax Revenue. In order to determine the projected increase in personal income tax revenues that would result directly from the increased wages, we had to develop assumptions about the effective income tax rates of the affected workers. We made the following assumptions with respect to the effective tax rate:

1. That 25% of affected workers can be claimed as a dependent on another party's Missouri income tax return and, as a result, would pay an effective tax rate of 6.0% on the increase in income;
2. That 50% of the affected workers would file as single taxpayers, would claim one deduction of $2,100, and would be entitled to a standard deduction of $5,800. This would result in an effective tax rate of 2.47%;
3. The remaining 25% would, we assumed, pay no additional Missouri income tax.

In light of these assumptions, the increased Missouri income tax revenue for each petition version can be calculated as follows: (total wage increase * 25% * 6.0%) + (total wage increase * 50% * 2.47%) + (total wage increase *25% * 0%).

Sales Tax Revenue. The state of Missouri imposes a 4.225% state sales tax on those items that are not exempt from the sales tax base. In addition, the average local sales tax rate is 2.95%. As a result, the average Missouri net sales tax rate is 7.175%. To estimate the share of income that is spent on goods and services that are subject to sales taxes, we used data from the 2015 Consumer Expenditure Survey (CES) for the US to estimate the share of income spent on categories that are subject to sales taxes. The CES summary tables list average spending per consumer across 20 different

categories (e.g. housing, transportation, food away from home) and we categorized each spending item as taxable or non-taxable and then calculated the share of spending that we taxable.[3] The resulting rate was 30.3 percent.

Based upon the above assumptions, and the total wage increase calculations for each version of the petition, we estimate that the increase in state income tax revenue resulting from the increased wages would be as follows:

Table 2. Summary of the Impact of Minimum Wage Increases on State and Local Sales and Income Taxes in Year of Full Minimum Wage Final Implementation.

Proposal	State Sales Tax (4.225%)	Local Sales Tax Revenue (2.95%)	Total Sales Tax Revenue Increase	Personal Income Tax Revenue	Total Sales and Personal Income Tax Revenue Increase
13,14,15[a]	$55,814,587	$38,971,132	$94,785,719	$119,213,129	$213,998,848

Note: Author's Analysis of American Community Survey (ACS) data from 2014 and fiscal impact assumptions described above. All dollars are in nominal figures. (a) Since these proposals only vary on non-economic factors, their economic and fiscal impacts are treated as equal for the purposes of this report.

As described in Table 2 above, the fiscal impact of the proposed minimum wage increases varies based on the ultimate level of the minimum wage and the degree of tipped minimum wage phase out. The estimates of the total fiscal benefit range from $164 million to $282 million annually. Appendix tables A1 through A13 provide a year-by-year summary of the fiscal benefits.

[3] Specifically, the categories we assumed to be subject to state and local sales taxes are: food, household furnishings and equipment, vehicle purchases, gasoline and motor oil, entertainment, and all other expenditures. We assumed that 50 percent of the spending on the category "apparel and services" was taxable.

We hope that this information is useful to your office as your prepare your analyses of the petitions.

Respectfully submitted,

Lara Granich

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided the following information as an opponent of this initiative petition.

These corrections were subsequently provided to the submitted information

In the table on the bottom of page 7 and top of page 8, both averages for 2023 should be based on a 5 year phase-in. Accordingly, the figure on that table should state for 2023 ($12) Average Annual Unemployment Premiums Paid by State of $16,269,523.52.

The corresponding change on the table on page 12 would be to state, for 2023 ($12) Total Net Loss to State Government from Taxes and Unemployment Insurance of ($19,137,851.76).

Re: Initiative Petitions 2018-196 through 2018-216

Dear Mr. Halwes,

I write on behalf of Robert Bonney. Mr. Bonney is the Chief Executive Officer of the Missouri Restaurant Association. Please consider this letter and the accompanying studies as his fiscal impact statement as an opponent of Initiative Petitions 2018-196 through 2018-216 (the "Initiative Petitions"). If passed, any of these twenty-one initiatives would have a substantial negative impact on state and local governments, as well as Missouri small businesses. Those effects are both direct (as noted in Section 1) and secondary (as noted in Sections 2 through 5). The direct effects stem from higher labor and contracting costs that the state and its political subdivisions will incur, despite the Initiatives' effort to exclude government workers from the mandate.

The indirect effects will present a debate this Office has seen before. The proponents of the Initiative Petitions will once again rely on data sourced from political activist groups who claim increases in the minimum wage only serve to create new taxable income. The reality is that such groups approach this issue with political bias. Their analysis is one-sided because it completely ignores the fact that a wage increase does not "create" income from thin air; instead, it is an economic transfer from Missouri businesses to workers. Missouri businesses must pay the new wages "created" by the increases. Political activists' models fail to account, then, for two specific manifestations of the "debit" side of this transfer: reductions in employment, and the reduction in corporate income tax paid based upon business done in Missouri.

The failure to account for any employment effect at any proposed wage increase—even a drastic increase of the minimum wage to $13—is particularly puzzling, because Missouri's most populous areas border Illinois and Kansas. These states, respectively, have minimum wages of $8.25 and $7.25. Neither state adjusts the minimum wage for inflation. Likewise, the second effect—loss of corporate income tax revenues—is a mathematical certainty. Missouri businesses will be the source of the wage increase, which will lower their own taxable income. Assuming a one-to-one substitution of "created" wages for lost corporate income, the difference in the rates

at which these two types of income are taxed will result in a net decrease in state revenue. A dollar from increased wages is taxable by state government in Missouri at 6% or substantially less, whereas Missouri's corporate income tax rate is 6.25%.

On top of these two types of negative outcomes—lower employment and lower state tax revenues—there may be second-order effects to small businesses because they lack the access to capital to weather price fluctuations; they may not survive at all because they may not have the flexibility to simply cut employment, shifting their reliance to capital instead of labor resources, or suffering a decrease in production and revenue.

In short, much of the fiscal impact regarding the current crop of wage-related ballot measures is secondary: they cause transfers of wealth within (or out of) the state economy, and those transfers of wealth then create second-order effects for state and local governments via their collection of tax revenues and provision of welfare services for the unemployed or less-employed. Because these fiscal notes call for the Auditor operate in the area of secondary effects, it is critical that she treat both sides of the wealth transfer equally, and refrain from assessing only one half of the wage increase equation.

1. Direct Labor Cost Impact on State and Local Government Budgets

As noted to the State Auditor's Office previously by Dr. David Macpherson, a nationally prominent labor and economics expert, there are two ways to measure labor cost on state and local government budgets. First, one can use the information included in fiscal note responses from state and local government entities. It is important to note that these fiscal notes provide an incomplete and, therefore, too-low estimate of labor cost. Few state and local government entities respond to requests for a fiscal note response, and those that do respond often ignore important effects.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can be used to calculate increased labor cost to state and local government entities in Missouri. To combat this time-honored analysis, and in a blatant attempt to manipulate the fiscal note process, the Initiative Petitions provide that they will raise the minimum wage for private workers, but not for workers employed by state or local governmental entities. No conceivable justification exists for solely raising the minimum wage on private businesses. Whatever the disparity between the value of total compensation at a private business and at a government employer, that disparity does not approach the wage adjustments at issue here, ranging from an inflation adjusted wage increase of 51.16% (($13-$8.60)/$8.60) in Initiative Petitions 2018-198 through 2018-201 to a wage increase of 30.17% (($11-$8.45)/$8.45) in Initiative Petitions 2018-213 through 2018-215.

Moreover, it is unreasonable to assume that on a sustained basis public employers, as defined in the Initiative Petitions, would be able to maintain dramatically lower wage levels than private businesses. Public employers would lose staff employable at higher rates in the private market, imposing substantial costs on government productivity. Using the method traditionally employed by labor economists and followed by the Auditor's office, one can calculate the annual

wage costs to state and local governmental entities, based on the annual wage cost for each state and local government worker in the ORG CPS, as detailed on page 6 of Dr. Macpherson's 2012 report, attached hereto as **Exhibit A**. Even if the auditor finds that a specific estimate of costs is not determinable, the auditor should note that state and local government "operating costs could increase by an unknown annual amount that could be significant," through the form of higher wage costs and higher contracting costs.

The proponents of the Initiative Petitions may argue that the Auditor should abandon any state and local cost estimates altogether. The proponents will argue that provisions they have inserted in the statute would mean that state and local government entities will not have to pay higher wages to their employees. Setting aside unjustifiable discrimination against private employers (and "public employees"), the provision is of uncertain legal effect and constitutionality. A "public employer," defined in the initiatives as "the state or a political subdivision of the state" still incurs substantial costs for wages of individuals that are "private employees," rather than "public employees." Cleaning services, food service, and other essential services often rely on state contracts with outside vendors. Sometimes, a contract rate may vary depending on the cost of labor. Even if the contract rate is fixed, it must be re-bid periodically, and that bidding process would take into account the new minimum wage. Plainly, the initiative would impose higher costs for state and local governments in contracting with any private entity and its employees. As a matter of law, it would be insufficient and unfair for the Auditor's fiscal note or summary to simply assume that these costs to state and local governmental entities do not exist.

2. Cost of Unemployment Benefits

a) The effect of inflation on Missouri's minimum wage

CPS–ORG data show that between 2007 and 2015, median nominal wages for adult (25–59 years old) workers in the U.S. grew by 1.68 percent a year. However, Missouri's minimum wage is currently adjusted using "the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W)." Section 290.502, RSMo. Coincidentally (or perhaps not), the CPI-W, over the period from 2006 to 2016, also increased at an average rate of 1.68 percent a year.

Year	CPI-W	Observed inflation %
2006	199.2	
2007	203.7	0.022590361
2008	216.304	0.061875307
2009	210.526	-0.0267124

2010	213.898	0.016017024
2011	222.686	0.041085003
2012	225.568	0.01294199
2013	230.084	0.02002057
2014	234.525	0.019301646
2015	233.806	-0.00306577
2016	234.771	0.004127353

Using Missouri's current inflation-adjusted minimum wage rate and an assumed, constant 1.68 percent increase in the CPI-W, the minimum wage in Missouri will be as follows:

Year	Estimated Minimum Wage
2016	$7.65 (observed)
2017	$7.70 (observed)
2018	$7.85
2019	$8.00
2020	$8.15
2021	$8.30
2022	$8.45
2023	$8.60
2024	$8.75
2025	$8.90
2026	$9.05

b) Calculating job loss attributable to increased minimum wage

At least one outside economist, James Sherk, has already provided an estimate for job loss in Missouri based on a $15 minimum wage. Mr. Sherk calculated the effect of a $15 minimum wage implemented in 2021. Mr. Sherk's figures accounted for inflation by estimating the present value of $15.00 in 2021, rather than estimating an absolute figure for wage inflation in Missouri. Mr. Sherk calculated the present value of $15.00 in 2021 to be $13.57, per hour, based on wage inflation of 1.68 percent. Mr. Sherk evaluated the change from $7.65 per hour to $13.57 per hour (a 77.39% increase), exclusive of agricultural workers. Cumulatively, Mr. Sherk calculated this 77.39 percent increase in wages to reduce employment in the affected workforce by (0.7739*0.677) 52.39%.

Graves Garrett LLC

Mr. Sherk calculated that approximately 40.9% of Missouri's Wage and Salary Workers would be affected by such a $15 minimum wage. Mr. Sherk's calculations reveal that a $15 minimum wage in 2021 would be expected to reduce the number of full-time equivalent jobs in Missouri by approximately 218,000. Based on CPS–ORG data, these figures reveal an affected workforce of approximately 416,086 workers impacted by a $15 minimum wage increase in 2021.

However, in 2014, Dr. Macpherson found, using more conservative, national-level Congressional Budget Office data, that an increase to a $10.10 minimum wage, effective January 1, 2015, would eliminate about 15,700 jobs in Missouri. Dr. Macpherson analyzed the effect of a Missouri $10.10 minimum wage using a model suitable to a national analysis. This analysis predicted a loss of 15,700 Missouri jobs based on a wage increase from $7.50 in 2014 to $10.10 in 2015 (a 34.67% increase).

On the whole, the analysis by Mr. Sherk is more instructive here, since it is more recent, Missouri-specific, and anticipates larger wage changes contemplated by the Initiative Petitions. The most accurate way to determine the estimate of Workers Affected would be to analyze the CPS–ORG data. However, without such data readily available in the time constraints imposed by the fiscal note process, it is reasonable for estimation purposes to assume Mr. Sherk's figures are evenly distributed. Assuming that worker data follows an equal distribution, the Initiative Petitions would be expected to result in the following job losses:

Year of final prescribed wage increase	Wage without IP	Wage mandated by IP	Percentage increase	Percentage of affected workers who lose jobs (Percentage Increase x 0.677 Elasticity)	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by Initiative
2021	$8.30	$11.00	32.53%	22.02%	174,897	38,512
2022	$8.45	$11.00	30.18%	20.43%	162,262	33,150
2022	$8.45	$12.00	42.01%	28.44%	225,866	64,236
2023	$8.60	$12.00	39.53%	26.77%	212,532	56,895
2023	$8.60	$13.00	51.16%	34.64%	275,061	95,281
2024	$8.75	$12.00	37.14%	25.15%	199,683	50,220
2024	$8.75	$13.00	48.57%	32.88%	261,136	85,861
2025	$8.90	$13.00	46.07%	31.19%	247,695	77,256
2026	$9.05	$13.00	43.65%	29.55%	234,683	69,349

c) The best estimate for a price elasticity of demand for low-skilled labor is -0.677.

As noted by Mr. Sherk, starting wages of $15.00 per hour mean that full-time employee must create at least $38,700 a year in value for his or her employer (including wages, employer payroll taxes, and mandatory healthcare benefits). High minimum wages and mandatory benefit costs make it much harder for less-experienced and less-skilled workers to find jobs, particularly full-time work.

Recent labor economics scholarship has revealed that, accounting for publication bias, a state-specific elasticity of demand for less-skilled workers is, on average, approximately -0.677, though some estimates are even higher, around -1.0.[1] "[E]conomists have extensively studied how businesses respond to higher wages overall, not just minimum-wage increases. On average these studies find a 10 percent increase in labor costs causes firms to reduce employment of less-skilled workers by 6.8 percent in the long run."[2]

While these elasticity estimates are substantial in absolute terms, there is reason to believe that such estimates might still understate the impact of a Missouri state-specific effort to increase the minimum wage. This is so for several reasons. First, traditionally, labor economists view labor as a reasonably difficult input to substitute; however, Missouri businesses have readily available options. There are relatively few barriers to doing business in Missouri's border states, and businesses can easily relocate across a state line to take advantage of more favorable wage (and tax laws). Additionally, substantially raising the cost for Missouri labor, relative to labor sources in other states and other countries, is likely to force many manufacturing jobs in Missouri to disappear entirely. Automation is also a significant risk. The substitution of labor is becoming increasingly easy due to technology advancements and the "sharing" economy, where fewer individuals are "employees" covered by the minimum wage. Finally, a labor "price shock" may result in significant decreases in the demand for goods and services. People make behavioral changes to avoid higher costs, including eating out less often and generally decreasing consumption (or shifting their activities to consumption involving comparatively low amounts of labor) wherever possible.

[1] Sherk, James, "How $15-per-Hour Minimum Starting Wages Would Affect Each State," The Heritage Foundation, http://report.heritage.org/ib4601.

[2] "The coefficients on these estimates imply an elasticity of –0.677 for a study published in 2012 (the most recent year in their data) of long-run unconditional labor demand for low-skilled labor in the U.S., estimated using industry-level administrative panel data and a structural form model." "Estimates that do not account for publication bias tend to slow a long-run elasticity closer to –1.0. See, for example, George Borjas, Labor Economics, 6th ed. (Columbus, OH: McGraw-Hill, 2013), Chapter 4: 'The evidence also suggests that the estimates of the long-run labor demand elasticity cluster around –1, so the long-run labor demand curve is indeed more elastic than the short-run curve.' " Sherk, available at http://report.heritage.org/ib4601.

Graves Garrett LLC

d) Unemployment Benefit Costs

We derived an average unemployment payout by calculating the expected weekly unemployment benefit amount. Based on current data, the expected unemployment weekly benefit amount of a worker making $7.65 an hour, on a 40 hour workweek, is $159.12 per week, for 20 weeks.[3] The expected unemployment weekly benefit amount of a worker making $10.99 an hour is $228.59 per week. The expected unemployment weekly benefit amount of a worker making $11.99 an hour is $249.39 per week. The expected unemployment weekly benefit amount of a worker making $12.99 an hour is $270.19 per week. We assume that workers will seek unemployment insurance for the full twenty weeks authorized under Missouri law, because unemployment attributable to an increase in the minimum wage is structural. In this case, structural unemployment occurs because workers' job skills do not meet the established "price floor" of labor, rendering the worker's skills unmarketable. Assuming an even distribution of workers affected, the average unemployment benefit cost to the state for a worker is calculated as follows:

- For Initiative Petitions 2018-213 through 2018-216, [($159.12+$228.59)/2]*20 = $3,877.10
- For Initiative Petitions 2018-196, 2018-197, 2018-200, 2018-202, and 2018-204 through 209, [($159.12+$249.39)/2]*20 = $4,085.10
- For Initiative Petitions 2018-198, 2018-199, 2018-201, 2018-203, 2018-210 through 2018-212, [($159.12+$270.19)/2]*20 = $4,293.10

Consistent with Dr. Macpherson's 2012 report, it would be reasonable for the Auditor to assume that 35% of unemployed workers will receive unemployment benefits. Combining these numbers leads to the following estimates:

Year of final prescribed wage increase	Estimate of Missouri Workers Unemployed by Initiative	Estimated Unemployment Amount Per Worker	Estimated Total Unemployment Premiums Paid	Average Annual Unemployment Premiums Paid by State
2021 ($11)	38,512	3,877.10	$52,260,206.32	$17,420,068.77
2022 ($11)	33,150	3,877.10	$44,984,052.75	$11,246,013.19
2022 ($12)	64,236	4,085.10	$91,843,669.26	$22,960,917.32
2023 ($12)	56,895	4,085.10	$81,347,617.58	$20,336,904.39

[3] https://labor.mo.gov/DES/Claims/calculator. A 2015 law decreased the unemployment benefit period from 20 weeks to 13 weeks, but the Supreme Court of Missouri struck down the law in July 2016.

2023 ($13)	95,281	4,293.10	$143,167,801.39	$28,633,560.28
2024 ($12)	50,220	4,085.10	$71,803,802.70	$11,967,300.45
2024 ($13)	85,861	4,293.10	$129,013,450.69	$21,502,241.78
2025 ($13)	77,256	4,293.10	$116,083,706.76	$16,583,386.68
2026 ($13)	69,349	4,293.10	$104,202,767.17	$13,025,345.90

3. Impact on State Income Tax Revenue

The 2012 analysis prepared by Dr. Macpherson may also be used as a reference in calculating the effect of the initiative petitions on state income tax revenue. Here, again, it is reasonable to assume that our "affected workers" are evenly distributed, though precise CPS–ORG data would also provide a reliable estimate. Here, the increased income tax revenue is the additional income tax paid by workers whose wages increase. There is a loss of revenue, however, in the form of decreased income tax paid by workers whose wages decrease and businesses who absorb the increased cost of labor, rather than passing it along to customers.

For the purposes of these estimates, we assume that workers work 40 hours a week and 52 weeks per year:

Year of final prescribed wage increase	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by IP	Estimate of Missouri Workers with Increased Wages	Annual Increase in Wages Paid to Workers who get Wage Increase in Final Year	Annual Decrease in Wages Paid to Workers now Unemployed
2021 ($11)	174,897	38,512	136,385	$382,969,080.00	$108,141,696.00

2022 ($11)	162,262	33,150	129,112	$342,405,024.00	$87,913,800.00
2022 ($12)	225,866	64,236	161,630	$596,737,960.00	$237,159,312.00
2023 ($12)	212,532	56,895	155,637	$550,332,432.00	$201,180,720.00
2023 ($13)	275,061	95,281	179,780	$822,673,280.00	$436,005,856.00
2024 ($12)	199,683	50,220	149,463	$505,184,940.00	$169,743,600.00
2024 ($13)	261,136	85,861	175,275	$774,715,500.00	$379,505,620.00
2025 ($13)	247,695	77,256	170,439	$726,750,021.03	$329,419,584.00
2026 ($13)	234,683	69,349	165,334	$679,192,072.00	$284,885,692.00

These net wage increases will lead to corresponding increases in state income tax collections. Traditionally, it has been assumed that about 50% of affected workers will pay 6% income tax, while the other 50% of workers pay no state income tax. This assumption may be less accurate at the higher wage increases contemplated by the Initiative Petitions. Accordingly, figures are also displayed assuming that about 75% of affected workers will pay 6% income tax, while the other 25% of workers pay no state income tax.

Annual Net Increase in Wages Paid To Workers	Annual Income Tax Increase from Wage Increase (50% pay tax)	Annual Income Tax Increase from Wage Increase (75% pay tax)
$274,827,384.00	$8,244,821.52	$12,367,232.28
$254,491,224.00	$7,634,736.72	$11,452,105.08
$359,578,648.00	$10,787,359.44	$16,181,039.16
$349,151,712.00	$10,474,551.36	$15,711,827.04
$386,667,424.00	$11,600,022.72	$17,400,034.08
$335,441,340.00	$10,063,240.20	$15,094,860.30
$395,209,880.00	$11,856,296.40	$17,784,444.60
$397,330,437.03	$11,919,913.11	$17,879,869.67
$394,306,380.00	$11,829,191.40	$17,743,787.10

Graves Garrett LLC

Based on these figures, Missouri businesses must also decide whether to pass along any increase in wage costs (wages and mandatory payments).[4]

Year of final prescribed wage increase	Annual Cost to Business from Increased Wage	Annual Decreased Corporate Income Tax if cost is fully absorbed	Annual Decreased Corporate Income Tax if cost is 50% absorbed
2021 ($11)	$412,266,214.62	$25,766,638.41	$12,883,319.21
2022 ($11)	$368,599,008.34	$23,037,438.02	$11,518,719.01
2022 ($12)	$642,388,413.94	$40,149,275.87	$20,074,637.94
2023 ($12)	$592,432,863.05	$37,027,053.94	$18,513,526.97
2023 ($13)	$885,607,785.92	$55,350,486.62	$27,675,243.31
2024 ($12)	$543,831,587.91	$33,989,474.24	$16,994,737.12
2024 ($13)	$833,981,235.80	$52,123,827.23	$26,061,913.62
2025 ($13)	$782,346,397.64	$48,896,649.85	$24,448,324.93
2026 ($13)	$731,150,265.50	$45,696,891.59	$22,848,445.80

Assuming businesses absorb half of the cost of increased wages, and 75 percent of affected workers pay the new, higher taxes, the effect on state income tax collections is estimated to be:

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss
2021 ($11)	($516,086.93)
2022 ($11)	($66,613.93)
2022 ($12)	($3,893,598.78)
2023 ($12)	($2,801,699.93)
2023 ($13)	($10,275,209.23)
2024 ($12)	($1,899,876.82)
2024 ($13)	($8,277,469.02)
2025 ($13)	($6,568,455.26)
2026 ($13)	($5,104,658.70)

[4] A healthcare benefit cost estimate is not available based on the time limitations imposed by this fiscal note.

Graves Garrett LLC

4. Sales tax revenue gain or loss

Projecting any increase in sales tax revenue resulting from an increased minimum wage would require the auditor's office to conclude, based on data separate and apart from the sheer conjecture typically offered by political activist groups: (1) the net effect on consumer disposable income and (2) the percentage of a consumer's disposable income that is spent on goods subject to the sales tax, taking into consideration that the scope of Missouri's sales tax has been truncated by a voter-approved constitutional amendment from November 2016.

Typically, the Auditor's office multiplies the total increase in worker earnings (which should be adjusted for employment reductions) and multiplies the result by 25 percent, then multiplying that figure by the Missouri the population weighted combined average state and local sales tax in Missouri, 7.81%.[5] Based on this estimate, the population-weighted combined average local sales tax is 3.585%.

However, it would be deceptive to fail to account for sales tax losses from workers whose wages are eliminated or sales tax losses from reduced business profits (attributable to the higher wages paid), which will lower spending by business owners. The first figure is calculable by determining the total annual wages (adjusted for employment deductions) for all workers who lose jobs due to a minimum wage hike, multiplied by 25 percent. The second number is calculable by multiplying the total increase in worker earnings (multiplied by 1.0765 to account for Social Security and Medicare taxes) by approximately 15 percent.[6]

Year of final prescribed wage increase	Annual Net Increase in Wages Paid To Workers	New Wages Spent on Sales Tax Items	Annual Cost to Business from Increased Wage	Annual Business Income No Longer Included in Sales Tax Base (50% passed-through)
2021 ($11)	$274,827,384	$68,706,846	$412,266,214.62	($61,839,932)
2022 ($11)	$254,491,224	$63,622,806	$368,599,008.34	($55,289,851)
2022 ($12)	$359,578,648	$89,894,662	$642,388,413.94	($96,358,262)
2023 ($12)	$349,151,712	$87,287,928	$592,432,863.05	($88,864,929)

[5] http://taxfoundation.org/sites/taxfoundation.org/files/docs/LOST--2015.png.
[6] This estimate would also need to be adjusted to reflect certain employers' mandate under the Affordable Care Act to provide healthcare coverage and pay 60 percent of such coverage.

2023 ($13)	$386,667,424	$96,666,856	$885,607,785.92	($132,841,168)
2024 ($12)	$335,441,340	$83,860,335	$543,831,587.91	($81,574,738)
2024 ($13)	$395,209,880	$98,802,470	$833,981,235.75	($125,097,185)
2025 ($13)	$397,330,437	$99,332,609	$782,346,397.64	($117,351,960)
2026 ($13)	$394,306,380	$98,576,595	$731,150,265.51	($109,672,540)

Accordingly, the annual estimations of the effects on state and local revenue, and total state economic impact are as follows:

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss	Annual Net Effect on State Sales Tax	Total Annual Effect on State Tax Revenue	Total Net Loss to State Government from Taxes and Unemployment Insurance	Annual Net Effect on Local Sales Tax
2021 ($11)	($516,086.93)	$290,127.11	($225,959.82)	($17,646,028.59)	$246,178.86
2022 ($11)	($66,613.93)	$352,067.34	$285,453.41	($10,960,559.78)	$298,736.43
2022 ($12)	($3,893,598.78)	($273,087.10)	($4,166,685.88)	($27,127,603.19)	($231,720.06)
2023 ($12)	($2,801,699.93)	($66,628.31)	($2,868,328.24)	($23,205,232.64)	($56,535.50)
2023 ($13)	($10,275,209.23)	($1,528,364.68)	($11,803,573.91)	($40,437,134.18)	($1,296,849.08)
2024 ($12)	($1,899,876.82)	$96,566.47	($1,803,310.36)	($13,770,610.81)	$81,938.65
2024 ($13)	($8,277,469.02)	($1,110,951.72)	($9,388,420.74)	($30,890,662.52)	($942,665.55)
2025 ($13)	($6,136,139.31)	($761,317.55)	($6,897,456.87)	($23,480,843.55)	($645,993.71)
2026 ($13)	($5,104,658.70)	($468,803.67)	($5,573,462.37)	($18,598,808.26)	($397,789.62)

5. Damage to small business

Additionally, any proponent or opponent fiscal note submission is required, pursuant to Missouri law, to state the impact of the initiative on small businesses. According to analysis by the Employment Policies Institute, 40 percent of the minimum wage workforce is employed at businesses with fewer than 50 employees. [7] The impact on extra costs to small business may be more significant than even this 40% figure suggests. Small businesses are more easily shut down by input price increases than large businesses, which have greater access to capital to weather the

[7] https://www.epionline.org/oped/who-really-employs-minimum-wage-workers/

storm. Clearly, small businesses that do not shut down due to increases in the minimum wage will pay higher costs, estimated at about 40% of business' total increased costs, described above.

Conclusion

In conclusion, the State Auditor should attempt to quantify the increased cost to be borne by state and local government entities through increased contracting costs as a result of an increase to the minimum wage. This direct cost is outlined in Section 1.

Indirect costs are outlined in Sections 2 through 5, and show a net loss. Although such second-order effects more difficult to predict, a net loss is easily the most likely outcome. Significantly, this result is only obtainable if the Auditor reviews both the "credit" and "debit" sides of the transfer of wealth from businesses to workers. The Auditor should refrain from taking the proponents' likely invitation to consider and present only the "credit," side, and should attempt to provide a complete picture of all effects of a minimum wage increase, including the loss of revenue to state and local governments from individuals who lose employment. Only conveying (or quantifying) the potential for gain, without fairly conveying the likelihood of net loss, would be deceptive and unfair.

The State Auditor's previous 2018 fiscal notes are a good model. Each of the fiscal notes for the Initiative Petitions should follow the already-established format and state that:

> "[O]perating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $## million decrease to a $## million increase depending on business decisions."

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

ABOUT THE MISSOURI RESTAURANT ASSOCIATION

With origins dating back to 1916, the Missouri Restaurant Association (MRA) is a statewide trade association representing over 1,500 member establishments. The association's membership is diverse, and includes full service, fast casual, and quick service restaurants, cafeterias, hotels, schools, institutions, contract feeders, and ancillary foodservice providers such as theme parks. The association has been successful in securing support from virtually every segment of the foodservice and hospitality industry.

MRA includes seven chapters as extensions of the parent organization, each with its own Officers, Board of Directors, and limited budget. The association is governed by a Board of Directors comprised of five Officers, 33 Directors, and each President of the seven affiliated chapters.

MRA is dedicated to serving the needs of the foodservice and hospitality industry, enhancing and improving its growth and development, assisting and educating its members in operating more effectively, improving the political and social environment in which the industry conducts business, for the benefit of its members, patrons, employees, and the well-being of the community.

David A. Macpherson is the E.M. Stevens Professor of Economics at Trinity University. He received undergraduate and doctoral degrees in economics from Pennsylvania State University.

Dr. Macpherson has published over 60 articles in leading economics and real estate journals including Review of Economics and Statistics, Industrial and Labor Relations Review, Journal of Labor Economics, Journal of Human Resources, and Journal of Real Estate Economics and Finance. His research has been funded by a variety of entities including the National Science Foundation, Florida Legislature, and the National Association of Realtors. He is co-author of the undergraduate labor economics text, Contemporary Labor Economics, as well as the principles of economics text, Economics: Private and Public Choice. He is included in Who's Who in Economics, Fourth Edition, which includes the 1,200 most frequently cited economists.

THE IMPACT OF A $10.10 MINIMUM WAGE ON JOBS AND TAXPAYER COSTS IN MISSOURI

June 2014

Economic Analysis by **Dr. David Macpherson**
Trinity University

Index

Executive Summary 4
Results 5
Technical Appendix 7

EXECUTIVE SUMMARY

Missouri's minimum wage of $7.50 is linked to rise in most years with the inflation rate. But some state legislators and labor unions would like to raise that figure even higher. For instance, a recent labor union-organized bus tour in the state promoted a $10.10 minimum wage in St. Louis.

Proponents have enthusiastically pointed to the benefits of the $10.10 policy. But there's been far less discussion of the costs involved with a $10.10-an-hour minimum wage—both the cost on employment, and the cost to taxpayers.

In this study, labor economist David Macpherson of Trinity University uses Census Bureau data to estimate the impact on Missouri's labor market and budget from raising the minimum wage to $10.10 an hour. He also provides separate results for the St. Louis metropolitan area.

Dr. Macpherson's employment estimates follow the methodology used by the nonpartisan Congressional Budget Office in its report earlier this year estimating the impact of a $10.10 minimum wage nationwide, which in turn relied on 60 different empirical studies to formulate its estimates.

Statewide, he finds that over 15,000 jobs would be lost at the $10.10 wage level—with 9,300 of those jobs being held by women. In the St. Louis metropolitan area, approximately 4,800 jobs would be lost from a $10.10 minimum wage.

The cost to taxpayers would be significant: There are approximately 40,000 state and local employees whose wages would be affected by the $10.10 increase in Missouri, for a combined cost to taxpayers of $87 million annually.

Raising wages is an admirable goal, but the evidence suggests that accomplishing this goal with a blunt wage mandate could do more harm than good.

RESULTS

The minimum wage is one of the most hotly-debated topics in the political world. Some legislators claim that a higher base wage will stimulate the economy; others claim that it will reduce jobs when affected employers can't offset the higher costs through higher prices.

Economists, who have studied the issue since the late 1940s, tend to take a skeptical view of minimum wage increases. Since the early 1990s, for instance, roughly 85 percent of the most credible research on the minimum wage points to job loss for less-skilled groups. The nonpartisan Congressional Budget Office (CBO), in an evaluation of President Obama's proposed $10.10 minimum wage increase, reviewed 60 different studies and concluded that the policy would eliminate 500,000 jobs if enacted.

The estimates that follow, of the employment impact of a higher minimum wage on Missouri's labor market, were performed by Dr. David Macpherson of Trinity University. Dr. Macpherson followed closely the methodology used by the CBO in its 2014 report. Dr. Macpherson also estimates the taxpayer costs of a higher minimum wage, as many state and local public employees will see their earnings increase when the minimum wage rises.

Dr. Macpherson's methodology is presented in detail in a technical appendix.

Estimated Employment Effects of a $10.10 Minimum Wage in Missouri

Statewide, Dr. Macpherson finds that increasing the minimum wage to $10.10 would eliminate over 15,000 jobs—approximately 60 percent of which are jobs held by women. The bulk of the job losses would be concentrated among individuals with a high school degree or less, and among people who work in the retail or leisure & hospitality industries.

City-Specific Minimum Wage Employment Impacts

The city of St. Louis has been the subject of a number of protests calling for a higher minimum wage. Dr. Macpherson analyzed the employment impact of a $10.10 minimum wage in the St. Louis metropolitan area, providing breakouts by gender and education where the data permits. He estimates that the wage hike would eliminate approximately 5,000 jobs—just over half of which would be jobs held by women.

RESULTS CONTINUED

Missouri Taxpayer Costs of a $10.10 Minimum Wage

Dr. Macpherson estimates that approximately forty thousand state & local public employees would be affected by a minimum wage increase to $10.10 an hour. These additional wage costs translate to new costs for state and local taxpayers. Following the methodology described in detail in the technical appendix, Dr. Macpherson estimates both the straight wage cost of a $10.10 minimum wage, as well as the total compensation cost with Social Security, Medicare, workers compensation, and unemployment insurance included. Statewide, taxpayers would shoulder an additional $87 million in costs if the base wage was increased to $10.10 an hour and public employees were covered by the new wage.

Missouri Taxpayer Costs of a $10.10 Minimum Wage	
# of State & Local Workers	304,588
# Affected By $10.10 MW	40,103
Annual Wage Cost	$79,629,374
Annual Compensation Cost	$87,004,355

Note: Annual compensation costs include the cost of worker's compensation, FICA, and unemployment insurance benefits.

TECHNICAL APPENDIX

Estimating Employment Loss and the Cost to State and Local Government of an Increase in the Minimum Wage

Dr. David Macpherson
E.M. Stevens Professor of Economics
Trinity University

This paper describes how we estimate the employment loss and the cost to state and local governments of a proposed increase in the minimum wage effective on January 1, 2015.

Data and Sample

First, we use data from the Current Population Survey (CPS) Outgoing Rotation Groups (ORG) from January 2011 through December 2013. For each worker in the sample, we calculate their wage rate. We also adjust the wage rate to reflect a forecast of wages in 2015. This is done in two steps. First, based on legislation enacted as of April 2014, we estimate the minimum wage that would be in effect in January 2015 for each state and city that we consider. If a state or city has an indexed minimum wage, we increase the January 2014 state or city minimum wage by the Congressional Budget Office (CBO) inflation forecast for 2014 of 1.7%.

Since we use data from 2011 through 2013, we also follow the CBO approach for forecasting what the wage distribution would be in 2015. This is done in two steps. First, we adjust wages observed prior to 2013 to reflect 2013 minimum wage legislation. For example, if the minimum wage in a state was $7.25 in 2011 and grew to $8.00 by 2013, anyone who earned between $7.25 and $8.00 in 2011 would have their wage increased to $8.00. After wages are adjusted to 2013 levels, we assume that all wages grow by 2.9% in 2014. Using the resulting 2015 distribution of wages, we adjust for minimum wage legislation that would increase the minimum between 2013 and 2015. Anyone earning a wage between the 2013 and 2015 minimum wage is assigned a wage matching the 2015 minimum wage.

After generating the forecast 2015 distribution of wages reflecting wage growth and existing minimum wage legislation, we identify workers who would be affected by additional changes to the 2015 minimum wage as those with wages between the predicted minimum wage legislated for 2015 (or up to $.25 below it) and the proposed minimum.

To estimate the number of affected workers, we take two steps. First, for each state, we estimate the number of affected workers for 2013. Second, we adjust the weights in the 2011 and 2012 data so that the state-specific number of affected workers implied by the 2011 and 2012 data matches that for 2013. This adjustment is designed to correct for the changing economic climate as the economy recovers from the great recession and to generate estimates that are as close as possible to the most recent data (2013). After we adjust the 2011 and 2012 weights, we estimate the number of affected workers by summing their earnings weights and dividing the total by 36 (the number of months of data).

[1] Also, following CBO, anyone earning up to $.25 less than the 2011 minimum wage would have their wage increased by the amount that the minimum wage increased (i.e. a $7.00 wage would be increased to $7.75 in this example). This approach is used to adjust for the fact that many workers round their answers when asked about their wage.

TECHINCAL APPENDIX CONTINUED

Employment Loss

To estimate employment loss, for each affected worker we compute:

L = e *(Proposed Min Wage /Min Wage 2015 – 1)

where e is an assumed elasticity of employment with respect to changes in the minimum wage, Min Wage 2015 is the minimum wage currently legislated for 2015, and Proposed Min Wage is the minimum wage that is being proposed for 2015. Thus, for example, if a worker is projected to earn the federal minimum of $7.25 in 2015, the expected reduction in employment resulting from a $10.10 minimum wage in 2015 if e=.45 is .45*(10.10/7.25 – 1) = .18. That is, for every 100 workers currently earning the federal minimum, the expectation is that 18 would lose a job if the minimum wage elasticity is .45.

To estimate the aggregate employment loss in the economy, we use earnings weights to sum L across workers. We also follow the Congressional Budget Office (2014) and use an elasticity of 0.15 for non-teenagers and 0.45 for teenagers.

Cost to State and Local Government

We use the same data to estimate the cost to state and local government of a proposed minimum wage hike. We apply the same definition of affected workers described above and estimate the number of state and local government workers affected by a minimum wage hike. We do not, however, assume that there is any job loss for state and local workers as we do not have an appropriate elasticity estimate specific to state and local workers. To the extent that state or local governments reduce hours or employment in response tothe minimum wage hike, our estimate of the cost of the hike would be overstated.

To estimate the increase in annual payroll cost resulting from an increase in the minimum wage, we estimate the increase in annual cost for each worker as:

(Proposed Min Wage-Min Wage 2015)*weekly hours*52

We then multiply the increase in annual cost by the earnings weight for each worker and sum across workers. Since an increase in wages also requires increased employer contributions for Social Security, Medicare, workers' compensation and unemployment insurance, we apply an estimate of the payroll tax rate for these mandatory programs to calculate the additional cost for these programs.

For each state and city considered, we provide tables summarizing the number of affected workers, employment loss, and the distribution of employment loss by sex, education, race, age and industry. Given that we use three years of data, a rule of thumb for minimum sample size required to achieve a reasonably accurate estimate of the employment loss is to require at least 30,000 people be in the relevant category. For example, if there are fewer than 30,000 people projected to be in a particular industry category, the Bureau of Labor Statistics would not report the estimate due to a lack of reliability based on the variance of the estimate relative to its mean.

In addition to the estimate of employment loss, for each state or city considered, we estimate the number of state and local workers that would be affected by the minimum wage hike and the total annual cost to government in terms of wages and total compensation. As with the employment estimates, we advise caution in interpreting estimates that are based on fewer than 30,000 affected workers.

[3] Congressional Budget Office, "The Effects of a Minimum-Wage Increase on Employment and Family Income," February 2014.

[4] For workers paid by the hour the reported hourly wage was used. For workers who are not paid by the hour, we calculate the hourly wage by dividing usual weekly earnings by usual weekly hours. Overtime pay was calculated as time and one-half for hours above 40 hours for hourly workers.

[5] The assumed payroll tax for Medicare and Social Security is 7.65 percent. To estimate the payroll tax for workers' compensation and unemployment insurance, we use unpublished data from the 2010 Employer Cost of Employee Compensation database for state and local workers in the relevant region in 2010.

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

Prepared for

Victor Allred versus Robin Carnahan and Thomas Schweich
Circuit Court of Cole County, Missouri

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

I. Introduction

This report was undertaken at the request of counsel representing plaintiffs in the case of Victor Allred versus Robin Carnahan and Thomas Schweich. As part of the basis of the lawsuit, the plaintiffs allege that the fiscal note summaries for proposed statutory initiative petitions 2012-084 and 2012-085 are insufficient and unfair. I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will

range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

The report is organized as follows. My qualifications to prepare this report are contained in Section II. Section III describes the data and records I relied upon for this report. Section IV reviews the estimated fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085. A summary and my conclusions are provided in Section VI.

II. Qualifications

I am currently the E.M. Stevens Professor of Economics at Trinity University in San Antonio, Texas. Previously, I was employed by Florida State University as Director of the Pepper Institute on Aging and Public Policy and the Rod and Hope Brim Eminent Scholar in Economics. I have taught both undergraduate and graduate Econometrics (statistical analysis of economic data), and Labor Economics. I have published over 50 articles in peer-reviewed professional journals.

I am currently serving on the editorial board of the *Journal of Forensic Economics*, which is a peer-reviewed journal. I have also served as a reviewer or 'referee' for 24 peer-reviewed journals, including the *Journal of Human Resources, Journal of Labor Economics, Quarterly Journal of Economics,* and the *Review of Economics and Statistics*. Based upon these experiences, I am very familiar with the scholarly and professional research process and the concept of peer review.

I have prepared numerous analyses and reports that use statistical methods as applied to specific questions. I have been responsible for developing the techniques and approaches required for these analyses. I routinely use computers and statistical software packages to assist me in my analytical work. I have been qualified as an expert witness on statistical analysis of employment discrimination and economic damages in state courts in Florida and Georgia and Federal Courts, and I have given expert testimony. I have prepared analyses and offered testimony on behalf of both plaintiffs and defendants.

Details of my qualifications are reflected in my current resume and legal cases, attached as Appendix A to the report.

III. Data and Records

I reviewed the following materials in preparing this report.

- Plaintiff's Complaint
- Material cited in footnotes below.

IV. Fiscal Impact

A. Overview

The proposed statutory initiative petitions 2012-084 and 2012-085 contain many elements in common. Both initiatives would increase the Missouri minimum wage to $8.25 per hour, alter the exemption for retail and service firms, raise the cash wage of tipped workers from 50% to 60% of the minimum wage, and increase the statute of limitation from two to three year for underpayment claims.

The initiatives differ in their linkage to the federal minimum wage. Initiative petition 2012-084 requires that the state minimum wage be automatically increased to the

federal minimum wage if it is higher than the state minimum wage. Initiative petition 2012-085 does not have such a linkage. It only requires that workers be paid the higher of the state minimum wage or the federal minimum wage. The linkage to the federal minimum wage will cause the state minimum wage to be higher under initiative petition 2012-084 over time. This is because the state minimum wage, in contrast to the federal minimum wage, is adjusted for inflation as measured by the Consumer Price Index.

An increase in the minimum wage in Missouri will affect state and local government entities in two ways. First, it will directly increase the cost of labor to state and local government entities. This will occur due to the increase in wages of state and local government workers earning between the existing minimum wage of $7.25 and the new minimum wage of $8.25.[1] In addition, workers laid off due to the minimum wage increase can collect unemployment benefits. The state government will bear the cost of unemployment benefits of these workers for the first 20 weeks. Second, state and local government may gain increased revenue through higher income tax and sales taxes paid by workers affected by the minimum wage who remain employed. However, state and local government will suffer reduced tax revenue to the extent the higher wage cost lowers profits of businesses.

The following sections estimate the cost and revenue effects to state and local government entities of the proposed minimum wage increase.

[1] Information about the minimum wage in Missouri is available at http://www.labor.mo.gov/DLS/minimumwage/.

B. Direct Labor Cost Impact on State and Local Government Budgets

There are two possible ways to measure the direct labor cost on state and local government budgets. First, one can use the information included in the fiscal notes prepared by the State Auditor regarding the proposed initiatives. It is important to note that the fiscal notes provide an incomplete and thus too low estimate of the direct labor cost. The fiscal notes indicate that the Office of Administration's (OA) Division of Personnel reported that as of September 2011 there were 834 state workers who would be affected by an increase of the minimum wage to $8.25 and the "approximate annual cost" would be more than $540,000.

This OA estimate excludes seasonal workers such as State Fair employees, State Parks Employees, and tax season staff. The Division of Revenue noted its labor cost would rise by $40,000. The Division of Natural Resources stated they have over 500 workers who would be affected by the increase, but did not provide an estimate of the cost. The State Fair hired 745 workers that would be affected, but no cost estimate was provided.

Thus, the cost to state government, based on the fiscal notes, would be more than $580,000.

The fiscal notes also provide an incomplete and thus too low measure of the cost to local government and public educational institutions. Many cities and educational institutions did not respond to Office of Auditor's survey or provide an estimate of the cost of the higher minimum wage. The City of Columbia, City of Jefferson, City of

Joseph, Linn State Technical College, and Metropolitan Community College did provide such an estimate. The total cost to these five institutions is $772,182.

Based on the fiscal notes, the cost to state and local government entities of the increase in the minimum wage to $8.25 will be more than $1,352,182.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can also be used to calculate the cost of the increased labor cost to state and local government entities in Missouri. Using the data from January 2010 to December 2011 Outgoing Rotation Group (ORG) CPS, I calculated that 17,089 state and local government workers would be affected by the minimum wage increase. I defined affected workers as those individuals earning between $7.00 and $8.24 per hour. Though the minimum wage was $7.25 per hour during this period, I also included those workers reporting earnings of $7.00 to $7.24 since some individuals may round their wage rate. I calculated the annual wage cost for each state and local government worker (i) in the ORG CPS as:

$$Annual\ Wage\ Cost_i = (\$8.25 - current\ wage_i) * weekly\ hours_i * 52.$$[2]

The average annual wage cost increase was $870. I summed the cost over each worker (i) to obtain the total wage cost to state and local government entities in Missouri of $14,866,430.

The increased wage cost is not the only labor cost to state and local government entities of the minimum wage increase. Employers are required to pay 7.65% of their wage costs in Social Security and Medicare taxes. Thus, the total labor cost of the minimum wage increase will be 1.0765 times $14,866,430 or $16,003,712.

---

[2] I assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour.

C. Unemployment Benefit Impact

The higher minimum wage will cause firms to reduce their level of employment.[3] As a result, the number of unemployed workers will increase. Thus, another important fiscal cost of the minimum wage increase is the cost of the unemployment insurance benefits for the workers laid off as a result of the minimum wage increase.

To calculate the cost to the unemployment benefits program, I first calculated the number of workers laid off. To do so, I calculated a probability of job loss for each affected Missouri worker (i) in the January 2010 to December 2011 ORG CPS:

$$Probability\ Job\ Loss_{\ i} = \frac{(\$8.25 - Current\ Wage_i)}{Current\ Wage_i} * elasticity_i.$$

I used the preferred employment elasticity (i.e., sensitivity of employment to wage changes) contained in Sabia and Burkhauser (2010), which was -0.6 for individuals aged 16 to 29 without a high school degree and -0.2 for all other individuals. The sole exception was for state and local government workers, where I assumed an elasticity of zero.[4] The sum across all affected workers yielded an estimated job loss of 5,745 jobs.

The next step was to calculate the weekly benefit for the average unemployed worker. Using the benefits calculator on the Missouri unemployment benefits web site and the wage income of average private-sector affected worker ($10,937), yields an average weekly benefit of $109.36[5]. The state of Missouri pays the first 20 weeks of benefits.[6] Thus, each eligible unemployed worker could receive a total of $2,187.20 in

---

[3] For a survey of research regarding the effect of the minimum wage on employment, see David Neumark and William L. Wascher, *Minimum Wages* (Cambridge, MA: MIT Press, 2008).
[4] Joseph J. Sabia and Richard V. Burkhauser, "Minimum Wages and Poverty: Will a $9.50 Federal Minimum Wage Really Help the Working Poor?" *Southern Economic Journal* (January 2010): 592-623.
[5] http://www.labor.mo.gov/DES/Claims/calculator.asp
[6] See http://www.labor.mo.gov/DES/Claims/

benefits paid for by the state of Missouri. These jobs are permanently eliminated and so it is appropriate to calculate the full amount of benefits for each worker.

Unemployment insurance, however, does not cover all unemployed workers. For example, it does not cover people who leave a job voluntarily, people looking for their first job, and re-entrants who previously left the labor force voluntarily. Furthermore, some individuals don't apply for benefits even though they are eligible. I assume that 35% of the unemployed workers will receive unemployment benefits based on analysis by Wenger (2001).[7]

The last step is to calculate the total cost to the Missouri unemployment benefits program. This done by multiplying the number of jobs lost (5,745) times the average benefit amount ($2,187.20) times the percent of unemployed individuals collecting benefits (35%). This calculation yields a figure of $4,397,510. This cost would be borne only during the first year of the minimum wage increase. The inflation adjustments in the minimum wage will also yield costs to the unemployment insurance program, but it is not possible to estimate the amount.

D. Impact on State Income Tax Revenue

The state of Missouri will gain increased revenue through higher income tax taxes paid by workers affected by the minimum wage who remain employed. However, it will

[7] Jeffery Wenger. "Divided We Fall: Deserving Workers Slip through America's Patchwork Unemployment Insurance System." *Economic Policy Institute*, 2001. Sabia and Burkhauser (2010) make the same assumption in their calculation of the amount of unemployment benefits generated by a minimum wage increase.

suffer reduced corporate income tax revenue to the extent the higher wage cost lowers profits of businesses.

To calculate the impact on individual income tax revenue, I again used data from January 2010 to December 2011 ORG CPS. I defined affected workers as those Missouri individuals earning between $7.00 and $8.24 per hour.[8] I used the following formula to estimate the change in income tax revenue:

$$\Delta Tax\ Revenue_i = (Tax_After_i - Tax_Before_i) - Prob_Job_Loss_i * Tax_Before_i,$$

where Tax_After_i is the income tax paid by worker i after the minimum wage increase. Tax_Before_i is the income tax paid by worker i after the minimum wage increase, and $Prob_Job_Loss_i$ is the probability of job loss for worker i. The first term shows the change in individual income tax revenue assuming no job loss and the second term shows the loss in tax revenue due to the employment loss caused by the minimum wage increase.

The income tax calculations were based on two assumptions.[9] First, the 50% percent of affected workers who were under the age 25 who were assumed to be dependents on another person's tax return. As a result, it was assumed that the affected workers' earnings were taxable at the maximum Missouri income tax rate of 6% both and after the minimum wage increase.[10] Second, all persons age 25 and older were assumed to be paying little or no income tax after exemptions and deductions. Thus, about 50% of the earnings increase will be taxed at a rate of 6%.

---

[8] I again assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour. The annual earnings level was calculated as the worker's wage rate times usual weekly hours worked times 52.

[9] The same assumptions are used in the State Auditor's fiscal notes for the initiatives.

[10] This assumption will overstate the revenue increase as 20% of affected workers under the age 25 are living by themselves and some of these individuals will not be a dependent on another person's tax return.

The tax calculations reveal an increase in income tax revenue increase to the state. Assuming no workers were laid off by the minimum wage increase, income tax revenue would rise by $6,043,534. However, the state will lose $1,965,446 in income tax revenue due to the lost earnings of private-sector workers no longer employed due to the minimum wage hike.[11] Thus, the net increase in individual income tax revenue is $4,078,088.

Businesses have three options to respond to the higher labor costs of a higher minimum wage. They can reduce their profits, raise prices, or lay off workers. Based on the 2010-2011 ORG CPS data, the minimum wage increase will raise private-sector labor costs by $192,620,900 if employment levels are not reduced. However, labor costs will be lowered by $55,240,790 due to the reduction in employment. Thus, labor costs will, on net, rise by $137,380,110. These increased labor costs may be either passed on to consumers through higher prices or reduced profits or more likely some combination of higher prices and reduced profits. Assuming that businesses absorbed all of the higher costs through reduced profits, the corporate income tax revenue would fall by the Missouri corporate income tax of 6.25% times the rise in labor costs of $137,380,110 * 1.0765 (to account for employer-paid Social Security and Medicare taxes) or $9,243,106.[12] Alternatively, if half of the higher labor costs were passed on to consumers, then corporate income tax revenue would fall by $4,621,553.

[11] The probability of job loss was calculated in the same manner as in the prior section.
[12] The corporate income tax for Missouri is available at: http://dor.mo.gov/business/corporate/

E. Impact on State and Local Sales Tax Revenue

To calculate the impact on state and local sales tax revenue the following approach was undertaken.[13] First, the total increase in worker earnings, adjusted for employment reductions, was calculated using the 2010-2011 ORG CPS. This figure was $152,246,540. Second, the increase in Missouri taxable sales was calculated as 25% of the earnings increase or $38,061,635. Third, the increase in sales tax revenue was calculated by multiplying the taxable sales change times the average state and local rate of 7.67% or $2,919,327.[14]

The higher minimum wage may decrease sales tax revenue to the extent that it reduces business profits, which will lower spending by business owners.

VI. Summary and Conclusions

I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

[13] The same general approach is used in the State Auditor's fiscal notes for the initiatives.
[14] The average rate comes from http://taxfoundation.org/news/show/27023.html

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

"Gender-Related Differences in Pension Coverage," with William Even, in *Women and Work: A Handbook*, Garland Publishing, New York, NY, 1996.

"The Pension Coverage of Young and Mature Workers", with William Even, in *Pension Coverage Issues for the '90s*, eds. Richard Hinz, John Turner, and Phyllis Fernandez, U.S. Government Printing Office, Washington, D.C, 1994.

Working Papers (Economics)

"Deferred Compensation vs. Efficiency Wages: An Experimental Test of Effort Provision and
Self-Selection," with Tim Salmon and Kislaya Prasad, under review, *Journal of Business and Economic Organization*

"What Do Unions Do to Pension Performance?" with William Even, September 2011, under revision

"Teacher Salaries, State Collective Bargaining Laws, and Union Coverage" March 2011, with Barry Hirsch and John Winters.

"The Effects of the 2007-2009 Federal Minimum Wage Increases on Teen Employment," with William Even, under revision, July 2010.

"Participant Direction in Defined Contribution Plans," April 2006, with William Even, under revision.

"Do Pensions Impede Phased Retirement?" September 2004, with William Even, under revision.

Working Papers (Real Estate and Insurance)

"An Empirical Analysis of Socio-Demographic Factors and the Mispricing of Homeowners Insurance in Florida," under review *Journal of Financial Services Research*, with Ronald Cheung, Charles Nyce, Kathleen McCullough, and Cassandra Cole.

"The Impact of No-Fault Legislation on Automobile Insurance Premiums," revised and resubmitted to *North American Actuarial Journal*, with Cassandra Cole, Kevin Eastman, Patrick Maroney, and Kathleen McCullough.

Funded Projects

Employment Policies Institute, 5/2010-7/2010, $16,500 (Trinity University portion), "Employment Effects of the 2007-2009 Federal Minimum Wage Increases," with William Even.

National Science Foundation, 9/2009-8/2012, $125,866 (Trinity University portion), "Incentives in the Workplace: An Experimental Examination of How Wage Differences Across Time and Among Peers Affect Productivity and Self-Selection," with Tim Salmon, Kislaya Prasad, and Hyejin Ku.

Florida Legislature, 10/2007-6/2009, $175,000, "Child Support Guidelines," with Stefan Norrbin and Thomas McCaleb.

Florida Legislature (through University of Florida), 12/2006-9/2007, $223,000, "Analysis of Save our Homes Amendment," with Dean Gatzlaff.

U.S. Administration on Aging (through University of South Florida), 5/2005-9/2007, $175,000, "Employment in the Long-Term Care Industry: The Importance of Recruitment and Retention," with William Even.

Florida Legislature, 2/2003-8/2004, $175,000, "Child Support Guidelines," with Stefan Norrbin and Thomas McCaleb.

Florida Department of Environmental Protection, 6/2002-2/2003, $94,157, "Affordability Index," with Stefan Norrbin and William Serow.

University of South Carolina, 4/2000-11/2000, $10,000, "Minority Homeownership in South Carolina," with Stacy Sirmans.

Florida Department of Business and Professional Regulation, 3/1999-6/1999, $21,739, "Forecasting Housing Demand in Florida," with Stacy Sirmans.

University of South Carolina, 4/1999-11/1999, $10,000, "Forecasting Housing Demand in South Carolina," with Stacy Sirmans.

Florida State University, 6/1999-8/1999, $7,500, "Support for Preparing ECO 2000 as a Web-Based Course."

TIAA-CREF, 8/1998-8/1999, $23,000, "Determinants of Savings in Supplemental Pension Plans: A Case Study of Pension Choices in Higher Education," with Melissa Hardy and Larry Hazelrigg.

Florida Department of Business and Professional Regulation, 4/1998-6/1998, $16,638, "Forecasting Seniors' Demand for Housing in Florida," with Stacy Sirmans.

Florida Department of Business and Professional Regulation, 12/1997-6/1998, $18,472, "Housing Price Appreciation in Orlando and Tampa," with Stacy Sirmans.

Florida State University, 6/1998-8/1998, $7,500, "Support for Preparing ECO 2000 as a Web-Assisted Course."

Florida Department of Business and Professional Regulation, 3/1997-6/1997, $17,898, "Minority Homeownership in Florida," with Stacy Sirmans.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 12/1996-8/1997, $20,000, "The Impact of Rising 401(k) Pension Coverage on Retirement Income," with William Even.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 3/1996-6/1997, $15,000, "The Determinants of 401(k) Participation and Contribution Levels," with William Even.

Florida Department of Business and Professional Regulation, 4/1996-6/1996, $22,702, "Forecasting the Number of New Florida Real Estate Licensees," with Stacy Sirmans.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 3/1995-6/1996, $15,000, "Explaining the Decline in Pension Coverage of Less Educated Workers," with William Even.

Florida State University COFRS Grant, 6/1994-8/1994, $8,000, "The Relative Compensation and Quality of Public and Private Sector Workers."

W.E. Upjohn Institute for Employment Research, 3/1994-12/1995, $35,000, "Pensions and Productivity," with Stuart Dorsey and Christopher Cornwell.

Florida Division of Workers' Compensation, 1/94-12/1995, $100,000, "Worker's Compensation Recipency in Union and Nonunion Workplaces," part of a service contract titled "Research Partnership with the Division of Workers' Compensation," co-investigator (one of several).

University of Wisconsin Institute for Research on Poverty Small Grant Program, 7/1993-6/1994, $15,000, "Racial Composition, Wages, and Quality Sorting," with Barry Hirsch.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 7/1993-6/1993, $10,000, "Trends in Individual and Family Pension Coverage," with William Even.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 6/1992-5/1993, $10,000, "The Pension Coverage of Young and Mature Workers," with William Even.

U.S. Department of Labor, Pension Welfare and Benefit Administration and American Society of Pension Actuaries, 6/1991-5/1992, $10,000, "A Conference on Current Pension Policy Issues," with William Even.

Miami University Faculty Research Grant, 6/1991-8/1991, $4,000, "Projected Growth in Retiree Health Insurance Liabilities."

Ohio Board of Regents Research Challenge Grant, 1/1990-12/1990, $4,980, "Proposal to Enhance the Data Library of the Center of Pension and Retirement Research," with William Even and Samuel Williamson.

Miami University Faculty Research Grant, 6/1990-8/1990, $4,000, "The Role of Firm Size in Pension Coverage and Options."

Miami University Faculty Research Grant, 6/1989-8/1989, $4,000, "Declining Unionism and the Gender Wage Gap," with William Even.

Participation in National Meetings

Panel Discussant, American Real Estate and Urban Economics Association/ASSA meetings, January 2008.

Presented, "Employee Turnover in the Long-Term Care Industry," at Academy Health Annual Research Meetings, June 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at International Atlantic Economic Society meetings, October 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at International Atlantic Economic Society meetings, October 2005.

Presented, "Replacing Earnings After Termination: Evidence from the Displaced Worker Survey," at the Allied Social Science Association/National Association of Forensic Economics, January 2002.

Presented, "Labor Market Transitions of Older Workers," at the Allied Social Science Association/Society of Government Economists meetings, January 1999.

Presented, "Why has the Loss in Pension Coverage Accelerated Among Less Educated Workers?" at the American Economic Association Meetings, 1995.

Presented, "Wages and Gender Composition: Why Do Women's Jobs Pay Less?" at the American Economic Association Meetings, 1994, with Barry Hirsch.

Presented, "Pensions, Labor Turnover, and Employer Size" at the American Economic Association Meetings, 1993, with William Even.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the American Economic Association meetings, 1992, with William Even.

Participation in Regional Meetings

Presented "Unions and Pension Performance: The Role of Pension Design," at Southern Economics Association meetings, November 2009.

Panel member, "Recent Federal Reserve Policy: An Evaluation" at Southern Economics Association meetings, November 2009.

Discussant, "Topics in Health Economics," at Southern Economics Association meetings, November 2009.

Discussant, "Teacher Pay, Principals, and Schooling," at Southern Economics Association meetings, November 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Western Economic Association meetings, July 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Eastern Economic Association meetings, February 2009.

Panel Discussant at the Southern Economic Association meetings, November 2008.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Southern Economic Association meetings, November 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Western Economic Association meetings, July 2008.

Chair "Pensions and Retirement" Session at Southern Economic Association meetings, November 2007.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Southern Economic Association meetings, November 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Southern Economic Association meetings, November 2006.

Panel Discussant, Southern Economic Association meetings, November 2005.

Presented, "Do Pensions Impede Phased Retirement?" at the Southern Economic Association meetings, November 2004.

Presented, "When Will the Gender Gap in Retirement Income Narrow?" at the Southern Economic Association meetings, November 2003.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Southern Economic Association meetings, November 2002.

Presented, "Racial Composition, Wages, and Quality Sorting," at the Southern Economic Association meetings, November 1999.

Presented, "Racial and Ethnic Differences in Pension Coverage and Benefit Levels," at the Southern Economic Association meetings, November 1998.

Presented, "Factors Influencing Participation and Contribution Levels in 401(k) Plans," at the Western Economics Association meetings, July 1998.

Presented, "Aging at Work: Employment Determination, Firm Strategies, and Public Policy in the United States," at the Western Economic Association meetings, July 1994.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Western Economic Association meetings, July 1992.

Presented "Plant Size and the Decline of Unionism," at the Southern Economic Association meetings, 1989, with William Even.

Panel Discussant, Southern Economic Association meetings, November 1989.

Presented "The Labor Force Participation and Earnings Profiles of Married Female Immigrants," at the Southern Economic Association meetings, November 1988.

Presented "Pensions, Screening, and the Gender Wage Gap," at the Southern Economic Association meetings, November 1988.

Session Chair and Panel Discussant at the Southern Economic Association meetings, November 1988.

Participation in Invited Seminars, Conferences, and other Presentations

Presented, "Teaching Macroeconomics During Troubled Times," at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2012.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Pennsylvania State University, April 2010.

Presented, "The Parallels Between the Japanese Economic Crisis of the 1990s and the US Today" at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2010.

Chair "Minimum Wage & EITC" Session at Society of Labor Economists meetings, May 2009.

Presented "Participant Direction in Defined Contribution Plans," at Lehigh University, April 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Association of Private Enterprise Education meetings, April 2009.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Trinity University, October 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Georgia State University, April 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Association of Private Enterprise Education meetings, April 2008.
Presented, "Improving Pension Coverage at Small Firms," at Hudson Institute, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Society of Labor Economics meetings, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Association of Private Enterprise Education meetings, April 2006.

Presented, "Participant Direction in Defined Contribution Plans," at University of Wisconsin-Milwaukee, April 2006.

Invited Panel Participant for Pepper Foundation and Center Symposium on pension reform, Washington, DC, February 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at West Virginia University, April 2005.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at the University of Kentucky, November 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the Federal Reserve Bank of Atlanta, April 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the University of Oklahoma, February 2004.

Presented, "Tracking Union and Nonunion Wages in the U.S.: Can the Evidence be Reconciled?" at the Middlebury Annual Conference on Economic Issues, April 2002.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Miami University Center for Pension and Retirement Research Conference, June 2001.

Presented, "Benefits and Worker Productivity," Benefits for the Workplace of Tomorrow Conference, Wharton School, University of Pennsylvania, May 2001.

Participant, Innovations in Managing the Financial Risks of Retirement Conference, Wharton School, University of Pennsylvania, May 2000.

Presented "Using Hi-Tech in Large Lectures," at Association of Private Enterprise Education meetings, April 2000.

Presented "Employee Participation in 401(k) Plans," at University of Wisconsin-Milwaukee, October 1999.

Presented "Gender, Race, and Ethnicity in the Labor Market," as part of the Smith Chair course in Labor Economics at Brigham Young University, September 1999.

Presented, "The Decline in Pension Coverage Among Less Educated Workers," at the Florida State University Economics Department Seminar Series, 1996.

Presented, "Children's Effects on Women's Labor Market Attachment and Earnings" at the Conference on the Changes in Working Time in Canada and the United States, Canadian Employment Research Forum, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Ohio State University Economics Department Seminar Series, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Florida State University Economics Department Seminar Series, 1995.

Presented, "Employer Size and Labor Turnover: The Role of Pensions," at Syracuse University, 1995.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" while visiting scholar at the Federal Reserve Bank of Cleveland, 1995.

Presented, "Trends in Individual and Household Pension Coverage," at the Miami University Center for Pension and Retirement Research Conference, 1994.

Presented, "Racial Composition, Quality Sorting, and the Black-White Wage Gap" at the University of Wisconsin, Institute for Research on Poverty, Small Grants Workshop, 1993, with Barry Hirsch.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Florida State University Economics Department Seminar Series, 1992.

Participant at National Bureau of Economic Research (NBER) Labor Studies meetings of the Summer Institute, 1992.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Miami University Conference on Current Pension Policy Issues, 1992.

Organizer and participant at conference on "Contemporary Issues in Pension Economics," hosted by the Center for Pension and Retirement Research, Miami University, 1990.

Presented "The Effect of International Competition on Union and Nonunion Wages," at the University of Cincinnati Seminar Series, 1987.

Fiscal Note Summary

State and local governments estimate no direct costs or savings from the proposal, but operating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $13.1 million decrease to a $282 million increase depending on business decisions.

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Richard Von Glahn regarding a proposed statutory amendment to Chapter 290, Version 2 (2018-197)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Richard Von Glahn on April 3, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that the proposed law changes, repeals, or modifies by implication, or may be construed by some persons to change, repeal, or modify by implication, the following provisions of the Missouri Revised Statutes: Section 285.055 and Sections 290.502, 290.512, 290.527, and 290.528. The proposed law enacts two new sections to be known as sections 290.526 and 290.529.

Be it enacted by the people of the state of Missouri:

Sections 290.502, 290.512, and 290.527 of the Revised Statutes of Missouri are amended, and two new sections to be known as sections 290.526 and 290.529 are enacted to read as follows:

290.502. 1. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, effective January 1, 2007, every employer shall pay to each employee wages at the rate of $6.50 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher.

2. The minimum wage shall be increased or decreased on January 1, 2008, and on January 1 of successive years, by the increase or decrease in the cost of living. On September 30, 2007, and on each September 30 of each successive year, the director shall measure the increase or decrease in the cost of living by the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) or successor index as published by the U.S. Department of Labor or its successor agency, with the amount of the minimum wage increase or decrease rounded to the nearest five cents.

3. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, and notwithstanding subsection (1) of this section, effective January 1, 2019, every employer shall pay to each employee wages at the rate of not less than $9.00 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher. Thereafter, the minimum wage established by this subsection shall be increased each year by $1.00 per hour, effective January 1 of each of the next three years, until it reaches $12.00 per hour, effective January 1, 2022. Thereafter, the minimum wage established by this subsection shall be increased or decreased on January 1, 2023, and on January 1 of successive years, per the method set forth in subsection (2) of this section. If at any time the federal minimum wage rate is above or is thereafter increased above the minimum wage then in effect under this subsection, the minimum wage required by this subsection shall continue to be increased pursuant to this subsection (3), but the higher federal rate shall immediately become the minimum wage required by this subsection and shall be increased or decreased per the method set forth in subsection (2) for so long as it remains higher than the state minimum wage required and increased pursuant to this subsection.

4. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (3) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsections (1) and (2) of this section shall continue to be subject to those subsections.

290.512. 1. [No] Except as provided in subsection (2) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of fifty percent of the minimum wage rate specified in sections 290.500 to 290.530, however, total compensation for such employee shall total at least the minimum wage specified in sections 290.500 to 290.530, the difference being made up by the employer.

2. Beginning January 1, 2019 and effective on the dates set forth below in this subsection, and notwithstanding the percentage established in subsection (1) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of the percent set forth below in this subsection of the minimum wage rate specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530:

(1) fifty-one percent, effective January 1, 2019;
(2) fifty-three percent, effective January 1, 2020;
(3) fifty-five percent, effective January 1, 2021;
(4) fifty-seven percent, effective January 1, 2022;
(5) fifty-eight percent, effective January 1, 2023;
(6) sixty percent, effective January 1, 2024;

however, in all cases, total compensation for such employee shall total at least the minimum wage specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530, the difference being made up by the employer.

3. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (2) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsection (1) of this section shall continue to be subject to that subsection at the percentage set forth therein of the minimum wage rate specified in subsections (1) and (2) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530.

[2.] 4. If an employee receives and retains compensation in the form of goods or services as an incident of his employment and if he is not required to exercise any discretion in order to receive the goods or services, the employer is required to pay only the difference between the fair market value of the goods and services and the minimum wage otherwise required to be paid by sections 290.500 to 290.530. The fair market value of the goods and services shall be computed on a weekly basis. The director shall provide by regulation a method of valuing the goods and services received by any employee in lieu of the wages otherwise required to be paid under the provisions of sections 290.500 to 290.530. He shall also provide by regulation a method of determining those types of goods and services that are an incident of employment the receipt of which does not require any discretion on the part of the employee.

290.526. Notwithstanding any other provision of law, as of the effective date of this section, municipalities, cities, counties, towns, and villages shall have the power to establish, mandate, or otherwise require an employer to pay wages to an employee who performs work while physically present within the boundaries of the municipality, city, county, town, or village, including employees not subject to the state or federal minimum wage, at a minimum rate per hour that exceeds the rate set under state or federal law, except that such a requirement shall not apply to employees employed by another local, state, or federal government entity or instrumentality.

290.527. Any employer who pays any employee less wages than the wages to which the employee is entitled under or by virtue of sections 290.500 to 290.530 shall be liable to the employee affected for the full amount of the wage rate and an additional [equal] amount equal to twice the unpaid wages as liquidated damages, less any amount actually paid to the employee by the employer and for costs and such reasonable attorney fees as may be allowed by the court or jury. The employee may bring any legal action necessary to collect the claim. Any agreement between the employee and the employer to work for less than the wage rate shall be no defense to the action. All actions for the collection of any deficiency in wages shall be commenced within [two] three years of the accrual of the cause of action.

290.529. Except in the circumstances set forth in section 290.523, all the provisions of sections 290.500 to 290.530 are severable. If any provision, including any section, subsection, subdivision, paragraph, sentence, or clause, of sections 290.500 to 290.530, or the application thereof to any person or circumstance, is found by a court of competent jurisdiction to be invalid, unconstitutional, or unconstitutionally enacted, such decision shall not affect other provisions or applications of sections 290.500 to 290.530 that can be given effect without the invalid, unconstitutional, or unconstitutionally enacted provision or application.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-197)

Subject

Initiative petition from Richard Von Glahn regarding a proposed amendment to Chapter 290 of the Revised Statutes of Missouri. (Received April 4, 2017)

Date

April 24, 2017

Description

This proposal would amend Chapter 290 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis,** the **St. Louis County Board of Elections,** the **Board of Election**

Commissioners City of St. Louis, the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners**.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided information as proponents of the proposal to the State Auditor's office.

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations. They do not expect that the enactment of this proposal would result in any other increased costs to their office.

Officials from the **Department of Agriculture** indicated there is no fiscal impact to their department for this initiative petition.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department since public employers are exempt from the new provisions proposed.

Officials from the **Department of Health and Senior Services** indicated this proposal would have no direct fiscal impact on their department since government employees are exempt from its provisions. However, employees of certain entities that receive funding through the department's budget would be impacted, such as Medicaid Home and Community Based Services vendors/providers and Area Agencies on Aging.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department defers to the Office of Administration to determine the fiscal impact of this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department. Their department defers to the Office of Administration for a state impact.

Officials from the **Department of Public Safety - Office of the Director** indicated they will defer to the response provided for this initiative petition by the Office of Administration - Human Resources.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration.

Officials from the **Governor's office** indicated there should be no added cost or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Officials from the **Office of Administration** indicated the proposal amends Sections 290.502, 290.512, 290.527, RSMo and adds Sections 290.526 and 290.529, RSMo.

Section 290.502, RSMo, increases the minimum wage to $9.00 per hour, beginning January 1, 2019 and by another $1.00 per hour each year until it reaches $12.00 per hour beginning January 1, 2022. Thereafter, the minimum wage will be adjusted annually based on the increase/decrease in the cost of living.

Section 290.512, RSMo, increases the base salary for tipped employees. Effective January 1, 2019, employers must pay at least 51% of the minimum wage rate to tipped employees. Each year thereafter the rate increases until January 1, 2024 when tipped employees should be paid 60% of the minimum wage as established in Section 290.502, RSMo.

The proposal exempts public employers from both requirements; therefore, there would be no cost to the State of Missouri.

Section 290.526 allows municipalities, cities, counties, towns and villages to implement a minimum wage that exceeds the state or federal minimum wage rate, but exempts local, state or federal government entities from the higher minimum wage rate.

Because no tax rates are affected, there is no direct impact on general and total state revenues. However, these proposals may have several indirect affects, which could impact revenue collections by an unknown amount, including but not limited to:

- Increased wages for certain employees. According to the US BLS, in 2015, Missouri had 57,000 hourly employees earning wages at or below the federal minimum wage;[1]
- Increased consumption by those employees;
- Lower overall employment (if employers choose to hold costs steady);
- Lower business investment (if employers' payrolls increase);
- Increased prices as firms pass–through labor costs.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated they do not predict an immediate fiscal impact upon their office if Missouri's minimum wage rate were increased to $12.00

[1] http://www.bls.gov/opub/reports/minimum-wage/2015/home.htm

per hour. However, the potential future impact of applying cost of living increases and/or increases in the federal minimum wage to a Missouri minimum wage of $12.00 per hour, as called for elsewhere in Section 290.502, RSMo., is unknown.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this petition may have a small negative fiscal impact on their city as a result of the increased hourly minimum wage being higher than the hourly rate paid some city employees.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they are not able to estimate any significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact since they are excluded under the public employer definition in section 4.

Officials from the **Missouri State University** indicated no fiscal impact.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated the wording is unclear as to whether Colleges/Universities are included in this petition. In assuming they are included they calculate the following significant fiscal impact to their university.

Combined Work Study Students and Non-Exempt Staff Minimum Wage Increase:
Proposed $9.00: increases our payroll by $ 455,840.00 annually
Proposed $10.00: increases our payroll by $ 835,360.00 annually
Proposed $11.00: increases our payroll by $1,251,928.00 annually
Proposed $12.00: increases our payroll by $1,701,646.00 annually

This proposed fiscal note will have a significant impact on the university.

Officials from the **Kansas City Board of Election Commissioners** indicated no fiscal effect on their operations.

Officials from the **Platte County Board of Elections** indicated no fiscal impact.

Officials from the **Jackson County Election Board** indicated this petition does not have a fiscal impact on their office.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided the following information as proponents of this initiative petition.

Re: Fiscal Impact Analysis of Minimum Wage Initiative Petitions

Summary of Proposed Minimum Wage Initiatives						
Version Number		**Initiative Summary**				
Version Number Used in This Impact Analysis	**Version Number Assigned by the Secretary of State**	**Minimum Wage Level**	**Matches the Federal Minimum Wage When It Is Higher**	**Stronger Penalty for Wage Violations**	**Tipped Worker Minimum Wage (as a % of Full Minimum Wage)**	**Allows Localities to Enact a Local Minimum Wage**
Version 13	2018 - 204	$12 by 2023 *(Start at $8.60 and $.85/year)*	Yes	Yes	No Change	No
Version 14	2018 - 205	$12 by 2023 *(Start at $8.60 and $.85/year)*	Yes	No	No Change	No
Version 15	2018 - 206	$12 by 2023 *(Start at $8.60 and $.85/year)*	No	No	No Change	No
Version 16	2018 - 207	$12 by 2024 *(Start at $8.50 and $.70/year)*	Yes	Yes	No Change	No
Version 17	2018 - 208	$12 by 2024 *(Start at $8.50 and $.70/year)*	Yes	No	No Change	No
Version 18	2018 - 209	$12 by 2024 *(Start at $8.50 and $.70/year)*	No	No	No Change	No

Version 19	2018 - 210	$13 by 2025 *(Start at $8.50 and $.75/year)*	Yes	Yes	No Change	No
Version 20	2018 - 211	$13 by 2025 *(Start at $8.50 and $.75/year)*	Yes	No	No Change	No
Version 21	2018 - 212	$13 by 2025 *(Start at $8.50 and $.75/year)*	No	No	No Change	No
Version 22	2018 - 213	$11 by 2022 (Start at $8.75 and $.75/year)	Yes	Yes	No Change	No
Version 23	2018 - 214	$11 by 2022 (Start at $8.75 and $.75/year)	Yes	No	No Change	No
Version 24	2018 - 215	$11 by 2022 (Start at $8.75 and $.75/year)	No	No	No Change	No
Version 25	2018 - 216	$11 by 2021 (Start at $9; $1/year)	Yes	Yes	No Change	No
Version 26	2018 - 200	$12 by 2022 (Start at $9; $1/year)	Yes	No	No Change	No
Version 27	2018 - 201	$13 by 2023 (Start at $9; $1/year)	Yes	No	No Change	No
Version 28	2018 - 202	$12 by 2024 (Start at $8.25; .75/year)	Yes	Yes	100%	No
Version 29	2018 - 203	$13 by 2025 (Start at $8.50; .75/year)	Yes	Yes	60%	No
Version 30	2018 - 196	$12 by 2022 (Start at $9; $1/year)	Yes	Yes	100%	Yes
Version 31	2018 - 197	$12 by 2022 (Start at $9; $1/year)	Yes	Yes	60%	Yes
Version 32	2018 - 198	$13 by 2023 (Start at 9; $1/year)	Yes	Yes	100%	Yes

Version 33	2018 - 199	$13 by 2023 (Start at $9; $1/year)	Yes	Yes	60%	Yes

This letter is from Lara Granich and Missouri Jobs with Justice Voter Action, proponents of the above-referenced Minimum Wage Initiative Petitions. Pursuant to RSMo. Section 116.175, we write to submit the following fiscal impact information to assist your office in its analysis of the fiscal impact of the above-mentioned seven proposed Minimum Wage Initiative Petitions.

Our analysis estimates the impact of the proposed Minimum Wage Initiative Petitions on state and local sales and personal income tax revenue in Missouri. We follow the process that has been used in the past to estimate the impact of minimum initiative petitions on state and local sales and personal income tax revenue, with some refinements. We also address certain claims that have been made by opponents of similar initiative petitions in the past.

As these petitions exclude public workers from the proposed minimum wage increases, we do not include in our analysis an estimate of the impact on state and local payroll costs of the proposed Minimum Wage Initiative Petitions.

I. Estimate of Number of Workers Affected Statewide and the Impact on Their Wages

Table 1. Summary of the Number of Affected Workers and Aggregate Wage Increases for Missouri in the Final Year of Minimum Wage Implementation.

Proposal	Year of Peak Minimum Wage (MW)	Proposed Peak MW	Tipped MW in Peak MW Year	Workers Affected by MW increase	Aggregate Annual Wage Increase in Nominal Dollars
13,14,15[a]	2023	$ 12.00	$ 6.00	835,350	$4,358,798,129
16,17,18[a]	2024	$ 12.00	$ 6.00	819,652	$4,209,438,048
19,20,21[a]	2025	$ 13.00	$ 6.50	900,788	$5,309,336,662
22,23,24[a]	2022	$ 11.00	$ 5.50	738,515	$3,347,138,756
25	2021	$ 11.00	$ 5.50	761,164	$3,469,534,559
26	2022	$ 12.00	$ 6.00	852,284	$4,510,285,824
27	2023	$ 13.00	$ 6.50	949,801	$5,667,065,534
28	2024	$ 12.00	$ 9.60	832,328	$4,288,614,460
29	2025	$ 13.00	$ 7.80	905,942	$5,332,471,496
30	2022	$ 12.00	$ 8.40	864,090	$4,558,317,729
31	2022	$ 12.00	$ 6.84	855,887	$4,523,341,931

32	2023	$ 13.00	$ 9.75	948,421	$5,745,051,956
33	2023	$ 13.00	$ 7.54	942,566	$5,685,951,766

Notes: Author's Analysis of American Community Survey (ACS) Data from 2014.
(a) Since these proposals only vary on non-economic factors, their economic and fiscal impacts are treated as equal for the purposes of this report.

Across the proposals analyzed, the total aggregate wage increase for workers in Missouri ranges from a low of $3.347 billion (Proposals 22-24) to a high of $5.745 billion under Proposal 32. While some proposals have the same final impact numbers, they have different impacts in the initial years (not listed) based on the relative pace of increases in earlier years. A full, year-by-year impact analysis is presented in Appendix Tables A1 through A13 below.

The wage impact of an increase in the minimum wage for the state of Missouri is calculated using the following procedure. The American Community Survey (ACS) Public Use Micro Sample for the most recent year available (2014) for the state of Missouri was downloaded from the US Census Bureau. The American Community Survey was chosen over the Current Population survey because the ACS has a significantly larger sample. We followed the method of Perry, Thomason, and Bernhardt (2016) for calculating an hourly wage rate from the ACS based on observed total annual wage income, typical hours worked each week and weeks worked per year. Since ACS income figures are clustered around whole-numbers, we smoothed the wage distribution by randomly adding or subtracting $0.25 from each wage figure.

Wage adjustments were made only for those individuals earning less than the proposed minimum wage, or proposed tipped minimum wage. We did not make additional adjustments for the "ripple effect" of minimum wage increases on workers earning slightly above the new threshold. Recent evidence suggests that workers earning up to 15 percent above of the minimum wage also receive small increases in response to a minimum wage increase. (See Wicks-Lim (2006) and Dube, Giuliano and Leonard (2015).) Thus, the estimated impacts listed above are likely to be smaller than the actual impact of increasing the minimum wage to the proposed level.

The proposed minimum wage increases exclude public employees. However, it was not practicable to exclude public employees from these calculations because the ACS does not have a published variable that allows for identification of public employees. Nonetheless, this inclusion of public employees should have only a minimal impact on our results, since their numbers are small and most already earn more than the proposed minimum wage increases.[1]

All wages from the 2014 survey were adjusted upward to account for inflation between the time of the survey and the time of measurement of the impact. Actual rates of inflation were used to adjust wages up to 2016. For all subsequent years between 2017 and 2028, baseline wages were adjusted using the projected annual average rate of change in the Consumer Price Index for Urban Workers (CPI-U) for the Midwest region. The 2015 and 2016 Missouri Minimum wage of $7.65 was adjusted by the same factor prior to measuring the impact of a change to the proposed minimum wage in 2019.

After these adjustments, the resulting hourly wage of all employees was compared to the proposed minimum wage. A total of twenty-one proposals were analyzed. For each proposal, we constructed a baseline wage scenario that used only basic wage changes from expected inflation rates to predict each ACS respondent's hourly wage rate in each year

[1] For Missouri's state employees, this can be validated by viewing the earnings of all state employees at: http://mapyourtaxes.mo.gov/MAP/Employees/. In larger counties and cities most all public employees already earn more than the highest proposed minimum wage. Smaller counties and towns may have some public employees who earn less than the highest proposed minimum.

between 2019 and 2028. We then constructed a counterfactual, or "proposed" wage distribution for each worker under all twenty-one minimum wage proposed scenarios. Since the minimum wage proposals offer nine different paths for raising the minimum wage for all non-tipped private sector workers, and different wage paths for tipped workers, we create separate minimum wage changes for tipped and non-tipped workers. Specifically, we used information on a worker's occupation and observed wage levels to separately identify tipped workers and assign them the proposed tipped minimum wage in each year, rather than the higher non-tipped minimum wage.[2]

If the proposed minimum wage was less than the inflation-adjusted hourly earnings of an employee, then no impact was calculated. If the proposed minimum wage was more than the hourly earnings for an employee, then the difference between the inflation-adjusted hourly earnings (i.e. baseline) and the proposed minimum wage was calculated. That difference was multiplied by the number of hours the employee worked in the year to calculate the annual impact for that employee. The result was then multiplied by a weighing factor for that employee in the population. The total impact for the state of Missouri was then summed across all affected workers to generate a total estimated increase in wage income in the state.

We do not include an estimate of job losses due to minimum wage changes. Existing research is clear that past minimum wage increases have had no measurable effect on aggregate employment levels. Larger minimum wage increases, such as those in Los Angeles, Seattle, and other jurisdictions, have not yet been studied to detect a clear disemployment effect. While it is possible that there may be some employment losses due to automation or other factors, this potential negative effect is likely offset by the positive potential job growth stemming from multiplier effects of the spending of minimum wage workers who receive substantial raises. There is substantial research to indicate that increases in the minimum wage have multiplier effects that increase the direct effects. For this reason and because of the likely increases in wages for individuals who earn above the proposed minimum wage rates, the impacts summarized in the table are considered conservative estimates relative to the total impact that would occur as a result of increasing the minimum wage to the proposed levels.

II. Economic Literature on the Impact of Minimum Wage Increases on Employment

Next, it is necessary to review the economic literature on the impact of minimum wage increases on employment. Opponents often claim that minimum wage increases may reduce employment in a state. If that is true, then those employment reductions would result in reductions in state income and sales tax revenue. However, review of the most credible recent empirical research on the minimum wage shows that increases in the minimum wage have had no discernible impact on employment. We thus conclude that it is not appropriate to project that the proposed initiative petitions would result in any detectable employment reduction, and resulting losses in income and sales tax revenue, or increases in unemployment-related costs to the state.

Economists have conducted hundreds of studies of the employment impact of the minimum wage. A recent meta-study – a formal statistical study of studies – by Doucouliagos and Stanley (2009) reviewed all the research conducted over the last three decades on the employment impact of minimum wage increases on teenagers in the United States. The researchers concluded that the minimum wage has little or no discernible effect on the employment prospects of low-wage workers. Their study followed a rigorous, peer-reviewed procedure and has the advantage of using a set of predetermined, objective criteria for weighing the validity of statistical findings across studies with different results.

[2] We defined tipped workers as those employed in occupations that typically receive a large share of income as tips. These occupations were 'Bartenders' (4040), 'Waiters and Waitresses', 'Food Servers, Non-restaurant' and 'Miscellaneous food preparation and serving related workers including dining room and cafeteria attendants and bartender helpers'.

(Source: Doucouliagos, Hristos and T. D. Stanley. 2009. "Publication Selection Bias in Minimum-Wage Research? A Meta-Regression Analysis." British Journal of Industrial Relations,vol. 47, no. 2, pp. 406-428.)

Recent theoretical and empirical research emphasizes several explanations for the consistently negligible employment impacts of moderate increases in the minimum wage. First, relative to total wage costs, minimum-wage increases are small. Second, employers and workers appear to respond to minimum-wage increases in many ways that reduce the direct cost to employers and substantially reduce or eliminate the need to cut employment.

Probably the most important economic response to a higher minimum wage is a reduction in turnover. At higher wages, employers fill vacancies faster and retain employees longer, boosting total employment and average productivity per worker while reducing direct and indirect training costs. Dube, Lester, and Reich (2012), for example, examined the effect of the minimum wage on labor turnover among teens and restaurant workers. They find "...striking evidence that separations, new hires, and turnover rates for teens and restaurant workers fall substantially following a minimum wage increase..." (p. 2). Their findings, using nationally representative data, are consistent with local case studies of the minimum wage and related "living wage" laws, including Dube, Naidu, and Reich's (2007) analysis of the San Francisco city-wide minimum wage; Fairris's (2005) study of local government contractors in Los Angeles; Howes (2005) on homecare workers in California; and Reich, Hall, and Jacobs (2005) on workers at the San Francisco airport.
(Sources: Dube, Arindrajit, T. William Lester, and Michael Reich. 2012. "Minimum Wage Shocks, Employment Flows and Labor Market Frictions." Berkeley, CA: Institute for Research on Labor and Employment. http://escholarship.org/uc/item/76p927ks; Dube, Arindrajit, Suresh Naidu, and Michael Reich. 2007. "The Economic Effects of a Citywide Minimum Wage." *Industrial and Labor Relations Review*, vol. 60, no. 4, pp. 522-543; Fairris, David. 2005. "The Impact of Living Wages on Employers: A Control Group Analysis of the Los Angeles Ordinance." *Industrial Relations*, vol. 44, no. 1, pp. 84-105; Howes, Candace. 2005. "Living Wages and the Retention of Home Care Workers in San Francisco." *Industrial Relations*, vol. 44, 5 no. 1, pp. 139-163; Reich, Michael, Peter Hall, and Ken Jacobs. 2005. "Living Wage Policies at the San Francisco Airport: Impacts on Workers and Businesses." *Industrial Relations*, vol. 44, no. 1, pp. 106-138.)

Employers also appear to respond to increases in the minimum wage by taking measures to boost productivity. Hirsch, Kaufman, and Zelenska's (2011) study of the impact of the federal minimum wage increase on 81 fast-food restaurants in Georgia and Alabama, for example, asked fast-food managers about the scope for efficiency improvements in response to the minimum-wage rise. About 90 percent of managers indicated that they planned to respond to the minimum wage increase with increased performance standards such as "requiring a better attendance and on-time record, faster and more proficient performance of job duties, taking on additional tasks, and faster termination of poor performers." (p. 27) Roughly the same share of managers said that they sought to "boost morale" by presenting the minimum wage increase as a "challenge to the store" and using this as a way "to energize employees to improve productivity." (pp. 28-29) Based on their interviews with store managers, the researchers concluded that a minimum wage increase may function as a "catalyst or shock that forces managers to step out of the daily routine and think about where cost savings can occur." (p. 29) (Source: Hirsch, Barry T., Bruce Kaufman, and Tetyana Zelenska, "Minimum Wage Channels of Adjustment." IZA Discussion Paper No. 6132. Germany: Institute for the Study of Labor. http://www2.gsu.edu/~ecobth/IZA_HKZ_MinWageCoA_dp6132.pdf)

A higher minimum wage may also motivate workers to work harder, independently of any actions by employers to increase productivity. According to "efficiency wage" theory, wages above the competitive-market rate may elicit greater work effort for several reasons. As Carl Shapiro and Joseph Stiglitz (1984) have argued, higher pay increases the cost to workers of losing their job, potentially inducing greater effort from workers in order to reduce their chances of

being fired. George Akerlof (1982), arguing from a more sociological point of view, has suggested that workers may see higher wages as a gift from employers, leading workers to reciprocate by working harder. (Sources: Shapiro, Carl and Joseph E. Stiglitz. 1984. "Equilibrium unemployment as a worker discipline device." *American Economic Review*, vol. 74, no. 3, pp. 433-444; Akerlof, George A. 1982. "Labor contracts as partial gift exchange." *Quarterly Journal of Economics*, vol. 97, no. 4, pp. 543-569.)

We therefore conclude that the proposed increase in the Missouri minimum wage would have no discernible impact on the employment levels of low-wage workers. Accordingly, we do not factor in reductions in employment, or any resulting decrease in sales tax or income tax. We also do not project any increased unemployment insurance costs – both because we do not project any resulting job losses, and, additionally, because unemployment insurance costs are paid for by employer premiums, and so are ultimately not a cost to the state.

For similar reasons, we do not believe that the proposed increase will have any significant adverse economic impact on small businesses or, by extension, on corporate income tax revenue. In fact, many small businesses already pay little if any corporate income tax.

III. State and Local Sales and Personal Income Tax Revenue Impact of Raising the Minimum Wage

Based on the wage impact figures calculated above, and the understanding that the minimum wage increases would be unlikely to result in offsetting job losses, we next calculate the impact of the projected wage increases on state and local sales and personal income tax revenue in Missouri. We project only the direct impact of the various minimum wage increase scenarios on such tax revenue. We do not attempt to project the additional impact through a GDP multiplier effect, or the potentially higher sales taxes generated if employers offset wage increases with higher prices (which would be taxable).

Personal Income Tax Revenue. In order to determine the projected increase in personal income tax revenues that would result directly from the increased wages, we had to develop assumptions about the effective income tax rates of the affected workers. We made the following assumptions with respect to the effective tax rate:

1. That 25% of affected workers can be claimed as a dependent on another party's Missouri income tax return and, as a result, would pay an effective tax rate of 6.0% on the increase in income;
2. That 50% of the affected workers would file as single taxpayers, would claim one deduction of $2,100, and would be entitled to a standard deduction of $5,800. This would result in an effective tax rate of 2.47%;
3. The remaining 25% would, we assumed, pay no additional Missouri income tax.

In light of these assumptions, the increased Missouri income tax revenue for each petition version can be calculated as follows: (total wage increase * 25% * 6.0%) + (total wage increase * 50% * 2.47%) + (total wage increase *25% * 0%).

Sales Tax Revenue. The state of Missouri imposes a 4.225% state sales tax on those items that are not exempt from the sales tax base. In addition, the average local sales tax rate is 2.95%. As a result, the average Missouri net sales tax rate is 7.175%. To estimate the share of income that is spent on goods and services that are subject to sales taxes, we used data from the 2015 Consumer Expenditure Survey (CES) for the US to estimate the share of income spent on categories that are subject to sales taxes. The CES summary tables list average spending per consumer across 20 different

categories (e.g. housing, transportation, food away from home) and we categorized each spending item as taxable or non-taxable and then calculated the share of spending that we taxable.[3] The resulting rate was 30.3 percent.

Based upon the above assumptions, and the total wage increase calculations for each version of the petition, we estimate that the increase in state income tax revenue resulting from the increased wages would be as follows:

Table 2. Summary of the Impact of Minimum Wage Increases on State and Local Sales and Income Taxes in Year of Full Minimum Wage Final Implementation.

Proposal	State Sales Tax (4.225%)	Local Sales Tax Revenue (2.95%)	Total Sales Tax Revenue Increase	Personal Income Tax Revenue	Total Sales and Personal Income Tax Revenue Increase
13,14,15[a]	$55,814,587	$38,971,132	$94,785,719	$119,213,129	$213,998,848
16,17,18[a]	$53,902,025	$37,635,734	$91,537,759	$115,128,131	$206,665,889
19,20,21[a]	$67,986,272	$47,469,704	$115,455,976	$145,210,358	$260,666,334
22,23,24[a]	$42,860,248	$29,926,090	$72,786,338	$91,544,245	$164,330,583
25	$44,427,531	$31,020,406	$75,447,937	$94,891,770	$170,339,707
26	$57,754,393	$40,325,553	$98,079,946	$123,356,317	$221,436,263
27	$72,567,004	$50,668,086	$123,235,090	$154,994,242	$278,229,333
28	$54,915,882	$38,343,634	$93,259,516	$117,293,605	$210,553,122

Note: Author's Analysis of American Community Survey (ACS) data from 2014 and fiscal impact assumptions described above. All dollars are in nominal figures. (a) Since these proposals only vary on non-economic factors, their economic and fiscal impacts are treated as equal for the purposes of this report.

As described in Table 2 above, the fiscal impact of the proposed minimum wage increases varies based on the ultimate level of the minimum wage and the degree of tipped minimum wage phase out. The estimates of the total fiscal benefit range from $164 million to $282 million annually. Appendix tables A1 through A13 provide a year-by-year summary of the fiscal benefits.

[3] Specifically, the categories we assumed to be subject to state and local sales taxes are: food, household furnishings and equipment, vehicle purchases, gasoline and motor oil, entertainment, and all other expenditures. We assumed that 50 percent of the spending on the category "apparel and services" was taxable.

We hope that this information is useful to your office as your prepare your analyses of the petitions.

Respectfully submitted,

Lara Granich

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided the following information as an opponent of this initiative petition.

These corrections were subsequently provided to the submitted information

In the table on the bottom of page 7 and top of page 8, both averages for 2023 should be based on a 5 year phase-in. Accordingly, the figure on that table should state for 2023 ($12) Average Annual Unemployment Premiums Paid by State of $16,269,523.52.

The corresponding change on the table on page 12 would be to state, for 2023 ($12) Total Net Loss to State Government from Taxes and Unemployment Insurance of ($19,137,851.76).

Re: Initiative Petitions 2018-196 through 2018-216

Dear Mr. Halwes,

I write on behalf of Robert Bonney. Mr. Bonney is the Chief Executive Officer of the Missouri Restaurant Association. Please consider this letter and the accompanying studies as his fiscal impact statement as an opponent of Initiative Petitions 2018-196 through 2018-216 (the "Initiative Petitions"). If passed, any of these twenty-one initiatives would have a substantial negative impact on state and local governments, as well as Missouri small businesses. Those effects are both direct (as noted in Section 1) and secondary (as noted in Sections 2 through 5). The direct effects stem from higher labor and contracting costs that the state and its political subdivisions will incur, despite the Initiatives' effort to exclude government workers from the mandate.

The indirect effects will present a debate this Office has seen before. The proponents of the Initiative Petitions will once again rely on data sourced from political activist groups who claim increases in the minimum wage only serve to create new taxable income. The reality is that such groups approach this issue with political bias. Their analysis is one-sided because it completely ignores the fact that a wage increase does not "create" income from thin air; instead, it is an economic transfer from Missouri businesses to workers. Missouri businesses must pay the new wages "created" by the increases. Political activists' models fail to account, then, for two specific manifestations of the "debit" side of this transfer: reductions in employment, and the reduction in corporate income tax paid based upon business done in Missouri.

The failure to account for any employment effect at any proposed wage increase—even a drastic increase of the minimum wage to $13—is particularly puzzling, because Missouri's most populous areas border Illinois and Kansas. These states, respectively, have minimum wages of $8.25 and $7.25. Neither state adjusts the minimum wage for inflation. Likewise, the second effect—loss of corporate income tax revenues—is a mathematical certainty. Missouri businesses will be the source of the wage increase, which will lower their own taxable income. Assuming a one-to-one substitution of "created" wages for lost corporate income, the difference in the rates

at which these two types of income are taxed will result in a net decrease in state revenue. A dollar from increased wages is taxable by state government in Missouri at 6% or substantially less, whereas Missouri's corporate income tax rate is 6.25%.

On top of these two types of negative outcomes—lower employment and lower state tax revenues—there may be second-order effects to small businesses because they lack the access to capital to weather price fluctuations; they may not survive at all because they may not have the flexibility to simply cut employment, shifting their reliance to capital instead of labor resources, or suffering a decrease in production and revenue.

In short, much of the fiscal impact regarding the current crop of wage-related ballot measures is secondary: they cause transfers of wealth within (or out of) the state economy, and those transfers of wealth then create second-order effects for state and local governments via their collection of tax revenues and provision of welfare services for the unemployed or less-employed. Because these fiscal notes call for the Auditor operate in the area of secondary effects, it is critical that she treat both sides of the wealth transfer equally, and refrain from assessing only one half of the wage increase equation.

1. Direct Labor Cost Impact on State and Local Government Budgets

As noted to the State Auditor's Office previously by Dr. David Macpherson, a nationally prominent labor and economics expert, there are two ways to measure labor cost on state and local government budgets. First, one can use the information included in fiscal note responses from state and local government entities. It is important to note that these fiscal notes provide an incomplete and, therefore, too-low estimate of labor cost. Few state and local government entities respond to requests for a fiscal note response, and those that do respond often ignore important effects.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can be used to calculate increased labor cost to state and local government entities in Missouri. To combat this time-honored analysis, and in a blatant attempt to manipulate the fiscal note process, the Initiative Petitions provide that they will raise the minimum wage for private workers, but not for workers employed by state or local governmental entities. No conceivable justification exists for solely raising the minimum wage on private businesses. Whatever the disparity between the value of total compensation at a private business and at a government employer, that disparity does not approach the wage adjustments at issue here, ranging from an inflation adjusted wage increase of 51.16% (($13-$8.60)/$8.60) in Initiative Petitions 2018-198 through 2018-201 to a wage increase of 30.17% (($11-$8.45)/$8.45) in Initiative Petitions 2018-213 through 2018-215.

Moreover, it is unreasonable to assume that on a sustained basis public employers, as defined in the Initiative Petitions, would be able to maintain dramatically lower wage levels than private businesses. Public employers would lose staff employable at higher rates in the private market, imposing substantial costs on government productivity. Using the method traditionally employed by labor economists and followed by the Auditor's office, one can calculate the annual

wage costs to state and local governmental entities, based on the annual wage cost for each state and local government worker in the ORG CPS, as detailed on page 6 of Dr. Macpherson's 2012 report, attached hereto as **Exhibit A**. Even if the auditor finds that a specific estimate of costs is not determinable, the auditor should note that state and local government "operating costs could increase by an unknown annual amount that could be significant," through the form of higher wage costs and higher contracting costs.

The proponents of the Initiative Petitions may argue that the Auditor should abandon any state and local cost estimates altogether. The proponents will argue that provisions they have inserted in the statute would mean that state and local government entities will not have to pay higher wages to their employees. Setting aside unjustifiable discrimination against private employers (and "public employees"), the provision is of uncertain legal effect and constitutionality. A "public employer," defined in the initiatives as "the state or a political subdivision of the state" still incurs substantial costs for wages of individuals that are "private employees," rather than "public employees." Cleaning services, food service, and other essential services often rely on state contracts with outside vendors. Sometimes, a contract rate may vary depending on the cost of labor. Even if the contract rate is fixed, it must be re-bid periodically, and that bidding process would take into account the new minimum wage. Plainly, the initiative would impose higher costs for state and local governments in contracting with any private entity and its employees. As a matter of law, it would be insufficient and unfair for the Auditor's fiscal note or summary to simply assume that these costs to state and local governmental entities do not exist.

2. Cost of Unemployment Benefits

a) The effect of inflation on Missouri's minimum wage

CPS–ORG data show that between 2007 and 2015, median nominal wages for adult (25–59 years old) workers in the U.S. grew by 1.68 percent a year. However, Missouri's minimum wage is currently adjusted using "the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W)." Section 290.502, RSMo. Coincidentally (or perhaps not), the CPI-W, over the period from 2006 to 2016, also increased at an average rate of 1.68 percent a year.

Year	CPI-W	Observed inflation %
2006	199.2	
2007	203.7	0.022590361
2008	216.304	0.061875307
2009	210.526	-0.0267124

2010	213.898	0.016017024
2011	222.686	0.041085003
2012	225.568	0.01294199
2013	230.084	0.02002057
2014	234.525	0.019301646
2015	233.806	-0.00306577
2016	234.771	0.004127353

Using Missouri's current inflation-adjusted minimum wage rate and an assumed, constant 1.68 percent increase in the CPI-W, the minimum wage in Missouri will be as follows:

Year	Estimated Minimum Wage
2016	$7.65 (observed)
2017	$7.70 (observed)
2018	$7.85
2019	$8.00
2020	$8.15
2021	$8.30
2022	$8.45
2023	$8.60
2024	$8.75
2025	$8.90
2026	$9.05

b) Calculating job loss attributable to increased minimum wage

At least one outside economist, James Sherk, has already provided an estimate for job loss in Missouri based on a $15 minimum wage. Mr. Sherk calculated the effect of a $15 minimum wage implemented in 2021. Mr. Sherk's figures accounted for inflation by estimating the present value of $15.00 in 2021, rather than estimating an absolute figure for wage inflation in Missouri. Mr. Sherk calculated the present value of $15.00 in 2021 to be $13.57, per hour, based on wage inflation of 1.68 percent. Mr. Sherk evaluated the change from $7.65 per hour to $13.57 per hour (a 77.39% increase), exclusive of agricultural workers. Cumulatively, Mr. Sherk calculated this 77.39 percent increase in wages to reduce employment in the affected workforce by (0.7739*0.677) 52.39%.

Graves Garrett LLC

Mr. Sherk calculated that approximately 40.9% of Missouri's Wage and Salary Workers would be affected by such a $15 minimum wage. Mr. Sherk's calculations reveal that a $15 minimum wage in 2021 would be expected to reduce the number of full-time equivalent jobs in Missouri by approximately 218,000. Based on CPS–ORG data, these figures reveal an affected workforce of approximately 416,086 workers impacted by a $15 minimum wage increase in 2021.

However, in 2014, Dr. Macpherson found, using more conservative, national-level Congressional Budget Office data, that an increase to a $10.10 minimum wage, effective January 1, 2015, would eliminate about 15,700 jobs in Missouri. Dr. Macpherson analyzed the effect of a Missouri $10.10 minimum wage using a model suitable to a national analysis. This analysis predicted a loss of 15,700 Missouri jobs based on a wage increase from $7.50 in 2014 to $10.10 in 2015 (a 34.67% increase).

On the whole, the analysis by Mr. Sherk is more instructive here, since it is more recent, Missouri-specific, and anticipates larger wage changes contemplated by the Initiative Petitions. The most accurate way to determine the estimate of Workers Affected would be to analyze the CPS–ORG data. However, without such data readily available in the time constraints imposed by the fiscal note process, it is reasonable for estimation purposes to assume Mr. Sherk's figures are evenly distributed. Assuming that worker data follows an equal distribution, the Initiative Petitions would be expected to result in the following job losses:

Year of final prescribed wage increase	Wage without IP	Wage mandated by IP	Percentage increase	Percentage of affected workers who lose jobs (Percentage Increase x 0.677 Elasticity)	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by Initiative
2021	$8.30	$11.00	32.53%	22.02%	174,897	38,512
2022	$8.45	$11.00	30.18%	20.43%	162,262	33,150
2022	$8.45	$12.00	42.01%	28.44%	225,866	64,236
2023	$8.60	$12.00	39.53%	26.77%	212,532	56,895
2023	$8.60	$13.00	51.16%	34.64%	275,061	95,281
2024	$8.75	$12.00	37.14%	25.15%	199,683	50,220
2024	$8.75	$13.00	48.57%	32.88%	261,136	85,861
2025	$8.90	$13.00	46.07%	31.19%	247,695	77,256
2026	$9.05	$13.00	43.65%	29.55%	234,683	69,349

c) The best estimate for a price elasticity of demand for low-skilled labor is -0.677.

As noted by Mr. Sherk, starting wages of $15.00 per hour mean that full-time employee must create at least $38,700 a year in value for his or her employer (including wages, employer payroll taxes, and mandatory healthcare benefits). High minimum wages and mandatory benefit costs make it much harder for less-experienced and less-skilled workers to find jobs, particularly full-time work.

Recent labor economics scholarship has revealed that, accounting for publication bias, a state-specific elasticity of demand for less-skilled workers is, on average, approximately -0.677, though some estimates are even higher, around -1.0.[1] "[E]conomists have extensively studied how businesses respond to higher wages overall, not just minimum-wage increases. On average these studies find a 10 percent increase in labor costs causes firms to reduce employment of less-skilled workers by 6.8 percent in the long run."[2]

While these elasticity estimates are substantial in absolute terms, there is reason to believe that such estimates might still understate the impact of a Missouri state-specific effort to increase the minimum wage. This is so for several reasons. First, traditionally, labor economists view labor as a reasonably difficult input to substitute; however, Missouri businesses have readily available options. There are relatively few barriers to doing business in Missouri's border states, and businesses can easily relocate across a state line to take advantage of more favorable wage (and tax laws). Additionally, substantially raising the cost for Missouri labor, relative to labor sources in other states and other countries, is likely to force many manufacturing jobs in Missouri to disappear entirely. Automation is also a significant risk. The substitution of labor is becoming increasingly easy due to technology advancements and the "sharing" economy, where fewer individuals are "employees" covered by the minimum wage. Finally, a labor "price shock" may result in significant decreases in the demand for goods and services. People make behavioral changes to avoid higher costs, including eating out less often and generally decreasing consumption (or shifting their activities to consumption involving comparatively low amounts of labor) wherever possible.

[1] Sherk, James, "How $15-per-Hour Minimum Starting Wages Would Affect Each State," The Heritage Foundation, http://report.heritage.org/ib4601.

[2] "The coefficients on these estimates imply an elasticity of –0.677 for a study published in 2012 (the most recent year in their data) of long-run unconditional labor demand for low-skilled labor in the U.S., estimated using industry-level administrative panel data and a structural form model." "Estimates that do not account for publication bias tend to slow a long-run elasticity closer to –1.0. See, for example, George Borjas, Labor Economics, 6th ed. (Columbus, OH: McGraw-Hill, 2013), Chapter 4: 'The evidence also suggests that the estimates of the long-run labor demand elasticity cluster around –1, so the long-run labor demand curve is indeed more elastic than the short-run curve.' " Sherk, available at http://report.heritage.org/ib4601.

Graves Garrett LLC

d) Unemployment Benefit Costs

We derived an average unemployment payout by calculating the expected weekly unemployment benefit amount. Based on current data, the expected unemployment weekly benefit amount of a worker making $7.65 an hour, on a 40 hour workweek, is $159.12 per week, for 20 weeks.[3] The expected unemployment weekly benefit amount of a worker making $10.99 an hour is $228.59 per week. The expected unemployment weekly benefit amount of a worker making $11.99 an hour is $249.39 per week. The expected unemployment weekly benefit amount of a worker making $12.99 an hour is $270.19 per week. We assume that workers will seek unemployment insurance for the full twenty weeks authorized under Missouri law, because unemployment attributable to an increase in the minimum wage is structural. In this case, structural unemployment occurs because workers' job skills do not meet the established "price floor" of labor, rendering the worker's skills unmarketable. Assuming an even distribution of workers affected, the average unemployment benefit cost to the state for a worker is calculated as follows:

- For Initiative Petitions 2018-213 through 2018-216, [($159.12+$228.59)/2]*20 = $3,877.10
- For Initiative Petitions 2018-196, 2018-197, 2018-200, 2018-202, and 2018-204 through 209, [($159.12+$249.39)/2]*20 = $4,085.10
- For Initiative Petitions 2018-198, 2018-199, 2018-201, 2018-203, 2018-210 through 2018-212, [($159.12+$270.19)/2]*20 = $4,293.10

Consistent with Dr. Macpherson's 2012 report, it would be reasonable for the Auditor to assume that 35% of unemployed workers will receive unemployment benefits. Combining these numbers leads to the following estimates:

Year of final prescribed wage increase	Estimate of Missouri Workers Unemployed by Initiative	Estimated Unemployment Amount Per Worker	Estimated Total Unemployment Premiums Paid	Average Annual Unemployment Premiums Paid by State
2021 ($11)	38,512	3,877.10	$52,260,206.32	$17,420,068.77
2022 ($11)	33,150	3,877.10	$44,984,052.75	$11,246,013.19
2022 ($12)	64,236	4,085.10	$91,843,669.26	$22,960,917.32
2023 ($12)	56,895	4,085.10	$81,347,617.58	$20,336,904.39

[3] https://labor.mo.gov/DES/Claims/calculator. A 2015 law decreased the unemployment benefit period from 20 weeks to 13 weeks, but the Supreme Court of Missouri struck down the law in July 2016.

2023 ($13)	95,281	4,293.10	$143,167,801.39	$28,633,560.28
2024 ($12)	50,220	4,085.10	$71,803,802.70	$11,967,300.45
2024 ($13)	85,861	4,293.10	$129,013,450.69	$21,502,241.78
2025 ($13)	77,256	4,293.10	$116,083,706.76	$16,583,386.68
2026 ($13)	69,349	4,293.10	$104,202,767.17	$13,025,345.90

3. Impact on State Income Tax Revenue

The 2012 analysis prepared by Dr. Macpherson may also be used as a reference in calculating the effect of the initiative petitions on state income tax revenue. Here, again, it is reasonable to assume that our "affected workers" are evenly distributed, though precise CPS–ORG data would also provide a reliable estimate. Here, the increased income tax revenue is the additional income tax paid by workers whose wages increase. There is a loss of revenue, however, in the form of decreased income tax paid by workers whose wages decrease and businesses who absorb the increased cost of labor, rather than passing it along to customers.

For the purposes of these estimates, we assume that workers work 40 hours a week and 52 weeks per year:

Year of final prescribed wage increase	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by IP	Estimate of Missouri Workers with Increased Wages	Annual Increase in Wages Paid to Workers who get Wage Increase in Final Year	Annual Decrease in Wages Paid to Workers now Unemployed
2021 ($11)	174,897	38,512	136,385	$382,969,080.00	$108,141,696.00

2022 ($11)	162,262	33,150	129,112	$342,405,024.00	$87,913,800.00
2022 ($12)	225,866	64,236	161,630	$596,737,960.00	$237,159,312.00
2023 ($12)	212,532	56,895	155,637	$550,332,432.00	$201,180,720.00
2023 ($13)	275,061	95,281	179,780	$822,673,280.00	$436,005,856.00
2024 ($12)	199,683	50,220	149,463	$505,184,940.00	$169,743,600.00
2024 ($13)	261,136	85,861	175,275	$774,715,500.00	$379,505,620.00
2025 ($13)	247,695	77,256	170,439	$726,750,021.03	$329,419,584.00
2026 ($13)	234,683	69,349	165,334	$679,192,072.00	$284,885,692.00

These net wage increases will lead to corresponding increases in state income tax collections. Traditionally, it has been assumed that about 50% of affected workers will pay 6% income tax, while the other 50% of workers pay no state income tax. This assumption may be less accurate at the higher wage increases contemplated by the Initiative Petitions. Accordingly, figures are also displayed assuming that about 75% of affected workers will pay 6% income tax, while the other 25% of workers pay no state income tax.

Annual Net Increase in Wages Paid To Workers	Annual Income Tax Increase from Wage Increase (50% pay tax)	Annual Income Tax Increase from Wage Increase (75% pay tax)
$274,827,384.00	$8,244,821.52	$12,367,232.28
$254,491,224.00	$7,634,736.72	$11,452,105.08
$359,578,648.00	$10,787,359.44	$16,181,039.16
$349,151,712.00	$10,474,551.36	$15,711,827.04
$386,667,424.00	$11,600,022.72	$17,400,034.08
$335,441,340.00	$10,063,240.20	$15,094,860.30
$395,209,880.00	$11,856,296.40	$17,784,444.60
$397,330,437.03	$11,919,913.11	$17,879,869.67
$394,306,380.00	$11,829,191.40	$17,743,787.10

Graves Garrett LLC

Based on these figures, Missouri businesses must also decide whether to pass along any increase in wage costs (wages and mandatory payments).[4]

Year of final prescribed wage increase	Annual Cost to Business from Increased Wage	Annual Decreased Corporate Income Tax if cost is fully absorbed	Annual Decreased Corporate Income Tax if cost is 50% absorbed
2021 ($11)	$412,266,214.62	$25,766,638.41	$12,883,319.21
2022 ($11)	$368,599,008.34	$23,037,438.02	$11,518,719.01
2022 ($12)	$642,388,413.94	$40,149,275.87	$20,074,637.94
2023 ($12)	$592,432,863.05	$37,027,053.94	$18,513,526.97
2023 ($13)	$885,607,785.92	$55,350,486.62	$27,675,243.31
2024 ($12)	$543,831,587.91	$33,989,474.24	$16,994,737.12
2024 ($13)	$833,981,235.80	$52,123,827.23	$26,061,913.62
2025 ($13)	$782,346,397.64	$48,896,649.85	$24,448,324.93
2026 ($13)	$731,150,265.50	$45,696,891.59	$22,848,445.80

Assuming businesses absorb half of the cost of increased wages, and 75 percent of affected workers pay the new, higher taxes, the effect on state income tax collections is estimated to be:

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss
2021 ($11)	($516,086.93)
2022 ($11)	($66,613.93)
2022 ($12)	($3,893,598.78)
2023 ($12)	($2,801,699.93)
2023 ($13)	($10,275,209.23)
2024 ($12)	($1,899,876.82)
2024 ($13)	($8,277,469.02)
2025 ($13)	($6,568,455.26)
2026 ($13)	($5,104,658.70)

[4] A healthcare benefit cost estimate is not available based on the time limitations imposed by this fiscal note.

Graves Garrett LLC

4. Sales tax revenue gain or loss

Projecting any increase in sales tax revenue resulting from an increased minimum wage would require the auditor's office to conclude, based on data separate and apart from the sheer conjecture typically offered by political activist groups: (1) the net effect on consumer disposable income and (2) the percentage of a consumer's disposable income that is spent on goods subject to the sales tax, taking into consideration that the scope of Missouri's sales tax has been truncated by a voter-approved constitutional amendment from November 2016.

Typically, the Auditor's office multiplies the total increase in worker earnings (which should be adjusted for employment reductions) and multiplies the result by 25 percent, then multiplying that figure by the Missouri the population weighted combined average state and local sales tax in Missouri, 7.81%.[5] Based on this estimate, the population-weighted combined average local sales tax is 3.585%.

However, it would be deceptive to fail to account for sales tax losses from workers whose wages are eliminated or sales tax losses from reduced business profits (attributable to the higher wages paid), which will lower spending by business owners. The first figure is calculable by determining the total annual wages (adjusted for employment deductions) for all workers who lose jobs due to a minimum wage hike, multiplied by 25 percent. The second number is calculable by multiplying the total increase in worker earnings (multiplied by 1.0765 to account for Social Security and Medicare taxes) by approximately 15 percent.[6]

Year of final prescribed wage increase	Annual Net Increase in Wages Paid To Workers	New Wages Spent on Sales Tax Items	Annual Cost to Business from Increased Wage	Annual Business Income No Longer Included in Sales Tax Base (50% passed-through)
2021 ($11)	$274,827,384	$68,706,846	$412,266,214.62	($61,839,932)
2022 ($11)	$254,491,224	$63,622,806	$368,599,008.34	($55,289,851)
2022 ($12)	$359,578,648	$89,894,662	$642,388,413.94	($96,358,262)
2023 ($12)	$349,151,712	$87,287,928	$592,432,863.05	($88,864,929)

[5] http://taxfoundation.org/sites/taxfoundation.org/files/docs/LOST--2015.png.
[6] This estimate would also need to be adjusted to reflect certain employers' mandate under the Affordable Care Act to provide healthcare coverage and pay 60 percent of such coverage.

2023 ($13)	$386,667,424	$96,666,856	$885,607,785.92	($132,841,168)
2024 ($12)	$335,441,340	$83,860,335	$543,831,587.91	($81,574,738)
2024 ($13)	$395,209,880	$98,802,470	$833,981,235.75	($125,097,185)
2025 ($13)	$397,330,437	$99,332,609	$782,346,397.64	($117,351,960)
2026 ($13)	$394,306,380	$98,576,595	$731,150,265.51	($109,672,540)

Accordingly, the annual estimations of the effects on state and local revenue, and total state economic impact are as follows:

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss	Annual Net Effect on State Sales Tax	Total Annual Effect on State Tax Revenue	Total Net Loss to State Government from Taxes and Unemployment Insurance	Annual Net Effect on Local Sales Tax
2021 ($11)	($516,086.93)	$290,127.11	($225,959.82)	($17,646,028.59)	$246,178.86
2022 ($11)	($66,613.93)	$352,067.34	$285,453.41	($10,960,559.78)	$298,736.43
2022 ($12)	($3,893,598.78)	($273,087.10)	($4,166,685.88)	($27,127,603.19)	($231,720.06)
2023 ($12)	($2,801,699.93)	($66,628.31)	($2,868,328.24)	($23,205,232.64)	($56,535.50)
2023 ($13)	($10,275,209.23)	($1,528,364.68)	($11,803,573.91)	($40,437,134.18)	($1,296,849.08)
2024 ($12)	($1,899,876.82)	$96,566.47	($1,803,310.36)	($13,770,610.81)	$81,938.65
2024 ($13)	($8,277,469.02)	($1,110,951.72)	($9,388,420.74)	($30,890,662.52)	($942,665.55)
2025 ($13)	($6,136,139.31)	($761,317.55)	($6,897,456.87)	($23,480,843.55)	($645,993.71)
2026 ($13)	($5,104,658.70)	($468,803.67)	($5,573,462.37)	($18,598,808.26)	($397,789.62)

5. Damage to small business

Additionally, any proponent or opponent fiscal note submission is required, pursuant to Missouri law, to state the impact of the initiative on small businesses. According to analysis by the Employment Policies Institute, 40 percent of the minimum wage workforce is employed at businesses with fewer than 50 employees. [7] The impact on extra costs to small business may be more significant than even this 40% figure suggests. Small businesses are more easily shut down by input price increases than large businesses, which have greater access to capital to weather the

[7] https://www.epionline.org/oped/who-really-employs-minimum-wage-workers/

storm. Clearly, small businesses that do not shut down due to increases in the minimum wage will pay higher costs, estimated at about 40% of business' total increased costs, described above.

Conclusion

In conclusion, the State Auditor should attempt to quantify the increased cost to be borne by state and local government entities through increased contracting costs as a result of an increase to the minimum wage. This direct cost is outlined in Section 1.

Indirect costs are outlined in Sections 2 through 5, and show a net loss. Although such second-order effects more difficult to predict, a net loss is easily the most likely outcome. Significantly, this result is only obtainable if the Auditor reviews both the "credit" and "debit" sides of the transfer of wealth from businesses to workers. The Auditor should refrain from taking the proponents' likely invitation to consider and present only the "credit," side, and should attempt to provide a complete picture of all effects of a minimum wage increase, including the loss of revenue to state and local governments from individuals who lose employment. Only conveying (or quantifying) the potential for gain, without fairly conveying the likelihood of net loss, would be deceptive and unfair.

The State Auditor's previous 2018 fiscal notes are a good model. Each of the fiscal notes for the Initiative Petitions should follow the already-established format and state that:

> "[O]perating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $## million decrease to a $## million increase depending on business decisions."

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

ABOUT THE MISSOURI RESTAURANT ASSOCIATION

With origins dating back to 1916, the Missouri Restaurant Association (MRA) is a statewide trade association representing over 1,500 member establishments. The association's membership is diverse, and includes full service, fast casual, and quick service restaurants, cafeterias, hotels, schools, institutions, contract feeders, and ancillary foodservice providers such as theme parks. The association has been successful in securing support from virtually every segment of the foodservice and hospitality industry.

MRA includes seven chapters as extensions of the parent organization, each with its own Officers, Board of Directors, and limited budget. The association is governed by a Board of Directors comprised of five Officers, 33 Directors, and each President of the seven affiliated chapters.

MRA is dedicated to serving the needs of the foodservice and hospitality industry, enhancing and improving its growth and development, assisting and educating its members in operating more effectively, improving the political and social environment in which the industry conducts business, for the benefit of its members, patrons, employees, and the well-being of the community.

David A. Macpherson is the E.M. Stevens Professor of Economics at Trinity University. He received undergraduate and doctoral degrees in economics from Pennsylvania State University.

Dr. Macpherson has published over 60 articles in leading economics and real estate journals including Review of Economics and Statistics, Industrial and Labor Relations Review, Journal of Labor Economics, Journal of Human Resources, and Journal of Real Estate Economics and Finance. His research has been funded by a variety of entities including the National Science Foundation, Florida Legislature, and the National Association of Realtors. He is co-author of the undergraduate labor economics text, Contemporary Labor Economics, as well as the principles of economics text, Economics: Private and Public Choice. He is included in Who's Who in Economics, Fourth Edition, which includes the 1,200 most frequently cited economists.

THE IMPACT OF A $10.10 MINIMUM WAGE ON JOBS AND TAXPAYER COSTS IN MISSOURI

June 2014

Economic Analysis by **Dr. David Macpherson**
Trinity University

Index

Executive Summary 4
Results 5
Technical Appendix 7

EXECUTIVE SUMMARY

Missouri's minimum wage of $7.50 is linked to rise in most years with the inflation rate. But some state legislators and labor unions would like to raise that figure even higher. For instance, a recent labor union-organized bus tour in the state promoted a $10.10 minimum wage in St. Louis.

Proponents have enthusiastically pointed to the benefits of the $10.10 policy. But there's been far less discussion of the costs involved with a $10.10-an-hour minimum wage—both the cost on employment, and the cost to taxpayers.

In this study, labor economist David Macpherson of Trinity University uses Census Bureau data to estimate the impact on Missouri's labor market and budget from raising the minimum wage to $10.10 an hour. He also provides separate results for the St. Louis metropolitan area.

Dr. Macpherson's employment estimates follow the methodology used by the nonpartisan Congressional Budget Office in its report earlier this year estimating the impact of a $10.10 minimum wage nationwide, which in turn relied on 60 different empirical studies to formulate its estimates.

Statewide, he finds that over 15,000 jobs would be lost at the $10.10 wage level—with 9,300 of those jobs being held by women. In the St. Louis metropolitan area, approximately 4,800 jobs would be lost from a $10.10 minimum wage.

The cost to taxpayers would be significant: There are approximately 40,000 state and local employees whose wages would be affected by the $10.10 increase in Missouri, for a combined cost to taxpayers of $87 million annually.

Raising wages is an admirable goal, but the evidence suggests that accomplishing this goal with a blunt wage mandate could do more harm than good.

RESULTS

The minimum wage is one of the most hotly-debated topics in the political world. Some legislators claim that a higher base wage will stimulate the economy; others claim that it will reduce jobs when affected employers can't offset the higher costs through higher prices.

Economists, who have studied the issue since the late 1940s, tend to take a skeptical view of minimum wage increases. Since the early 1990s, for instance, roughly 85 percent of the most credible research on the minimum wage points to job loss for less-skilled groups. The nonpartisan Congressional Budget Office (CBO), in an evaluation of President Obama's proposed $10.10 minimum wage increase, reviewed 60 different studies and concluded that the policy would eliminate 500,000 jobs if enacted.

The estimates that follow, of the employment impact of a higher minimum wage on Missouri's labor market, were performed by Dr. David Macpherson of Trinity University. Dr. Macpherson followed closely the methodology used by the CBO in its 2014 report. Dr. Macpherson also estimates the taxpayer costs of a higher minimum wage, as many state and local public employees will see their earnings increase when the minimum wage rises.

Dr. Macpherson's methodology is presented in detail in a technical appendix.

Estimated Employment Effects of a $10.10 Minimum Wage in Missouri

Statewide, Dr. Macpherson finds that increasing the minimum wage to $10.10 would eliminate over 15,000 jobs—approximately 60 percent of which are jobs held by women. The bulk of the job losses would be concentrated among individuals with a high school degree or less, and among people who work in the retail or leisure & hospitality industries.

(Note: Totals have slight discrepancies due to rounding.)

City-Specific Minimum Wage Employment Impacts

The city of St. Louis has been the subject of a number of protests calling for a higher minimum wage. Dr. Macpherson analyzed the employment impact of a $10.10 minimum wage in the St. Louis metropolitan area, providing breakouts by gender and education where the data permits. He estimates that the wage hike would eliminate approximately 5,000 jobs—just over half of which would be jobs held by women.

RESULTS CONTINUED

Missouri Taxpayer Costs of a $10.10 Minimum Wage

Dr. Macpherson estimates that approximately forty thousand state & local public employees would be affected by a minimum wage increase to $10.10 an hour. These additional wage costs translate to new costs for state and local taxpayers. Following the methodology described in detail in the technical appendix, Dr. Macpherson estimates both the straight wage cost of a $10.10 minimum wage, as well as the total compensation cost with Social Security, Medicare, workers compensation, and unemployment insurance included. Statewide, taxpayers would shoulder an additional $87 million in costs if the base wage was increased to $10.10 an hour and public employees were covered by the new wage.

Missouri Taxpayer Costs of a $10.10 Minimum Wage	
# of State & Local Workers	304,588
# Affected By $10.10 MW	40,103
Annual Wage Cost	$79,629,374
Annual Compensation Cost	$87,004,355

Note: Annual compensation costs include the cost of worker's compensation, FICA, and unemployment insurance benefits.

TECHNICAL APPENDIX

Estimating Employment Loss and the Cost to State and Local Government of an Increase in the Minimum Wage

Dr. David Macpherson
E.M. Stevens Professor of Economics
Trinity University

This paper describes how we estimate the employment loss and the cost to state and local governments of a proposed increase in the minimum wage effective on January 1, 2015.

Data and Sample

First, we use data from the Current Population Survey (CPS) Outgoing Rotation Groups (ORG) from January 2011 through December 2013. For each worker in the sample, we calculate their wage rate. We also adjust the wage rate to reflect a forecast of wages in 2015. This is done in two steps. First, based on legislation enacted as of April 2014, we estimate the minimum wage that would be in effect in January 2015 for each state and city that we consider. If a state or city has an indexed minimum wage, we increase the January 2014 state or city minimum wage by the Congressional Budget Office (CBO) inflation forecast for 2014 of 1.7%.

Since we use data from 2011 through 2013, we also follow the CBO approach for forecasting what the wage distribution would be in 2015. This is done in two steps. First, we adjust wages observed prior to 2013 to reflect 2013 minimum wage legislation. For example, if the minimum wage in a state was $7.25 in 2011 and grew to $8.00 by 2013, anyone who earned between $7.25 and $8.00 in 2011 would have their wage increased to $8.00. After wages are adjusted to 2013 levels, we assume that all wages grow by 2.9% in 2014. Using the resulting 2015 distribution of wages, we adjust for minimum wage legislation that would increase the minimum between 2013 and 2015. Anyone earning a wage between the 2013 and 2015 minimum wage is assigned a wage matching the 2015 minimum wage.

After generating the forecast 2015 distribution of wages reflecting wage growth and existing minimum wage legislation, we identify workers who would be affected by additional changes to the 2015 minimum wage as those with wages between the predicted minimum wage legislated for 2015 (or up to $.25 below it) and the proposed minimum.

To estimate the number of affected workers, we take two steps. First, for each state, we estimate the number of affected workers for 2013. Second, we adjust the weights in the 2011 and 2012 data so that the state-specific number of affected workers implied by the 2011 and 2012 data matches that for 2013. This adjustment is designed to correct for the changing economic climate as the economy recovers from the great recession and to generate estimates that are as close as possible to the most recent data (2013). After we adjust the 2011 and 2012 weights, we estimate the number of affected workers by summing their earnings weights and dividing the total by 36 (the number of months of data).

[1] Also, following CBO, anyone earning up to $.25 less than the 2011 minimum wage would have their wage increased by the amount that the minimum wage increased (i.e. a $7.00 wage would be increased to $7.75 in this example). This approach is used to adjust for the fact that many workers round their answers when asked about their wage.

TECHINCAL APPENDIX CONTINUED

Employment Loss

To estimate employment loss, for each affected worker we compute:

L = e *(Proposed Min Wage /Min Wage 2015 – 1)

where e is an assumed elasticity of employment with respect to changes in the minimum wage, Min Wage 2015 is the minimum wage currently legislated for 2015, and Proposed Min Wage is the minimum wage that is being proposed for 2015. Thus, for example, if a worker is projected to earn the federal minimum of $7.25 in 2015, the expected reduction in employment resulting from a $10.10 minimum wage in 2015 if e=.45 is .45*(10.10/7.25 – 1) = .18. That is, for every 100 workers currently earning the federal minimum, the expectation is that 18 would lose a job if the minimum wage elasticity is .45.

To estimate the aggregate employment loss in the economy, we use earnings weights to sum L across workers. We also follow the Congressional Budget Office (2014) and use an elasticity of 0.15 for non-teenagers and 0.45 for teenagers.

Cost to State and Local Government

We use the same data to estimate the cost to state and local government of a proposed minimum wage hike. We apply the same definition of affected workers described above and estimate the number of state and local government workers affected by a minimum wage hike. We do not, however, assume that there is any job loss for state and local workers as we do not have an appropriate elasticity estimate specific to state and local workers. To the extent that state or local governments reduce hours or employment in response tothe minimum wage hike, our estimate of the cost of the hike would be overstated.

To estimate the increase in annual payroll cost resulting from an increase in the minimum wage, we estimate the increase in annual cost for each worker as:

(Proposed Min Wage-Min Wage 2015)*weekly hours*52

We then multiply the increase in annual cost by the earnings weight for each worker and sum across workers. Since an increase in wages also requires increased employer contributions for Social Security, Medicare, workers' compensation and unemployment insurance, we apply an estimate of the payroll tax rate for these mandatory programs to calculate the additional cost for these programs.

For each state and city considered, we provide tables summarizing the number of affected workers, employment loss, and the distribution of employment loss by sex, education, race, age and industry. Given that we use three years of data, a rule of thumb for minimum sample size required to achieve a reasonably accurate estimate of the employment loss is to require at least 30,000 people be in the relevant category. For example, if there are fewer than 30,000 people projected to be in a particular industry category, the Bureau of Labor Statistics would not report the estimate due to a lack of reliability based on the variance of the estimate relative to its mean.

In addition to the estimate of employment loss, for each state or city considered, we estimate the number of state and local workers that would be affected by the minimum wage hike and the total annual cost to government in terms of wages and total compensation. As with the employment estimates, we advise caution in interpreting estimates that are based on fewer than 30,000 affected workers.

[3] Congressional Budget Office, "The Effects of a Minimum-Wage Increase on Employment and Family Income," February 2014.

[4] For workers paid by the hour the reported hourly wage was used. For workers who are not paid by the hour, we calculate the hourly wage by dividing usual weekly earnings by usual weekly hours. Overtime pay was calculated as time and one-half for hours above 40 hours for hourly workers.

[5] The assumed payroll tax for Medicare and Social Security is 7.65 percent. To estimate the payroll tax for workers' compensation and unemployment insurance, we use unpublished data from the 2010 Employer Cost of Employee Compensation database for state and local workers in the relevant region in 2010.

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

Prepared for

Victor Allred versus Robin Carnahan and Thomas Schweich
Circuit Court of Cole County, Missouri

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

I. Introduction

This report was undertaken at the request of counsel representing plaintiffs in the case of Victor Allred versus Robin Carnahan and Thomas Schweich. As part of the basis of the lawsuit, the plaintiffs allege that the fiscal note summaries for proposed statutory initiative petitions 2012-084 and 2012-085 are insufficient and unfair. I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will

range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

The report is organized as follows. My qualifications to prepare this report are contained in Section II. Section III describes the data and records I relied upon for this report. Section IV reviews the estimated fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085. A summary and my conclusions are provided in Section VI.

II. Qualifications

I am currently the E.M. Stevens Professor of Economics at Trinity University in San Antonio, Texas. Previously, I was employed by Florida State University as Director of the Pepper Institute on Aging and Public Policy and the Rod and Hope Brim Eminent Scholar in Economics. I have taught both undergraduate and graduate Econometrics (statistical analysis of economic data), and Labor Economics. I have published over 50 articles in peer-reviewed professional journals.

I am currently serving on the editorial board of the *Journal of Forensic Economics*, which is a peer-reviewed journal. I have also served as a reviewer or 'referee' for 24 peer-reviewed journals, including the *Journal of Human Resources, Journal of Labor Economics, Quarterly Journal of Economics,* and the *Review of Economics and Statistics*. Based upon these experiences, I am very familiar with the scholarly and professional research process and the concept of peer review.

I have prepared numerous analyses and reports that use statistical methods as applied to specific questions. I have been responsible for developing the techniques and approaches required for these analyses. I routinely use computers and statistical software packages to assist me in my analytical work. I have been qualified as an expert witness on statistical analysis of employment discrimination and economic damages in state courts in Florida and Georgia and Federal Courts, and I have given expert testimony. I have prepared analyses and offered testimony on behalf of both plaintiffs and defendants.

Details of my qualifications are reflected in my current resume and legal cases, attached as Appendix A to the report.

III. Data and Records

I reviewed the following materials in preparing this report.

- Plaintiff's Complaint
- Material cited in footnotes below.

IV. Fiscal Impact

A. Overview

The proposed statutory initiative petitions 2012-084 and 2012-085 contain many elements in common. Both initiatives would increase the Missouri minimum wage to $8.25 per hour, alter the exemption for retail and service firms, raise the cash wage of tipped workers from 50% to 60% of the minimum wage, and increase the statute of limitation from two to three year for underpayment claims.

The initiatives differ in their linkage to the federal minimum wage. Initiative petition 2012-084 requires that the state minimum wage be automatically increased to the

federal minimum wage if it is higher than the state minimum wage. Initiative petition 2012-085 does not have such a linkage. It only requires that workers be paid the higher of the state minimum wage or the federal minimum wage. The linkage to the federal minimum wage will cause the state minimum wage to be higher under initiative petition 2012-084 over time. This is because the state minimum wage, in contrast to the federal minimum wage, is adjusted for inflation as measured by the Consumer Price Index.

An increase in the minimum wage in Missouri will affect state and local government entities in two ways. First, it will directly increase the cost of labor to state and local government entities. This will occur due to the increase in wages of state and local government workers earning between the existing minimum wage of $7.25 and the new minimum wage of $8.25.[1] In addition, workers laid off due to the minimum wage increase can collect unemployment benefits. The state government will bear the cost of unemployment benefits of these workers for the first 20 weeks. Second, state and local government may gain increased revenue through higher income tax and sales taxes paid by workers affected by the minimum wage who remain employed. However, state and local government will suffer reduced tax revenue to the extent the higher wage cost lowers profits of businesses.

The following sections estimate the cost and revenue effects to state and local government entities of the proposed minimum wage increase.

[1] Information about the minimum wage in Missouri is available at http://www.labor.mo.gov/DLS/minimumwage/.

B. Direct Labor Cost Impact on State and Local Government Budgets

There are two possible ways to measure the direct labor cost on state and local government budgets. First, one can use the information included in the fiscal notes prepared by the State Auditor regarding the proposed initiatives. It is important to note that the fiscal notes provide an incomplete and thus too low estimate of the direct labor cost. The fiscal notes indicate that the Office of Administration's (OA) Division of Personnel reported that as of September 2011 there were 834 state workers who would be affected by an increase of the minimum wage to $8.25 and the "approximate annual cost" would be more than $540,000.

This OA estimate excludes seasonal workers such as State Fair employees, State Parks Employees, and tax season staff. The Division of Revenue noted its labor cost would rise by $40,000. The Division of Natural Resources stated they have over 500 workers who would be affected by the increase, but did not provide an estimate of the cost. The State Fair hired 745 workers that would be affected, but no cost estimate was provided.

Thus, the cost to state government, based on the fiscal notes, would be more than $580,000.

The fiscal notes also provide an incomplete and thus too low measure of the cost to local government and public educational institutions. Many cities and educational institutions did not respond to Office of Auditor's survey or provide an estimate of the cost of the higher minimum wage. The City of Columbia, City of Jefferson, City of

Joseph, Linn State Technical College, and Metropolitan Community College did provide such an estimate. The total cost to these five institutions is $772,182.

Based on the fiscal notes, the cost to state and local government entities of the increase in the minimum wage to $8.25 will be more than $1,352,182.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can also be used to calculate the cost of the increased labor cost to state and local government entities in Missouri. Using the data from January 2010 to December 2011 Outgoing Rotation Group (ORG) CPS, I calculated that 17,089 state and local government workers would be affected by the minimum wage increase. I defined affected workers as those individuals earning between $7.00 and $8.24 per hour. Though the minimum wage was $7.25 per hour during this period, I also included those workers reporting earnings of $7.00 to $7.24 since some individuals may round their wage rate. I calculated the annual wage cost for each state and local government worker (i) in the ORG CPS as:

$$Annual\ Wage\ Cost_i = (\$8.25 - current\ wage_i) * weekly\ hours_i * 52.$$[2]

The average annual wage cost increase was $870. I summed the cost over each worker (i) to obtain the total wage cost to state and local government entities in Missouri of $14,866,430.

The increased wage cost is not the only labor cost to state and local government entities of the minimum wage increase. Employers are required to pay 7.65% of their wage costs in Social Security and Medicare taxes. Thus, the total labor cost of the minimum wage increase will be 1.0765 times $14,866,430 or $16,003,712.

---

[2] I assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour.

C. Unemployment Benefit Impact

The higher minimum wage will cause firms to reduce their level of employment.[3] As a result, the number of unemployed workers will increase. Thus, another important fiscal cost of the minimum wage increase is the cost of the unemployment insurance benefits for the workers laid off as a result of the minimum wage increase.

To calculate the cost to the unemployment benefits program, I first calculated the number of workers laid off. To do so, I calculated a probability of job loss for each affected Missouri worker (i) in the January 2010 to December 2011 ORG CPS:

$$Probability\ Job\ Loss_{\ i} = \frac{(\$8.25 - Current\ Wage_i)}{Current\ Wage_i} * elasticity_i.$$

I used the preferred employment elasticity (i.e., sensitivity of employment to wage changes) contained in Sabia and Burkhauser (2010), which was -0.6 for individuals aged 16 to 29 without a high school degree and -0.2 for all other individuals. The sole exception was for state and local government workers, where I assumed an elasticity of zero.[4] The sum across all affected workers yielded an estimated job loss of 5,745 jobs.

The next step was to calculate the weekly benefit for the average unemployed worker. Using the benefits calculator on the Missouri unemployment benefits web site and the wage income of average private-sector affected worker ($10,937), yields an average weekly benefit of $109.36[5]. The state of Missouri pays the first 20 weeks of benefits.[6] Thus, each eligible unemployed worker could receive a total of $2,187.20 in

---

[3] For a survey of research regarding the effect of the minimum wage on employment, see David Neumark and William L. Wascher, *Minimum Wages* (Cambridge, MA: MIT Press, 2008).
[4] Joseph J. Sabia and Richard V. Burkhauser, "Minimum Wages and Poverty: Will a $9.50 Federal Minimum Wage Really Help the Working Poor?" *Southern Economic Journal* (January 2010): 592-623.
[5] http://www.labor.mo.gov/DES/Claims/calculator.asp
[6] See http://www.labor.mo.gov/DES/Claims/

benefits paid for by the state of Missouri. These jobs are permanently eliminated and so it is appropriate to calculate the full amount of benefits for each worker.

Unemployment insurance, however, does not cover all unemployed workers. For example, it does not cover people who leave a job voluntarily, people looking for their first job, and re-entrants who previously left the labor force voluntarily. Furthermore, some individuals don't apply for benefits even though they are eligible. I assume that 35% of the unemployed workers will receive unemployment benefits based on analysis by Wenger (2001).[7]

The last step is to calculate the total cost to the Missouri unemployment benefits program. This done by multiplying the number of jobs lost (5,745) times the average benefit amount ($2,187.20) times the percent of unemployed individuals collecting benefits (35%). This calculation yields a figure of $4,397,510. This cost would be borne only during the first year of the minimum wage increase. The inflation adjustments in the minimum wage will also yield costs to the unemployment insurance program, but it is not possible to estimate the amount.

D. Impact on State Income Tax Revenue

The state of Missouri will gain increased revenue through higher income tax taxes paid by workers affected by the minimum wage who remain employed. However, it will

[7] Jeffery Wenger. "Divided We Fall: Deserving Workers Slip through America's Patchwork Unemployment Insurance System." *Economic Policy Institute*, 2001. Sabia and Burkhauser (2010) make the same assumption in their calculation of the amount of unemployment benefits generated by a minimum wage increase.

suffer reduced corporate income tax revenue to the extent the higher wage cost lowers profits of businesses.

To calculate the impact on individual income tax revenue, I again used data from January 2010 to December 2011 ORG CPS. I defined affected workers as those Missouri individuals earning between $7.00 and $8.24 per hour.[8] I used the following formula to estimate the change in income tax revenue:

$$\Delta Tax\ Revenue_i = (Tax_After_i - Tax_Before_i) - Prob_Job_Loss_i * Tax_Before_i,$$

where Tax_After_i is the income tax paid by worker i after the minimum wage increase. Tax_Before_i is the income tax paid by worker i after the minimum wage increase, and $Prob_Job_Loss_i$ is the probability of job loss for worker i. The first term shows the change in individual income tax revenue assuming no job loss and the second term shows the loss in tax revenue due to the employment loss caused by the minimum wage increase.

The income tax calculations were based on two assumptions.[9] First, the 50% percent of affected workers who were under the age 25 who were assumed to be dependents on another person's tax return. As a result, it was assumed that the affected workers' earnings were taxable at the maximum Missouri income tax rate of 6% both and after the minimum wage increase.[10] Second, all persons age 25 and older were assumed to be paying little or no income tax after exemptions and deductions. Thus, about 50% of the earnings increase will be taxed at a rate of 6%.

---

[8] I again assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour. The annual earnings level was calculated as the worker's wage rate times usual weekly hours worked times 52.

[9] The same assumptions are used in the State Auditor's fiscal notes for the initiatives.

[10] This assumption will overstate the revenue increase as 20% of affected workers under the age 25 are living by themselves and some of these individuals will not be a dependent on another person's tax return.

The tax calculations reveal an increase in income tax revenue increase to the state. Assuming no workers were laid off by the minimum wage increase, income tax revenue would rise by $6,043,534. However, the state will lose $1,965,446 in income tax revenue due to the lost earnings of private-sector workers no longer employed due to the minimum wage hike.[11] Thus, the net increase in individual income tax revenue is $4,078,088.

Businesses have three options to respond to the higher labor costs of a higher minimum wage. They can reduce their profits, raise prices, or lay off workers. Based on the 2010-2011 ORG CPS data, the minimum wage increase will raise private-sector labor costs by $192,620,900 if employment levels are not reduced. However, labor costs will be lowered by $55,240,790 due to the reduction in employment. Thus, labor costs will, on net, rise by $137,380,110. These increased labor costs may be either passed on to consumers through higher prices or reduced profits or more likely some combination of higher prices and reduced profits. Assuming that businesses absorbed all of the higher costs through reduced profits, the corporate income tax revenue would fall by the Missouri corporate income tax of 6.25% times the rise in labor costs of $137,380,110 * 1.0765 (to account for employer-paid Social Security and Medicare taxes) or $9,243,106.[12] Alternatively, if half of the higher labor costs were passed on to consumers, then corporate income tax revenue would fall by $4,621,553.

[11] The probability of job loss was calculated in the same manner as in the prior section.
[12] The corporate income tax for Missouri is available at: http://dor.mo.gov/business/corporate/

E. Impact on State and Local Sales Tax Revenue

To calculate the impact on state and local sales tax revenue the following approach was undertaken.[13] First, the total increase in worker earnings, adjusted for employment reductions, was calculated using the 2010-2011 ORG CPS. This figure was $152,246,540. Second, the increase in Missouri taxable sales was calculated as 25% of the earnings increase or $38,061,635. Third, the increase in sales tax revenue was calculated by multiplying the taxable sales change times the average state and local rate of 7.67% or $2,919,327.[14]

The higher minimum wage may decrease sales tax revenue to the extent that it reduces business profits, which will lower spending by business owners.

VI. Summary and Conclusions

I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

[13] The same general approach is used in the State Auditor's fiscal notes for the initiatives.
[14] The average rate comes from http://taxfoundation.org/news/show/27023.html

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

University of South Carolina, 4/2000-11/2000, $10,000, "Minority Homeownership in South Carolina," with Stacy Sirmans.

Florida Department of Business and Professional Regulation, 3/1999-6/1999, $21,739, "Forecasting Housing Demand in Florida," with Stacy Sirmans.

University of South Carolina, 4/1999-11/1999, $10,000, "Forecasting Housing Demand in South Carolina," with Stacy Sirmans.

Florida State University, 6/1999-8/1999, $7,500, "Support for Preparing ECO 2000 as a Web-Based Course."

TIAA-CREF, 8/1998-8/1999, $23,000, "Determinants of Savings in Supplemental Pension Plans: A Case Study of Pension Choices in Higher Education," with Melissa Hardy and Larry Hazelrigg.

Florida Department of Business and Professional Regulation, 4/1998-6/1998, $16,638, "Forecasting Seniors' Demand for Housing in Florida," with Stacy Sirmans.

Florida Department of Business and Professional Regulation, 12/1997-6/1998, $18,472, "Housing Price Appreciation in Orlando and Tampa," with Stacy Sirmans.

Florida State University, 6/1998-8/1998, $7,500, "Support for Preparing ECO 2000 as a Web-Assisted Course."

Florida Department of Business and Professional Regulation, 3/1997-6/1997, $17,898, "Minority Homeownership in Florida," with Stacy Sirmans.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 12/1996-8/1997, $20,000, "The Impact of Rising 401(k) Pension Coverage on Retirement Income," with William Even.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 3/1996-6/1997, $15,000, "The Determinants of 401(k) Participation and Contribution Levels," with William Even.

Florida Department of Business and Professional Regulation, 4/1996-6/1996, $22,702, "Forecasting the Number of New Florida Real Estate Licensees," with Stacy Sirmans.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 3/1995-6/1996, $15,000, "Explaining the Decline in Pension Coverage of Less Educated Workers," with William Even.

Florida State University COFRS Grant, 6/1994-8/1994, $8,000, "The Relative Compensation and Quality of Public and Private Sector Workers."

W.E. Upjohn Institute for Employment Research, 3/1994-12/1995, $35,000, "Pensions and Productivity," with Stuart Dorsey and Christopher Cornwell.

Florida Division of Workers' Compensation, 1/94-12/1995, $100,000, "Worker's Compensation Recipency in Union and Nonunion Workplaces," part of a service contract titled "Research Partnership with the Division of Workers' Compensation," co-investigator (one of several).

University of Wisconsin Institute for Research on Poverty Small Grant Program, 7/1993-6/1994, $15,000, "Racial Composition, Wages, and Quality Sorting," with Barry Hirsch.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 7/1993-6/1993, $10,000, "Trends in Individual and Family Pension Coverage," with William Even.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 6/1992-5/1993, $10,000, "The Pension Coverage of Young and Mature Workers," with William Even.

U.S. Department of Labor, Pension Welfare and Benefit Administration and American Society of Pension Actuaries, 6/1991-5/1992, $10,000, "A Conference on Current Pension Policy Issues," with William Even.

Miami University Faculty Research Grant, 6/1991-8/1991, $4,000, "Projected Growth in Retiree Health Insurance Liabilities."

Ohio Board of Regents Research Challenge Grant, 1/1990-12/1990, $4,980, "Proposal to Enhance the Data Library of the Center of Pension and Retirement Research," with William Even and Samuel Williamson.

Miami University Faculty Research Grant, 6/1990-8/1990, $4,000, "The Role of Firm Size in Pension Coverage and Options."

Miami University Faculty Research Grant, 6/1989-8/1989, $4,000, "Declining Unionism and the Gender Wage Gap," with William Even.

Participation in National Meetings

Panel Discussant, American Real Estate and Urban Economics Association/ASSA meetings, January 2008.

Presented, "Employee Turnover in the Long-Term Care Industry," at Academy Health Annual Research Meetings, June 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at International Atlantic Economic Society meetings, October 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at International Atlantic Economic Society meetings, October 2005.

Presented, "Replacing Earnings After Termination: Evidence from the Displaced Worker Survey," at the Allied Social Science Association/National Association of Forensic Economics, January 2002.

Presented, "Labor Market Transitions of Older Workers," at the Allied Social Science Association/Society of Government Economists meetings, January 1999.

Presented, "Why has the Loss in Pension Coverage Accelerated Among Less Educated Workers?" at the American Economic Association Meetings, 1995.

Presented, "Wages and Gender Composition: Why Do Women's Jobs Pay Less?" at the American Economic Association Meetings, 1994, with Barry Hirsch.

Presented, "Pensions, Labor Turnover, and Employer Size" at the American Economic Association Meetings, 1993, with William Even.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the American Economic Association meetings, 1992, with William Even.

Participation in Regional Meetings

Presented "Unions and Pension Performance: The Role of Pension Design," at Southern Economics Association meetings, November 2009.

Panel member, "Recent Federal Reserve Policy: An Evaluation" at Southern Economics Association meetings, November 2009.

Discussant, "Topics in Health Economics," at Southern Economics Association meetings, November 2009.

Discussant, "Teacher Pay, Principals, and Schooling," at Southern Economics Association meetings, November 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Western Economic Association meetings, July 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Eastern Economic Association meetings, February 2009.

Panel Discussant at the Southern Economic Association meetings, November 2008.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Southern Economic Association meetings, November 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Western Economic Association meetings, July 2008.

Chair "Pensions and Retirement" Session at Southern Economic Association meetings, November 2007.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Southern Economic Association meetings, November 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Southern Economic Association meetings, November 2006.

Panel Discussant, Southern Economic Association meetings, November 2005.

Presented, "Do Pensions Impede Phased Retirement?" at the Southern Economic Association meetings, November 2004.

Presented, "When Will the Gender Gap in Retirement Income Narrow?" at the Southern Economic Association meetings, November 2003.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Southern Economic Association meetings, November 2002.

Presented, "Racial Composition, Wages, and Quality Sorting," at the Southern Economic Association meetings, November 1999.

Presented, "Racial and Ethnic Differences in Pension Coverage and Benefit Levels," at the Southern Economic Association meetings, November 1998.

Presented, "Factors Influencing Participation and Contribution Levels in 401(k) Plans," at the Western Economics Association meetings, July 1998.

Presented, "Aging at Work: Employment Determination, Firm Strategies, and Public Policy in the United States," at the Western Economic Association meetings, July 1994.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Western Economic Association meetings, July 1992.

Presented "Plant Size and the Decline of Unionism," at the Southern Economic Association meetings, 1989, with William Even.

Panel Discussant, Southern Economic Association meetings, November 1989.

Presented "The Labor Force Participation and Earnings Profiles of Married Female Immigrants," at the Southern Economic Association meetings, November 1988.

Presented "Pensions, Screening, and the Gender Wage Gap," at the Southern Economic Association meetings, November 1988.

Session Chair and Panel Discussant at the Southern Economic Association meetings, November 1988.

Participation in Invited Seminars, Conferences, and other Presentations

Presented, "Teaching Macroeconomics During Troubled Times," at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2012.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Pennsylvania State University, April 2010.

Presented, "The Parallels Between the Japanese Economic Crisis of the 1990s and the US Today" at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2010.

Chair "Minimum Wage & EITC" Session at Society of Labor Economists meetings, May 2009.

Presented "Participant Direction in Defined Contribution Plans," at Lehigh University, April 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Association of Private Enterprise Education meetings, April 2009.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Trinity University, October 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Georgia State University, April 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Association of Private Enterprise Education meetings, April 2008.
Presented, "Improving Pension Coverage at Small Firms," at Hudson Institute, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Society of Labor Economics meetings, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Association of Private Enterprise Education meetings, April 2006.

Presented, "Participant Direction in Defined Contribution Plans," at University of Wisconsin-Milwaukee, April 2006.

Invited Panel Participant for Pepper Foundation and Center Symposium on pension reform, Washington, DC, February 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at West Virginia University, April 2005.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at the University of Kentucky, November 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the Federal Reserve Bank of Atlanta, April 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the University of Oklahoma, February 2004.

Presented, "Tracking Union and Nonunion Wages in the U.S.: Can the Evidence be Reconciled?" at the Middlebury Annual Conference on Economic Issues, April 2002.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Miami University Center for Pension and Retirement Research Conference, June 2001.

Presented, "Benefits and Worker Productivity," Benefits for the Workplace of Tomorrow Conference, Wharton School, University of Pennsylvania, May 2001.

Participant, Innovations in Managing the Financial Risks of Retirement Conference, Wharton School, University of Pennsylvania, May 2000.

Presented "Using Hi-Tech in Large Lectures," at Association of Private Enterprise Education meetings, April 2000.

Presented "Employee Participation in 401(k) Plans," at University of Wisconsin-Milwaukee, October 1999.

Presented "Gender, Race, and Ethnicity in the Labor Market," as part of the Smith Chair course in Labor Economics at Brigham Young University, September 1999.

Presented, "The Decline in Pension Coverage Among Less Educated Workers," at the Florida State University Economics Department Seminar Series, 1996.

Presented, "Children's Effects on Women's Labor Market Attachment and Earnings" at the Conference on the Changes in Working Time in Canada and the United States, Canadian Employment Research Forum, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Ohio State University Economics Department Seminar Series, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Florida State University Economics Department Seminar Series, 1995.

Presented, "Employer Size and Labor Turnover: The Role of Pensions," at Syracuse University, 1995.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" while visiting scholar at the Federal Reserve Bank of Cleveland, 1995.

Presented, "Trends in Individual and Household Pension Coverage," at the Miami University Center for Pension and Retirement Research Conference, 1994.

Presented, "Racial Composition, Quality Sorting, and the Black-White Wage Gap" at the University of Wisconsin, Institute for Research on Poverty, Small Grants Workshop, 1993, with Barry Hirsch.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Florida State University Economics Department Seminar Series, 1992.

Participant at National Bureau of Economic Research (NBER) Labor Studies meetings of the Summer Institute, 1992.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Miami University Conference on Current Pension Policy Issues, 1992.

Organizer and participant at conference on "Contemporary Issues in Pension Economics," hosted by the Center for Pension and Retirement Research, Miami University, 1990.

Presented "The Effect of International Competition on Union and Nonunion Wages," at the University of Cincinnati Seminar Series, 1987.

Outside reviewer for Department of Economics, UNC-Greensboro, Georgia State University.

Promotion and tenure letters for candidates at Georgia State University, Kansas State University, Monmouth University, Ohio State University, University of Massachusetts, University of Southern California, and University of Wisconsin-Milwaukee.

Honors and Awards

Awarded sabbatical, Trinity, Fall 2011.

Nominated for FSU Award for Excellence in Undergraduate Teaching, Spring 2005.

Named Rod and Hope Brim Eminent Scholar in Economics, FSU, Fall 2004.

Research Fellow, Institute for the Study of Labor (IZA), Bonn, 2004-.

Who's Who in Economics, Fourth Edition, Mark Blaug and Howard Vane (eds), Edward Elgar Publishing, 2003, pp. 524 (selection criteria: one of the 1,200 most frequently cited economists in the years 1990-2000 using the Social Science Citation Index).

Awarded Abba Lerner named professorship, FSU, Spring 2000.

Awarded sabbatical, FSU, Spring 2000.

Received FSU Award for Excellence in Undergraduate Teaching, Spring 2000.

Received FSU Teaching Incentive Program Award, Fall 1995.

Nominated for FSU Award for Excellence in Undergraduate Teaching, Spring 1994.

Nominated for Outstanding Teaching Award, Associated Student Government, Miami University,1992.
Selected by the Miami University Sisters of Delta Gamma for a "Favorite Professor Award" in Fall 1990.

Honorary Member of Golden Key National Honor Society, Fall 1989.

Selected by the Sisters of Delta Gamma as "One of the twenty five most outstanding faculty members at Miami University" in Fall 1988.

Service

Vice President, Southern Economic Association, 2011-

Trinity University

Dick and Peggy Prassel Professor of Business Administration Search Committee, 2011
Faculty and Staff Compensation Committee, 2010-2011
Student Retention Committee, 2010

Florida State University

University and College Committees:

Member, GPC subcommittee for Marketing, Spring 2008.
Member, Graduate Policy Committee, Fall 2007-.
Chair, GPC subcommittee for Political Science, Fall 2006.
Member, Title IV Admissions Attendance Committee, Fall 2003-Spring 2004.
Member, College of Social Sciences Executive Committee, Fall 2003-.
Member, Ad Hoc Committee on COSS Technology, Spring 2003.
Member, Computing and Information Resource Committee, Fall 1999-.
Member, Academic and Policy Affairs Committee, Fall 1996-Spring 1998.

Economics Department Committees:

Member, Ad Hoc Committee on Economics 2000 Level Courses, Spring 1999.
Member, Undergraduate Economics Committee, Fall 1998-
Member, Economics Department Executive Committee, Fall 1994-Spring 1995, Fall 1996-Spring 1999, Fall 2000-.
Economics Department Library Representative, Fall 1993-.
Micro/Macroeconomics Seminar Coordinator, Fall 1993-Spring 1995, Fall 1998-Fall 1999, Fall 2001, Fall 2006-.

Comprehensive Examination Committees:

Member, Masters Comprehensive Exam Committee, Spring 1994.
Member, Ph.D. Labor Field Exam Committee, Fall 1992, Spring 1994, Fall 1994, Fall 1995, Fall 1996, Spring 1997, Spring 1998.

Depositions and Trial Testimony: 2008 to 2012

1. Angela Speed and Adrian Speed vs. Hertz Corporation
   Atty: Dawn Pompey Whitehurst; Brevard County, Florida; gave deposition; wrongful injury; 2008; Case No: 05-2005-CA-065447

2. Patricia Morrison vs. Anthony Mork and Microspine Surgery
   Atty: Steven Andrews; Walton County, Florida; testified at trial; wrongful injury; 2008; Case No: 06000249CA.

3. James Tomaselli vs. State of Florida, Department of Corrections
   Atty: Gordon Leech; Martin County, Florida; gave deposition; wrongful termination; 2008; Case No: 01-554-CA.

4. Russell Martin, et al. v. City of Atlanta, et al.
   Atty: Andrew Coffman; U.S. District Court, Northern District of Georgia, Atlanta 5Division; gave deposition; racial discrimination; 2008; Case CA File No: 1:07-cv-00326-BBM

5. McCabe, et al. v. Harmon Fruit, et al.
   Atty: Larry Perry; Polk County, Florida; gave deposition; wrongful death; 2008; Case 53-2005-CA-003612-0000-00

6. Thomas Faulkner v. Michael Chertoff and Department of Homeland Security
   Atty: John Davis; U.S. District Court; Northern District of Florida; gave deposition; wrongful termination; 2009; Case 4:08CV341-SPM/WCS

7. Matthew Debord and Tabitha Debord vs. G & S Material Service et al.
   Atty: Hubert Brown; U.S. District Court; Northern District of Florida; gave deposition; wrongful injury; 2009; Case 3:07cv365-LAC/MD

8. Jessica Loveday vs. USA
   Atty: Anthony Caggiano; U.S. District Court; Northern District of Florida; gave deposition; wrongful injury; 2009; Case 1:08cv205/SPM

9. Julia Keyes vs. AIG
   Atty: Larry Perry; Jackson County, Florida; gave deposition; wrongful injury; 2009; Case 08706CA

10. Estate of Linda DePuy vs. Broeseker et al.
    Atty: Steve Andrews; Leon County, Florida; gave deposition; wrongful death; 2009; Case 2007 CA 2509

11. Oliver and Sollman vs. VSoft Inc.
    Atty: Larry Pankey; U.S. District Court, Northern District of Georgia, Atlanta Division; gave deposition; age discrimination; 2009; Case CA File No: 1:09-CV-0185

12. Yolanda Young vs. Covington and Burling, LLP
    Atty: Latif Damon; U.S. District Court for the District of Columbia; gave deposition; racial discrimination; 2009; Case CA File No: 1:09-CV-0464 RBW

13. Deborah Suboh vs. Mark Bergeson et al.
    Atty: Stephanie Wright and Charlotte Perrell; Georgia, Dekalb County; Case 07A77585-5, gave deposition; legal malpractice; 2010.

14. Rolando Simmons vs. Davis and Peterson
    Atty: Hubert Brown; Florida, Calhoun County; Case 2008-0150-CA, gave deposition and testified at trial; medical malpractice; 2010.

15. Lorie J. Marshall, et al. vs. H & R Block Tax Services, Inc.
    Atty: Allan Steyer; U.S, U.S. District Court
    Southern District of Illinois; Case No. 3:08-CV591-MJR; gave deposition; consumer damages; 2010.

16. Daren Davis vs. Joseph Austin and Terry Roberts Work Site
    Atty: Anthony Caggiano; Florida, Osceola County; gave deposition; wrongful injury; 2010; Case 2006 CA 002997 AN

17. David Darrow vs. Adventist Health Systems/Sunbelt Inc.
    Atty: Anthony Caggiano; Florida, Orange County; gave deposition; wrongful injury; 2010; Case 48-2009-CA-004897-0

18. Samuel Gonzalez vs. Gurdev Singh Nijjar et al.
    Atty: Ramon Rodriguez; Texas, El Paso County; gave deposition; wrongful injury; 2010; Case 2007-011

19. John Davis vs. Devereux Foundation.
    Atty: Thomas Brown; Florida, Brevard County; gave deposition; wrongful injury; 2010; Case 99-15992-CA-F

20. Al Kowalski vs. et al. YellowPages.Com, LLC
    Atty: Peter Pearlman; U.S. District Court Southern District of New York; Case No. 10-7318 (PGG); gave deposition; consumer damages; 2011.

21. Christina Glover and Jason Glover vs. Publix Super Markets
    Atty: Phelicia Steill; Florida, Leon; Case No. 08 CA 2695; gave deposition; wrongful injury; 2011.

22. Lissette Cartagena and William Cartagena vs. Bracero et al.
    Atty: Thomas Brown; Florida, Orange County; Case No. 07-CA-2645 DIV 34; gave deposition and testified at trial; wrongful injury; 2011.

23. Lillie Conyers and James Conyers vs. Werner Enterprises et al.
    Atty: Thomas Brown; Florida, Jackson County; Case No. 09-1174-CA; gave deposition; wrongful injury; 2011.

24. Shannon McCants vs. Wackenhut Corporation
    Atty: Dawn Pompey Whitehurst; Duval County, Florida; gave deposition and testified at trial; wrongful death; 2011; Case No: 16-2008-CA-014834

25. Christina Whipple versus R.E.S.A, Inc.
    Atty: Susan Haney; Bexar County, Texas; gave deposition; business damages; 2011; Case No.: 2009-CI-17074

26. Daniel Plouffe, et al. versus General Motors, LLC
    Atty: Michael Pitt; Wayne County, Michigan; gave deposition; age discrimination; 2012; Case No.: Case No. 11-007645-CL

27. Johnny Cash versus State Farm
    Atty: Steven Andrews; Leon County, Florida; testified at trial; wrongful injury; 2012; Case No.: Case No. 10-CA-2429

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College,** and **St. Louis Community College, Harris-Stowe State University, Lincoln University,**. **Northwest Missouri State University, Southeast Missouri State University, Truman State University, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State and local governments estimate no direct costs or savings from the proposal, but operating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $4.4 million decrease to a $222 million increase depending on business decisions.

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Richard Von Glahn regarding a proposed statutory amendment to Chapter 290, Version 1 (2018-196)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Richard Von Glahn on April 3, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that the proposed law changes, repeals, or modifies by implication, or may be construed by some persons to change, repeal, or modify by implication, the following provisions of the Missouri Revised Statutes: Section 285.055 and Sections 290.502, 290.512, 290.527, and 290.528. The proposed law enacts two new sections to be known as sections 290.526 and 290.529.

Be it enacted by the people of the state of Missouri:

Sections 290.502, 290.512, and 290.527 of the Revised Statutes of Missouri are amended, and two new sections to be known as sections 290.526 and 290.529 are enacted to read as follows:

290.502. 1. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, effective January 1, 2007, every employer shall pay to each employee wages at the rate of $6.50 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher.

2. The minimum wage shall be increased or decreased on January 1, 2008, and on January 1 of successive years, by the increase or decrease in the cost of living. On September 30, 2007, and on each September 30 of each successive year, the director shall measure the increase or decrease in the cost of living by the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) or successor index as published by the U.S. Department of Labor or its successor agency, with the amount of the minimum wage increase or decrease rounded to the nearest five cents.

3. Except as may be otherwise provided pursuant to sections 290.500 to 290.530, and notwithstanding subsection (1) of this section, effective January 1, 2019, every employer shall pay to each employee wages at the rate of not less than $9.00 per hour, or wages at the same rate or rates set under the provisions of federal law as the prevailing federal minimum wage applicable to those covered jobs in interstate commerce, whichever rate per hour is higher. Thereafter, the minimum wage established by this subsection shall be increased each year by $1.00 per hour, effective January 1 of each of the next three years, until it reaches $12.00 per hour, effective January 1, 2022. Thereafter, the minimum wage established by this subsection shall be increased or decreased on January 1, 2023, and on January 1 of successive years, per the method set forth in subsection (2) of this section. If at any time the federal minimum wage rate is above or is thereafter increased above the minimum wage then in effect under this subsection, the minimum wage required by this subsection shall continue to be increased pursuant to this subsection (3), but the higher federal rate shall immediately become the minimum wage required by this subsection and shall be increased or decreased per the method set forth in subsection (2) for so long as it remains higher than the state minimum wage required and increased pursuant to this subsection.

4. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (3) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsections (1) and (2) of this section shall continue to be subject to those subsections.

290.512. 1. [No] Except as provided in subsection (2) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of fifty percent of the minimum wage rate specified in sections 290.500 to 290.530, however, total compensation for such employee shall total at least the minimum wage specified in sections 290.500 to 290.530, the difference being made up by the employer.

2. Beginning January 1, 2019 and effective on the dates set forth below in this subsection, and notwithstanding the percentage established in subsection (1) of this section, no employer of any employee who receives and retains compensation in the form of gratuities in addition to wages is required to pay wages in excess of the percent set forth below in this subsection of the minimum wage rate specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530:

(1) fifty-five percent, effective January 1, 2019;
(2) sixty percent, effective January 1, 2020;
(3) sixty-five percent, effective January 1, 2021;
(4) seventy percent, effective January 1, 2022;
(5) seventy-five percent, effective January 1, 2023;
(6) eighty percent, effective January 1, 2024;
(7) eighty-five percent, effective January 1, 2025;
(8) ninety percent, effective January 1, 2026;
(9) ninety-five percent, effective January 1, 2027;
(10) one hundred percent, effective January 1, 2028;

however, in all cases, total compensation for such employee shall total at least the minimum wage specified in subsection (3) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530, the difference being made up by the employer.

3. For purposes of this section, the term "public employer" means an employer that is the state or a political subdivision of the state, including a department, agency, officer, bureau, division, board, commission, or instrumentality of the state, or a city, county, town, village, school district, or other political subdivision of the state. Subsection (2) of this section shall not apply to a public employer with respect to its employees. Any public employer that is subject to subsection (1) of this section shall continue to be subject to that subsection at the percentage set forth therein of the minimum wage rate specified in subsections (1) and (2) of section 290.502 or, where applicable, the minimum wage rate otherwise specified in sections 290.500 to 290.530.

[2.] 4. If an employee receives and retains compensation in the form of goods or services as an incident of his employment and if he is not required to exercise any discretion in order to receive the goods or services, the employer is required to pay only the difference between the fair market value of the goods and services and the minimum wage otherwise required to be paid by sections 290.500 to 290.530. The fair market value of the goods and services shall be computed on a weekly basis. The director shall provide by regulation a method of valuing the goods and services received by any employee in lieu of the wages otherwise required to be paid under the provisions of sections 290.500 to 290.530. He shall also provide by regulation a method of determining those types of goods and services that are an incident of employment the receipt of which does not require any discretion on the part of the employee.

290.526. Notwithstanding any other provision of law, as of the effective date of this section, municipalities, cities, counties, towns, and villages shall have the power to establish, mandate, or otherwise require an employer to pay wages to an employee who performs work while physically present within the boundaries of the municipality, city, county, town, or village, including employees not subject to the state or federal minimum wage, at a minimum rate per hour that exceeds the rate set under state or federal law, except that such a requirement shall not apply to employees employed by another local, state, or federal government entity or instrumentality.

290.527. Any employer who pays any employee less wages than the wages to which the employee is entitled under or by virtue of sections 290.500 to 290.530 shall be liable to the employee affected for the full amount of the wage rate and an additional [equal] amount equal to twice the unpaid wages as liquidated damages, less any amount actually paid to the employee by the employer and for costs and such reasonable attorney fees as may be allowed by the court or jury. The employee may bring any legal action necessary to collect the claim. Any agreement between the employee and the employer to work for less than the wage rate shall be no defense to the action. All actions for the collection of any deficiency in wages shall be commenced within [two] three years of the accrual of the cause of action.

290.529. Except in the circumstances set forth in section 290.523, all the provisions of sections 290.500 to 290.530 are severable. If any provision, including any section, subsection, subdivision, paragraph, sentence, or clause, of sections 290.500 to 290.530, or the application thereof to any person or circumstance, is found by a court of competent jurisdiction to be invalid, unconstitutional, or unconstitutionally enacted, such decision shall not affect other provisions or applications of sections 290.500 to 290.530 that can be given effect without the invalid, unconstitutional, or unconstitutionally enacted provision or application.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-196)

Subject

Initiative petition from Richard Von Glahn regarding a proposed amendment to Chapter 290 of the Revised Statutes of Missouri. (Received April 4, 2017)

Date

April 24, 2017

Description

This proposal would amend Chapter 290 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis,** the **St. Louis County Board of Elections,** the **Board of Election**

Commissioners City of St. Louis, the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners**.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided information as proponents of the proposal to the State Auditor's office.

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided information as an opponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations. They do not expect that the enactment of this proposal would result in any other increased costs to their office.

Officials from the **Department of Agriculture** indicated there is no fiscal impact to their department for this initiative petition.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department since public employers are exempt from the new provisions proposed.

Officials from the **Department of Health and Senior Services** indicated this proposal would have no direct fiscal impact on their department since government employees are exempt from its provisions. However, employees of certain entities that receive funding through the department's budget would be impacted, such as Medicaid Home and Community Based Services vendors/providers and Area Agencies on Aging.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department defers to the Office of Administration to determine the fiscal impact of this proposal.

Officials from the **Department of Corrections** indicated they defer to the Office of Administration.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department. Their department defers to the Office of Administration for a state impact.

Officials from the **Department of Public Safety - Office of the Director** indicated they will defer to the response provided for this initiative petition by the Office of Administration - Human Resources.

Officials from the **Department of Social Services** indicated no fiscal impact on their department. They defer to the Office of Administration.

Officials from the **Governor's office** indicated there should be no added cost or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Officials from the **Office of Administration** indicated the proposal amends Sections 290.502, 290.512, 290.527, RSMo and adds Sections 290.526 and 290.529, RSMo.

Section 290.502, RSMo, increases the minimum wage to $9.00 per hour, beginning January 1, 2019 and by another $1.00 per hour each year until it reaches $12.00 per hour beginning January 1, 2022. Thereafter, the minimum wage will be adjusted annually based on the increase/decrease in the cost of living.

Section 290.512, RSMo, increases the base salary for tipped employees. Effective January 1, 2019, employers must pay at least 55% of the minimum wage rate to tipped employees. Each year thereafter the rate increases by five percent until January 1, 2028 when tipped employees should be paid 100% of the minimum wage as established in Section 290.502, RSMo.

The proposal exempts public employers from both requirements; therefore there would be no cost to the State of Missouri.

Section 290.526 allows municipalities, cities, counties, towns and villages to implement a minimum wage that exceeds the state or federal minimum wage rate, but exempts local, state or federal government entities from the higher minimum wage rate.

Because no tax rates are affected, there is no direct impact on general and total state revenues. However, these proposals may have several indirect affects which could impact revenue collections by an unknown amount, including but not limited to:

- Increased wages for certain employees. According to the US BLS, in 2015, Missouri had 57,000 hourly employees earning wages at or below the federal minimum wage;[1]
- Increased consumption by those employees;
- Lower overall employment (if employers choose to hold costs steady);
- Lower business investment (if employers' payrolls increase);
- Increased prices as firms pass–through labor costs.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

[1] http://www.bls.gov/opub/reports/minimum-wage/2015/home.htm

Officials from the **State Treasurer's office** indicated they do not predict an immediate fiscal impact upon their office if Missouri's minimum wage rate were increased to $12.00 per hour. However, the potential future impact of applying cost of living increases and/or increases in the federal minimum wage to a Missouri minimum wage of $12.00 per hour, as called for elsewhere in Section 290.502, RSMo., is unknown.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this petition may have a small negative fiscal impact on their city as a result of the increased hourly minimum wage being higher than the hourly rate paid some city employees.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **University of Missouri** indicated they are not able to estimate any significant financial impact on their university.

Officials from **University of Central Missouri** indicated they estimate no fiscal impact since they are excluded under the public employer definition in section 4.

Officials from the **Missouri State University** indicated no fiscal impact.

Officials from **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated the wording is unclear as to whether Colleges/Universities are included in this petition. In assuming they are included, they calculate the following significant fiscal impact to their university.

Work Study Employees:
They currently have 626 work study students averaging between 720 hours to 832 hours per academic year.
Based on the proposed minimum wage increases they project the following salary increases:

Per Hr	**Additional Costs:**
$9.00	$ 455,840.00 overall increase in payroll for work study employees
$10.00	$ 835,360.00 overall increase in payroll for work study employees
$11.00	$1,236,640.00 overall increase in payroll for work study employees
$12.00	$1,637,920.00 overall increase in payroll for work study employees
$13.00	$2,039,200.00 overall increase in payroll for work study employees

University Staff Employees:
The payroll increase calculations for staff will start at $11.00 per hour. They do not have any employees earning less than $11.00 per hour.

They comprised these payroll increase calculations based on a 37.5 hour work week (which is their normal work week) for 52 weeks each year multiplied by 155 nonexempt staff:

Per Hr	**Additional Costs:**
$11.00	$ 15,288.00 overall increase in payroll for nonexempt employees
$12.00	$ 63,726.00 overall increase in payroll for nonexempt employees
$13.00	$117,195.00 overall increase in payroll for nonexempt employees

Combined Work Study Students and Non-Exempt Staff Minimum Wage Increase:
Year One: $ 455,840.00
Year Two: $ 835,360.00
Year Three:$1,251,928.00
Year Four: $1,701,646.00
Year Five: $2,156,395.00

This proposed fiscal note will have a significant impact on the university.

Officials from the **Kansas City Board of Election Commissioners** indicated no fiscal effect on their operations.

Officials from the **Platte County Board of Elections** indicated no fiscal impact.

Officials from the **Jackson County Election Board** indicated this petition does not have a fiscal impact on their office.

Lara Granich and **Missouri Jobs with Justice Voter Action** provided the following information as proponents of this initiative petition.

Re: Fiscal Impact Analysis of Minimum Wage Initiative Petitions

Summary of Proposed Minimum Wage Initiatives						
Version Number		**Initiative Summary**				
Version Number Used in This Impact Analysis	**Version Number Assigned by the Secretary of State**	**Minimum Wage Level**	**Matches the Federal Minimum Wage When It Is Higher**	**Stronger Penalty for Wage Violations**	**Tipped Worker Minimum Wage (as a % of Full Minimum Wage)**	**Allows Localities to Enact a Local Minimum Wage**
Version 13	2018 - 204	$12 by 2023 *(Start at $8.60 and $.85/year)*	Yes	Yes	No Change	No
Version 14	2018 - 205	$12 by 2023 *(Start at $8.60 and $.85/year)*	Yes	No	No Change	No
Version 15	2018 - 206	$12 by 2023 *(Start at $8.60 and $.85/year)*	No	No	No Change	No
Version 16	2018 - 207	$12 by 2024 *(Start at $8.50 and $.70/year)*	Yes	Yes	No Change	No
Version 17	2018 - 208	$12 by 2024 *(Start at $8.50 and $.70/year)*	Yes	No	No Change	No
Version 18	2018 - 209	$12 by 2024 *(Start at $8.50 and $.70/year)*	No	No	No Change	No

Version 19	2018 - 210	$13 by 2025 *(Start at $8.50 and $.75/year)*	Yes	Yes	No Change	No
Version 20	2018 - 211	$13 by 2025 *(Start at $8.50 and $.75/year)*	Yes	No	No Change	No
Version 21	2018 - 212	$13 by 2025 *(Start at $8.50 and $.75/year)*	No	No	No Change	No
Version 22	2018 - 213	$11 by 2022 (Start at $8.75 and $.75/year)	Yes	Yes	No Change	No
Version 23	2018 - 214	$11 by 2022 (Start at $8.75 and $.75/year)	Yes	No	No Change	No
Version 24	2018 - 215	$11 by 2022 (Start at $8.75 and $.75/year)	No	No	No Change	No
Version 25	2018 - 216	$11 by 2021 (Start at $9; $1/year)	Yes	Yes	No Change	No
Version 26	2018 - 200	$12 by 2022 (Start at $9; $1/year)	Yes	No	No Change	No
Version 27	2018 - 201	$13 by 2023 (Start at $9; $1/year)	Yes	No	No Change	No
Version 28	2018 - 202	$12 by 2024 (Start at $8.25; .75/year)	Yes	Yes	100%	No
Version 29	2018 - 203	$13 by 2025 (Start at $8.50; .75/year)	Yes	Yes	60%	No
Version 30	2018 - 196	$12 by 2022 (Start at $9; $1/year)	Yes	Yes	100%	Yes
Version 31	2018 - 197	$12 by 2022 (Start at $9; $1/year)	Yes	Yes	60%	Yes
Version 32	2018 - 198	$13 by 2023 (Start at 9; $1/year)	Yes	Yes	100%	Yes

Version 33	2018 - 199	$13 by 2023 (Start at $9; $1/year)	Yes	Yes	60%	Yes

This letter is from Lara Granich and Missouri Jobs with Justice Voter Action, proponents of the above-referenced Minimum Wage Initiative Petitions. Pursuant to RSMo. Section 116.175, we write to submit the following fiscal impact information to assist your office in its analysis of the fiscal impact of the above-mentioned seven proposed Minimum Wage Initiative Petitions.

Our analysis estimates the impact of the proposed Minimum Wage Initiative Petitions on state and local sales and personal income tax revenue in Missouri. We follow the process that has been used in the past to estimate the impact of minimum initiative petitions on state and local sales and personal income tax revenue, with some refinements. We also address certain claims that have been made by opponents of similar initiative petitions in the past.

As these petitions exclude public workers from the proposed minimum wage increases, we do not include in our analysis an estimate of the impact on state and local payroll costs of the proposed Minimum Wage Initiative Petitions.

I. Estimate of Number of Workers Affected Statewide and the Impact on Their Wages

Table 1. Summary of the Number of Affected Workers and Aggregate Wage Increases for Missouri in the Final Year of Minimum Wage Implementation.

Proposal	Year of Peak Minimum Wage (MW)	Proposed Peak MW	Tipped MW in Peak MW Year	Workers Affected by MW increase	Aggregate Annual Wage Increase in Nominal Dollars
13,14,15[a]	2023	$ 12.00	$ 6.00	835,350	$4,358,798,129
16,17,18[a]	2024	$ 12.00	$ 6.00	819,652	$4,209,438,048
19,20,21[a]	2025	$ 13.00	$ 6.50	900,788	$5,309,336,662
22,23,24[a]	2022	$ 11.00	$ 5.50	738,515	$3,347,138,756
25	2021	$ 11.00	$ 5.50	761,164	$3,469,534,559
26	2022	$ 12.00	$ 6.00	852,284	$4,510,285,824
27	2023	$ 13.00	$ 6.50	949,801	$5,667,065,534
28	2024	$ 12.00	$ 9.60	832,328	$4,288,614,460
29	2025	$ 13.00	$ 7.80	905,942	$5,332,471,496
30	2022	$ 12.00	$ 8.40	864,090	$4,558,317,729
31	2022	$ 12.00	$ 6.84	855,887	$4,523,341,931

32	2023	$ 13.00	$ 9.75	948,421	$5,745,051,956
33	2023	$ 13.00	$ 7.54	942,566	$5,685,951,766

Notes: Author's Analysis of American Community Survey (ACS) Data from 2014.
(a) Since these proposals only vary on non-economic factors, their economic and fiscal impacts are treated as equal for the purposes of this report.

Across the proposals analyzed, the total aggregate wage increase for workers in Missouri ranges from a low of $3.347 billion (Proposals 22-24) to a high of $5.745 billion under Proposal 32. While some proposals have the same final impact numbers, they have different impacts in the initial years (not listed) based on the relative pace of increases in earlier years. A full, year-by-year impact analysis is presented in Appendix Tables A1 through A13 below.

The wage impact of an increase in the minimum wage for the state of Missouri is calculated using the following procedure. The American Community Survey (ACS) Public Use Micro Sample for the most recent year available (2014) for the state of Missouri was downloaded from the US Census Bureau. The American Community Survey was chosen over the Current Population survey because the ACS has a significantly larger sample. We followed the method of Perry, Thomason, and Bernhardt (2016) for calculating an hourly wage rate from the ACS based on observed total annual wage income, typical hours worked each week and weeks worked per year. Since ACS income figures are clustered around whole-numbers, we smoothed the wage distribution by randomly adding or subtracting $0.25 from each wage figure.

Wage adjustments were made only for those individuals earning less than the proposed minimum wage, or proposed tipped minimum wage. We did not make additional adjustments for the "ripple effect" of minimum wage increases on workers earning slightly above the new threshold. Recent evidence suggests that workers earning up to 15 percent above of the minimum wage also receive small increases in response to a minimum wage increase. (See Wicks-Lim (2006) and Dube, Giuliano and Leonard (2015).) Thus, the estimated impacts listed above are likely to be smaller than the actual impact of increasing the minimum wage to the proposed level.

The proposed minimum wage increases exclude public employees. However, it was not practicable to exclude public employees from these calculations because the ACS does not have a published variable that allows for identification of public employees. Nonetheless, this inclusion of public employees should have only a minimal impact on our results, since their numbers are small and most already earn more than the proposed minimum wage increases.[1]

All wages from the 2014 survey were adjusted upward to account for inflation between the time of the survey and the time of measurement of the impact. Actual rates of inflation were used to adjust wages up to 2016. For all subsequent years between 2017 and 2028, baseline wages were adjusted using the projected annual average rate of change in the Consumer Price Index for Urban Workers (CPI-U) for the Midwest region. The 2015 and 2016 Missouri Minimum wage of $7.65 was adjusted by the same factor prior to measuring the impact of a change to the proposed minimum wage in 2019.

After these adjustments, the resulting hourly wage of all employees was compared to the proposed minimum wage. A total of twenty-one proposals were analyzed. For each proposal, we constructed a baseline wage scenario that used only basic wage changes from expected inflation rates to predict each ACS respondent's hourly wage rate in each year

[1] For Missouri's state employees, this can be validated by viewing the earnings of all state employees at: http://mapyourtaxes.mo.gov/MAP/Employees/. In larger counties and cities most all public employees already earn more than the highest proposed minimum wage. Smaller counties and towns may have some public employees who earn less than the highest proposed minimum.

between 2019 and 2028. We then constructed a counterfactual, or "proposed" wage distribution for each worker under all twenty-one minimum wage proposed scenarios. Since the minimum wage proposals offer nine different paths for raising the minimum wage for all non-tipped private sector workers, and different wage paths for tipped workers, we create separate minimum wage changes for tipped and non-tipped workers. Specifically, we used information on a worker's occupation and observed wage levels to separately identify tipped workers and assign them the proposed tipped minimum wage in each year, rather than the higher non-tipped minimum wage.[2]

If the proposed minimum wage was less than the inflation-adjusted hourly earnings of an employee, then no impact was calculated. If the proposed minimum wage was more than the hourly earnings for an employee, then the difference between the inflation-adjusted hourly earnings (i.e. baseline) and the proposed minimum wage was calculated. That difference was multiplied by the number of hours the employee worked in the year to calculate the annual impact for that employee. The result was then multiplied by a weighing factor for that employee in the population. The total impact for the state of Missouri was then summed across all affected workers to generate a total estimated increase in wage income in the state.

We do not include an estimate of job losses due to minimum wage changes. Existing research is clear that past minimum wage increases have had no measurable effect on aggregate employment levels. Larger minimum wage increases, such as those in Los Angeles, Seattle, and other jurisdictions, have not yet been studied to detect a clear disemployment effect. While it is possible that there may be some employment losses due to automation or other factors, this potential negative effect is likely offset by the positive potential job growth stemming from multiplier effects of the spending of minimum wage workers who receive substantial raises. There is substantial research to indicate that increases in the minimum wage have multiplier effects that increase the direct effects. For this reason and because of the likely increases in wages for individuals who earn above the proposed minimum wage rates, the impacts summarized in the table are considered conservative estimates relative to the total impact that would occur as a result of increasing the minimum wage to the proposed levels.

II. Economic Literature on the Impact of Minimum Wage Increases on Employment

Next, it is necessary to review the economic literature on the impact of minimum wage increases on employment. Opponents often claim that minimum wage increases may reduce employment in a state. If that is true, then those employment reductions would result in reductions in state income and sales tax revenue. However, review of the most credible recent empirical research on the minimum wage shows that increases in the minimum wage have had no discernible impact on employment. We thus conclude that it is not appropriate to project that the proposed initiative petitions would result in any detectable employment reduction, and resulting losses in income and sales tax revenue, or increases in unemployment-related costs to the state.

Economists have conducted hundreds of studies of the employment impact of the minimum wage. A recent meta-study – a formal statistical study of studies – by Doucouliagos and Stanley (2009) reviewed all the research conducted over the last three decades on the employment impact of minimum wage increases on teenagers in the United States. The researchers concluded that the minimum wage has little or no discernible effect on the employment prospects of low-wage workers. Their study followed a rigorous, peer-reviewed procedure and has the advantage of using a set of predetermined, objective criteria for weighing the validity of statistical findings across studies with different results.

[2] We defined tipped workers as those employed in occupations that typically receive a large share of income as tips. These occupations were 'Bartenders' (4040), 'Waiters and Waitresses', 'Food Servers, Non-restaurant' and 'Miscellaneous food preparation and serving related workers including dining room and cafeteria attendants and bartender helpers'.

(Source: Doucouliagos, Hristos and T. D. Stanley. 2009. "Publication Selection Bias in Minimum-Wage Research? A Meta-Regression Analysis." British Journal of Industrial Relations,vol. 47, no. 2, pp. 406-428.)

Recent theoretical and empirical research emphasizes several explanations for the consistently negligible employment impacts of moderate increases in the minimum wage. First, relative to total wage costs, minimum-wage increases are small. Second, employers and workers appear to respond to minimum-wage increases in many ways that reduce the direct cost to employers and substantially reduce or eliminate the need to cut employment.

Probably the most important economic response to a higher minimum wage is a reduction in turnover. At higher wages, employers fill vacancies faster and retain employees longer, boosting total employment and average productivity per worker while reducing direct and indirect training costs. Dube, Lester, and Reich (2012), for example, examined the effect of the minimum wage on labor turnover among teens and restaurant workers. They find "...striking evidence that separations, new hires, and turnover rates for teens and restaurant workers fall substantially following a minimum wage increase..." (p. 2). Their findings, using nationally representative data, are consistent with local case studies of the minimum wage and related "living wage" laws, including Dube, Naidu, and Reich's (2007) analysis of the San Francisco city-wide minimum wage; Fairris's (2005) study of local government contractors in Los Angeles; Howes (2005) on homecare workers in California; and Reich, Hall, and Jacobs (2005) on workers at the San Francisco airport.
(Sources: Dube, Arindrajit, T. William Lester, and Michael Reich. 2012. "Minimum Wage Shocks, Employment Flows and Labor Market Frictions." Berkeley, CA: Institute for Research on Labor and Employment. http://escholarship.org/uc/item/76p927ks; Dube, Arindrajit, Suresh Naidu, and Michael Reich. 2007. "The Economic Effects of a Citywide Minimum Wage." *Industrial and Labor Relations Review*, vol. 60, no. 4, pp. 522-543; Fairris, David. 2005. "The Impact of Living Wages on Employers: A Control Group Analysis of the Los Angeles Ordinance." *Industrial Relations*, vol. 44, no. 1, pp. 84-105; Howes, Candace. 2005. "Living Wages and the Retention of Home Care Workers in San Francisco." *Industrial Relations*, vol. 44, 5 no. 1, pp. 139-163; Reich, Michael, Peter Hall, and Ken Jacobs. 2005. "Living Wage Policies at the San Francisco Airport: Impacts on Workers and Businesses." *Industrial Relations*, vol. 44, no. 1, pp. 106-138.)

Employers also appear to respond to increases in the minimum wage by taking measures to boost productivity. Hirsch, Kaufman, and Zelenska's (2011) study of the impact of the federal minimum wage increase on 81 fast-food restaurants in Georgia and Alabama, for example, asked fast-food managers about the scope for efficiency improvements in response to the minimum-wage rise. About 90 percent of managers indicated that they planned to respond to the minimum wage increase with increased performance standards such as "requiring a better attendance and on-time record, faster and more proficient performance of job duties, taking on additional tasks, and faster termination of poor performers." (p. 27) Roughly the same share of managers said that they sought to "boost morale" by presenting the minimum wage increase as a "challenge to the store" and using this as a way "to energize employees to improve productivity." (pp. 28-29) Based on their interviews with store managers, the researchers concluded that a minimum wage increase may function as a "catalyst or shock that forces managers to step out of the daily routine and think about where cost savings can occur." (p. 29) (Source: Hirsch, Barry T., Bruce Kaufman, and Tetyana Zelenska, "Minimum Wage Channels of Adjustment." IZA Discussion Paper No. 6132. Germany: Institute for the Study of Labor. http://www2.gsu.edu/~ecobth/IZA_HKZ_MinWageCoA_dp6132.pdf)

A higher minimum wage may also motivate workers to work harder, independently of any actions by employers to increase productivity. According to "efficiency wage" theory, wages above the competitive-market rate may elicit greater work effort for several reasons. As Carl Shapiro and Joseph Stiglitz (1984) have argued, higher pay increases the cost to workers of losing their job, potentially inducing greater effort from workers in order to reduce their chances of

being fired. George Akerlof (1982), arguing from a more sociological point of view, has suggested that workers may see higher wages as a gift from employers, leading workers to reciprocate by working harder. (Sources: Shapiro, Carl and Joseph E. Stiglitz. 1984. "Equilibrium unemployment as a worker discipline device." *American Economic Review*, vol. 74, no. 3, pp. 433-444; Akerlof, George A. 1982. "Labor contracts as partial gift exchange." *Quarterly Journal of Economics*, vol. 97, no. 4, pp. 543-569.)

We therefore conclude that the proposed increase in the Missouri minimum wage would have no discernible impact on the employment levels of low-wage workers. Accordingly, we do not factor in reductions in employment, or any resulting decrease in sales tax or income tax. We also do not project any increased unemployment insurance costs – both because we do not project any resulting job losses, and, additionally, because unemployment insurance costs are paid for by employer premiums, and so are ultimately not a cost to the state.

For similar reasons, we do not believe that the proposed increase will have any significant adverse economic impact on small businesses or, by extension, on corporate income tax revenue. In fact, many small businesses already pay little if any corporate income tax.

III. State and Local Sales and Personal Income Tax Revenue Impact of Raising the Minimum Wage

Based on the wage impact figures calculated above, and the understanding that the minimum wage increases would be unlikely to result in offsetting job losses, we next calculate the impact of the projected wage increases on state and local sales and personal income tax revenue in Missouri. We project only the direct impact of the various minimum wage increase scenarios on such tax revenue. We do not attempt to project the additional impact through a GDP multiplier effect, or the potentially higher sales taxes generated if employers offset wage increases with higher prices (which would be taxable).

Personal Income Tax Revenue. In order to determine the projected increase in personal income tax revenues that would result directly from the increased wages, we had to develop assumptions about the effective income tax rates of the affected workers. We made the following assumptions with respect to the effective tax rate:

1. That 25% of affected workers can be claimed as a dependent on another party's Missouri income tax return and, as a result, would pay an effective tax rate of 6.0% on the increase in income;
2. That 50% of the affected workers would file as single taxpayers, would claim one deduction of $2,100, and would be entitled to a standard deduction of $5,800. This would result in an effective tax rate of 2.47%;
3. The remaining 25% would, we assumed, pay no additional Missouri income tax.

In light of these assumptions, the increased Missouri income tax revenue for each petition version can be calculated as follows: (total wage increase * 25% * 6.0%) + (total wage increase * 50% * 2.47%) + (total wage increase *25% * 0%).

Sales Tax Revenue. The state of Missouri imposes a 4.225% state sales tax on those items that are not exempt from the sales tax base. In addition, the average local sales tax rate is 2.95%. As a result, the average Missouri net sales tax rate is 7.175%. To estimate the share of income that is spent on goods and services that are subject to sales taxes, we used data from the 2015 Consumer Expenditure Survey (CES) for the US to estimate the share of income spent on categories that are subject to sales taxes. The CES summary tables list average spending per consumer across 20 different

categories (e.g. housing, transportation, food away from home) and we categorized each spending item as taxable or non-taxable and then calculated the share of spending that we taxable.[3] The resulting rate was 30.3 percent.

Based upon the above assumptions, and the total wage increase calculations for each version of the petition, we estimate that the increase in state income tax revenue resulting from the increased wages would be as follows:

Table 2. Summary of the Impact of Minimum Wage Increases on State and Local Sales and Income Taxes in Year of Full Minimum Wage Final Implementation.

Proposal	State Sales Tax (4.225%)	Local Sales Tax Revenue (2.95%)	Total Sales Tax Revenue Increase	Personal Income Tax Revenue	Total Sales and Personal Income Tax Revenue Increase
13,14,15[a]	$55,814,587	$38,971,132	$94,785,719	$119,213,129	$213,998,848
16,17,18[a]	$53,902,025	$37,635,734	$91,537,759	$115,128,131	$206,665,889
19,20,21[a]	$67,986,272	$47,469,704	$115,455,976	$145,210,358	$260,666,334
22,23,24[a]	$42,860,248	$29,926,090	$72,786,338	$91,544,245	$164,330,583
25	$44,427,531	$31,020,406	$75,447,937	$94,891,770	$170,339,707
26	$57,754,393	$40,325,553	$98,079,946	$123,356,317	$221,436,263
27	$72,567,004	$50,668,086	$123,235,090	$154,994,242	$278,229,333
28	$54,915,882	$38,343,634	$93,259,516	$117,293,605	$210,553,122
29	$68,282,514	$47,676,548	$115,959,062	$145,843,095	$261,802,158
30	$58,369,444	$40,754,996	$99,124,440	$124,669,990	$223,794,430

Note: Author's Analysis of American Community Survey (ACS) data from 2014 and fiscal impact assumptions described above. All dollars are in nominal figures. (a) Since these proposals only vary on non-economic factors, their economic and fiscal impacts are treated as equal for the purposes of this report.

As described in Table 2 above, the fiscal impact of the proposed minimum wage increases varies based on the ultimate level of the minimum wage and the degree of tipped minimum wage phase out. The estimates of the total fiscal benefit range from $164 million to $282 million annually. Appendix tables A1 through A13 provide a year-by-year summary of the fiscal benefits.

[3] Specifically, the categories we assumed to be subject to state and local sales taxes are: food, household furnishings and equipment, vehicle purchases, gasoline and motor oil, entertainment, and all other expenditures. We assumed that 50 percent of the spending on the category "apparel and services" was taxable.

We hope that this information is useful to your office as your prepare your analyses of the petitions.

Respectfully submitted,

Lara Granich

Robert Bonney, Chief Executive Officer of the Missouri Restaurant Association provided the following information as an opponent of this initiative petition.

These corrections were subsequently provided to the submitted information

In the table on the bottom of page 7 and top of page 8, both averages for 2023 should be based on a 5 year phase-in. Accordingly, the figure on that table should state for 2023 ($12) Average Annual Unemployment Premiums Paid by State of $16,269,523.52.

The corresponding change on the table on page 12 would be to state, for 2023 ($12) Total Net Loss to State Government from Taxes and Unemployment Insurance of ($19,137,851.76).

Re: Initiative Petitions 2018-196 through 2018-216

Dear Mr. Halwes,

I write on behalf of Robert Bonney. Mr. Bonney is the Chief Executive Officer of the Missouri Restaurant Association. Please consider this letter and the accompanying studies as his fiscal impact statement as an opponent of Initiative Petitions 2018-196 through 2018-216 (the "Initiative Petitions"). If passed, any of these twenty-one initiatives would have a substantial negative impact on state and local governments, as well as Missouri small businesses. Those effects are both direct (as noted in Section 1) and secondary (as noted in Sections 2 through 5). The direct effects stem from higher labor and contracting costs that the state and its political subdivisions will incur, despite the Initiatives' effort to exclude government workers from the mandate.

The indirect effects will present a debate this Office has seen before. The proponents of the Initiative Petitions will once again rely on data sourced from political activist groups who claim increases in the minimum wage only serve to create new taxable income. The reality is that such groups approach this issue with political bias. Their analysis is one-sided because it completely ignores the fact that a wage increase does not "create" income from thin air; instead, it is an economic transfer from Missouri businesses to workers. Missouri businesses must pay the new wages "created" by the increases. Political activists' models fail to account, then, for two specific manifestations of the "debit" side of this transfer: reductions in employment, and the reduction in corporate income tax paid based upon business done in Missouri.

The failure to account for any employment effect at any proposed wage increase—even a drastic increase of the minimum wage to $13—is particularly puzzling, because Missouri's most populous areas border Illinois and Kansas. These states, respectively, have minimum wages of $8.25 and $7.25. Neither state adjusts the minimum wage for inflation. Likewise, the second effect—loss of corporate income tax revenues—is a mathematical certainty. Missouri businesses will be the source of the wage increase, which will lower their own taxable income. Assuming a one-to-one substitution of "created" wages for lost corporate income, the difference in the rates

at which these two types of income are taxed will result in a net decrease in state revenue. A dollar from increased wages is taxable by state government in Missouri at 6% or substantially less, whereas Missouri's corporate income tax rate is 6.25%.

On top of these two types of negative outcomes—lower employment and lower state tax revenues—there may be second-order effects to small businesses because they lack the access to capital to weather price fluctuations; they may not survive at all because they may not have the flexibility to simply cut employment, shifting their reliance to capital instead of labor resources, or suffering a decrease in production and revenue.

In short, much of the fiscal impact regarding the current crop of wage-related ballot measures is secondary: they cause transfers of wealth within (or out of) the state economy, and those transfers of wealth then create second-order effects for state and local governments via their collection of tax revenues and provision of welfare services for the unemployed or less-employed. Because these fiscal notes call for the Auditor operate in the area of secondary effects, it is critical that she treat both sides of the wealth transfer equally, and refrain from assessing only one half of the wage increase equation.

1. Direct Labor Cost Impact on State and Local Government Budgets

As noted to the State Auditor's Office previously by Dr. David Macpherson, a nationally prominent labor and economics expert, there are two ways to measure labor cost on state and local government budgets. First, one can use the information included in fiscal note responses from state and local government entities. It is important to note that these fiscal notes provide an incomplete and, therefore, too-low estimate of labor cost. Few state and local government entities respond to requests for a fiscal note response, and those that do respond often ignore important effects.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can be used to calculate increased labor cost to state and local government entities in Missouri. To combat this time-honored analysis, and in a blatant attempt to manipulate the fiscal note process, the Initiative Petitions provide that they will raise the minimum wage for private workers, but not for workers employed by state or local governmental entities. No conceivable justification exists for solely raising the minimum wage on private businesses. Whatever the disparity between the value of total compensation at a private business and at a government employer, that disparity does not approach the wage adjustments at issue here, ranging from an inflation adjusted wage increase of 51.16% (($13-$8.60)/$8.60) in Initiative Petitions 2018-198 through 2018-201 to a wage increase of 30.17% (($11-$8.45)/$8.45) in Initiative Petitions 2018-213 through 2018-215.

Moreover, it is unreasonable to assume that on a sustained basis public employers, as defined in the Initiative Petitions, would be able to maintain dramatically lower wage levels than private businesses. Public employers would lose staff employable at higher rates in the private market, imposing substantial costs on government productivity. Using the method traditionally employed by labor economists and followed by the Auditor's office, one can calculate the annual

wage costs to state and local governmental entities, based on the annual wage cost for each state and local government worker in the ORG CPS, as detailed on page 6 of Dr. Macpherson's 2012 report, attached hereto as **Exhibit A**. Even if the auditor finds that a specific estimate of costs is not determinable, the auditor should note that state and local government "operating costs could increase by an unknown annual amount that could be significant," through the form of higher wage costs and higher contracting costs.

The proponents of the Initiative Petitions may argue that the Auditor should abandon any state and local cost estimates altogether. The proponents will argue that provisions they have inserted in the statute would mean that state and local government entities will not have to pay higher wages to their employees. Setting aside unjustifiable discrimination against private employers (and "public employees"), the provision is of uncertain legal effect and constitutionality. A "public employer," defined in the initiatives as "the state or a political subdivision of the state" still incurs substantial costs for wages of individuals that are "private employees," rather than "public employees." Cleaning services, food service, and other essential services often rely on state contracts with outside vendors. Sometimes, a contract rate may vary depending on the cost of labor. Even if the contract rate is fixed, it must be re-bid periodically, and that bidding process would take into account the new minimum wage. Plainly, the initiative would impose higher costs for state and local governments in contracting with any private entity and its employees. As a matter of law, it would be insufficient and unfair for the Auditor's fiscal note or summary to simply assume that these costs to state and local governmental entities do not exist.

2. Cost of Unemployment Benefits

a) The effect of inflation on Missouri's minimum wage

CPS–ORG data show that between 2007 and 2015, median nominal wages for adult (25–59 years old) workers in the U.S. grew by 1.68 percent a year. However, Missouri's minimum wage is currently adjusted using "the percentage increase or decrease as of the preceding July over the level as of July of the immediately preceding year of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W)." Section 290.502, RSMo. Coincidentally (or perhaps not), the CPI-W, over the period from 2006 to 2016, also increased at an average rate of 1.68 percent a year.

Year	CPI-W	Observed inflation %
2006	199.2	
2007	203.7	0.022590361
2008	216.304	0.061875307
2009	210.526	-0.0267124

2010	213.898	0.016017024
2011	222.686	0.041085003
2012	225.568	0.01294199
2013	230.084	0.02002057
2014	234.525	0.019301646
2015	233.806	-0.00306577
2016	234.771	0.004127353

Using Missouri's current inflation-adjusted minimum wage rate and an assumed, constant 1.68 percent increase in the CPI-W, the minimum wage in Missouri will be as follows:

Year	Estimated Minimum Wage
2016	$7.65 (observed)
2017	$7.70 (observed)
2018	$7.85
2019	$8.00
2020	$8.15
2021	$8.30
2022	$8.45
2023	$8.60
2024	$8.75
2025	$8.90
2026	$9.05

b) Calculating job loss attributable to increased minimum wage

At least one outside economist, James Sherk, has already provided an estimate for job loss in Missouri based on a $15 minimum wage. Mr. Sherk calculated the effect of a $15 minimum wage implemented in 2021. Mr. Sherk's figures accounted for inflation by estimating the present value of $15.00 in 2021, rather than estimating an absolute figure for wage inflation in Missouri. Mr. Sherk calculated the present value of $15.00 in 2021 to be $13.57, per hour, based on wage inflation of 1.68 percent. Mr. Sherk evaluated the change from $7.65 per hour to $13.57 per hour (a 77.39% increase), exclusive of agricultural workers. Cumulatively, Mr. Sherk calculated this 77.39 percent increase in wages to reduce employment in the affected workforce by (0.7739*0.677) 52.39%.

Graves Garrett LLC

Mr. Sherk calculated that approximately 40.9% of Missouri's Wage and Salary Workers would be affected by such a $15 minimum wage. Mr. Sherk's calculations reveal that a $15 minimum wage in 2021 would be expected to reduce the number of full-time equivalent jobs in Missouri by approximately 218,000. Based on CPS–ORG data, these figures reveal an affected workforce of approximately 416,086 workers impacted by a $15 minimum wage increase in 2021.

However, in 2014, Dr. Macpherson found, using more conservative, national-level Congressional Budget Office data, that an increase to a $10.10 minimum wage, effective January 1, 2015, would eliminate about 15,700 jobs in Missouri. Dr. Macpherson analyzed the effect of a Missouri $10.10 minimum wage using a model suitable to a national analysis. This analysis predicted a loss of 15,700 Missouri jobs based on a wage increase from $7.50 in 2014 to $10.10 in 2015 (a 34.67% increase).

On the whole, the analysis by Mr. Sherk is more instructive here, since it is more recent, Missouri-specific, and anticipates larger wage changes contemplated by the Initiative Petitions. The most accurate way to determine the estimate of Workers Affected would be to analyze the CPS–ORG data. However, without such data readily available in the time constraints imposed by the fiscal note process, it is reasonable for estimation purposes to assume Mr. Sherk's figures are evenly distributed. Assuming that worker data follows an equal distribution, the Initiative Petitions would be expected to result in the following job losses:

Year of final prescribed wage increase	Wage without IP	Wage mandated by IP	Percentage increase	Percentage of affected workers who lose jobs (Percentage Increase x 0.677 Elasticity)	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by Initiative
2021	$8.30	$11.00	32.53%	22.02%	174,897	38,512
2022	$8.45	$11.00	30.18%	20.43%	162,262	33,150
2022	$8.45	$12.00	42.01%	28.44%	225,866	64,236
2023	$8.60	$12.00	39.53%	26.77%	212,532	56,895
2023	$8.60	$13.00	51.16%	34.64%	275,061	95,281
2024	$8.75	$12.00	37.14%	25.15%	199,683	50,220
2024	$8.75	$13.00	48.57%	32.88%	261,136	85,861
2025	$8.90	$13.00	46.07%	31.19%	247,695	77,256
2026	$9.05	$13.00	43.65%	29.55%	234,683	69,349

c) The best estimate for a price elasticity of demand for low-skilled labor is -0.677.

As noted by Mr. Sherk, starting wages of $15.00 per hour mean that full-time employee must create at least $38,700 a year in value for his or her employer (including wages, employer payroll taxes, and mandatory healthcare benefits). High minimum wages and mandatory benefit costs make it much harder for less-experienced and less-skilled workers to find jobs, particularly full-time work.

Recent labor economics scholarship has revealed that, accounting for publication bias, a state-specific elasticity of demand for less-skilled workers is, on average, approximately -0.677, though some estimates are even higher, around -1.0.[1] "[E]conomists have extensively studied how businesses respond to higher wages overall, not just minimum-wage increases. On average these studies find a 10 percent increase in labor costs causes firms to reduce employment of less-skilled workers by 6.8 percent in the long run."[2]

While these elasticity estimates are substantial in absolute terms, there is reason to believe that such estimates might still understate the impact of a Missouri state-specific effort to increase the minimum wage. This is so for several reasons. First, traditionally, labor economists view labor as a reasonably difficult input to substitute; however, Missouri businesses have readily available options. There are relatively few barriers to doing business in Missouri's border states, and businesses can easily relocate across a state line to take advantage of more favorable wage (and tax laws). Additionally, substantially raising the cost for Missouri labor, relative to labor sources in other states and other countries, is likely to force many manufacturing jobs in Missouri to disappear entirely. Automation is also a significant risk. The substitution of labor is becoming increasingly easy due to technology advancements and the "sharing" economy, where fewer individuals are "employees" covered by the minimum wage. Finally, a labor "price shock" may result in significant decreases in the demand for goods and services. People make behavioral changes to avoid higher costs, including eating out less often and generally decreasing consumption (or shifting their activities to consumption involving comparatively low amounts of labor) wherever possible.

[1] Sherk, James, "How $15-per-Hour Minimum Starting Wages Would Affect Each State," The Heritage Foundation, http://report.heritage.org/ib4601.

[2] "The coefficients on these estimates imply an elasticity of –0.677 for a study published in 2012 (the most recent year in their data) of long-run unconditional labor demand for low-skilled labor in the U.S., estimated using industry-level administrative panel data and a structural form model." "Estimates that do not account for publication bias tend to slow a long-run elasticity closer to –1.0. See, for example, George Borjas, Labor Economics, 6th ed. (Columbus, OH: McGraw-Hill, 2013), Chapter 4: 'The evidence also suggests that the estimates of the long-run labor demand elasticity cluster around –1, so the long-run labor demand curve is indeed more elastic than the short-run curve.' " Sherk, available at http://report.heritage.org/ib4601.

Graves Garrett LLC

d) Unemployment Benefit Costs

We derived an average unemployment payout by calculating the expected weekly unemployment benefit amount. Based on current data, the expected unemployment weekly benefit amount of a worker making $7.65 an hour, on a 40 hour workweek, is $159.12 per week, for 20 weeks.[3] The expected unemployment weekly benefit amount of a worker making $10.99 an hour is $228.59 per week. The expected unemployment weekly benefit amount of a worker making $11.99 an hour is $249.39 per week. The expected unemployment weekly benefit amount of a worker making $12.99 an hour is $270.19 per week. We assume that workers will seek unemployment insurance for the full twenty weeks authorized under Missouri law, because unemployment attributable to an increase in the minimum wage is structural. In this case, structural unemployment occurs because workers' job skills do not meet the established "price floor" of labor, rendering the worker's skills unmarketable. Assuming an even distribution of workers affected, the average unemployment benefit cost to the state for a worker is calculated as follows:

- For Initiative Petitions 2018-213 through 2018-216, [($159.12+$228.59)/2]*20 = $3,877.10
- For Initiative Petitions 2018-196, 2018-197, 2018-200, 2018-202, and 2018-204 through 209, [($159.12+$249.39)/2]*20 = $4,085.10
- For Initiative Petitions 2018-198, 2018-199, 2018-201, 2018-203, 2018-210 through 2018-212, [($159.12+$270.19)/2]*20 = $4,293.10

Consistent with Dr. Macpherson's 2012 report, it would be reasonable for the Auditor to assume that 35% of unemployed workers will receive unemployment benefits. Combining these numbers leads to the following estimates:

Year of final prescribed wage increase	Estimate of Missouri Workers Unemployed by Initiative	Estimated Unemployment Amount Per Worker	Estimated Total Unemployment Premiums Paid	Average Annual Unemployment Premiums Paid by State
2021 ($11)	38,512	3,877.10	$52,260,206.32	$17,420,068.77
2022 ($11)	33,150	3,877.10	$44,984,052.75	$11,246,013.19
2022 ($12)	64,236	4,085.10	$91,843,669.26	$22,960,917.32
2023 ($12)	56,895	4,085.10	$81,347,617.58	$20,336,904.39

[3] https://labor.mo.gov/DES/Claims/calculator. A 2015 law decreased the unemployment benefit period from 20 weeks to 13 weeks, but the Supreme Court of Missouri struck down the law in July 2016.

2023 ($13)	95,281	4,293.10	$143,167,801.39	$28,633,560.28
2024 ($12)	50,220	4,085.10	$71,803,802.70	$11,967,300.45
2024 ($13)	85,861	4,293.10	$129,013,450.69	$21,502,241.78
2025 ($13)	77,256	4,293.10	$116,083,706.76	$16,583,386.68
2026 ($13)	69,349	4,293.10	$104,202,767.17	$13,025,345.90

3. Impact on State Income Tax Revenue

The 2012 analysis prepared by Dr. Macpherson may also be used as a reference in calculating the effect of the initiative petitions on state income tax revenue. Here, again, it is reasonable to assume that our "affected workers" are evenly distributed, though precise CPS–ORG data would also provide a reliable estimate. Here, the increased income tax revenue is the additional income tax paid by workers whose wages increase. There is a loss of revenue, however, in the form of decreased income tax paid by workers whose wages decrease and businesses who absorb the increased cost of labor, rather than passing it along to customers.

For the purposes of these estimates, we assume that workers work 40 hours a week and 52 weeks per year:

Year of final prescribed wage increase	Estimate of Workers Affected	Estimate of Missouri Workers Unemployed by IP	Estimate of Missouri Workers with Increased Wages	Annual Increase in Wages Paid to Workers who get Wage Increase in Final Year	Annual Decrease in Wages Paid to Workers now Unemployed
2021 ($11)	174,897	38,512	136,385	$382,969,080.00	$108,141,696.00

2022 ($11)	162,262	33,150	129,112	$342,405,024.00	$87,913,800.00
2022 ($12)	225,866	64,236	161,630	$596,737,960.00	$237,159,312.00
2023 ($12)	212,532	56,895	155,637	$550,332,432.00	$201,180,720.00
2023 ($13)	275,061	95,281	179,780	$822,673,280.00	$436,005,856.00
2024 ($12)	199,683	50,220	149,463	$505,184,940.00	$169,743,600.00
2024 ($13)	261,136	85,861	175,275	$774,715,500.00	$379,505,620.00
2025 ($13)	247,695	77,256	170,439	$726,750,021.03	$329,419,584.00
2026 ($13)	234,683	69,349	165,334	$679,192,072.00	$284,885,692.00

These net wage increases will lead to corresponding increases in state income tax collections. Traditionally, it has been assumed that about 50% of affected workers will pay 6% income tax, while the other 50% of workers pay no state income tax. This assumption may be less accurate at the higher wage increases contemplated by the Initiative Petitions. Accordingly, figures are also displayed assuming that about 75% of affected workers will pay 6% income tax, while the other 25% of workers pay no state income tax.

Annual Net Increase in Wages Paid To Workers	Annual Income Tax Increase from Wage Increase (50% pay tax)	Annual Income Tax Increase from Wage Increase (75% pay tax)
$274,827,384.00	$8,244,821.52	$12,367,232.28
$254,491,224.00	$7,634,736.72	$11,452,105.08
$359,578,648.00	$10,787,359.44	$16,181,039.16
$349,151,712.00	$10,474,551.36	$15,711,827.04
$386,667,424.00	$11,600,022.72	$17,400,034.08
$335,441,340.00	$10,063,240.20	$15,094,860.30
$395,209,880.00	$11,856,296.40	$17,784,444.60
$397,330,437.03	$11,919,913.11	$17,879,869.67
$394,306,380.00	$11,829,191.40	$17,743,787.10

Graves Garrett LLC

Based on these figures, Missouri businesses must also decide whether to pass along any increase in wage costs (wages and mandatory payments).[4]

Year of final prescribed wage increase	Annual Cost to Business from Increased Wage	Annual Decreased Corporate Income Tax if cost is fully absorbed	Annual Decreased Corporate Income Tax if cost is 50% absorbed
2021 ($11)	$412,266,214.62	$25,766,638.41	$12,883,319.21
2022 ($11)	$368,599,008.34	$23,037,438.02	$11,518,719.01
2022 ($12)	$642,388,413.94	$40,149,275.87	$20,074,637.94
2023 ($12)	$592,432,863.05	$37,027,053.94	$18,513,526.97
2023 ($13)	$885,607,785.92	$55,350,486.62	$27,675,243.31
2024 ($12)	$543,831,587.91	$33,989,474.24	$16,994,737.12
2024 ($13)	$833,981,235.80	$52,123,827.23	$26,061,913.62
2025 ($13)	$782,346,397.64	$48,896,649.85	$24,448,324.93
2026 ($13)	$731,150,265.50	$45,696,891.59	$22,848,445.80

Assuming businesses absorb half of the cost of increased wages, and 75 percent of affected workers pay the new, higher taxes, the effect on state income tax collections is estimated to be:

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss
2021 ($11)	($516,086.93)
2022 ($11)	($66,613.93)
2022 ($12)	($3,893,598.78)
2023 ($12)	($2,801,699.93)
2023 ($13)	($10,275,209.23)
2024 ($12)	($1,899,876.82)
2024 ($13)	($8,277,469.02)
2025 ($13)	($6,568,455.26)
2026 ($13)	($5,104,658.70)

[4] A healthcare benefit cost estimate is not available based on the time limitations imposed by this fiscal note.

Graves Garrett LLC

4. Sales tax revenue gain or loss

Projecting any increase in sales tax revenue resulting from an increased minimum wage would require the auditor's office to conclude, based on data separate and apart from the sheer conjecture typically offered by political activist groups: (1) the net effect on consumer disposable income and (2) the percentage of a consumer's disposable income that is spent on goods subject to the sales tax, taking into consideration that the scope of Missouri's sales tax has been truncated by a voter-approved constitutional amendment from November 2016.

Typically, the Auditor's office multiplies the total increase in worker earnings (which should be adjusted for employment reductions) and multiplies the result by 25 percent, then multiplying that figure by the Missouri the population weighted combined average state and local sales tax in Missouri, 7.81%.[5] Based on this estimate, the population-weighted combined average local sales tax is 3.585%.

However, it would be deceptive to fail to account for sales tax losses from workers whose wages are eliminated or sales tax losses from reduced business profits (attributable to the higher wages paid), which will lower spending by business owners. The first figure is calculable by determining the total annual wages (adjusted for employment deductions) for all workers who lose jobs due to a minimum wage hike, multiplied by 25 percent. The second number is calculable by multiplying the total increase in worker earnings (multiplied by 1.0765 to account for Social Security and Medicare taxes) by approximately 15 percent.[6]

Year of final prescribed wage increase	Annual Net Increase in Wages Paid To Workers	New Wages Spent on Sales Tax Items	Annual Cost to Business from Increased Wage	Annual Business Income No Longer Included in Sales Tax Base (50% passed-through)
2021 ($11)	$274,827,384	$68,706,846	$412,266,214.62	($61,839,932)
2022 ($11)	$254,491,224	$63,622,806	$368,599,008.34	($55,289,851)
2022 ($12)	$359,578,648	$89,894,662	$642,388,413.94	($96,358,262)
2023 ($12)	$349,151,712	$87,287,928	$592,432,863.05	($88,864,929)

[5] http://taxfoundation.org/sites/taxfoundation.org/files/docs/LOST--2015.png.
[6] This estimate would also need to be adjusted to reflect certain employers' mandate under the Affordable Care Act to provide healthcare coverage and pay 60 percent of such coverage.

2023 ($13)	$386,667,424	$96,666,856	$885,607,785.92	($132,841,168)
2024 ($12)	$335,441,340	$83,860,335	$543,831,587.91	($81,574,738)
2024 ($13)	$395,209,880	$98,802,470	$833,981,235.75	($125,097,185)
2025 ($13)	$397,330,437	$99,332,609	$782,346,397.64	($117,351,960)
2026 ($13)	$394,306,380	$98,576,595	$731,150,265.51	($109,672,540)

Accordingly, the annual estimations of the effects on state and local revenue, and total state economic impact are as follows:

Year of final prescribed wage increase	Annual Net Income Tax Revenue Loss	Annual Net Effect on State Sales Tax	Total Annual Effect on State Tax Revenue	Total Net Loss to State Government from Taxes and Unemployment Insurance	Annual Net Effect on Local Sales Tax
2021 ($11)	($516,086.93)	$290,127.11	($225,959.82)	($17,646,028.59)	$246,178.86
2022 ($11)	($66,613.93)	$352,067.34	$285,453.41	($10,960,559.78)	$298,736.43
2022 ($12)	($3,893,598.78)	($273,087.10)	($4,166,685.88)	($27,127,603.19)	($231,720.06)
2023 ($12)	($2,801,699.93)	($66,628.31)	($2,868,328.24)	($23,205,232.64)	($56,535.50)
2023 ($13)	($10,275,209.23)	($1,528,364.68)	($11,803,573.91)	($40,437,134.18)	($1,296,849.08)
2024 ($12)	($1,899,876.82)	$96,566.47	($1,803,310.36)	($13,770,610.81)	$81,938.65
2024 ($13)	($8,277,469.02)	($1,110,951.72)	($9,388,420.74)	($30,890,662.52)	($942,665.55)
2025 ($13)	($6,136,139.31)	($761,317.55)	($6,897,456.87)	($23,480,843.55)	($645,993.71)
2026 ($13)	($5,104,658.70)	($468,803.67)	($5,573,462.37)	($18,598,808.26)	($397,789.62)

5. Damage to small business

Additionally, any proponent or opponent fiscal note submission is required, pursuant to Missouri law, to state the impact of the initiative on small businesses. According to analysis by the Employment Policies Institute, 40 percent of the minimum wage workforce is employed at businesses with fewer than 50 employees. [7] The impact on extra costs to small business may be more significant than even this 40% figure suggests. Small businesses are more easily shut down by input price increases than large businesses, which have greater access to capital to weather the

[7] https://www.epionline.org/oped/who-really-employs-minimum-wage-workers/

storm. Clearly, small businesses that do not shut down due to increases in the minimum wage will pay higher costs, estimated at about 40% of business' total increased costs, described above.

Conclusion

In conclusion, the State Auditor should attempt to quantify the increased cost to be borne by state and local government entities through increased contracting costs as a result of an increase to the minimum wage. This direct cost is outlined in Section 1.

Indirect costs are outlined in Sections 2 through 5, and show a net loss. Although such second-order effects more difficult to predict, a net loss is easily the most likely outcome. Significantly, this result is only obtainable if the Auditor reviews both the "credit" and "debit" sides of the transfer of wealth from businesses to workers. The Auditor should refrain from taking the proponents' likely invitation to consider and present only the "credit," side, and should attempt to provide a complete picture of all effects of a minimum wage increase, including the loss of revenue to state and local governments from individuals who lose employment. Only conveying (or quantifying) the potential for gain, without fairly conveying the likelihood of net loss, would be deceptive and unfair.

The State Auditor's previous 2018 fiscal notes are a good model. Each of the fiscal notes for the Initiative Petitions should follow the already-established format and state that:

> "[O]perating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $## million decrease to a $## million increase depending on business decisions."

Should you desire further detail or have any questions about this fiscal impact statement, please do not hesitate to contact me.

Sincerely,

Edward D. Greim

ABOUT THE MISSOURI RESTAURANT ASSOCIATION

With origins dating back to 1916, the Missouri Restaurant Association (MRA) is a statewide trade association representing over 1,500 member establishments. The association's membership is diverse, and includes full service, fast casual, and quick service restaurants, cafeterias, hotels, schools, institutions, contract feeders, and ancillary foodservice providers such as theme parks. The association has been successful in securing support from virtually every segment of the foodservice and hospitality industry.

MRA includes seven chapters as extensions of the parent organization, each with its own Officers, Board of Directors, and limited budget. The association is governed by a Board of Directors comprised of five Officers, 33 Directors, and each President of the seven affiliated chapters.

MRA is dedicated to serving the needs of the foodservice and hospitality industry, enhancing and improving its growth and development, assisting and educating its members in operating more effectively, improving the political and social environment in which the industry conducts business, for the benefit of its members, patrons, employees, and the well-being of the community.

David A. Macpherson is the E.M. Stevens Professor of Economics at Trinity University. He received undergraduate and doctoral degrees in economics from Pennsylvania State University.

Dr. Macpherson has published over 60 articles in leading economics and real estate journals including Review of Economics and Statistics, Industrial and Labor Relations Review, Journal of Labor Economics, Journal of Human Resources, and Journal of Real Estate Economics and Finance. His research has been funded by a variety of entities including the National Science Foundation, Florida Legislature, and the National Association of Realtors. He is co-author of the undergraduate labor economics text, Contemporary Labor Economics, as well as the principles of economics text, Economics: Private and Public Choice. He is included in Who's Who in Economics, Fourth Edition, which includes the 1,200 most frequently cited economists.

THE IMPACT OF A $10.10 MINIMUM WAGE ON JOBS AND TAXPAYER COSTS IN MISSOURI

June 2014

Economic Analysis by **Dr. David Macpherson**
Trinity University

Index

Executive Summary 4
Results 5
Technical Appendix 7

EXECUTIVE SUMMARY

Missouri's minimum wage of $7.50 is linked to rise in most years with the inflation rate. But some state legislators and labor unions would like to raise that figure even higher. For instance, a recent labor union-organized bus tour in the state promoted a $10.10 minimum wage in St. Louis.

Proponents have enthusiastically pointed to the benefits of the $10.10 policy. But there's been far less discussion of the costs involved with a $10.10-an-hour minimum wage—both the cost on employment, and the cost to taxpayers.

In this study, labor economist David Macpherson of Trinity University uses Census Bureau data to estimate the impact on Missouri's labor market and budget from raising the minimum wage to $10.10 an hour. He also provides separate results for the St. Louis metropolitan area.

Dr. Macpherson's employment estimates follow the methodology used by the nonpartisan Congressional Budget Office in its report earlier this year estimating the impact of a $10.10 minimum wage nationwide, which in turn relied on 60 different empirical studies to formulate its estimates.

Statewide, he finds that over 15,000 jobs would be lost at the $10.10 wage level—with 9,300 of those jobs being held by women. In the St. Louis metropolitan area, approximately 4,800 jobs would be lost from a $10.10 minimum wage.

The cost to taxpayers would be significant: There are approximately 40,000 state and local employees whose wages would be affected by the $10.10 increase in Missouri, for a combined cost to taxpayers of $87 million annually.

Raising wages is an admirable goal, but the evidence suggests that accomplishing this goal with a blunt wage mandate could do more harm than good.

RESULTS

The minimum wage is one of the most hotly-debated topics in the political world. Some legislators claim that a higher base wage will stimulate the economy; others claim that it will reduce jobs when affected employers can't offset the higher costs through higher prices.

Economists, who have studied the issue since the late 1940s, tend to take a skeptical view of minimum wage increases. Since the early 1990s, for instance, roughly 85 percent of the most credible research on the minimum wage points to job loss for less-skilled groups. The nonpartisan Congressional Budget Office (CBO), in an evaluation of President Obama's proposed $10.10 minimum wage increase, reviewed 60 different studies and concluded that the policy would eliminate 500,000 jobs if enacted.

The estimates that follow, of the employment impact of a higher minimum wage on Missouri's labor market, were performed by Dr. David Macpherson of Trinity University. Dr. Macpherson followed closely the methodology used by the CBO in its 2014 report. Dr. Macpherson also estimates the taxpayer costs of a higher minimum wage, as many state and local public employees will see their earnings increase when the minimum wage rises.

Dr. Macpherson's methodology is presented in detail in a technical appendix.

Estimated Employment Effects of a $10.10 Minimum Wage in Missouri

Statewide, Dr. Macpherson finds that increasing the minimum wage to $10.10 would eliminate over 15,000 jobs—approximately 60 percent of which are jobs held by women. The bulk of the job losses would be concentrated among individuals with a high school degree or less, and among people who work in the retail or leisure & hospitality industries.

(Note: Totals have slight discrepancies due to rounding.)

City-Specific Minimum Wage Employment Impacts

The city of St. Louis has been the subject of a number of protests calling for a higher minimum wage. Dr. Macpherson analyzed the employment impact of a $10.10 minimum wage in the St. Louis metropolitan area, providing breakouts by gender and education where the data permits. He estimates that the wage hike would eliminate approximately 5,000 jobs—just over half of which would be jobs held by women.

Impact on St. Louis Metro Area of a $10.10 Minimum Wage

RESULTS CONTINUED

Missouri Taxpayer Costs of a $10.10 Minimum Wage

Dr. Macpherson estimates that approximately forty thousand state & local public employees would be affected by a minimum wage increase to $10.10 an hour. These additional wage costs translate to new costs for state and local taxpayers. Following the methodology described in detail in the technical appendix, Dr. Macpherson estimates both the straight wage cost of a $10.10 minimum wage, as well as the total compensation cost with Social Security, Medicare, workers compensation, and unemployment insurance included. Statewide, taxpayers would shoulder an additional $87 million in costs if the base wage was increased to $10.10 an hour and public employees were covered by the new wage.

Missouri Taxpayer Costs of a $10.10 Minimum Wage	
# of State & Local Workers	304,588
# Affected By $10.10 MW	40,103
Annual Wage Cost	$79,629,374
Annual Compensation Cost	$87,004,355

Note: Annual compensation costs include the cost of worker's compensation, FICA, and unemployment insurance benefits.

TECHNICAL APPENDIX

Estimating Employment Loss and the Cost to State and Local Government of an Increase in the Minimum Wage

Dr. David Macpherson
E.M. Stevens Professor of Economics
Trinity University

This paper describes how we estimate the employment loss and the cost to state and local governments of a proposed increase in the minimum wage effective on January 1, 2015.

Data and Sample

First, we use data from the Current Population Survey (CPS) Outgoing Rotation Groups (ORG) from January 2011 through December 2013. For each worker in the sample, we calculate their wage rate. We also adjust the wage rate to reflect a forecast of wages in 2015. This is done in two steps. First, based on legislation enacted as of April 2014, we estimate the minimum wage that would be in effect in January 2015 for each state and city that we consider. If a state or city has an indexed minimum wage, we increase the January 2014 state or city minimum wage by the Congressional Budget Office (CBO) inflation forecast for 2014 of 1.7%.

Since we use data from 2011 through 2013, we also follow the CBO approach for forecasting what the wage distribution would be in 2015. This is done in two steps. First, we adjust wages observed prior to 2013 to reflect 2013 minimum wage legislation. For example, if the minimum wage in a state was $7.25 in 2011 and grew to $8.00 by 2013, anyone who earned between $7.25 and $8.00 in 2011 would have their wage increased to $8.00. After wages are adjusted to 2013 levels, we assume that all wages grow by 2.9% in 2014. Using the resulting 2015 distribution of wages, we adjust for minimum wage legislation that would increase the minimum between 2013 and 2015. Anyone earning a wage between the 2013 and 2015 minimum wage is assigned a wage matching the 2015 minimum wage.

After generating the forecast 2015 distribution of wages reflecting wage growth and existing minimum wage legislation, we identify workers who would be affected by additional changes to the 2015 minimum wage as those with wages between the predicted minimum wage legislated for 2015 (or up to $.25 below it) and the proposed minimum.

To estimate the number of affected workers, we take two steps. First, for each state, we estimate the number of affected workers for 2013. Second, we adjust the weights in the 2011 and 2012 data so that the state-specific number of affected workers implied by the 2011 and 2012 data matches that for 2013. This adjustment is designed to correct for the changing economic climate as the economy recovers from the great recession and to generate estimates that are as close as possible to the most recent data (2013). After we adjust the 2011 and 2012 weights, we estimate the number of affected workers by summing their earnings weights and dividing the total by 36 (the number of months of data).

[1] Also, following CBO, anyone earning up to $.25 less than the 2011 minimum wage would have their wage increased by the amount that the minimum wage increased (i.e. a $7.00 wage would be increased to $7.75 in this example). This approach is used to adjust for the fact that many workers round their answers when asked about their wage.

TECHINCAL APPENDIX CONTINUED

Employment Loss

To estimate employment loss, for each affected worker we compute:

L = e *(Proposed Min Wage /Min Wage 2015 – 1)

where e is an assumed elasticity of employment with respect to changes in the minimum wage, Min Wage 2015 is the minimum wage currently legislated for 2015, and Proposed Min Wage is the minimum wage that is being proposed for 2015. Thus, for example, if a worker is projected to earn the federal minimum of $7.25 in 2015, the expected reduction in employment resulting from a $10.10 minimum wage in 2015 if e=.45 is .45*(10.10/7.25 – 1) = .18. That is, for every 100 workers currently earning the federal minimum, the expectation is that 18 would lose a job if the minimum wage elasticity is .45.

To estimate the aggregate employment loss in the economy, we use earnings weights to sum L across workers. We also follow the Congressional Budget Office (2014) and use an elasticity of 0.15 for non-teenagers and 0.45 for teenagers.

Cost to State and Local Government

We use the same data to estimate the cost to state and local government of a proposed minimum wage hike. We apply the same definition of affected workers described above and estimate the number of state and local government workers affected by a minimum wage hike. We do not, however, assume that there is any job loss for state and local workers as we do not have an appropriate elasticity estimate specific to state and local workers. To the extent that state or local governments reduce hours or employment in response tothe minimum wage hike, our estimate of the cost of the hike would be overstated.

To estimate the increase in annual payroll cost resulting from an increase in the minimum wage, we estimate the increase in annual cost for each worker as:

(Proposed Min Wage-Min Wage 2015)*weekly hours*52

We then multiply the increase in annual cost by the earnings weight for each worker and sum across workers. Since an increase in wages also requires increased employer contributions for Social Security, Medicare, workers' compensation and unemployment insurance, we apply an estimate of the payroll tax rate for these mandatory programs to calculate the additional cost for these programs.

For each state and city considered, we provide tables summarizing the number of affected workers, employment loss, and the distribution of employment loss by sex, education, race, age and industry. Given that we use three years of data, a rule of thumb for minimum sample size required to achieve a reasonably accurate estimate of the employment loss is to require at least 30,000 people be in the relevant category. For example, if there are fewer than 30,000 people projected to be in a particular industry category, the Bureau of Labor Statistics would not report the estimate due to a lack of reliability based on the variance of the estimate relative to its mean.

In addition to the estimate of employment loss, for each state or city considered, we estimate the number of state and local workers that would be affected by the minimum wage hike and the total annual cost to government in terms of wages and total compensation. As with the employment estimates, we advise caution in interpreting estimates that are based on fewer than 30,000 affected workers.

[3] Congressional Budget Office, "The Effects of a Minimum-Wage Increase on Employment and Family Income," February 2014.

[4] For workers paid by the hour the reported hourly wage was used. For workers who are not paid by the hour, we calculate the hourly wage by dividing usual weekly earnings by usual weekly hours. Overtime pay was calculated as time and one-half for hours above 40 hours for hourly workers.

[5] The assumed payroll tax for Medicare and Social Security is 7.65 percent. To estimate the payroll tax for workers' compensation and unemployment insurance, we use unpublished data from the 2010 Employer Cost of Employee Compensation database for state and local workers in the relevant region in 2010.

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

Prepared for

Victor Allred versus Robin Carnahan and Thomas Schweich
Circuit Court of Cole County, Missouri

FISCAL ANALYSIS
OF
PROPOSED STATUTORY INITIATIVE PETITIONS 2012-084 AND 2012-085

I. Introduction

This report was undertaken at the request of counsel representing plaintiffs in the case of Victor Allred versus Robin Carnahan and Thomas Schweich. As part of the basis of the lawsuit, the plaintiffs allege that the fiscal note summaries for proposed statutory initiative petitions 2012-084 and 2012-085 are insufficient and unfair. I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will

range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

The report is organized as follows. My qualifications to prepare this report are contained in Section II. Section III describes the data and records I relied upon for this report. Section IV reviews the estimated fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085. A summary and my conclusions are provided in Section VI.

II. Qualifications

I am currently the E.M. Stevens Professor of Economics at Trinity University in San Antonio, Texas. Previously, I was employed by Florida State University as Director of the Pepper Institute on Aging and Public Policy and the Rod and Hope Brim Eminent Scholar in Economics. I have taught both undergraduate and graduate Econometrics (statistical analysis of economic data), and Labor Economics. I have published over 50 articles in peer-reviewed professional journals.

I am currently serving on the editorial board of the *Journal of Forensic Economics*, which is a peer-reviewed journal. I have also served as a reviewer or 'referee' for 24 peer-reviewed journals, including the *Journal of Human Resources, Journal of Labor Economics, Quarterly Journal of Economics,* and the *Review of Economics and Statistics*. Based upon these experiences, I am very familiar with the scholarly and professional research process and the concept of peer review.

I have prepared numerous analyses and reports that use statistical methods as applied to specific questions. I have been responsible for developing the techniques and approaches required for these analyses. I routinely use computers and statistical software packages to assist me in my analytical work. I have been qualified as an expert witness on statistical analysis of employment discrimination and economic damages in state courts in Florida and Georgia and Federal Courts, and I have given expert testimony. I have prepared analyses and offered testimony on behalf of both plaintiffs and defendants.

Details of my qualifications are reflected in my current resume and legal cases, attached as Appendix A to the report.

III. Data and Records

I reviewed the following materials in preparing this report.

- Plaintiff's Complaint
- Material cited in footnotes below.

IV. Fiscal Impact

A. Overview

The proposed statutory initiative petitions 2012-084 and 2012-085 contain many elements in common. Both initiatives would increase the Missouri minimum wage to $8.25 per hour, alter the exemption for retail and service firms, raise the cash wage of tipped workers from 50% to 60% of the minimum wage, and increase the statute of limitation from two to three year for underpayment claims.

The initiatives differ in their linkage to the federal minimum wage. Initiative petition 2012-084 requires that the state minimum wage be automatically increased to the

federal minimum wage if it is higher than the state minimum wage. Initiative petition 2012-085 does not have such a linkage. It only requires that workers be paid the higher of the state minimum wage or the federal minimum wage. The linkage to the federal minimum wage will cause the state minimum wage to be higher under initiative petition 2012-084 over time. This is because the state minimum wage, in contrast to the federal minimum wage, is adjusted for inflation as measured by the Consumer Price Index.

An increase in the minimum wage in Missouri will affect state and local government entities in two ways. First, it will directly increase the cost of labor to state and local government entities. This will occur due to the increase in wages of state and local government workers earning between the existing minimum wage of $7.25 and the new minimum wage of $8.25.[1] In addition, workers laid off due to the minimum wage increase can collect unemployment benefits. The state government will bear the cost of unemployment benefits of these workers for the first 20 weeks. Second, state and local government may gain increased revenue through higher income tax and sales taxes paid by workers affected by the minimum wage who remain employed. However, state and local government will suffer reduced tax revenue to the extent the higher wage cost lowers profits of businesses.

The following sections estimate the cost and revenue effects to state and local government entities of the proposed minimum wage increase.

[1] Information about the minimum wage in Missouri is available at http://www.labor.mo.gov/DLS/minimumwage/.

B. Direct Labor Cost Impact on State and Local Government Budgets

There are two possible ways to measure the direct labor cost on state and local government budgets. First, one can use the information included in the fiscal notes prepared by the State Auditor regarding the proposed initiatives. It is important to note that the fiscal notes provide an incomplete and thus too low estimate of the direct labor cost. The fiscal notes indicate that the Office of Administration's (OA) Division of Personnel reported that as of September 2011 there were 834 state workers who would be affected by an increase of the minimum wage to $8.25 and the "approximate annual cost" would be more than $540,000.

This OA estimate excludes seasonal workers such as State Fair employees, State Parks Employees, and tax season staff. The Division of Revenue noted its labor cost would rise by $40,000. The Division of Natural Resources stated they have over 500 workers who would be affected by the increase, but did not provide an estimate of the cost. The State Fair hired 745 workers that would be affected, but no cost estimate was provided.

Thus, the cost to state government, based on the fiscal notes, would be more than $580,000.

The fiscal notes also provide an incomplete and thus too low measure of the cost to local government and public educational institutions. Many cities and educational institutions did not respond to Office of Auditor's survey or provide an estimate of the cost of the higher minimum wage. The City of Columbia, City of Jefferson, City of

Joseph, Linn State Technical College, and Metropolitan Community College did provide such an estimate. The total cost to these five institutions is $772,182.

Based on the fiscal notes, the cost to state and local government entities of the increase in the minimum wage to $8.25 will be more than $1,352,182.

Second, data from the U.S. Census Bureau's Current Population Survey (CPS) can also be used to calculate the cost of the increased labor cost to state and local government entities in Missouri. Using the data from January 2010 to December 2011 Outgoing Rotation Group (ORG) CPS, I calculated that 17,089 state and local government workers would be affected by the minimum wage increase. I defined affected workers as those individuals earning between $7.00 and $8.24 per hour. Though the minimum wage was $7.25 per hour during this period, I also included those workers reporting earnings of $7.00 to $7.24 since some individuals may round their wage rate. I calculated the annual wage cost for each state and local government worker (i) in the ORG CPS as:

$$Annual\ Wage\ Cost_i = (\$8.25 - current\ wage_i) * weekly\ hours_i * 52.$$[2]

The average annual wage cost increase was $870. I summed the cost over each worker (i) to obtain the total wage cost to state and local government entities in Missouri of $14,866,430.

The increased wage cost is not the only labor cost to state and local government entities of the minimum wage increase. Employers are required to pay 7.65% of their wage costs in Social Security and Medicare taxes. Thus, the total labor cost of the minimum wage increase will be 1.0765 times $14,866,430 or $16,003,712.

---

[2] I assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour.

C. Unemployment Benefit Impact

The higher minimum wage will cause firms to reduce their level of employment.[3] As a result, the number of unemployed workers will increase. Thus, another important fiscal cost of the minimum wage increase is the cost of the unemployment insurance benefits for the workers laid off as a result of the minimum wage increase.

To calculate the cost to the unemployment benefits program, I first calculated the number of workers laid off. To do so, I calculated a probability of job loss for each affected Missouri worker (i) in the January 2010 to December 2011 ORG CPS:

$$Probability\ Job\ Loss_{\ i} = \frac{(\$8.25 - Current\ Wage_i)}{Current\ Wage_i} * elasticity_i.$$

I used the preferred employment elasticity (i.e., sensitivity of employment to wage changes) contained in Sabia and Burkhauser (2010), which was -0.6 for individuals aged 16 to 29 without a high school degree and -0.2 for all other individuals. The sole exception was for state and local government workers, where I assumed an elasticity of zero.[4] The sum across all affected workers yielded an estimated job loss of 5,745 jobs.

The next step was to calculate the weekly benefit for the average unemployed worker. Using the benefits calculator on the Missouri unemployment benefits web site and the wage income of average private-sector affected worker ($10,937), yields an average weekly benefit of $109.36[5]. The state of Missouri pays the first 20 weeks of benefits.[6] Thus, each eligible unemployed worker could receive a total of $2,187.20 in

---

[3] For a survey of research regarding the effect of the minimum wage on employment, see David Neumark and William L. Wascher, *Minimum Wages* (Cambridge, MA: MIT Press, 2008).
[4] Joseph J. Sabia and Richard V. Burkhauser, "Minimum Wages and Poverty: Will a $9.50 Federal Minimum Wage Really Help the Working Poor?" *Southern Economic Journal* (January 2010): 592-623.
[5] http://www.labor.mo.gov/DES/Claims/calculator.asp
[6] See http://www.labor.mo.gov/DES/Claims/

benefits paid for by the state of Missouri. These jobs are permanently eliminated and so it is appropriate to calculate the full amount of benefits for each worker.

Unemployment insurance, however, does not cover all unemployed workers. For example, it does not cover people who leave a job voluntarily, people looking for their first job, and re-entrants who previously left the labor force voluntarily. Furthermore, some individuals don't apply for benefits even though they are eligible. I assume that 35% of the unemployed workers will receive unemployment benefits based on analysis by Wenger (2001).[7]

The last step is to calculate the total cost to the Missouri unemployment benefits program. This done by multiplying the number of jobs lost (5,745) times the average benefit amount ($2,187.20) times the percent of unemployed individuals collecting benefits (35%). This calculation yields a figure of $4,397,510. This cost would be borne only during the first year of the minimum wage increase. The inflation adjustments in the minimum wage will also yield costs to the unemployment insurance program, but it is not possible to estimate the amount.

D. Impact on State Income Tax Revenue

The state of Missouri will gain increased revenue through higher income tax taxes paid by workers affected by the minimum wage who remain employed. However, it will

[7] Jeffery Wenger. "Divided We Fall: Deserving Workers Slip through America's Patchwork Unemployment Insurance System." *Economic Policy Institute*, 2001. Sabia and Burkhauser (2010) make the same assumption in their calculation of the amount of unemployment benefits generated by a minimum wage increase.

suffer reduced corporate income tax revenue to the extent the higher wage cost lowers profits of businesses.

To calculate the impact on individual income tax revenue, I again used data from January 2010 to December 2011 ORG CPS. I defined affected workers as those Missouri individuals earning between $7.00 and $8.24 per hour.[8] I used the following formula to estimate the change in income tax revenue:

$$\Delta Tax\ Revenue_i = (Tax_After_i - Tax_Before_i) - Prob_Job_Loss_i * Tax_Before_i,$$

where Tax_After_i is the income tax paid by worker i after the minimum wage increase. Tax_Before_i is the income tax paid by worker i after the minimum wage increase, and $Prob_Job_Loss_i$ is the probability of job loss for worker i. The first term shows the change in individual income tax revenue assuming no job loss and the second term shows the loss in tax revenue due to the employment loss caused by the minimum wage increase.

The income tax calculations were based on two assumptions.[9] First, the 50% percent of affected workers who were under the age 25 who were assumed to be dependents on another person's tax return. As a result, it was assumed that the affected workers' earnings were taxable at the maximum Missouri income tax rate of 6% both and after the minimum wage increase.[10] Second, all persons age 25 and older were assumed to be paying little or no income tax after exemptions and deductions. Thus, about 50% of the earnings increase will be taxed at a rate of 6%.

---

[8] I again assume that persons reporting an hourly wage rate between $7.00 and $7.24 are actually earning $7.25 per hour. The annual earnings level was calculated as the worker's wage rate times usual weekly hours worked times 52.

[9] The same assumptions are used in the State Auditor's fiscal notes for the initiatives.

[10] This assumption will overstate the revenue increase as 20% of affected workers under the age 25 are living by themselves and some of these individuals will not be a dependent on another person's tax return.

The tax calculations reveal an increase in income tax revenue increase to the state. Assuming no workers were laid off by the minimum wage increase, income tax revenue would rise by $6,043,534. However, the state will lose $1,965,446 in income tax revenue due to the lost earnings of private-sector workers no longer employed due to the minimum wage hike.[11] Thus, the net increase in individual income tax revenue is $4,078,088.

Businesses have three options to respond to the higher labor costs of a higher minimum wage. They can reduce their profits, raise prices, or lay off workers. Based on the 2010-2011 ORG CPS data, the minimum wage increase will raise private-sector labor costs by $192,620,900 if employment levels are not reduced. However, labor costs will be lowered by $55,240,790 due to the reduction in employment. Thus, labor costs will, on net, rise by $137,380,110. These increased labor costs may be either passed on to consumers through higher prices or reduced profits or more likely some combination of higher prices and reduced profits. Assuming that businesses absorbed all of the higher costs through reduced profits, the corporate income tax revenue would fall by the Missouri corporate income tax of 6.25% times the rise in labor costs of $137,380,110 * 1.0765 (to account for employer-paid Social Security and Medicare taxes) or $9,243,106.[12] Alternatively, if half of the higher labor costs were passed on to consumers, then corporate income tax revenue would fall by $4,621,553.

[11] The probability of job loss was calculated in the same manner as in the prior section.
[12] The corporate income tax for Missouri is available at: http://dor.mo.gov/business/corporate/

E. Impact on State and Local Sales Tax Revenue

To calculate the impact on state and local sales tax revenue the following approach was undertaken.[13] First, the total increase in worker earnings, adjusted for employment reductions, was calculated using the 2010-2011 ORG CPS. This figure was $152,246,540. Second, the increase in Missouri taxable sales was calculated as 25% of the earnings increase or $38,061,635. Third, the increase in sales tax revenue was calculated by multiplying the taxable sales change times the average state and local rate of 7.67% or $2,919,327.[14]

The higher minimum wage may decrease sales tax revenue to the extent that it reduces business profits, which will lower spending by business owners.

VI. Summary and Conclusions

I was asked by counsel to evaluate the fiscal impact of proposed statutory initiative petitions 2012-084 and 2012-085.

The results of my analysis indicate:

(1) labor costs to state and local government entities, based on state auditor fiscal notes, will rise by more than $1,352,182. A more inclusive estimate indicates that state and local government labor costs will increase by $16,003,712;

[13] The same general approach is used in the State Auditor's fiscal notes for the initiatives.
[14] The average rate comes from http://taxfoundation.org/news/show/27023.html

(2) unemployment benefit costs will rise by $4,397,510 during the first year of the minimum wage increase;

(3) individual income tax revenue will rise by at most $4,078,088;

(4) the loss in corporate income tax revenue could be as high as $9,243,105;

(5) state and local sales tax revenue will rise by at most $2,919,327;

(6) during the first year: state and local governments will incur increased costs of $20,401,222; the change in state and local government revenue will range from -$2,245,690 to +$6,997,415; and the net state and local government fiscal impact will range from -$22,646,912 to -$13,403,807.

"Gender-Related Differences in Pension Coverage," with William Even, in *Women and Work: A Handbook*, Garland Publishing, New York, NY, 1996.

"The Pension Coverage of Young and Mature Workers", with William Even, in *Pension Coverage Issues for the '90s*, eds. Richard Hinz, John Turner, and Phyllis Fernandez, U.S. Government Printing Office, Washington, D.C, 1994.

Working Papers (Economics)

"Deferred Compensation vs. Efficiency Wages: An Experimental Test of Effort Provision and
Self-Selection," with Tim Salmon and Kislaya Prasad, under review, *Journal of Business and Economic Organization*

"What Do Unions Do to Pension Performance?" with William Even, September 2011, under revision

"Teacher Salaries, State Collective Bargaining Laws, and Union Coverage" March 2011, with Barry Hirsch and John Winters.

"The Effects of the 2007-2009 Federal Minimum Wage Increases on Teen Employment," with William Even, under revision, July 2010.

"Participant Direction in Defined Contribution Plans," April 2006, with William Even, under revision.

"Do Pensions Impede Phased Retirement?" September 2004, with William Even, under revision.

Working Papers (Real Estate and Insurance)

"An Empirical Analysis of Socio-Demographic Factors and the Mispricing of Homeowners Insurance in Florida," under review *Journal of Financial Services Research*, with Ronald Cheung, Charles Nyce, Kathleen McCullough, and Cassandra Cole.

"The Impact of No-Fault Legislation on Automobile Insurance Premiums," revised and resubmitted to *North American Actuarial Journal*, with Cassandra Cole, Kevin Eastman, Patrick Maroney, and Kathleen McCullough.

Funded Projects

Employment Policies Institute, 5/2010-7/2010, $16,500 (Trinity University portion), "Employment Effects of the 2007-2009 Federal Minimum Wage Increases," with William Even.

National Science Foundation, 9/2009-8/2012, $125,866 (Trinity University portion), "Incentives in the Workplace: An Experimental Examination of How Wage Differences Across Time and Among Peers Affect Productivity and Self-Selection," with Tim Salmon, Kislaya Prasad, and Hyejin Ku.

Florida Legislature, 10/2007-6/2009, $175,000, "Child Support Guidelines," with Stefan Norrbin and Thomas McCaleb.

Florida Legislature (through University of Florida), 12/2006-9/2007, $223,000, "Analysis of Save our Homes Amendment," with Dean Gatzlaff.

U.S. Administration on Aging (through University of South Florida), 5/2005-9/2007, $175,000, "Employment in the Long-Term Care Industry: The Importance of Recruitment and Retention," with William Even.

Florida Legislature, 2/2003-8/2004, $175,000, "Child Support Guidelines," with Stefan Norrbin and Thomas McCaleb.

Florida Department of Environmental Protection, 6/2002-2/2003, $94,157, "Affordability Index," with Stefan Norrbin and William Serow.

University of South Carolina, 4/2000-11/2000, $10,000, "Minority Homeownership in South Carolina," with Stacy Sirmans.

Florida Department of Business and Professional Regulation, 3/1999-6/1999, $21,739, "Forecasting Housing Demand in Florida," with Stacy Sirmans.

University of South Carolina, 4/1999-11/1999, $10,000, "Forecasting Housing Demand in South Carolina," with Stacy Sirmans.

Florida State University, 6/1999-8/1999, $7,500, "Support for Preparing ECO 2000 as a Web-Based Course."

TIAA-CREF, 8/1998-8/1999, $23,000, "Determinants of Savings in Supplemental Pension Plans: A Case Study of Pension Choices in Higher Education," with Melissa Hardy and Larry Hazelrigg.

Florida Department of Business and Professional Regulation, 4/1998-6/1998, $16,638, "Forecasting Seniors' Demand for Housing in Florida," with Stacy Sirmans.

Florida Department of Business and Professional Regulation, 12/1997-6/1998, $18,472, "Housing Price Appreciation in Orlando and Tampa," with Stacy Sirmans.

Florida State University, 6/1998-8/1998, $7,500, "Support for Preparing ECO 2000 as a Web-Assisted Course."

Florida Department of Business and Professional Regulation, 3/1997-6/1997, $17,898, "Minority Homeownership in Florida," with Stacy Sirmans.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 12/1996-8/1997, $20,000, "The Impact of Rising 401(k) Pension Coverage on Retirement Income," with William Even.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 3/1996-6/1997, $15,000, "The Determinants of 401(k) Participation and Contribution Levels," with William Even.

Florida Department of Business and Professional Regulation, 4/1996-6/1996, $22,702, "Forecasting the Number of New Florida Real Estate Licensees," with Stacy Sirmans.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 3/1995-6/1996, $15,000, "Explaining the Decline in Pension Coverage of Less Educated Workers," with William Even.

Florida State University COFRS Grant, 6/1994-8/1994, $8,000, "The Relative Compensation and Quality of Public and Private Sector Workers."

W.E. Upjohn Institute for Employment Research, 3/1994-12/1995, $35,000, "Pensions and Productivity," with Stuart Dorsey and Christopher Cornwell.

Florida Division of Workers' Compensation, 1/94-12/1995, $100,000, "Worker's Compensation Recipency in Union and Nonunion Workplaces," part of a service contract titled "Research Partnership with the Division of Workers' Compensation," co-investigator (one of several).

University of Wisconsin Institute for Research on Poverty Small Grant Program, 7/1993-6/1994, $15,000, "Racial Composition, Wages, and Quality Sorting," with Barry Hirsch.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 7/1993-6/1993, $10,000, "Trends in Individual and Family Pension Coverage," with William Even.

U.S. Department of Labor, Pension Welfare and Benefit Administration, 6/1992-5/1993, $10,000, "The Pension Coverage of Young and Mature Workers," with William Even.

Miami University Faculty Research Grant, 6/1991-8/1991, $4,000, "Projected Growth in Retiree Health Insurance Liabilities."

Ohio Board of Regents Research Challenge Grant, 1/1990-12/1990, $4,980, "Proposal to Enhance the Data Library of the Center of Pension and Retirement Research," with William Even and Samuel Williamson.

Miami University Faculty Research Grant, 6/1990-8/1990, $4,000, "The Role of Firm Size in Pension Coverage and Options."

Miami University Faculty Research Grant, 6/1989-8/1989, $4,000, "Declining Unionism and the Gender Wage Gap," with William Even.

Participation in National Meetings

Panel Discussant, American Real Estate and Urban Economics Association/ASSA meetings, January 2008.

Presented, "Employee Turnover in the Long-Term Care Industry," at Academy Health Annual Research Meetings, June 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at International Atlantic Economic Society meetings, October 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at International Atlantic Economic Society meetings, October 2005.

Presented, "Replacing Earnings After Termination: Evidence from the Displaced Worker Survey," at the Allied Social Science Association/National Association of Forensic Economics, January 2002.

Presented, "Labor Market Transitions of Older Workers," at the Allied Social Science Association/Society of Government Economists meetings, January 1999.

Presented, "Why has the Loss in Pension Coverage Accelerated Among Less Educated Workers?" at the American Economic Association Meetings, 1995.

Presented, "Wages and Gender Composition: Why Do Women's Jobs Pay Less?" at the American Economic Association Meetings, 1994, with Barry Hirsch.

Presented, "Pensions, Labor Turnover, and Employer Size" at the American Economic Association Meetings, 1993, with William Even.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the American Economic Association meetings, 1992, with William Even.

Participation in Regional Meetings

Presented "Unions and Pension Performance: The Role of Pension Design," at Southern Economics Association meetings, November 2009.

Panel member, "Recent Federal Reserve Policy: An Evaluation" at Southern Economics Association meetings, November 2009.

Discussant, "Topics in Health Economics," at Southern Economics Association meetings, November 2009.

Discussant, "Teacher Pay, Principals, and Schooling," at Southern Economics Association meetings, November 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Western Economic Association meetings, July 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Eastern Economic Association meetings, February 2009.

Panel Discussant at the Southern Economic Association meetings, November 2008.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Southern Economic Association meetings, November 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Western Economic Association meetings, July 2008.

Chair "Pensions and Retirement" Session at Southern Economic Association meetings, November 2007.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Southern Economic Association meetings, November 2007.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Southern Economic Association meetings, November 2006.

Panel Discussant, Southern Economic Association meetings, November 2005.

Presented, "Do Pensions Impede Phased Retirement?" at the Southern Economic Association meetings, November 2004.

Presented, "When Will the Gender Gap in Retirement Income Narrow?" at the Southern Economic Association meetings, November 2003.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Southern Economic Association meetings, November 2002.

Presented, "Racial Composition, Wages, and Quality Sorting," at the Southern Economic Association meetings, November 1999.

Presented, "Racial and Ethnic Differences in Pension Coverage and Benefit Levels," at the Southern Economic Association meetings, November 1998.

Presented, "Factors Influencing Participation and Contribution Levels in 401(k) Plans," at the Western Economics Association meetings, July 1998.

Presented, "Aging at Work: Employment Determination, Firm Strategies, and Public Policy in the United States," at the Western Economic Association meetings, July 1994.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Western Economic Association meetings, July 1992.

Presented "Plant Size and the Decline of Unionism," at the Southern Economic Association meetings, 1989, with William Even.

Panel Discussant, Southern Economic Association meetings, November 1989.

Presented "The Labor Force Participation and Earnings Profiles of Married Female Immigrants," at the Southern Economic Association meetings, November 1988.

Presented "Pensions, Screening, and the Gender Wage Gap," at the Southern Economic Association meetings, November 1988.

Session Chair and Panel Discussant at the Southern Economic Association meetings, November 1988.

Participation in Invited Seminars, Conferences, and other Presentations

Presented, "Teaching Macroeconomics During Troubled Times," at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2012.

Presented, "Participant Direction in Defined Contribution Pension Plans," at Pennsylvania State University, April 2010.

Presented, "The Parallels Between the Japanese Economic Crisis of the 1990s and the US Today" at Creative Ideas for Your Basic Economics Course Conference at Florida State University, February 2010.

Chair "Minimum Wage & EITC" Session at Society of Labor Economists meetings, May 2009.

Presented "Participant Direction in Defined Contribution Plans," at Lehigh University, April 2009.

Presented "Is Bigger Still Better?: The Decline of the Wage Premium at Large Firms," at Association of Private Enterprise Education meetings, April 2009.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Trinity University, October 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Georgia State University, April 2008.

Presented "The Growth of Participant Direction in Defined Contribution Pensions," at Association of Private Enterprise Education meetings, April 2008.
Presented, "Improving Pension Coverage at Small Firms," at Hudson Institute, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Society of Labor Economics meetings, May 2006.

Presented, "Participant Direction in Defined Contribution Plans," at Association of Private Enterprise Education meetings, April 2006.

Presented, "Participant Direction in Defined Contribution Plans," at University of Wisconsin-Milwaukee, April 2006.

Invited Panel Participant for Pepper Foundation and Center Symposium on pension reform, Washington, DC, February 2006.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at West Virginia University, April 2005.

Presented, "The Risk and Return of Pension Investments in Employer Stock," at the University of Kentucky, November 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the Federal Reserve Bank of Atlanta, April 2004.

Presented, "The Causes and Consequences of Company Stock Holdings in Pension Funds," at the University of Oklahoma, February 2004.

Presented, "Tracking Union and Nonunion Wages in the U.S.: Can the Evidence be Reconciled?" at the Middlebury Annual Conference on Economic Issues, April 2002.

Presented, "How Will the Growth of DC and 401(k) Plans Affect Pension Income?" at the Miami University Center for Pension and Retirement Research Conference, June 2001.

Presented, "Benefits and Worker Productivity," Benefits for the Workplace of Tomorrow Conference, Wharton School, University of Pennsylvania, May 2001.

Participant, Innovations in Managing the Financial Risks of Retirement Conference, Wharton School, University of Pennsylvania, May 2000.

Presented "Using Hi-Tech in Large Lectures," at Association of Private Enterprise Education meetings, April 2000.

Presented "Employee Participation in 401(k) Plans," at University of Wisconsin-Milwaukee, October 1999.

Presented "Gender, Race, and Ethnicity in the Labor Market," as part of the Smith Chair course in Labor Economics at Brigham Young University, September 1999.

Presented, "The Decline in Pension Coverage Among Less Educated Workers," at the Florida State University Economics Department Seminar Series, 1996.

Presented, "Children's Effects on Women's Labor Market Attachment and Earnings" at the Conference on the Changes in Working Time in Canada and the United States, Canadian Employment Research Forum, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Ohio State University Economics Department Seminar Series, 1996.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" at the Florida State University Economics Department Seminar Series, 1995.

Presented, "Employer Size and Labor Turnover: The Role of Pensions," at Syracuse University, 1995.

Presented, "Earnings, Rents, and Competition in the Airline Labor Market" while visiting scholar at the Federal Reserve Bank of Cleveland, 1995.

Presented, "Trends in Individual and Household Pension Coverage," at the Miami University Center for Pension and Retirement Research Conference, 1994.

Presented, "Racial Composition, Quality Sorting, and the Black-White Wage Gap" at the University of Wisconsin, Institute for Research on Poverty, Small Grants Workshop, 1993, with Barry Hirsch.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Florida State University Economics Department Seminar Series, 1992.

Participant at National Bureau of Economic Research (NBER) Labor Studies meetings of the Summer Institute, 1992.

Presented, "Why Did Male Pension Coverage Decline in the 1980s?" at the Miami University Conference on Current Pension Policy Issues, 1992.

Organizer and participant at conference on "Contemporary Issues in Pension Economics," hosted by the Center for Pension and Retirement Research, Miami University, 1990.

Presented "The Effect of International Competition on Union and Nonunion Wages," at the University of Cincinnati Seminar Series, 1987.

Bulletin of Economic Research, Canadian Journal of Economics, Contemporary Economic Policy, Eastern Economics Journal, Economic Development and Cultural Change, Economic Inquiry, Industrial Relations, Industrial and Labor Relations Review, International Economic Review, Journal of Economics and Business, Journal of Human Resources, Journal of Labor Economics, Journal of Labor Research, Journal of Pension Economics and Finance, Labour Economics, Mid-American Journal of Business, Policy Studies Review, Quarterly Journal of Economics, Quarterly Review of Economics and Finance, Real Estate Economics, Review *of Economics and Statistics, Social Science Quarterly, Southern Economic Journal*

Outside reviewer for Department of Economics, UNC-Greensboro, Georgia State University.

Promotion and tenure letters for candidates at Georgia State University, Kansas State University, Monmouth University, Ohio State University, University of Massachusetts, University of Southern California, and University of Wisconsin-Milwaukee.

Honors and Awards

Awarded sabbatical, Trinity, Fall 2011.

Nominated for FSU Award for Excellence in Undergraduate Teaching, Spring 2005.

Named Rod and Hope Brim Eminent Scholar in Economics, FSU, Fall 2004.

Research Fellow, Institute for the Study of Labor (IZA), Bonn, 2004-.

Who's Who in Economics, Fourth Edition, Mark Blaug and Howard Vane (eds), Edward Elgar Publishing, 2003, pp. 524 (selection criteria: one of the 1,200 most frequently cited economists in the years 1990-2000 using the Social Science Citation Index).

Awarded Abba Lerner named professorship, FSU, Spring 2000.

Awarded sabbatical, FSU, Spring 2000.

Received FSU Award for Excellence in Undergraduate Teaching, Spring 2000.

Received FSU Teaching Incentive Program Award, Fall 1995.

Nominated for FSU Award for Excellence in Undergraduate Teaching, Spring 1994.

Nominated for Outstanding Teaching Award, Associated Student Government, Miami University,1992.
Selected by the Miami University Sisters of Delta Gamma for a "Favorite Professor Award" in Fall 1990.

Honorary Member of Golden Key National Honor Society, Fall 1989.

Selected by the Sisters of Delta Gamma as "One of the twenty five most outstanding faculty members at Miami University" in Fall 1988.

Service

Vice President, Southern Economic Association, 2011-

Trinity University

Dick and Peggy Prassel Professor of Business Administration Search Committee, 2011
Faculty and Staff Compensation Committee, 2010-2011
Student Retention Committee, 2010

Florida State University

University and College Committees:

Member, GPC subcommittee for Marketing, Spring 2008.
Member, Graduate Policy Committee, Fall 2007-.
Chair, GPC subcommittee for Political Science, Fall 2006.
Member, Title IV Admissions Attendance Committee, Fall 2003-Spring 2004.
Member, College of Social Sciences Executive Committee, Fall 2003-.
Member, Ad Hoc Committee on COSS Technology, Spring 2003.
Member, Computing and Information Resource Committee, Fall 1999-.
Member, Academic and Policy Affairs Committee, Fall 1996-Spring 1998.

Economics Department Committees:

Member, Ad Hoc Committee on Economics 2000 Level Courses, Spring 1999.
Member, Undergraduate Economics Committee, Fall 1998-
Member, Economics Department Executive Committee, Fall 1994-Spring 1995, Fall 1996-Spring 1999, Fall 2000-.
Economics Department Library Representative, Fall 1993-.
Micro/Macroeconomics Seminar Coordinator, Fall 1993-Spring 1995, Fall 1998-Fall 1999, Fall 2001, Fall 2006-.

Comprehensive Examination Committees:

Member, Masters Comprehensive Exam Committee, Spring 1994.
Member, Ph.D. Labor Field Exam Committee, Fall 1992, Spring 1994, Fall 1994, Fall 1995, Fall 1996, Spring 1997, Spring 1998.
Chair, Masters Comprehensive Exam Committee, Fall 1994, Spring 1998.
Chair, Ph.D. Labor Field Exam Committee, Spring 1993-Fall 1993, Spring 1995, Spring 1996, Spring 2000, Spring 2001, Fall 2001.

Miami University

Computing Task Force, Department of Economics, 1991-92.

Fiscal Note Summary

State and local governments estimate no direct costs or savings from the proposal, but operating costs could increase by an unknown annual amount that could be significant. State and local government tax revenue could change by an unknown annual amount ranging from a $4.4 million decrease to a $224 million increase depending on business decisions.

Jefferson City, MO 65101

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III (2018-195)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on April 3, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

My commission expires: _____

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Section 14 and amending Sections 2, 5, 6, 7, 9, 10 and 11 to read as follows:

Section 2. The house of representatives shall consist of **[**one hundred sixty-three**]** ten members from each congressional district elected at each general election and apportioned in the following manner: Within sixty days after the population of this state is reported to the President for each decennial census of the United States and, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days after notification by the governor that such a ruling has been made, the congressional district committee of each of the two political parties casting the highest vote for at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state representative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district **[**committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected**]** will refer to legislative districts that would have been used to elect members of Congress had they not been elected at large. Such legislative districts will continue to be formed after each decennial census of the United States and will be used for purposes of electing members of the Missouri house of representatives. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.

The commissioners so selected shall on the fifteenth day, excluding Sundays and holidays, after all members have been selected, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary and shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission shall reapportion the representatives by dividing the population of the state by the number **[**one hundred sixty-three**]** of members of Congress to which the state of Missouri is entitled, and shall establish each district so that the population of that district shall, as nearly as possible, equal that figure.

Each district shall be composed of contiguous territory as compact as may be.

Not later than five months after the appointment of the commission, the commission shall file with the secretary of state a tentative plan of apportionment and map of the proposed districts and during the ensuing fifteen days shall hold such public hearings as may be necessary to hear objections or testimony of interested persons.

Not later than six months after the appointment of the commission, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts, and no statement shall be valid unless approved by at least seven-tenths of the members.

After the statement is filed members of the house of representatives shall be elected according to such districts until a reapportionment is made as herein provided, except that if the statement is not filed within six months of the time fixed for the appointment of the commission, it shall stand discharged and the house of representatives shall be apportioned by a commission of six members appointed from among the judges of the appellate courts of the state of Missouri by the state supreme court, a majority of whom shall sign and file its apportionment plan and map with the secretary of state within ninety days of the date of the discharge of the apportionment commission. Thereafter members of the house of representatives shall be elected according to such districts until a reapportionment is made as herein provided.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.

Section 5. The senate shall consist of thirty-four members, divided in two groups of seventeen each, elected by the qualified voters of the **[**respective districts**]** state of Missouri for four years. **[**For the election of senators, the state shall be divided into convenient districts of contiguous territory, as compact and nearly equal in population as may be.**]**

Section 6. Each senator shall be thirty years of age, and next before the day of his election shall have been a qualified voter of the state for three years and a resident of the **[**district which he is chosen to represent**]** state. **[**for one year, if such district shall have been so long established, and if not, then of the district or districts from which the same shall have been taken.**]**

Section 7. **[**Within sixty days after the population of this state is reported to the President for each decennial census of the United States, and within sixty days after notification by the governor that a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

The commissioners so selected shall on the fifteenth day, excluding Sundays and holidays, after all members have been selected, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary and shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission shall reapportion the senatorial districts by dividing the population of the state by the number thirty-four and shall establish each district so that the population of that district shall, as nearly as possible, equal that figure; no county lines shall be crossed except when necessary to add sufficient population to a multi-district county or city to complete only one district which lies partly within such multi-district county or city so as to be as nearly equal as practicable in population. Any county with a population in excess of the quotient obtained by

dividing the population of the state by the number thirty-four is hereby declared to be a multi-district county.

Not later than five months after the appointment of the commission, the commission shall file with the secretary of state a tentative plan of apportionment and map of the proposed districts and during the ensuing fifteen days shall hold such public hearings as may be necessary to hear objections or testimony of interested persons.

Not later than six months after the appointment of the commission, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts, and no statement shall be valid unless approved by at least seven members.

After the statement is filed senators shall be elected according to such districts until a reapportionment is made as herein provided, except that if the statement is not filed within six months of the time fixed for the appointment of the commission, it shall stand discharged and the senate shall be apportioned by a commission of six members appointed from among the judges of the appellate courts of the state of Missouri by the state supreme court, a majority of whom shall sign and file its apportionment plan and map with the secretary of state within ninety days of the date of the discharge of the apportionment commission. Thereafter senators shall be elected according to such districts until a reapportionment is made as herein provided.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

An ordered list of candidates, ranked by number of votes received, from most to least, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, three more than the number of members to be elected. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions are to be delivered to the secretary of state no later than ninety days preceding the general election. At the time the petitions are presented, the political party will also notify the secretary of state of the method to be used by said party in nominating a slate of candidates.

The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

In each general election, each voter will cast a single vote for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

To determine how many candidates in the house of representatives and the senate will be elected from each political party and which independent or write-in candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate will then be divided by that number and that number of candidates from each party is elected, with any remaining votes for each party above the number needed to elect that many candidates calculated as "surplus votes" for that party. Any independent candidate or valid write-in candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

The surplus votes of any political party or independent candidate having surplus votes, but not having enough surplus votes to win an additional seat, or a seat, may have those surplus votes transferred to another political party or independent candidate by notifying the Secretary of State in writing at least fourteen days before the date of the general election.

The number of candidates thus elected is calculated and subtracted from the total number of candidates to be elected. If additional candidates remain to be elected, the highest ordered remaining candidate from a party list, or independent candidate with the highest number of surplus votes, is elected. The number of surplus votes required to be elected is then deducted from that party's total votes and the process repeated until the requisite number of candidates has been elected.

In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate who would have been elected had there been one more member elected using the prescribed method for tabulating votes.

Section 9. Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965. Beginning with the election of representatives in the general election to be held in November of 2020, the House of Representatives shall consist of ten members elected from each congressional district. In the event that members of congress from Missouri are elected at large, congressional district boundaries will still be drawn and used in the election of members of the Missouri House of Representatives.

Section 10. The last decennial census of the United States shall be used in apportioning representatives and determining the population of senatorial and representative districts. Such districts may be altered from time to time as public convenience may require. Beginning with the general election to be held in November of 2020, senators will be elected on a state-wide basis, without districts.

Section 11. The first election of senators and representatives under this constitution, shall be held at the general election in the year one thousand nine hundred and forty-six when the whole number of representatives and the senators from the districts having even numbers, who shall compose the first class, shall be elected, and two years thereafter the whole number of representatives and the senators from districts having odd numbers, who shall compose the second class, shall be elected, and so on at each succeeding general election. Beginning with the general election to be held in November of 2020, senators from each class, will be elected at large on a state-wide basis.

[Section 14. Writs of election to fill vacancies in either house of the general assembly shall be issued by the governor.]

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-195)

Subject

Initiative petition from Winston Apple regarding a proposed constitutional amendment to Article III. (Received April 3, 2017)

Date

April 24, 2017

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact for this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated this reduces membership from 163 to 80. Would first affect FY 21 post the 11/2020 election. FY 21 savings is $3,879,714 (1/2 year). Savings estimate is $6,943,036 annually after that.

Member salary = 83 x $35,915 = $2,980,945
Member expense accounts = 83 x $8,400 = $697,200
Session mileage = 83 x 268 (ave weekly roundtrip mileage) x .37 x 19 (weeks of session) = $156,375
Session per diem = 83 x $113.60 x 70 (days of session) = $660,016
Legislative Assistant salary = 83 x $29,500 = $2,448,500.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal response.

Officials from the **Office of Administration** indicated:

Under this proposal:

- Beginning with the 2020 general election, Representatives and Senators will be elected at large, instead of by congressional districts.
- Each party will submit an ordered list of candidates for the general elections. Parties choose their list of candidates through a primary election.
- Independents may qualify for an election after submitting the required number of signatures.
- In the general election, each voter will cast a single vote for a political party and its ordered list of candidates, or for an independent candidate or for a single write-in candidate.
- The number of popular votes for each party will determine the number of candidates from their ordered list that are elected.
- Beginning with the 2020 general election, Senators will be elected on a statewide basis, without districts.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their agency.

Officials from the **Secretary of State's office** indicated this petition would change the composition of the General Assembly and cause representatives and senators to be elected by congressional district. At each primary election, voters would see a list of all

representative candidates in their congressional district and a list of all senate candidates from the state, with the ability to vote for one candidate from each list. This consolidation into congressional districts may incur the following costs:

Re-programming voting machines: Voting machines in Missouri are currently programmed to accept only single-page ballots – each of these machines would need to be reprogrammed to accept multiple-page ballots due to the potential for large numbers of candidates to file for each congressional district's seats (at both the primary and general elections).

Postage Costs: mailing envelopes used to return absentee ballots are printed with business reply permits – pursuant to RSMo 115.285, Local Election Authorities are reimbursed for these costs by the Missouri Secretary of State's Office at a current cost of $1.80 per envelope based on the current size and weight of the envelope and ballot; multiple-page ballots would increase these costs.

Ballot printing costs: Local Election Authorities bear the cost of printing ballots for each election – paying to print multiple page ballots would substantially increase printing costs.

Due to situational variables, it is not possible to determine a concrete amount of fiscal impact to this measure. However, the costs to the state and to local election authorities could be significant.

Additionally, their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this petition has no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from **Platte County Board of Elections** indicated no fiscal impact.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State government legislative operating costs are estimated to decrease by approximately $6.9 million annually. The state and local governments could incur unknown additional election-related costs that could be significant.

RE: Petition approval request from Damien Johnson regarding a proposed statutory amendment to Chapter 115 (2018-194)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Damien Johnson on April 3, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

Jay Ashcroft

Be it enacted by the people of the state of Missouri

Section 115.427. is amended by deleting all matters within the enclosed brackets and adding all the underlined matters as required pursuant to Section 116.050 RSMo.

115.427. 1. Persons seeking to vote in a public election shall establish their identity and eligibility to vote at the polling place by presenting a form of personal identification to election officials. No form of personal identification other than the forms listed in this section shall be accepted to establish a voter's qualifications to vote. Forms of personal identification that satisfy the requirements of this section are any one of the following:

(1) Nonexpired Missouri driver's license;

(2) Nonexpired or nonexpiring Missouri nondriver's license;

(3) A document that satisfies all of the following requirements:

(4) A student ID from an accredited institution of higher education.

(a) The document contains the name of the individual to whom the document was issued, and the name substantially conforms to the most recent signature in the individual's voter registration record;

(b) The document shows a photograph of the individual;

(c) Except form an accredited institution of higher education, [T]the document includes an expiration date, and the document is not expired, or, if expired, the document expired after the date of the most recent general election; and

(d) The document was issued by the United States, an accredited institution of higher education, or the state of Missouri; or

[(4)](5) Any identification containing a photograph of the individual which is issued by the Missouri National Guard, the United States Armed Forces, or the United States Department of Veteran Affairs to a member or former member of the Missouri National Guard or the United States Armed Forces and that is not expired or does not have an expiration date[.];

(6) A picture identification issued by the state of Missouri, an agency of the state, or a local election authority of the state;

(7) A identification issued by the United States government or agency thereof;

2. (1) An individual who appears at a polling place without a form of personal identification described in subsection 1 of this section and who is otherwise qualified to vote at that polling place may execute a statement, under penalty of perjury, averring that the individual is the person listed in the precinct register; averring that the individual does not possess a form of personal identification described in subsection 1 of this section; acknowledging that the individual is eligible to receive a Missouri nondriver's license free of charge if desiring it in order to vote; and acknowledging that the individual is required to present a form of personal identification, as described in subsection 1 of this section, in order to vote. Such statement shall be executed and sworn to before the election official receiving the statement. Upon executing such statement, the individual may cast a regular ballot, provided such individual presents one of the following forms of identification:

(a) non-picture Identification issued by the state of Missouri, an agency of the state, or a local election authority of the state;

[(b) Identification issued by the United States government or agency thereof;]

[(c) Identification issued by an institution of higher education, including a university, college, vocational and technical school, located within the state of Missouri;]

[(d)](b) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that contains the name and address of the individual;

[(e)](c) Other identification approved by the secretary of state under rules promulgated pursuant to this section.

(2) For any individual who appears at a polling place without a form of personal identification described in subsection 1 of this section and who is otherwise qualified to vote at that polling place, the election authority may take a picture of such individual and keep it as part of that individual's voter registration file at the election authority.

(3) Any individual who chooses not to execute the statement described in subdivision (1) of this subsection may cast a provisional ballot. Such provisional ballot shall be counted, provided that it meets the requirements of subsection 4 of this section.

(4) For the purposes of this section, the term "election official" shall include any person working under the authority of the election authority.

3. The statement to be used for voting under subdivision (1) of subsection 2 of this section shall be substantially in the following form:

"State of .....

County of .....

I do solemnly swear (or affirm) that my name is .....; that I reside at .....; that I am the person listed in the precinct register under this name and at this address; and that, under penalty of perjury, I do not possess a form of personal identification approved for voting. As a person who does not possess a form of personal identification approved for

voting, I acknowledge that I am eligible to receive free of charge a Missouri nondriver's license at any fee office if desiring it in order to vote. I furthermore acknowledge that I am required to present a form of personal identification, as prescribed by law, in order to vote.

I understand that knowingly providing false information is a violation of law and subjects me to possible criminal prosecution.

.....

Signature of voter

Subscribed and affirmed before me this ..... day of ....., 20....

.....

Signature of election official"

4. A voter shall be allowed to cast a provisional ballot under section 115.430 even if the election judges cannot establish the voter's identity under this section. The election judges shall make a notation on the provisional ballot envelope to indicate that the voter's identity was not verified. The provisional ballot cast by such voter shall not be counted unless:

(1) (a) The voter returns to the polling place during the uniform polling hours established by section115.407 and provides a form of personal identification that allows the election judges to verify the voter's identity as provided in subsection 1 of this section; or

(b) The election authority verifies the identity of the individual by comparing that individual's signature to the signature on file with the election authority and determines that the individual was eligible to cast a ballot at the polling place where the ballot was cast; and

(2) The provisional ballot otherwise qualifies to be counted under section 115.430

5. The secretary of state shall provide advance notice of the personal identification requirements of subsection 1 of this section in a manner calculated to inform the public generally of the requirement for forms of personal identification as provided in this section. Such advance notice shall include, at a minimum, the use of advertisements and public service announcements in print, broadcast television, radio, and cable television media, as well as the posting of information on the opening pages of the official state internet websites of the secretary of state and governor.

6. (1) Notwithstanding the provisions of section 136.055 and section 302.181 to the contrary, the state and all fee offices shall provide one nondriver's license at no cost to any otherwise qualified voter who does not already possess such identification and who desires the identification in order to vote.

(2) This state and its agencies shall provide one copy of each of the following, free of charge, if needed by an individual seeking to obtain a form of personal identification described in subsection 1 of this section in order to vote:

(a) A birth certificate;

(b) A marriage license or certificate;

(c) A divorce decree;

(d) A certificate of decree of adoption;

(e) A court order changing the person's name;

(f) A Social Security card reflecting an updated name; and

(g) Naturalization papers or other documents from the United States Department of State proving citizenship.

Any individual seeking one of the above documents in order to obtain a form of personal identification described in subsection 1 of this section in order to vote may request the secretary of state to facilitate the acquisition of such documents. The secretary of state shall pay any fee or fees charged by another state or its agencies, or any court of competent jurisdiction in this state or any other state, or the federal government or its agencies, in order to obtain any of the above documents from such state or the federal government.

(3) All costs associated with the implementation of this section shall be reimbursed from the general revenue of this state by an appropriation for that purpose. If there is not a sufficient appropriation of state funds, then the personal identification requirements of subsection 1 of this section shall not be enforced.

(4) Any applicant who requests a nondriver's license for the purpose of voting shall not be required to pay a fee if the applicant executes a statement, under penalty of perjury, averring that the applicant does not have any other form of personal identification that meets the requirements of this section. The state of Missouri shall pay the legally required fees for any such applicant. The director of the department of revenue shall design a statement to be used for this purpose. The total cost associated with nondriver's license photo identification under this subsection shall be borne by the state of Missouri from funds appropriated to the department of revenue for that specific purpose. The department of revenue and a local election authority may enter into a contract that allows the local election authority to assist the department in issuing nondriver's license photo identifications.

7. The director of the department of revenue shall, by January first of each year, prepare and deliver to each member of the general assembly a report documenting the number of individuals who have requested and received a nondriver's license photo identification for the purposes of voting under

this section. The report shall also include the number of persons requesting a nondriver's license for purposes of voting under this section, but not receiving such license, and the reason for the denial of the nondriver's license.

8. The precinct register shall serve as the voter identification certificate. The following form shall be printed at the top of each page of the precinct register:

VOTER'S IDENTIFICATION CERTIFICATE

Warning: It is against the law for anyone to vote, or attempt to vote, without having a lawful right to vote.

PRECINCT

WARD OR TOWNSHIP .....

GENERAL (SPECIAL, PRIMARY) ELECTION

Held ....., 20....

Date

I hereby certify that I am qualified to vote at this election by signing my name and verifying my address by signing my initials next to my address.

9. The secretary of state shall promulgate rules to effectuate the provisions of this section.

10. Any rule or portion of a rule, as that term is defined in section 536.010, that is created under the authority delegated in this section shall become effective only if it complies with and is subject to all of the provisions of chapter 536 and, if applicable, section 536.028. This section and chapter 536 are nonseverable and if any of the powers vested with the general assembly pursuant to chapter 536 to review, to delay the effective date or to disapprove and annul a rule are subsequently held unconstitutional, then the grant of rulemaking authority and any rule proposed or adopted after August 28, 2002, shall be invalid and void.

11. If any voter is unable to sign his name at the appropriate place on the certificate or computer printout, an election judge shall print the name and address of the voter in the appropriate place on the precinct register, the voter shall make his mark in lieu of signature, and the voter's mark shall be witnessed by the signature of an election judge.

12. This section [shall] <u>became [</u>become] effective [only] upon the passage and approval by the voters of a constitutional amendment submitted to them by the general assembly regarding the authorization of photo identification requirements for elections by general law. <u>Future Amendments to this section shall become effective immediately.</u> [If such constitutional amendment is approved by the voters, this section shall become effective June 1, 2017.]

Be it enacted by the people of the state of Missouri:

Sections 128.346 and 128.348 of the Revised Missouri Statutes are hereby amended, to read as follows:

128.346. The districts established by the provisions of sections 128.400 to 128.440 for the election of representatives to the Congress of the United States shall be effective beginning with election to the 108th Congress and through the election of the 112th Congress. The districts established by sections 128.451 to 128.458 for the election of representatives to the Congress of the United States shall be effective beginning with the election to the 113th Congress. Effective beginning with the election of representatives to the 117th Congress, representatives to the Congress of the United States from the state of Missouri shall be elected at large, in the manner prescribed by section 128.348.

128.348. 1. The state of Missouri is hereby divided into nine congressional districts. Effective with the election for the 113th Congress, the state of Missouri shall consist of eight congressional districts. [The legal voters of each district shall elect one member of Congress of the United States.] Effective with the election for the 117th Congress, representatives to the Congress of the United States shall be elected according to the method described herein.

2. Each political party shall nominate an ordered list of candidates, including a number no greater than the number of representatives (members) to which the state of Missouri is entitled.

3. Each political party may determine its ordered list of candidates through a primary election, caucuses, a statewide party nominating convention, or a combination of caucuses and a statewide party nominating convention.

4. A primary election will be the default method for parties to select an ordered list of candidates. Should a political party determine that they will select candidates by caucuses, statewide party convention, or a combination of caucuses and a statewide party convention, a legally designated representative of the party will notify the secretary of state, in writing, of the method to be used, no later than the first day of April of an election year.

5. If a political party elects to use a primary election as the means of determining its candidates for the general election, all qualified candidates who file for said party's nominations will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and to vote for one, and only one, candidate from that party.

6. An ordered list of candidates for each party, including a number of candidates totaling up to the number of seats in Congress to which the state of Missouri is entitled, will be placed on the ballot in the general election, based on the number of votes received by each candidate in the primary election for each party.

7. Should a party elect to nominate candidates for the general election by means of caucuses and/or a statewide party convention, an ordered list of that party's candidates shall be filed with the secretary of state's office no less than 90 days before the general election date in election years.

8. To qualify for a place on the ballot, an independent candidate must present petitions signed by one-fifth of one percent of the total number of legal voters in the general election last preceding. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions must be delivered to the secretary of state no later than one-hundred and twenty days before the general election.

9. The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

10.) In each general election, each voter will cast a single vote for a political party, and its ordered list of candidates, or for an independent candidate for Congress appearing on the ballot, or a single write-in vote for a candidate not appearing on the ballot, who has properly registered with the secretary of state as a write-in candidate.

11. The following method of tabulation shall be used to determine how many representatives will be elected from each political party and which independent candidates (if any) will be elected:

(1) The total number of valid votes cast for all parties, and independent and valid write-in candidates, will be divided by the number of representatives to be elected. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent candidate will then be divided by that number and each party awarded that number of representatives and that many candidates from that party's ordered list are elected. Any independent or valid write-in candidate receiving at least the number of votes needed to be elected is elected.

(2) Any remaining votes for each party above the number needed to elect those representatives are counted as "surplus votes" for that party. The votes for any party or independent candidate or valid write-in candidate falling short of the number needed to be elected are also treated as surplus votes.

(3) The number of representatives thus elected is subtracted from the total number of representatives to be elected. If the number of representatives thus elected is fewer than the number to which the state of Missouri is entitled, additional representatives will be elected, in order, based on the highest number of surplus votes. The next candidate(s) from the ordered list of a party that has already had some candidates elected, the first candidate from the ordered list of a party that has not had a candidate elected, or the independent or valid write-in candidate, with the most surplus votes is elected. If there is more than one additional representative to be elected, the number of surplus votes needed to be elected is to be deducted from the total of surplus votes held by that party or independent candidate and the process is repeated until all seats are filled.

(4) In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

12. All subsections and all clauses of this statute, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-193)

Subject

Initiative petition from Winston Apple regarding a proposed amendment to Chapter 128 of the Revised Statutes of Missouri. (Received March 31, 2017)

Date

April 20, 2017

Description

This proposal would amend Chapter 128 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that the enactment of this proposal would result in increased litigation. They expect that they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their agency.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated this proposal amends Sections 128.346 and 128.348 RSMo by changing election of Congressional candidates to an "at large" process instead of by congressional districts.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated this petition would cause United States representatives to be elected at-large from the state, with each party presenting an ordered list of candidates for U.S. Representative at the general election following the primary election (or alternative party nominating method). This may incur the following costs:

Re-programming voting machines: Voting machines in Missouri are currently programmed to accept only single-page ballots – each of these machines would need to be reprogrammed to accept multiple-page ballots due to the length of each party's list of candidates (at both the primary and general elections).

Postage Costs: mailing envelopes used to return absentee ballots are printed with business reply permits – pursuant to RSMo 115.285, Local Election Authorities are reimbursed for these costs by the Missouri Secretary of State's Office at a current cost of $1.80 per envelope based on the current size and weight of the envelope and ballot; multiple-page ballots would increase these costs.

Ballot printing costs: Local Election Authorities bear the cost of printing ballots for each election – paying to print multiple page ballots would substantially increase printing costs.

Due to situational variables, it is not possible to determine a concrete amount of fiscal impact to this measure. However, the costs to the state and to local election authorities could be significant.

Additionally, their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the

Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this statutory amendment would have no fiscal impact on their city.

Officials from the **Platte County Board of Elections** indicated no fiscal impact.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

The state and local governments could incur unknown additional election-related costs that could be significant.

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

INITIATIVE PETITION

To the Honorable , Secretary of State for the State of Missouri:

We, the undersigned, registered voters of the state of Missouri and _____ County (or city of St. Louis), respectfully order that the following amendment to the 221.030 1 shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the th day of November, , and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or city of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

RE: Petition approval request from Damien Johnson regarding a proposed statutory amendment to Chapter 115 (2018-191)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Damien Johnson on March 30, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri

Section 115.427. is amended by deleting all matters within the enclosed brackets and adding all the underlined matters as required pursuant to Section 116.050 RSMo.

115.427. 1. Persons seeking to vote in a public election shall establish their identity and eligibility to vote at the polling place by presenting a form of personal identification to election officials. No form of personal identification other than the forms listed in this section shall be accepted to establish a voter's qualifications to vote. Forms of personal identification that satisfy the requirements of this section are any one of the following:

(1) Nonexpired Missouri driver's license;

(2) Nonexpired or nonexpiring Missouri nondriver's license;

(3) A document that satisfies all of the following requirements:

(4) A student ID from an accredited institution of higher education.

(a) The document contains the name of the individual to whom the document was issued, and the name substantially conforms to the most recent signature in the individual's voter registration record;

(b) The document shows a photograph of the individual;

(c) Except form an accredited institution of higher education, [T]the document includes an expiration date, and the document is not expired, or, if expired, the document expired after the date of the most recent general election; and

(d) The document was issued by the United States, an accredited institution of higher education, or the state of Missouri; or

[(4)](5) Any identification containing a photograph of the individual which is issued by the Missouri National Guard, the United States Armed Forces, or the United States Department of Veteran Affairs to a member or former member of the Missouri National Guard or the United States Armed Forces and that is not expired or does not have an expiration date[.];

(6) A picture identification issued by the state of Missouri, an agency of the state, or a local election authority of the state;

(7) A identification issued by the United States government or agency thereof;

2. (1) An individual who appears at a polling place without a form of personal identification described in subsection 1 of this section and who is otherwise qualified to vote at that polling place may execute a statement, under penalty of perjury, averring that the individual is the person listed in the precinct register; averring that the individual does not possess a form of personal identification described in subsection 1 of this section; acknowledging that the individual is eligible to receive a Missouri nondriver's license free of charge if desiring it in order to vote; and acknowledging that the individual is required to present a form of personal identification, as described in subsection 1 of this section, in order to vote. Such statement shall be executed and sworn to before the election official receiving the statement. Upon executing such statement, the individual may cast a regular ballot, provided such individual presents one of the following forms of identification:

(a) non-Identification issued by the state of Missouri, an agency of the state, or a local election authority of the state;

(b) non-Identification issued by the United States government or agency thereof;

[(c) Identification issued by an institution of higher education, including a university, college, vocational and technical school, located within the state of Missouri;]

[(d)](c) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that contains the name and address of the individual;

[(e)](d) Other identification approved by the secretary of state under rules promulgated pursuant to this section.

(2) For any individual who appears at a polling place without a form of personal identification described in subsection 1 of this section and who is otherwise qualified to vote at that polling place, the election authority may take a picture of such individual and keep it as part of that individual's voter registration file at the election authority.

(3) Any individual who chooses not to execute the statement described in subdivision (1) of this subsection may cast a provisional ballot. Such provisional ballot shall be counted, provided that it meets the requirements of subsection 4 of this section.

(4) For the purposes of this section, the term "election official" shall include any person working under the authority of the election authority.

3. The statement to be used for voting under subdivision (1) of subsection 2 of this section shall be substantially in the following form:

"State of .....

County of .....

I do solemnly swear (or affirm) that my name is .....; that I reside at .....; that I am the person listed in the precinct register under this name and at this address; and that, under penalty of perjury, I do not possess a form of personal identification approved for voting. As a person who does not possess a form of personal identification approved for

voting, I acknowledge that I am eligible to receive free of charge a Missouri nondriver's license at any fee office if desiring it in order to vote. I furthermore acknowledge that I am required to present a form of personal identification, as prescribed by law, in order to vote.

I understand that knowingly providing false information is a violation of law and subjects me to possible criminal prosecution.

.....

Signature of voter

Subscribed and affirmed before me this ..... day of ....., 20....

.....

Signature of election official"

4. A voter shall be allowed to cast a provisional ballot under section 115.430 even if the election judges cannot establish the voter's identity under this section. The election judges shall make a notation on the provisional ballot envelope to indicate that the voter's identity was not verified. The provisional ballot cast by such voter shall not be counted unless:

(1) (a) The voter returns to the polling place during the uniform polling hours established by section115.407 and provides a form of personal identification that allows the election judges to verify the voter's identity as provided in subsection 1 of this section; or

(b) The election authority verifies the identity of the individual by comparing that individual's signature to the signature on file with the election authority and determines that the individual was eligible to cast a ballot at the polling place where the ballot was cast; and

(2) The provisional ballot otherwise qualifies to be counted under section 115.430

5. The secretary of state shall provide advance notice of the personal identification requirements of subsection 1 of this section in a manner calculated to inform the public generally of the requirement for forms of personal identification as provided in this section. Such advance notice shall include, at a minimum, the use of advertisements and public service announcements in print, broadcast television, radio, and cable television media, as well as the posting of information on the opening pages of the official state internet websites of the secretary of state and governor.

6. (1) Notwithstanding the provisions of section 136.055 and section 302.181 to the contrary, the state and all fee offices shall provide one nondriver's license at no cost to any otherwise qualified voter who does not already possess such identification and who desires the identification in order to vote.

(2) This state and its agencies shall provide one copy of each of the following, free of charge, if needed by an individual seeking to obtain a form of personal identification described in subsection 1 of this section in order to vote:

(a) A birth certificate;

(b) A marriage license or certificate;

(c) A divorce decree;

(d) A certificate of decree of adoption;

(e) A court order changing the person's name;

(f) A Social Security card reflecting an updated name; and

(g) Naturalization papers or other documents from the United States Department of State proving citizenship.

Any individual seeking one of the above documents in order to obtain a form of personal identification described in subsection 1 of this section in order to vote may request the secretary of state to facilitate the acquisition of such documents. The secretary of state shall pay any fee or fees charged by another state or its agencies, or any court of competent jurisdiction in this state or any other state, or the federal government or its agencies, in order to obtain any of the above documents from such state or the federal government.

(3) All costs associated with the implementation of this section shall be reimbursed from the general revenue of this state by an appropriation for that purpose. If there is not a sufficient appropriation of state funds, then the personal identification requirements of subsection 1 of this section shall not be enforced.

(4) Any applicant who requests a nondriver's license for the purpose of voting shall not be required to pay a fee if the applicant executes a statement, under penalty of perjury, averring that the applicant does not have any other form of personal identification that meets the requirements of this section. The state of Missouri shall pay the legally required fees for any such applicant. The director of the department of revenue shall design a statement to be used for this purpose. The total cost associated with nondriver's license photo identification under this subsection shall be borne by the state of Missouri from funds appropriated to the department of revenue for that specific purpose. The department of revenue and a local election authority may enter into a contract that allows the local election authority to assist the department in issuing nondriver's license photo identifications.

7. The director of the department of revenue shall, by January first of each year, prepare and deliver to each member of the general assembly a report documenting the number of individuals who have requested and received a nondriver's license photo identification for the purposes of voting under

this section. The report shall also include the number of persons requesting a nondriver's license for purposes of voting under this section, but not receiving such license, and the reason for the denial of the nondriver's license.

8. The precinct register shall serve as the voter identification certificate. The following form shall be printed at the top of each page of the precinct register:

VOTER'S IDENTIFICATION CERTIFICATE

Warning: It is against the law for anyone to vote, or attempt to vote, without having a lawful right to vote.

PRECINCT

WARD OR TOWNSHIP .....

GENERAL (SPECIAL, PRIMARY) ELECTION

Held ....., 20....

Date

I hereby certify that I am qualified to vote at this election by signing my name and verifying my address by signing my initials next to my address.

9. The secretary of state shall promulgate rules to effectuate the provisions of this section.

10. Any rule or portion of a rule, as that term is defined in section 536.010, that is created under the authority delegated in this section shall become effective only if it complies with and is subject to all of the provisions of chapter 536 and, if applicable, section 536.028. This section and chapter 536 are nonseverable and if any of the powers vested with the general assembly pursuant to chapter 536 to review, to delay the effective date or to disapprove and annul a rule are subsequently held unconstitutional, then the grant of rulemaking authority and any rule proposed or adopted after August 28, 2002, shall be invalid and void.

11. If any voter is unable to sign his name at the appropriate place on the certificate or computer printout, an election judge shall print the name and address of the voter in the appropriate place on the precinct register, the voter shall make his mark in lieu of signature, and the voter's mark shall be witnessed by the signature of an election judge.

12. This section [shall] <u>became [</u>become] effective [only] upon the passage and approval by the voters of a constitutional amendment submitted to them by the general assembly regarding the authorization of photo identification requirements for elections by general law. <u>Future Amendments to this section shall become effective immediately.</u> [If such constitutional amendment is approved by the voters, this section shall become effective June 1, 2017.]

Be it resolved by the people of the state of Missouri that the Constitution be amended:

35 of Article I of the Constitution of Missouri is amended by modifying section 35. The existing section 35 is set forth hereinafter with the new matter underlined and deleted matter in brackets,

Definitions of terms, as used in this Act:

A) Cannabis: refers to the cannabis, marihuana, marijuana, cannabis, sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including but not limited to, derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof

B) Hemp: The fiber of this plant, extracted from the stem and used to make rope, fabrics, fiberboard, clothing, and paper. The sister plant of cannabis

That agriculture which provides food, energy, health benefits, and security is the foundation and stabilizing force of Missouri's economy. To protect this vital sector of Missouri's economy, the right of farmers and ranchers to engage in farming and ranching practices, including but not limited to the right to grow cannabis and hemp, shall be forever guaranteed in this state, subject to duly authorized powers, if any, conferred by article VI of the Constitution of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-190)

Subject

Initiative petition from Damien Johnson regarding a proposed constitutional amendment to Article I. (Received March 30, 2017)

Date

April 19, 2017

Description

This proposal would amend Article I of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that the enactment of this proposal would result in increased litigation. They expect that they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Missouri State Highway Patrol** indicated no fiscal impact on their office.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated this proposal revises Article I, Section 35 to explicitly protect the right to grow cannabis and hemp.

This proposal should not have a fiscal impact for their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this constitutional amendment would have no fiscal impact on their city.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri State University** indicated no fiscal impact to their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education,** the **Department of Labor and Industrial Relations, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

State and local government entities expect no costs or savings.

Jefferson City, MO 65101

RE: Petition approval request from Marc Ellinger regarding a proposed constitutional amendment to Article IV, version 4 (2018-189)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Marc Ellinger on March 28, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article IV is amended by adding one new section to be known as Section 40(c), to read as follows:

40(c). 1. The provisions of Section 40(c) shall be known as the Native Missouri Wildlife Conservation Amendment, and its purpose is to prohibit the shipment or transportation of big game species to or from Missouri destinations. It shall be the public policy of this state to protect the health of Missouri's livestock and wildlife by changing the requirements related to the transport of captive big game species. Transport of big game species into and inside Missouri presents a significant threat to the safety, health and welfare of wildlife across Missouri due to the risk of introducing disease. Confined big game killing or the owning, possessing, confining, transporting, breeding, or raising of privately owned big game species shall not be construed as hunting, farming or ranching for any purpose under this Constitution or any law.

2. Upon the effective date of this Amendment the delivery, receipt, shipping, or transportation of any big game species to or from any destination within Missouri shall be prohibited. The only exceptions to this general prohibition are as follows:

a. Prior to and on November 7, 2019, a Missouri facility legally confining big game species with all required permits in place on November 6, 2018, and which continuously maintains all required permits, may deliver, ship or transport any big game species for which such facility maintains such permits, and any person engaged in the shipping to or from any such excepted facility however the shipping of such big game species into Missouri shall not be permitted under this exception;

b. When such big game species are being transported to or from any facility and will be held under the authority of the Missouri Conservation Commission or under the supervision of an authorized representative of: governmentally owned zoos or wildlife or research organizations; American Zoo and Aquariums Association accredited not-for-profit facilities; nationally accredited universities, colleges or, schools; incorporated cities, states or federal agencies for scientific research;

c. When such big game species are transported through Missouri in compliance with federal regulations, with both origin and destination outside of Missouri;

d. When such big game species are transported to any commercial slaughter facility operating under state or federal inspection for commercial meat production; or

e. When such big game species are transported, for treatment of illness or injury, between a veterinary facility and a facility authorized to possess privately owned big game species.

3. In addition to the authority vested in it by Section 40(a) of Article IV, the Missouri Conservation Commission shall have primary authority over the regulation of privately-owned big game species. The Missouri Conservation Commission may make such rules and regulations as may be deemed necessary for the enforcement of this Amendment.

4. Definitions.

a. "Big game species" as used in this amendment shall not include any livestock as defined in this Amendment, and shall include all of the following animals, either as live animals, embryos, ova, or semen: (a) all cervids and cervid hybrids including but not limited to white-tailed deer, elk, mule deer, red deer, fallow deer, sika deer and moose; (b) mountain goats, bighorn sheep, Dall's sheep, pronghorn, peccary, and javelina; and (c) any other ungulate (hooved animal) confined or bred primarily for confined big game killing and not for commercial meat production or other human use.

b. "Confined big game killing" as used in this amendment shall mean an act in which an owner, operator or agent of a big game preserve permits, allows, enables or facilitates the killing or attempted killing of big game species inside a big game preserve, but shall not include any act of a government employee or agent to control an animal population, to prevent or control diseases, or when government action is otherwise required or authorized by law.

c. "Livestock" as used in this Amendment, shall mean cattle, fully domesticated swine, fully domesticated sheep, fully domesticated goats, fully domesticated bison, fully domesticated ratite birds, fully domesticated rabbits, and fully domesticated horses, donkeys, mules, alpacas and llamas, where such fully domesticated animals are raised primarily for human use or consumption not including confined big game killing. Livestock shall also include embryos, ova, and semen of any designated animal in this definition.

d. "Big game preserve" as used in this amendment shall mean a facility confining privately-owned big game species within fencing designed or intended to reduce the ability of such privately-owned big game species to escape or to evade pursuit.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-189)

Subject

Initiative petition from Marc Ellinger regarding a proposed constitutional amendment to Article IV. (Received March 29, 2017)

Date

April 18, 2017

Description

This proposal would amend Article IV of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** the **Missouri Joint Municipal Electric Utility Commission,** and **Metropolitan Zoological Park and Museum District**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated this initiative petition will have a substantial negative impact on the cervid industry in Missouri.

The Agricultural and Food Policy Center at Texas A&M University conducted an economic impact study of the United States cervid farming industry in 2007 (attached) based on a survey of the deer farms in Texas and the elk producers located throughout the United States.

Based on the values provided by the Texas A&M study, and an estimated 225 cervid producers in Missouri, the industry has an estimated direct annual economic impact in Missouri of approximately $98 million. The number of people employed in the cervid industry in Missouri is estimated to be approximately 1,150 individuals. In addition, based on the study and 2007 property tax rates, the cervid industry pays approximately $700,000 annually in local property taxes.

They included the following information on the economic impact of the United States cervid farming industry:

ECONOMIC IMPACT OF THE UNITED STATES CERVID FARMING INDUSTRY

Executive Summary

- The cervid farming industry is, perhaps, the fastest growing industry in rural America.
- Over 2,000 industry participants were surveyed, with a response rate of 14 percent.
- This survey, designed to estimate the economic impact of the industry, was performed in late 2006-early 2007.
- The average whitetail deer farm had 82 deer, composed of 28 males, 28 females, 26 fawns, and had an average birth rate of 1.31 fawns per doe in 2006.
- Breeding operations reported expenditures averaging $101,000 per year.
- The cervid farming industry has a direct economic impact of $893.5 million.
- When incorporating the indirect impacts of the industry, for example, the farm's expenditures on feed, veterinary supplies, fuel and other purchases, the total economic impact of the industry is $2.3 billion.
- One of the major customers of this industry is hunters. Estimating the impact of hunting dollars spent, with hunters as the consumer of cervid farming products, an additional $757 million is generated by the cervid farming industry.
- The total impact of the industry, combining the farming and hunting components, is $3.0 billion annually.
- The economic activity of the cervid farming industry supports 29,199 jobs, most of which are in rural America. If this industry did not exist, those jobs would have to be supported by some other economic activity.
- These results highlight the fact that the cervid farming industry is a growing and important industry in rural America.

Introduction

The cervid, or deer, farming industry is a vital and growing business in rural areas of the United States. As demographic and market forces tend to shift traditional revenue sources away from rural communities, their economies increasingly rely on new industries such as this one. As the industry has grown, participants and legislators have developed an interest in measuring the economic contribution of the industry on their respective communities. In addition, the industry is governed by a myriad of state and federal laws, regulations, and jurisdictions. Since the majority of industry regulation is left up to the states, a significant amount of variability in the regulations exists from state to state. This lack of consistency in laws and regulations may be a factor affecting future industry growth in some states. The rapid growth of the industry and an array of policy issues led the industry to request this study of the size and economic importance of the cervid farming industry. In 2006, the Agricultural and Food Policy Center (AFPC) at Texas A&M University was requested by former Texas Congressman Henry Bonilla to undertake this study. The primary objective of this study is to determine the economic impact of the United States cervid farming industry. Secondary objectives include providing a current description of typical industry participants and cost estimates for the major categories of expenses on cervid farming operations.

Cervid Industry

The term "cervid" refers to any one of the various members of the cervidae family. This family includes members such as whitetail deer, elk, fallow, reindeer, axis, sika, and red deer among others.[1]

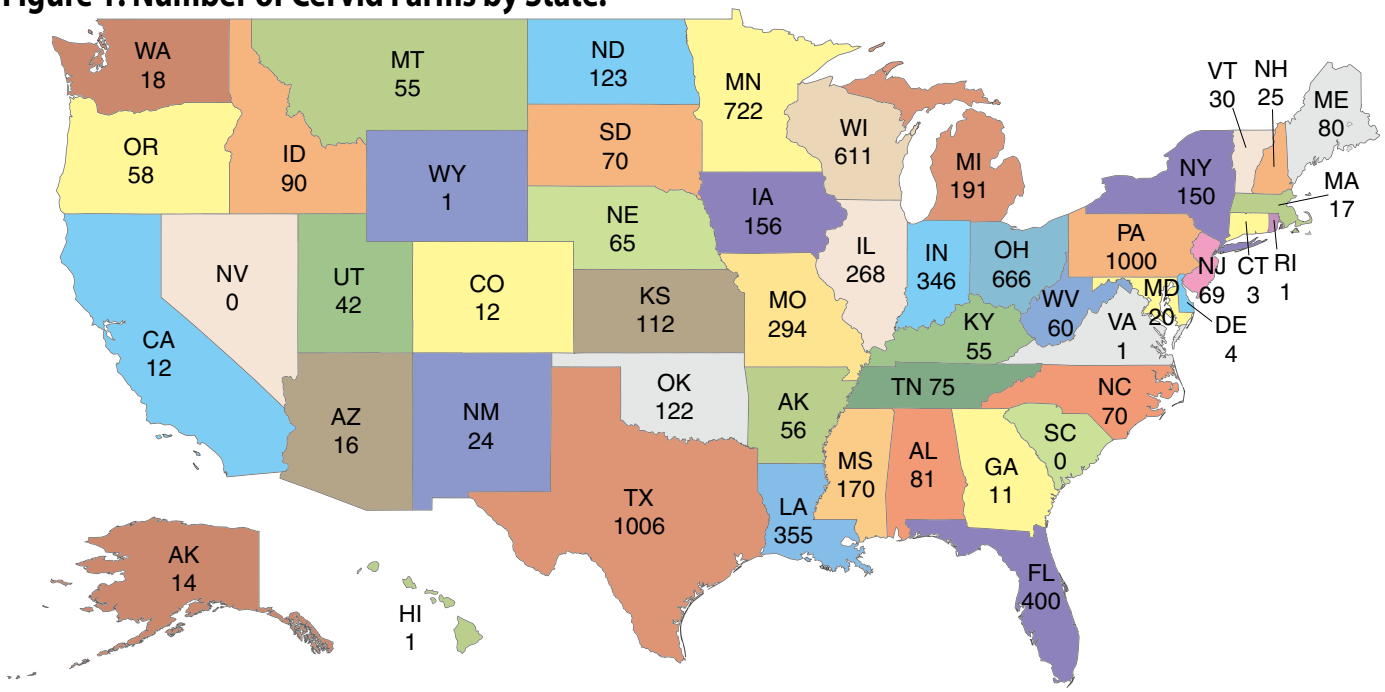
Like any industry, the cervid farming industry involves producers and consumers. In general, the production side of the industry is comprised of breeding stock producers, trophy hunting preserves, commercial venison producers, and commercial scent collection. Some commercial production operations may take on a single segment, such as one producing and selling only breeding stock. Others may consist of any combination of these, such as an operation producing venison and velvet, while also collecting urine for scent sales. Consumers of the industry include hunters (for scent products and hunting) other breeders, and consumers of venison and related products (hides, velvet, shed antlers, etc.).

Figure 1 displays the estimated number of cervid farms per state. This inventory was compiled by the administrative staff at the North American Deer Farmers Association (NADeFA®) through contact with the appropriate state agency. Those states that did not have an exact count provided their best estimate. Across the nation, the total number of cervid farms was 7,828, with Pennsylvania and Texas home to around 1,000 farms each. The total number of hunting preserves is estimated at 2,639, yet this only represents an estimate of those that are related to the cervid farming industry. As an example of the growth the cervid farming industry is experiencing, there were 946 permitted breeding facilities in Texas in late summer 2006. However, when the analysis took place early in the spring of 2007, there were 1,006 permitted facilities. In addition, it is important to note that there are approximately 1,600 Amish operations included in the national total. For many in the Amish communities, deer breeding is another way to diversify their operations. A number of industry participants find that this form of farming provides an opportunity to turn a greater profit on a relatively small amount of acreage than traditional farming or ranching enterprises.

The trophy hunting segment of this industry relates only to those operations that purchase outright or release their own cervids into a hunting preserve. This segment represents the primary end market for the breeding stock industry. Trophy hunting, in this sense, involves hunting trophy cervids within high fenced hunting preserves. This generally occurs via 3-6 day hunt packages, where the hunter is provided lodging, meals, and a guided hunt for a set fee. Hunter expenditures included in this study only include those hunters that are related to this industry. In other words, hunters, in the context of this study, are only those that hunt at operations that either purchase or release deer from breeding operations into their hunting operations. Breeding operations represent the largest segment of the cervid farming industry. These operations raise and sell breeding stock to other industry breeders as well as hunting preserves. The commercial venison segment is similar to other food animal production operations, with fallow, elk, and red deer being the primary species reared. Cervids are raised to market age, processed, and the resulting venison is sold. In addition to venison, these operations may sell other co-products such as velvet, hides, and antlers. The last segment is the commercial urine, or scent, collection operations. These operations are found to stand alone or co-exist with other operational segments, where the urine is collected from males and females to sell as a hunting attractant.

[1] "Cervid." The American Heritage® Science Dictionary. Houghton Mifflin Company. 20 Jul. 2007. Dictionary.com http://dictionary.reference.com/browse/cervid

Figure 1: Number of Cervid Farms by State.



Methodology

As previously mentioned, the primary objective of this study is to estimate the economic impact of the United States cervid farming industry. In order to do this, a survey instrument was developed to collect detailed operational information from industry participants. This information was then combined with the inventory of cervid farms to analyze the production side of the industry. In addition, an analysis was performed to determine the impact of hunters, but only the portion of hunters who are related to the cervid farming industry. The production and hunting components were then combined to estimate the economic impact of the cervid farming industry.

Data Collection

During the late summer and early fall of 2006, background information to develop the survey was gained through site visits to cervid farms across the nation. Interviews from these visits provided a base set of information that was then utilized to develop the survey instrument. The survey was then reviewed by industry participants, revised, and sent to over 700 members of NADeFA® and 1,300 members of the Texas Deer Association (TDA) over the fall of 2006 to early 2007. Overall, the extensive survey achieved a response rate of 14 percent. These memberships were selected to participate in this study because they represent all facets of the cervid farming industry.

Survey Development

The actual survey instruments are contained in Appendix A (NADeFA®) and Appendix B (TDA). For the purposes of the survey, the cervid farming industry was segmented into three operational structures: breeding only, breeding and hunting, and hunting only operations. Breeding only operations were defined as those that only involve the scientific breeding and rearing of cervids for the purpose(s) of breeding stock, commercial venison, or commercial urine collection. Hunting only operations relate to only those hunting preserves that purchase cervids from breeding operations as stockers or as breeding stock for release into the preserve. Operations that manage their deer populations by selective harvest and nutritional supplements, rather than supplementing the natural genetics with deer released from breeding operations, are not included in this category. Breeding and hunting operations represent those that engage in breeding activities while also utilizing their own breeding stock, or purchased breeding stock, to supplement the genetics and/or populate their hunting preserve.

While a majority of the industry are whitetail deer producers, a variety of cervid species are raised as well, including elk, red deer, mule deer, sika, pere david's, reindeer, axis, fallow, and muntjak. The surveys proved to be quite extensive, as they were designed to represent producers of all of these cervid species and operational segments. For breeding operations, the survey included questions regarding the operation in general, herd inventory, purchases, sales, capital expenditures, veterinary expenditures, labor, feeding rates and expenditures, utilities, and other miscellaneous expenses. For hunting operations, the base operational questions remained the same, however, hunting related questions were included as well, such as the number of hunters, harvest rate, percentage of herd from breeding operations, hunt revenues, processing, and taxidermy.

Figure 2: Typical Fenced Paddock.

Survey Results

General Operations

Of the 302 respondents, 61 percent were breeding only operations, 32 percent were breeding and hunting operations, and 7 percent were hunting only operations. Respondents represented 26 of the 48 states that have some type of cervid operation. When combining all survey respondents, operations have been in business, on average, since 1999.

From the NADeFA® survey results, the average whitetail deer breeding operation reported a total of 82 deer, on close to 25 acres. Of these, 28 were bucks, 28 were does, and 26 were fawns. In 2005, bred does had an average of 1.24 fawns each, which increased to 1.31 for the 2006 fawning season. Average annual mortality rate was reported to be 9.6 percent. For comparison, whitetail breeding operations from the Texas survey were slightly larger, averaging 114 head, on a little more than 64 acres. Of these, 42 were bucks, 44 were does, with the remainder being fawns. Bred does averaged 1.27 fawns each in 2005 and 1.37 in 2006, slightly higher than the national results. Overall herd mortality rate was reported to be 5.7 percent.

Table 1 above contains a summary of the average operational costs across all survey respondents. A quick glance through the table reveals expected differences across operations for general expenditures. Breeding and hunting operations displayed the largest footprint, around 1,700 acres, as expected. Breeding only operations were the smallest, averaging around 20 acres in pens. Pens, in this sense, are typically described as a high fenced paddock, as shown in Figure 2. For those pens holding bucks or bulls, a protective screening is often used in conjunction with the fence to keep an antler from hooking in the fence accidentally. In addition, screening may be used as a visual barrier, particularly if the operation is near a road, to shield the deer from view from passers-by.

Breeding and hunting operations had more area devoted to breeding pens, more pens overall, and more deer (Table 2) than breeding only operations. This was expected as the breeding and hunting operations supply their hunting operation from their breeding operation, and are not necessarily relying on sales or transfers to move deer off the operation.

The results indicate expenditures on lodges, fencing, and improvements were the top three in terms of the capital cost for both breeding and hunting and hunting only operations, while breeding operations spent the most on fencing, buildings, and improvements. The category of improvements includes expenditures on land clearing, roads, tanks/ponds, and forage development among others. Large equipment, ranch vehicles, and implements were reported as the highest equipment expenditures across all three types of operations. Of all the respondents, 49 percent reported hiring labor, while 43 percent reported outsourcing labor and/or consulting needs. Breeding and hunting operations reported using four times the amount of outsourced services than breeding only operations, or $16,456 versus $4,042. Examples of outsourced services include those of operational management and or nutritional consulting, bottle feeding services for newborns, annual herd maintenance/vaccination services, and accounting services.

Figure 3 provides a summary of expenditures for a typical breeding operation. Survey categories, such as those shown in Table 1, were combined into four primary expense categories: capital, operational, feed, and general. Figure 3 illustrates the annual expenses for breeding operations. Operational expenditures include items such as supplies, labor,

utilities, insurance, advertising, and travel. Capital expenses refer to annualized capital costs for items such as land, improvements, fencing, buildings, breeding stock, feeding equipment, ATV's, and implements. Feed refers to the annual feed costs, including supplemental feed, hay, and bottle feeding supplies. Lastly, General costs cover the remainder of expenditures on items such as food plots, artificial insemination, veterinary, and disease monitoring.

Production

Table 2 contains a summary of production data across all respondents. Feed represents a little over 11 percent of total annual expenditures for breeding operations. From venison production to breeding stock operations, proper nutrition is essential to the physical health, development, and overall well being of all cervids. For breeding only operations with whitetails, 53 percent of respondents indicated bottle feeding their fawns, while only 29 percent of breeding and

* Insufficient results

hunting operations did. Of all species, bottle feeding is primarily practiced with whitetail fawns. Other species will not typically incur such management practices, where bottle feeding may only be utilized for orphaned or sick young.

On average, adult whitetail males were fed close to 4 pounds of supplemental feed per day, while elk consumed slightly over 6 pounds. All of the reported species were fed a protein concentrate and hay. Hay costs were extremely high during the study period due to severe drought conditions across most of the southern plains. In addition to purchased feed, 74 percent of all respondents reported planting food plots on their operations, ranging from half an acre to 500 acres.

When combining results, 70 percent of all breeding or breeding and hunting operation respondents indicated some type of breeding stock purchase. This would include purchases of breeder males, stocker males, bred females, open females, fawns, or semen straws. For whitetail, breeder bucks were the highest dollar expense, costing close to $21,000 each on average.

Hunting Operations

Operations with hunting reported other expenses in addition to those of breeding operations. Seventy-six percent of all respondents of operations that reported to be involved in hunting had a lodge on the premises for their clients. In addition to the roughly $170,000 cost of the lodge, these operations also accrued expenses to maintain and supply the lodge. Labor costs were reported to be higher than those of breeding operations due to an overall larger operation, as well as seasonal hunting guides. Food plots in the hunting areas tended to be larger, along with more feeders, waterers, and fencing, all contributing to the higher reported expenses. Although the majority of hunting operations accepted paying clients and corporate clients, 14 percent reported their hunting operation as personal use only. Of the whitetail hunting operations reporting, respondents estimated an average of 49 percent of the deer in their hunting areas are from breeding operations. Of all the respondents, 49 percent reported hiring labor, while 43 percent reported outsourcing labor and/or consulting needs. For breeding operations, those hiring salaried employees reported an annual expense in the mid $20,000 range. This expense increased to the mid $30,000 range for breeding and hunting operations. On the whole, labor hired on an hourly basis tended to be more prevalent than salaried labor.

Feed was the third largest expense category, representing a little over 11 percent of annual expenditures for breeding operations. Although it's not the largest expense category, feeding is considered to be one of the most important aspects of all operations. From venison production to breeding stock operations, proper nutrition is essential to the physical health, development, and overall well being of all cervid operations. For fawns, 45 percent of respondents indicated bottle feeding their young. Typical products used for bottle feeding ranged from goat's milk to different brands of milk replacer. On average, adult whitetail males were fed close to 4 pounds of supplemental feed per day, while elk consumed slightly over 6 pounds. Respondents indicated paying a little over $300 per ton for supplemental feed, while hay costs averaged around $240 per ton. In addition to purchased feed, 74 percent of all respondents reported planting food plots on their operations, ranging from half an acre to 500 acres.

Economic Impact

IMPLAN® (Impact Analysis for Planning), an input/output model, was used to estimate the economic impact of the cervid farming industry on the national economy. Originally developed by the USDA Forest Service, the IMPLAN model is now managed and maintained by the Minnesota IMPLAN Group (MIG). The model is, arguably, the most used and cited model for performing economic impact analyses in the United States.

The IMPLAN model is driven by purchases of final goods and services in a certain region, such as a state, a group of states, or the entire nation. These purchases represent the dollar value of the increase in finished goods and services demanded, and create an impact that ripples throughout the economy.

Industries produce goods and services for final use and purchase goods and services from other industries. These other producers and industries buy goods and services as well, which IMPLAN designates as indirect purchases. In addition, each step along the cycle pays wages and salaries to employees, who, in turn, make additional expenditures into the economy of the region.[2]

In determining the overall economic impact of an industry, the IMPLAN model uses a set of multipliers, separated by sector, to estimate the direct, indirect, and induced effects (induced being effects of household spending) of the economic cycle. Over 500 sector codes are included in the IMPLAN model, where each code represents a unique industrial sector that a specific product or category of products is represented by. The multipliers that are derived for each sector quantify the ripple effects of a dollar increase in final demand, thus resulting in an estimation of the economic impact.[3]

Cervid Industry

In determining the economic impact of the cervid farming industry, the categories of the survey were prepared for input into the IMPLAN model. This was accomplished by extrapolating the survey results against the inventory of operations to arrive at total industry expenditures for each category. These totals represent the value of final goods and services demanded by the industry, and were the baseline inputs for the IMPLAN model. Categories from the extrapolated survey results, such as supplemental feed or fencing, are then assigned a sector code according to the underlying industry the category relates to. Table 3 provides an example of category inputs and their multipliers from IMPLAN, with each category belonging to a different sector. Differences between the multipliers for each category demonstrate how dollars move throughout different industries. For instance, a $1 million change in final demand for supplemental feed will generate a total of $2.67 million in total industry output, $1.53 million in value added economic activity, and will support 24.34 jobs. In this example, total industry output would include the output generated by the supplemental feed industry and those industries that supply it. Value added from this industry includes employee compensation, proprietary income, other proprietor income, and indirect business taxes that are generated.[4] The employment multiplier represents the number of jobs that are supported per million dollar change in final demand.

Large equipment	3.02	1.29	15.79
ATV's	2.73	1.59	22.96

Hunter Expenditures

An additional component in determining the economic impact of the industry is to evaluate and include the role of hunter expenditures in the consumption of industry products. Not all hunting is related to cervid farming, but some is, therefore it is important to include only that which is related to this industry. In other words, the hunting product of cervid farming is a small part of overall cervid hunting in the United States. Yet the hunting component or economic activity associated with deer farming is an important part of the economic activity generated by the cervid farming industry. While overall hunter numbers in the United States are down, the demand for trophy hunting appears to be increasing. Dollars spent on hunting, assorted gear, and travel continue to grow. Time is increasingly the limiting factor for many industry participants, as they have the money to participate, but not the time to invest in traditional hunting. The growth of this segment of the industry is expected to continue, therefore, it is important to include this aspect of the industry in this study.

In order to determine this impact, the number of hunters per operation was taken from the survey, extrapolated against all hunting operations, and combined with a report that outlines hunting expenditures on a per hunter basis. This report, entitled the "Economic Importance of Hunting in America",[5] was based on the 2001 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation survey conducted by the U.S. Fish and Wildlife Service and the U.S. Census Bureau. These retail expenditures were then combined with other hunt related expenditures, such as trophy and processing fees, and assigned sector codes for the IMPLAN model. When totaled, less than 1 percent of the report's estimated 11 million deer hunters are related to the cervid farming industry. However, this small percentage of hunters account for over 2 percent of the report's estimated $10 billion in retail, travel, and hunt related expenditures.

Results

Table 4 below provides a summary of the economic impact of the industry. Cervid operations generate an estimated $893.5 million in direct expenditures into the U.S. economy. This value represents the estimated increase in final demand of all goods and services consumed by the industry. As these direct expenditures ripple throughout the economy, the cervid farming industry generates an estimated $2.3 billion of total industry output for all industries that supply the cervid farming industry. These industries include feed suppliers, farm and ranch supply stores, veterinary services, medical and sedation product suppliers, construction, utilities, advertising, insurance, and numerous others. Hunters contribute an additional $241 million in direct economic impacts through retail and hunt related expenditures, which generates a total of $756.9 million of total industry output.

When combined, the cervid farming industry generates $3 billion of economic activity and output in the U.S. economy. The industry provides the economic activity that supports 29,199 jobs in the economy, most of which are located in rural areas of the nation. If this industry were to disappear, these jobs would have to find support from some other sector of the economy. Unfortunately, not every segment of the industry could be analyzed. Insufficient industry and survey data limited analysis to only the operational aspects of both the venison and scent collection industries, as production and retail revenues were excluded from the analysis.

[5] "Economic Importance of Hunting in America." Produced by Southwick Associates, Inc. for the International Association of Fish and Wildlife Agencies, 2002. Available online, accessed August 10, 2006. http://www.southwickassociates.com/freereports/default.aspx

Table 4: Economic Impact of the Cervid Farming Industry.

	Direct	Output	Value Added	Employment
All Operations	893,501,559	2,333,462,511	1,276,311,405	21,070
Hunters	241,042,970	756,897,725	358,602,855	8,129
Total	1,134,544,528	3,090,360,236	1,634,914,260	29,199

Conclusion

With over 7,000 operations and 2,000 hunting preserves, the cervid farming industry has an established presence across the nation. The majority of these operations are located in rural areas of the nation. In addition, while traditional forms overwhelmingly dominate the hunting industry, the small niche of hunters this market serves continues to increase. This increase in demand is fueling the growth in the breeding industry. Over $1.1 billion in direct expenditures are poured into the U.S. economy each year by commercial farming operations and sportsmen related to this industry. In turn, this generates $3 billion of economic activity while supporting 29,199 jobs. All told, these results highlight the fact that the cervid farming industry continues to be a vital contributor to the rural economies of the United States.

Appendix A: National Cervid Industry Survey

National Cervid Industry - Economic Impact Survey

Instructions are provided at the end of this survey. Include annualized 2005 figures where appropriate.

Please indicate type of operation (check all that apply)
Cervid Breeding (includes venison and urine collection) ☐ **Cervid Hunting** ☐ **Cervid Breeding and Hunting** ☐

Cervid Breeding

***Please select type of cervid breeding operation*:** **Breeding only** ☐ **Commercial Venison** ☐ **Commercial Urine Collection** ☐

I. Operation

1. Year started: _____ 2. State: _____
3. Total acreage: _____ acres 4. Area under high fence: _____ acres
5. Area of land purchased: _____ acres 5a. Purchase value: $_____ (per acre)

National Cervid Industry - Economic Impact Survey
North American Deer Farmers Association Members

****All information collected in this survey will remain <u>confidential</u>****

Survey Instructions

1. This survey is to be completed by cervid breeding operations (including venison production and urine collection operations), combination cervid breeding and hunting operations, and hunting operations that utilize outside cervid breeding operations as a genetic supplement for their cervid herd. All other industry participants may disregard this survey.
2. For the sections and categories below, please provide annualized 2005 records of actual or accurate estimates of expenditures rather than a range estimate of expenditures.
3. **For combination breeding and hunting operations, please separate breeding operation records from hunting operation records. Contact us for additional surveys if you have multiple permitted breeding and/or hunting operations.**
4. **It is important to use the provided categories for records for each section, rather than combining records from breeding and hunting operations and submitting that in a breeding or hunting category. Please provide an accurate estimate when your records do not match these categories.**
5. If a question does not apply to your operation, please indicate this with an "N/A" response.
6. Please indicate units (lbs, tons, gals, etc.) where applicable.
7. For further explanation of general and selected lines of the survey, please refer to the information below.

Cervid Breeding (Breeding only, Venison production, Urine Collection)

Please indicate the purpose of your breeding operation by checking all boxes that apply.

<u>I. Operation</u>: This category provides for a general overview of your operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Herd Inventory</u>: This category refers to your final 2005 cervid inventory and final 2005 purchases (please include number purchased with total cost) towards this inventory. *Annual mortality rate* refers to the annual mortality loss on entire herd, including the loss of fawns/calves after weaning. *Birth rate* refers to the number of surviving fawns/calves born per bred female, specifically, the total number of live fawns/calves at weaning divided by the total number of bred females (i.e. 1.5, 2.3, etc.).

<u>III. Facilities</u>: This category refers to your operational specific facilities. *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc.

<u>IV. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>V. Veterinary & Supplies</u>: *Annual cost of operating supplies* refers to the yearly expense for all operating supplies, such as office supplies, sedation supplies, AI supplies, etc. *Annual cost of medical supplies* refers to the yearly expense for medicine, syringes, etc. *Average cost per sedation* refers to the average expense of supplies and labor to sedate or dart an animal. *Number of necropsies performed* refers to the number of post mortality veterinary examinations performed to determine the cause of death. *Average cost per necropsy* refers to the average labor and labwork expense of performing a necropsy on a single animal. *Average cost per CWD test* refers to the average labor and labwork expense of performing a CWD test.

<u>VI. Labor</u>: This category refers to the labor expense for your breeding operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if paid labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense from outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VII. Utilities</u>: This category refers to the annual utilities expense for electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for your breeding operation.

<u>VIII. Miscellaneous Expenses</u>: *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for genetic display (horn molds, shed mounts, deceased buck mounts, etc.). *Annual regulatory expense* refers to the annual cost of regulatory operating permits, if applicable to your state. *Annual meat inspection expense* refers to the annual cost to venison production operations for state or federal meat inspection. *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>IX. Feeding</u>: This category relates to feeding rates of fawns/calves and adults in your operation. For those who bottle feed fawns/calves, please indicate the percent of all fawns/calves that are bottle fed for, the number of days of bottle feeding until weaned, the product used (i.e. goat milk, milk replacer, etc.), the per unit product price (please indicate units-gal, bags, lbs), and the number of units of this product used per fawn until weaning for each cervid species in your operation.

<u>X. Annual Sales</u>: This category relates to the final 2005 revenue inflows of your operation. Receipts are categorized for breeding operations, commercial venison operations, and commercial urine operations. Please separate records for each these categories that apply to your operation.

Cervid Hunting

Please indicate the purpose of your hunting operation by checking all boxes that apply

<u>I. Operation</u>: *Area of hunting operation* refers to the total acreage dedicated to your hunting operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Facilities</u>: *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc.

<u>III. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your breeding operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>IV. Supplies</u>: This category relates to final 2005 expenses for supplemental feed, corn, operating, and food and beverage supplies.

<u>V. Labor</u>: This category refers to the labor expense for your hunting operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if paid labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense for outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VI. Utilities</u>: This category refers to the annual utilities expense for electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for your hunting operation.

<u>VII. Miscellaneous Expenses</u>: *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for display. *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>VIII. Hunters</u>: *Total expense* refers to the cost of purchasing, sedating, and transporting cervids for release into hunting operation. *Average processing cost* refers to the cost of processing each harvested cervid. If in-house processing occurs, please provide an accurate estimate of this cost based on local processor costs. *Percent of all harvested seeking taxidermy services* relates to the percentage of all harvested cervids that will have some type of taxidermy service performed, such as a shoulder or full body mount. *Average taxidermy cost, per cervid* allows for the average per cervid expense of this service for the hunter from your local taxidermist.

We thank you in advance for taking the time to complete this survey. Upon completion, please return the survey with the enclosed envelope. Questions or requests for additional surveys may be directed to Brian Frosch at 888-890-5663.

Appendix B: Economic Impact Survey

Economic Impact Survey

Please indicate type of operation

Scientific Breeding Only ☐ **Scientific Breeding and Hunting** ☐ **Hunting only** ☐

Scientific Breeding

Instructions and clarification are provided at the end of this survey. For Hunting only operations, please skip to the hunting section. Include annualized 2005 figures where appropriate.

I. Operation

1. Year started: _____ 2. Area of breeding operation: _____ (acres)
3. Land purchased: _____ (acres) 3a. Purchase value: $_____ (per acre)
4. Land inherited: _____ (acres)

II. Herd Inventory (Final 2005 Inventory)

1. Total number of deer: _____
2. Number of breeder bucks: _____ 3. Number of stocker bucks: _____ 4. Does: _____
5. Fawns, 2005: _____ 5a. Fawning rate (surviving at weaning): _____ (fawns per doe)
6. Fawns, 2006: _____ 6a. Fawning rate (surviving at weaning): _____ (fawns per doe)
7. Annual herd mortality rate (including fawns after weaning): _____ %
8. Annual sales (Final 2005 figures) 9. Annual purchases (Final 2005 figures)

Breeder bucks (#):	Total receipts: $	Breeder bucks (#):	Total cost: $
Stocker bucks (#):	Total receipts: $	Open does (#):	Total cost: $
Open does (#):	Total receipts: $	Bred does (#):	Total cost: $
Bred does (#):	Total receipts: $	Buck fawns (#):	Total cost: $
Buck fawns (#):	Total receipts: $	Doe fawns (#):	Total cost: $
Doe fawns (#):	Total receipts: $	Semen Straws (#):	Total cost: $
Semen Straws (#):	Total receipts: $		

III. Facilities

1. Number of pens: _____ 2. Area of pens: _____ (acres)
3. Capital cost of fencing: $_____ 4. Capital cost of shelters: $_____
5. Capital cost of improvements: $_____
6. Capital cost of buildings: $_____ 7. Capital cost of working pens: $_____
8. Do you have a handling facility? ☐ Yes ☐ No 8a. If yes, capital cost of handling facility: $_____
9. Approximate area of food plots: _____ (acres)
   9a. Annual cost of seed: $_____
   9b. Annual cost of fertilizer: $_____
10. Annual cost of maintenance and repair: $_____

IV. Equipment

1. Purchase price of all large equipment, combined (i.e. tractor + bobcat): $_____
2. Purchase price of all ATV(s), combined: $_____
3. Purchase price of all ranch vehicle(s), combined: $_____
4. Purchase price of all implements, combined: $_____
5. Purchase price of all trailer(s)/transport crate(s), combined: $_____
6. Purchase price of all bulk feed bin(s), combined: $_____
7. Purchase price of all feeding equipment, combined: $_____

Scientific Breeding, continued

8. Purchase price of all watering equipment, combined: $_____
9. Purchase price of all video equipment, combined: $_____
10. Annual cost of rental equipment: $_____
11. Purchase price of semen storage tank(s): $_____
12. Purchase price of dart gun/sedation equipment: $_____

V. Veterinary & Supplies

1. Annual cost of operating supplies: $_____ 2. Annual cost of feed and hay: $_____
3. Annual cost of medical supplies: $_____ 4. Annual veterinary expense: $_____
5. Annual number of sedations: _____ (per doe) 6. Annual number of sedations: _____ (per buck)
7. Average cost per sedation: $_____ 8. Number of does AI'd: _____
9. Number of necropsies performed: _____ 9a. Average cost per necropsy: $_____
10. Number of CWD tests performed: _____ 10a. Average cost per CWD test: $_____
11. Number of deer DNA certified: _____ 11a. Annual cost for DNA certification: $_____

VI. Labor

1. Number of employees: 1a. Paid salary: _____ 1b. Paid hourly: _____
2. Total wages paid: 2a. Salaries: $_____ 2b. Hourly: $_____
3. Annual expense from outsourced services: $_____

VII. Utilities

1. Annual cost of utilities: $_____
2. Annual cost of fuel: $_____

VIII. Miscellaneous Expenses

1. Annual insurance expense: $_____
2. Annual advertising/marketing expense (includes taxidermy services): $_____
3. Annual travel expense: $_____
4. Annual property tax: $_____

IX. Feeding

Fawns

1. Do you bottle feed your fawns? ☐ Yes (continue with 1a-1e) ☐ No (skip to 2)
   1a. If yes, what percent of all fawns? _____% 1b. Average bottle feeding days until weaning: _____
   1c. What product do you use? _____
   1d. Units fed per fawn until weaning: _____ (gal/bags/lbs) 1e. Product price: $_____ (per gal/bag/lb)
2. After weaning: 2a. Approximate daily feed rate: _____ (lbs per fawn) 2b. Feed price: $_____ (per bag/ton)
   2c. Approximate alfalfa/hay daily feed rate: _____ (lbs per fawn) 2d. Alfalfa/hay price: $_____ (per bale)
   2e. Average bale weight: _____lbs

Does

1. Approximate daily feed rate: _____ (lbs per doe) 2. Feed price: $_____ (per bag/ton)
3. Approximate alfalfa/hay daily feed rate: _____ (lbs per doe)

Bucks

1. Approximate daily feed rate: _____ (lbs per buck) 2. Feed price: $_____ (per bag/ton)
3. Approximate alfalfa/hay daily feed rate: _____ (lbs per buck)

Hunting

Instructions and clarification are provided at the end of this survey. For combination Scientific Breeding & Hunting operations, please separate hunting expenses from breeding expenses. Include annualized 2005 figures where appropriate.

What is the purpose of your hunting operation? ☐ Personal use only ☐ Corporate clients, no fee ☐ Paying clients

I. Operation

1. Year started: _____ 2. Area of hunting operation: _____ (acres)
3. Land purchased: _____ (acres) 3a. Purchase value: $_____ (per acre)
4. Land inherited: _____ (acres)

II. Facilities

1. Capital cost of lodge(s): $_____
2. Capital cost of fencing: $_____
3. Capital cost of improvements: $_____
4. Capital cost of buildings: $_____
5. Annual cost of maintenance and repair: $_____
6. Approximate area of food plots: _____ (acres)
   6a. Annual cost of seed: $_____
   6b. Annual cost of fertilizer: $_____

III. Equipment

1. Purchase price of all large equipment combined (i.e. tractor + bobcat): $_____
2. Purchase price of all ATV(s), combined: $_____
3. Purchase price of all ranch vehicle(s), combined: $_____
4. Purchase price of all implements, combined: $_____
5. Purchase price of all trailer(s)/transport crate(s), combined: $_____
6. Purchase price of all bulk feed bin(s), combined: $_____
7. Purchase price of all feeding equipment, combined: $_____
8. Purchase price of all watering equipment, combined: $_____
9. Purchase price of all video equipment, combined: $_____
10. Annual cost of rental equipment: $_____
11. Purchase price of dart gun/sedation equipment: $_____
12. Purchase price of cooler/freezer equipment: $_____
13. Purchase price of other equipment: $_____

IV. Supplies

1. Annual amount of protein feed purchased: _____ (tons) 1a. Protein feed unit price: $_____ (per bag/ton)
2. Annual amount of corn purchased: _____ (tons) 2a. Corn unit price: $_____ (per bag/ton)
3. Annual cost of operating supplies for lodge: $_____
4. Annual cost of food and beverages for lodge: $_____

V. Labor

1. Number of employees: 1a. Salary: _____ 1b. Hourly: _____
2. Total wages paid: 2a. Salaries: $_____ 2b. Hourly: $_____
3. Annual expense from outsourced services: $_____

Hunting, continued

VI. Utilities

1. Annual cost of utilities: $_____
2. Annual cost of fuel: $_____

VII. Miscellaneous Expenses

1. Annual insurance expense: $_____
2. Annual advertising/marketing expense (includes taxidermy services): $_____
3. Annual travel expenses: $_____
4. Annual property tax: $_____
5. Other annual miscellaneous expenses: $_____

VIII. Hunters

1. Annual number of hunters: _____
2. Total annual deer harvest: _____
3. Approximate total number of deer in hunting area: _____
   3a. Approximate percentage of total deer in the hunting area that are from breeding: _____
4. Annual number of stocker bucks released from breeding operation into hunting operation: _____
5. Annual number of does released from breeding operation into hunting operation: _____
6. Annual number of stocker bucks purchased for release into hunting operation: _____
   6a. Total expense: $_____
7. Annual number of does purchased for release: _____
   7a. Total expense: $_____
8. Annual number of does harvested: _____
   8a. Total receipts from doe hunts: $_____
9. Annual number of management bucks harvested: _____
   9a. Total receipts from management buck hunts: $_____
10. Annual number of trophy bucks harvested: _____
    10a. Total receipts from trophy buck hunts: $_____
11. Average processing cost: $_____ (per deer)
12. Approximate percentage of harvested bucks seeking taxidermy services: _____%
13. Average taxidermy cost: $_____ (per deer)

APPENDIX

Economic Impact Survey
Texas Deer Association Members

****All information collected in this survey will remain <u>confidential</u>****

Survey Instructions

1. This survey is to be completed by scientific breeding operations, combination scientific breeding and hunting operations, and hunting operations that utilize outside scientific breeding operations as a genetic supplement for their deer herd. All other industry participants may disregard this survey.
2. For the sections and categories below, please provide annualized 2005 records of actual or accurate estimates of expenditures rather than a range estimate of expenditures.
3. For those who have multiple facilities under separate permits (uniquely identified), please contact us for additional surveys for each operation.
4. **It is important to separate records for each facility, and between hunting and breeding operations. Contact us for additional surveys if you have multiple permitted breeding and/or hunting operations.**
5. **It is also important to use the provided categories for records for each section, rather than combining records from breeding and hunting operations and submitting that in a breeding or hunting category. Please provide an accurate estimate when your records do not match these categories.**
6. If a question does not apply to your operation, please indicate this with an "N/A" response.
7. Please indicate units (lbs, tons, gals, etc.) where applicable.
8. For further explanation of general and selected lines of the survey, please refer to the information below.

Scientific Breeding

<u>I. Operation</u>: *Area of breeding operation* refers to the total acreage dedicated to your breeding operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Herd Inventory</u>: This category refers to your herd inventory, fawning rate, purchases and sales towards your inventory for 2005, and number the of fawns born and fawning rate for 2006. *Annual herd mortality rate* refers to the annual mortality loss on the total breeding herd, including loss of fawns after weaning. *Fawning rate* refers to the number of surviving fawns born per doe, specifically, the total number of live fawns at weaning divided by the total number of bred does (i.e. 0.7, 1.5, 2.3, etc.).

<u>III. Facilities</u>: *Area of pens* refers to the total acreage enclosed by all pens combined. *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>IV. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your breeding operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>V. Veterinary & Supplies</u>: *Annual cost of operating supplies* refers to the yearly expense for all operating supplies, such as office supplies, sedation supplies, AI supplies, etc. *Annual cost of medical supplies* refers to the yearly expense for medicine, syringes, etc. *Annual number of sedations* refers to the average annual number of sedations on a per doe/buck basis. *Average cost per sedation* refers to the average expense of supplies and labor to sedate or dart a deer. *Number of necropsies performed* refers to the number of post mortality veterinary examinations performed to determine the cause of death. *Average cost per necropsy* refers to the average labor and labwork expense of performing a necropsy on a single deer. *Average cost per CWD test* refers to the average labor and labwork expense of performing a CWD test.

<u>VI. Labor</u>: This category refers to the labor expense for your breeding operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense from outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VII. Utilities</u>: This category refers to the annual utilities expense for the annual electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for breeding operations.

<u>VIII. Miscellaneous Expenses</u>: *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for genetic display (horn molds or shed mounts, or deceased buck mounts). *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc.

<u>IX. Feeding</u>: This category relates to feeding rates for fawns, bucks, and does. For those who bottle feed fawns, please indicate the percent of all fawns that are bottle fed, number of days of bottle feeding until weaning, the product used (i.e. goat milk, milk replacer, etc.), units of this product used per fawn until weaning, the per unit product price (please indicate units-gal, bags, lbs).

Hunting

<u>I. Operation</u>: *Area of hunting operation* refers to the total acreage dedicated to your hunting operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Facilities</u>: *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>III. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your breeding operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>IV. Supplies</u>: This category relates to supplemental feed, corn, operating, food, and beverage supplies for hunting operations on an annualized basis.

<u>V. Labor</u>: This category refers to the labor expense for your breeding operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense for outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VI. Utilities</u>: This category refers to the annual utilities expense for the annual electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for hunting operations.

<u>VII. Miscellaneous Expenses</u>: *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for display. *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc.

<u>VIII. Hunters</u>: This category relates to the annual number of hunters, number of deer harvested, number of deer purchased and/or released into hunting operation, and the expenses and receipts from hunting. *Total expense* in lines 6a & 7a refer to the cost of purchasing, sedating, and transporting deer for release into hunting operation. *Average processing cost* refers to the cost of processing each harvested deer. If it is processed in-house, please provide an accurate estimate of this cost from based on local processor costs. Line 12 relates to the percentage of harvested deer that will have some type of taxidermy service performed, such as a shoulder or full body mount. Line 13 allows for the average per deer expense of this service for the hunter.

We thank you in advance for taking the time to complete this survey. Upon completion, please return the survey with the enclosed envelope no later than November 10th. Questions or requests for additional surveys may also be directed to Brian Frosch at 888-890-5663.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact. This initiative petition prohibits confined big game hunting in Missouri.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated the proposed amendment would prohibit the shipment or transportation of big game species to or from Missouri destinations, with certain exceptions. It gives the Missouri Conservation Commission primary authority over the regulation of privately owned big game species, including rulemaking authority. It also states that confined big game killing or the owning, possessing, confining, transporting, breeding or raising of privately owned big game species shall not be construed as hunting, farming or ranching for any purpose under the Constitution or any law. Information or data related to any program related to diseases of big game species is considered a public record and subject to disclosure.

Budget and Planning defers to the Missouri Conservation Commission for an estimate of the proposal's fiscal impact on the Commission or the Missouri Department of Conservation (MDC). Budget and Planning also defers to the Missouri Department of Agriculture (MDA) for an estimate of the proposal's potential fiscal impact on MDA. Budget and Planning does not have sufficient information to estimate the potential fiscal impact the proposal may have on state or local government revenues derived from practices that would be regulated, restricted, or prohibited under the proposal.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated the proposed amendment proposed in this petition will have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no anticipated fiscal impact for their college.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Metropolitan Zoological Park and Museum District** indicated they do not believe this initiative petition will have a financial impact on their district.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, University of Missouri, St. Louis Community College, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** and the **Missouri Joint Municipal Electric Utility Commission.**

Fiscal Note Summary

State governmental impact is unknown. Local governmental entities expect no costs or savings.

JOHN R. ASHCROFT
SECRETARY OF STATE
STATE OF MISSOURI

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Marc Ellinger regarding a proposed constitutional amendment to Article IV, version 3 (2018-188)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Marc Ellinger on March 28, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Joshua D. Hawley

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

INITIATIVE PETITION

To the Honorable John R. Ashcroft, Secretary of State for the State of Missouri:

We, the undersigned, registered voters of the state of Missouri and _____ County (or city of St. Louis), respectfully order that the following amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 6th day of November, 2018, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or city of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

RECEIVED
MAR 28 2017

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article IV is amended by adding one new section to be known as Section 40(c), to read as follows:

40(c). 1. The provisions of Section 40(c) shall be known as the Native Missouri Wildlife Conservation Amendment, and its purpose is to prohibit the shipment or transportation of big game species to or from Missouri destinations. It shall be the public policy of this state to protect the health of Missouri's livestock and wildlife by changing the requirements related to the transport of captive big game species. Transport of big game species into and inside Missouri presents a significant threat to the safety, health and welfare of wildlife across Missouri due to the risk of introducing disease. Confined big game killing or the owning, possessing, confining, transporting, breeding, or raising of privately owned big game species shall not be construed as hunting, farming or ranching for any purpose under this Constitution or any law.

2. Upon the effective date of this Amendment the delivery, receipt, shipping, or transportation of any big game species to or from any destination within Missouri shall be prohibited. The only exceptions to this general prohibition are as follows:

a. Prior to and on November 7, 2019, a Missouri facility legally confining big game species with all required permits in place on November 6, 2018, and which continuously maintains all required permits, may deliver, ship or transport any big game species for which such facility maintains such permits, and any person engaged in the shipping to or from any such excepted facility however the shipping of such big game species into Missouri shall not be permitted under this exception;

b. When such big game species are being transported to or from any facility and will be held under the authority of the Missouri Conservation Commission or under the supervision of an authorized representative of: governmentally owned zoos or wildlife or research organizations; American Zoo and Aquariums Association accredited not-for-profit facilities; nationally accredited universities, colleges or, schools; incorporated cities, states or federal agencies for scientific research;

c. When such big game species are transported through Missouri in compliance with federal regulations, with both origin and destination outside of Missouri;

d. When such big game species are transported to any commercial slaughter facility operating under state or federal inspection for commercial meat production; or

e. When such big game species are transported, for treatment of illness or injury, between a veterinary facility and a facility authorized to possess privately owned big game species.

3. In addition to the authority vested in it by Section 40(a) of Article IV, the Missouri Conservation Commission shall have primary authority over the regulation of privately-owned big game species. The Missouri Conservation Commission may make such rules and regulations as may be deemed necessary for the enforcement of this Amendment.

4. Information or data in either paper or electronic form regarding any voluntary or mandatory program related to diseases of big game species shall be considered a public record and subject to disclosure except as or expressly permitted or required to be closed by federal law or this constitution.

5. Definitions.

a. "Big game species" as used in this amendment shall not include any livestock as defined in this Amendment, and shall include all of the following animals, either as live animals, embryos, ova, or semen: (a) all cervids and cervid hybrids including but not limited to white-tailed deer, elk, mule deer, red deer, fallow deer, sika deer and moose; (b) mountain goats, bighorn sheep, Dall's sheep, pronghorn, peccary, and javelina; and (c) any other ungulate (hooved animal) confined or bred primarily for confined big game killing and not for commercial meat production or other human use.

b. "Confined big game killing" as used in this amendment shall mean an act in which an owner, operator or agent of a big game preserve permits, allows, enables or facilitates the killing or attempted killing of big game species inside a big game preserve, but shall not include any act of a government employee or agent to control an animal population, to prevent or control diseases, or when government action is otherwise required or authorized by law.

c. "Livestock" as used in this Amendment, shall mean cattle, fully domesticated swine, fully domesticated sheep, fully domesticated goats, fully domesticated bison, fully domesticated ratite birds, fully domesticated rabbits, and fully domesticated horses, donkeys, mules, alpacas and llamas, where such fully domesticated animals are raised primarily for human use or consumption not including confined big game killing. Livestock shall also include embryos, ova, and semen of any designated animal in this definition.

d. "Big game preserve" as used in this amendment shall mean a facility confining privately-owned big game species within fencing designed or intended to reduce the ability of such privately-owned big game species to escape or to evade pursuit.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-188)

Subject

Initiative petition from Marc Ellinger regarding a proposed constitutional amendment to Article IV. (Received March 29, 2017)

Date

April 18, 2017

Description

This proposal would amend Article IV of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** the **Missouri Joint Municipal Electric Utility Commission,** and **Metropolitan Zoological Park and Museum District**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated this initiative petition will have a substantial negative impact on the cervid industry in Missouri.

The Agricultural and Food Policy Center at Texas A&M University conducted an economic impact study of the United States cervid farming industry in 2007 (attached) based on a survey of the deer farms in Texas and the elk producers located throughout the United States.

Based on the values provided by the Texas A&M study, and an estimated 225 cervid producers in Missouri, the industry has an estimated direct annual economic impact in Missouri of approximately $98 million. The number of people employed in the cervid industry in Missouri is estimated to be approximately 1,150 individuals. In addition, based on the study and 2007 property tax rates, the cervid industry pays approximately $700,000 annually in local property taxes.

They included the following information on the economic impact of the United States cervid farming industry:

Executive Summary

- The cervid farming industry is, perhaps, the fastest growing industry in rural America.
- Over 2,000 industry participants were surveyed, with a response rate of 14 percent.
- This survey, designed to estimate the economic impact of the industry, was performed in late 2006-early 2007.
- The average whitetail deer farm had 82 deer, composed of 28 males, 28 females, 26 fawns, and had an average birth rate of 1.31 fawns per doe in 2006.
- Breeding operations reported expenditures averaging $101,000 per year.
- The cervid farming industry has a direct economic impact of $893.5 million.
- When incorporating the indirect impacts of the industry, for example, the farm's expenditures on feed, veterinary supplies, fuel and other purchases, the total economic impact of the industry is $2.3 billion.
- One of the major customers of this industry is hunters. Estimating the impact of hunting dollars spent, with hunters as the consumer of cervid farming products, an additional $757 million is generated by the cervid farming industry.
- The total impact of the industry, combining the farming and hunting components, is $3.0 billion annually.
- The economic activity of the cervid farming industry supports 29,199 jobs, most of which are in rural America. If this industry did not exist, those jobs would have to be supported by some other economic activity.
- These results highlight the fact that the cervid farming industry is a growing and important industry in rural America.

Introduction

The cervid, or deer, farming industry is a vital and growing business in rural areas of the United States. As demographic and market forces tend to shift traditional revenue sources away from rural communities, their economies increasingly rely on new industries such as this one. As the industry has grown, participants and legislators have developed an interest in measuring the economic contribution of the industry on their respective communities. In addition, the industry is governed by a myriad of state and federal laws, regulations, and jurisdictions. Since the majority of industry regulation is left up to the states, a significant amount of variability in the regulations exists from state to state. This lack of consistency in laws and regulations may be a factor affecting future industry growth in some states. The rapid growth of the industry and an array of policy issues led the industry to request this study of the size and economic importance of the cervid farming industry. In 2006, the Agricultural and Food Policy Center (AFPC) at Texas A&M University was requested by former Texas Congressman Henry Bonilla to undertake this study. The primary objective of this study is to determine the economic impact of the United States cervid farming industry. Secondary objectives include providing a current description of typical industry participants and cost estimates for the major categories of expenses on cervid farming operations.

Cervid Industry

The term "cervid" refers to any one of the various members of the cervidae family. This family includes members such as whitetail deer, elk, fallow, reindeer, axis, sika, and red deer among others.[1]

Like any industry, the cervid farming industry involves producers and consumers. In general, the production side of the industry is comprised of breeding stock producers, trophy hunting preserves, commercial venison producers, and commercial scent collection. Some commercial production operations may take on a single segment, such as one producing and selling only breeding stock. Others may consist of any combination of these, such as an operation producing venison and velvet, while also collecting urine for scent sales. Consumers of the industry include hunters (for scent products and hunting) other breeders, and consumers of venison and related products (hides, velvet, shed antlers, etc.).

Figure 1 displays the estimated number of cervid farms per state. This inventory was compiled by the administrative staff at the North American Deer Farmers Association (NADeFA®) through contact with the appropriate state agency. Those states that did not have an exact count provided their best estimate. Across the nation, the total number of cervid farms was 7,828, with Pennsylvania and Texas home to around 1,000 farms each. The total number of hunting preserves is estimated at 2,639, yet this only represents an estimate of those that are related to the cervid farming industry. As an example of the growth the cervid farming industry is experiencing, there were 946 permitted breeding facilities in Texas in late summer 2006. However, when the analysis took place early in the spring of 2007, there were 1,006 permitted facilities. In addition, it is important to note that there are approximately 1,600 Amish operations included in the national total. For many in the Amish communities, deer breeding is another way to diversify their operations. A number of industry participants find that this form of farming provides an opportunity to turn a greater profit on a relatively small amount of acreage than traditional farming or ranching enterprises.

The trophy hunting segment of this industry relates only to those operations that purchase outright or release their own cervids into a hunting preserve. This segment represents the primary end market for the breeding stock industry. Trophy hunting, in this sense, involves hunting trophy cervids within high fenced hunting preserves. This generally occurs via 3-6 day hunt packages, where the hunter is provided lodging, meals, and a guided hunt for a set fee. Hunter expenditures included in this study only include those hunters that are related to this industry. In other words, hunters, in the context of this study, are only those that hunt at operations that either purchase or release deer from breeding operations into their hunting operations. Breeding operations represent the largest segment of the cervid farming industry. These operations raise and sell breeding stock to other industry breeders as well as hunting preserves. The commercial venison segment is similar to other food animal production operations, with fallow, elk, and red deer being the primary species reared. Cervids are raised to market age, processed, and the resulting venison is sold. In addition to venison, these operations may sell other co-products such as velvet, hides, and antlers. The last segment is the commercial urine, or scent, collection operations. These operations are found to stand alone or co-exist with other operational segments, where the urine is collected from males and females to sell as a hunting attractant.

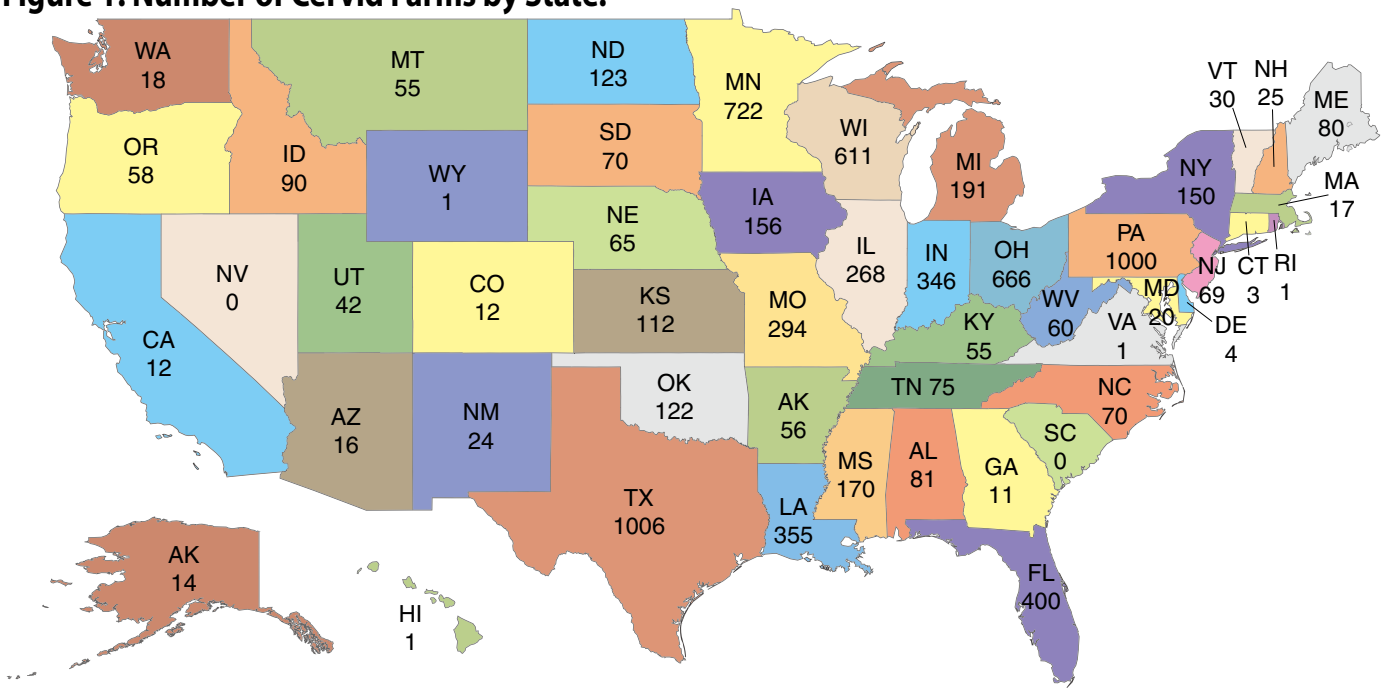
Figure 1: Number of Cervid Farms by State.



Methodology

As previously mentioned, the primary objective of this study is to estimate the economic impact of the United States cervid farming industry. In order to do this, a survey instrument was developed to collect detailed operational information from industry participants. This information was then combined with the inventory of cervid farms to analyze the production side of the industry. In addition, an analysis was performed to determine the impact of hunters, but only the portion of hunters who are related to the cervid farming industry. The production and hunting components were then combined to estimate the economic impact of the cervid farming industry.

Data Collection

During the late summer and early fall of 2006, background information to develop the survey was gained through site visits to cervid farms across the nation. Interviews from these visits provided a base set of information that was then utilized to develop the survey instrument. The survey was then reviewed by industry participants, revised, and sent to over 700 members of NADeFA® and 1,300 members of the Texas Deer Association (TDA) over the fall of 2006 to early 2007. Overall, the extensive survey achieved a response rate of 14 percent. These memberships were selected to participate in this study because they represent all facets of the cervid farming industry.

Survey Development

The actual survey instruments are contained in Appendix A (NADeFA®) and Appendix B (TDA). For the purposes of the survey, the cervid farming industry was segmented into three operational structures: breeding only, breeding and hunting, and hunting only operations. Breeding only operations were defined as those that only involve the scientific breeding and rearing of cervids for the purpose(s) of breeding stock, commercial venison, or commercial urine collection. Hunting only operations relate to only those hunting preserves that purchase cervids from breeding operations as stockers or as breeding stock for release into the preserve. Operations that manage their deer populations by selective harvest and nutritional supplements, rather than supplementing the natural genetics with deer released from breeding operations, are not included in this category. Breeding and hunting operations represent those that engage in breeding activities while also utilizing their own breeding stock, or purchased breeding stock, to supplement the genetics and/or populate their hunting preserve.

While a majority of the industry are whitetail deer producers, a variety of cervid species are raised as well, including elk, red deer, mule deer, sika, pere david's, reindeer, axis, fallow, and muntjak. The surveys proved to be quite extensive, as they were designed to represent producers of all of these cervid species and operational segments. For breeding operations, the survey included questions regarding the operation in general, herd inventory, purchases, sales, capital expenditures, veterinary expenditures, labor, feeding rates and expenditures, utilities, and other miscellaneous expenses. For hunting operations, the base operational questions remained the same, however, hunting related questions were included as well, such as the number of hunters, harvest rate, percentage of herd from breeding operations, hunt revenues, processing, and taxidermy.

Figure 2: Typical Fenced Paddock.

Survey Results

General Operations

Of the 302 respondents, 61 percent were breeding only operations, 32 percent were breeding and hunting operations, and 7 percent were hunting only operations. Respondents represented 26 of the 48 states that have some type of cervid operation. When combining all survey respondents, operations have been in business, on average, since 1999.

From the NADeFA® survey results, the average whitetail deer breeding operation reported a total of 82 deer, on close to 25 acres. Of these, 28 were bucks, 28 were does, and 26 were fawns. In 2005, bred does had an average of 1.24 fawns each, which increased to 1.31 for the 2006 fawning season. Average annual mortality rate was reported to be 9.6 percent. For comparison, whitetail breeding operations from the Texas survey were slightly larger, averaging 114 head, on a little more than 64 acres. Of these, 42 were bucks, 44 were does, with the remainder being fawns. Bred does averaged 1.27 fawns each in 2005 and 1.37 in 2006, slightly higher than the national results. Overall herd mortality rate was reported to be 5.7 percent.

Table 1 above contains a summary of the average operational costs across all survey respondents. A quick glance through the table reveals expected differences across operations for general expenditures. Breeding and hunting operations displayed the largest footprint, around 1,700 acres, as expected. Breeding only operations were the smallest, averaging around 20 acres in pens. Pens, in this sense, are typically described as a high fenced paddock, as shown in Figure 2. For those pens holding bucks or bulls, a protective screening is often used in conjunction with the fence to keep an antler from hooking in the fence accidentally. In addition, screening may be used as a visual barrier, particularly if the operation is near a road, to shield the deer from view from passers-by.

Breeding and hunting operations had more area devoted to breeding pens, more pens overall, and more deer (Table 2) than breeding only operations. This was expected as the breeding and hunting operations supply their hunting operation from their breeding operation, and are not necessarily relying on sales or transfers to move deer off the operation.

The results indicate expenditures on lodges, fencing, and improvements were the top three in terms of the capital cost for both breeding and hunting and hunting only operations, while breeding operations spent the most on fencing, buildings, and improvements. The category of improvements includes expenditures on land clearing, roads, tanks/ponds, and forage development among others. Large equipment, ranch vehicles, and implements were reported as the highest equipment expenditures across all three types of operations. Of all the respondents, 49 percent reported hiring labor, while 43 percent reported outsourcing labor and/or consulting needs. Breeding and hunting operations reported using four times the amount of outsourced services than breeding only operations, or $16,456 versus $4,042. Examples of outsourced services include those of operational management and or nutritional consulting, bottle feeding services for newborns, annual herd maintenance/vaccination services, and accounting services.

Figure 3 provides a summary of expenditures for a typical breeding operation. Survey categories, such as those shown in Table 1, were combined into four primary expense categories: capital, operational, feed, and general. Figure 3 illustrates the annual expenses for breeding operations. Operational expenditures include items such as supplies, labor,

utilities, insurance, advertising, and travel. Capital expenses refer to annualized capital costs for items such as land, improvements, fencing, buildings, breeding stock, feeding equipment, ATV's, and implements. Feed refers to the annual feed costs, including supplemental feed, hay, and bottle feeding supplies. Lastly, General costs cover the remainder of expenditures on items such as food plots, artificial insemination, veterinary, and disease monitoring.

Production

Table 2 contains a summary of production data across all respondents. Feed represents a little over 11 percent of total annual expenditures for breeding operations. From venison production to breeding stock operations, proper nutrition is essential to the physical health, development, and overall well being of all cervids. For breeding only operations with whitetails, 53 percent of respondents indicated bottle feeding their fawns, while only 29 percent of breeding and

Hay price (per ton)	193	268

* Insufficient results

hunting operations did. Of all species, bottle feeding is primarily practiced with whitetail fawns. Other species will not typically incur such management practices, where bottle feeding may only be utilized for orphaned or sick young.

On average, adult whitetail males were fed close to 4 pounds of supplemental feed per day, while elk consumed slightly over 6 pounds. All of the reported species were fed a protein concentrate and hay. Hay costs were extremely high during the study period due to severe drought conditions across most of the southern plains. In addition to purchased feed, 74 percent of all respondents reported planting food plots on their operations, ranging from half an acre to 500 acres.

When combining results, 70 percent of all breeding or breeding and hunting operation respondents indicated some type of breeding stock purchase. This would include purchases of breeder males, stocker males, bred females, open females, fawns, or semen straws. For whitetail, breeder bucks were the highest dollar expense, costing close to $21,000 each on average.

Hunting Operations

Operations with hunting reported other expenses in addition to those of breeding operations. Seventy-six percent of all respondents of operations that reported to be involved in hunting had a lodge on the premises for their clients. In addition to the roughly $170,000 cost of the lodge, these operations also accrued expenses to maintain and supply the lodge. Labor costs were reported to be higher than those of breeding operations due to an overall larger operation, as well as seasonal hunting guides. Food plots in the hunting areas tended to be larger, along with more feeders, waterers, and fencing, all contributing to the higher reported expenses. Although the majority of hunting operations accepted paying clients and corporate clients, 14 percent reported their hunting operation as personal use only. Of the whitetail hunting operations reporting, respondents estimated an average of 49 percent of the deer in their hunting areas are from breeding operations. Of all the respondents, 49 percent reported hiring labor, while 43 percent reported outsourcing labor and/or consulting needs. For breeding operations, those hiring salaried employees reported an annual expense in the mid $20,000 range. This expense increased to the mid $30,000 range for breeding and hunting operations. On the whole, labor hired on an hourly basis tended to be more prevalent than salaried labor.

Feed was the third largest expense category, representing a little over 11 percent of annual expenditures for breeding operations. Although it's not the largest expense category, feeding is considered to be one of the most important aspects of all operations. From venison production to breeding stock operations, proper nutrition is essential to the physical health, development, and overall well being of all cervid operations. For fawns, 45 percent of respondents indicated bottle feeding their young. Typical products used for bottle feeding ranged from goat's milk to different brands of milk replacer. On average, adult whitetail males were fed close to 4 pounds of supplemental feed per day, while elk consumed slightly over 6 pounds. Respondents indicated paying a little over $300 per ton for supplemental feed, while hay costs averaged around $240 per ton. In addition to purchased feed, 74 percent of all respondents reported planting food plots on their operations, ranging from half an acre to 500 acres.

Economic Impact

IMPLAN® (Impact Analysis for Planning), an input/output model, was used to estimate the economic impact of the cervid farming industry on the national economy. Originally developed by the USDA Forest Service, the IMPLAN model is now managed and maintained by the Minnesota IMPLAN Group (MIG). The model is, arguably, the most used and cited model for performing economic impact analyses in the United States.

The IMPLAN model is driven by purchases of final goods and services in a certain region, such as a state, a group of states, or the entire nation. These purchases represent the dollar value of the increase in finished goods and services demanded, and create an impact that ripples throughout the economy.

Industries produce goods and services for final use and purchase goods and services from other industries. These other producers and industries buy goods and services as well, which IMPLAN designates as indirect purchases. In addition, each step along the cycle pays wages and salaries to employees, who, in turn, make additional expenditures into the economy of the region.[2]

In determining the overall economic impact of an industry, the IMPLAN model uses a set of multipliers, separated by sector, to estimate the direct, indirect, and induced effects (induced being effects of household spending) of the economic cycle. Over 500 sector codes are included in the IMPLAN model, where each code represents a unique industrial sector that a specific product or category of products is represented by. The multipliers that are derived for each sector quantify the ripple effects of a dollar increase in final demand, thus resulting in an estimation of the economic impact.[3]

Cervid Industry

In determining the economic impact of the cervid farming industry, the categories of the survey were prepared for input into the IMPLAN model. This was accomplished by extrapolating the survey results against the inventory of operations to arrive at total industry expenditures for each category. These totals represent the value of final goods and services demanded by the industry, and were the baseline inputs for the IMPLAN model. Categories from the extrapolated survey results, such as supplemental feed or fencing, are then assigned a sector code according to the underlying industry the category relates to. Table 3 provides an example of category inputs and their multipliers from IMPLAN, with each category belonging to a different sector. Differences between the multipliers for each category demonstrate how dollars move throughout different industries. For instance, a $1 million change in final demand for supplemental feed will generate a total of $2.67 million in total industry output, $1.53 million in value added economic activity, and will support 24.34 jobs. In this example, total industry output would include the output generated by the supplemental feed industry and those industries that supply it. Value added from this industry includes employee compensation, proprietary income, other proprietor income, and indirect business taxes that are generated.[4] The employment multiplier represents the number of jobs that are supported per million dollar change in final demand.

Table 3: Cervid Industry Multipliers.

	Output	Value Added	Employment
Supplemental Feed	2.67	1.53	24.34
Food plots	3.18	1.72	46.12
Veterinar y	3.43	1.57	31.42
Utilities	2.04	1.23	8.48
Insurance	2.35	1.52	18.25
Maintenance and repair	3.01	1.57	24.68
Handling facility	2.93	1.61	25.61
Fencing	3.02	1.61	25.36
Large equipment	3.02	1.29	15.79
ATV's	2.73	1.59	22.96

Hunter Expenditures

An additional component in determining the economic impact of the industry is to evaluate and include the role of hunter expenditures in the consumption of industry products. Not all hunting is related to cervid farming, but some is, therefore it is important to include only that which is related to this industry. In other words, the hunting product of cervid farming is a small part of overall cervid hunting in the United States. Yet the hunting component or economic activity associated with deer farming is an important part of the economic activity generated by the cervid farming industry. While overall hunter numbers in the United States are down, the demand for trophy hunting appears to be increasing. Dollars spent on hunting, assorted gear, and travel continue to grow. Time is increasingly the limiting factor for many industry participants, as they have the money to participate, but not the time to invest in traditional hunting. The growth of this segment of the industry is expected to continue, therefore, it is important to include this aspect of the industry in this study.

In order to determine this impact, the number of hunters per operation was taken from the survey, extrapolated against all hunting operations, and combined with a report that outlines hunting expenditures on a per hunter basis. This report, entitled the "Economic Importance of Hunting in America",[5] was based on the 2001 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation survey conducted by the U.S. Fish and Wildlife Service and the U.S. Census Bureau. These retail expenditures were then combined with other hunt related expenditures, such as trophy and processing fees, and assigned sector codes for the IMPLAN model. When totaled, less than 1 percent of the report's estimated 11 million deer hunters are related to the cervid farming industry. However, this small percentage of hunters account for over 2 percent of the report's estimated $10 billion in retail, travel, and hunt related expenditures.

Results

Table 4 below provides a summary of the economic impact of the industry. Cervid operations generate an estimated $893.5 million in direct expenditures into the U.S. economy. This value represents the estimated increase in final demand of all goods and services consumed by the industry. As these direct expenditures ripple throughout the economy, the cervid farming industry generates an estimated $2.3 billion of total industry output for all industries that supply the cervid farming industry. These industries include feed suppliers, farm and ranch supply stores, veterinary services, medical and sedation product suppliers, construction, utilities, advertising, insurance, and numerous others. Hunters contribute an additional $241 million in direct economic impacts through retail and hunt related expenditures, which generates a total of $756.9 million of total industry output.

When combined, the cervid farming industry generates $3 billion of economic activity and output in the U.S. economy. The industry provides the economic activity that supports 29,199 jobs in the economy, most of which are located in rural areas of the nation. If this industry were to disappear, these jobs would have to find support from some other sector of the economy. Unfortunately, not every segment of the industry could be analyzed. Insufficient industry and survey data limited analysis to only the operational aspects of both the venison and scent collection industries, as production and retail revenues were excluded from the analysis.

[5] "Economic Importance of Hunting in America." Produced by Southwick Associates, Inc. for the International Association of Fish and Wildlife Agencies, 2002. Available online, accessed August 10, 2006. http://www.southwickassociates.com/freereports/default.aspx

Table 4: Economic Impact of the Cervid Farming Industry.

	Direct	Output	Value Added	Employment
All Operations	893,501,559	2,333,462,511	1,276,311,405	21,070
Hunters	241,042,970	756,897,725	358,602,855	8,129
Total	1,134,544,528	3,090,360,236	1,634,914,260	29,199

Conclusion

With over 7,000 operations and 2,000 hunting preserves, the cervid farming industry has an established presence across the nation. The majority of these operations are located in rural areas of the nation. In addition, while traditional forms overwhelmingly dominate the hunting industry, the small niche of hunters this market serves continues to increase. This increase in demand is fueling the growth in the breeding industry. Over $1.1 billion in direct expenditures are poured into the U.S. economy each year by commercial farming operations and sportsmen related to this industry. In turn, this generates $3 billion of economic activity while supporting 29,199 jobs. All told, these results highlight the fact that the cervid farming industry continues to be a vital contributor to the rural economies of the United States.

Appendix A: National Cervid Industry Survey

National Cervid Industry - Economic Impact Survey

Instructions are provided at the end of this survey. Include annualized 2005 figures where appropriate.

Please indicate type of operation (check all that apply)
Cervid Breeding (includes venison and urine collection) ☐ **Cervid Hunting** ☐ **Cervid Breeding and Hunting** ☐

Cervid Breeding

***Please select type of cervid breeding operation*:** **Breeding only** ☐ **Commercial Venison** ☐ **Commercial Urine Collection** ☐

I. Operation

1. Year started: _____ 2. State: _____
3. Total acreage: _____ acres 4. Area under high fence: _____ acres
5. Area of land purchased: _____ acres 5a. Purchase value: $_____ (per acre)
6. Area of land inherited: _____ acres

II. Herd Inventory

1. Inventory (Final 2005 figures)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Males:										
Females:										
Fawns/calves:										
Birth rate (2005):										
Birth rate (2006):										
Annual mortality rate (%):										

2. Annual Purchases (Final 2005 figures)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Males (#):										
Total Cost:										
Females (#):										
Total Cost:										
Fawns/calves (#):										
Total Cost:										
Semen straws (#):										
Total Cost:										

III. Facilities

1. Area of breeding operation: _____ acres 1a. Number of pens: _____
2. Area of venison operation: _____ acres 2a. Number of pens: _____
3. Area of urine collection operation: _____ acres 3a. Number of pens: _____
4. Capital cost of fencing: $_____ 5. Capital cost of shelters: $_____
6. Capital cost of improvements: $_____ 7. Capital cost of additional buildings: $_____
8. Capital cost of working pens: $_____
9. Do you have a handling facility? ☐ Yes ☐ No 9a. If yes, capital cost of this facility: $_____
10. Do you have a venison processing facility? ☐ Yes ☐ No 10a. If yes, capital cost of this facility: $_____
11. Do you have a cooler/freezer for venison? ☐ Yes ☐ No 11a. If yes, capital cost of this equipment: $_____
12. Do you have a urine collection facility? ☐ Yes ☐ No 12a. If yes, capital cost of this facility: $_____
13. Do you have a cooler/freezer for urine? ☐ Yes ☐ No 13a. If yes, capital cost of this equipment: $_____

Cervid Breeding, continued

IV. Equipment

1. Purchase price of all large equipment, combined (i.e. tractor + bobcat): $_____
2. Purchase price of all ATVs, combined: $_____
3. Purchase price of all ranch vehicles, combined: $_____
4. Purchase price of all implements, combined: $_____
5. Purchase price of all trailers/transport crates, combined: $_____
6. Purchase price of all bulk feed bins, combined: $_____
7. Purchase price of all feeding equipment, combined: $_____
8. Purchase price of all watering equipment, combined: $_____
9. Purchase price of all video equipment, combined: $_____
10. Annual cost of rental equipment: $_____
11. Purchase price of semen storage tank(s): $_____
12. Purchase price of dart gun/sedation equipment: $_____
13. Purchase price of packaging equipment (venison and urine products): $_____

V. Veterinary & Supplies

1. Annual cost of operating supplies: $_____ 2. Annual cost of medical supplies: $_____
3. Annual veterinary expense: $_____ 4. Average cost per sedation: $_____
5. Number of necropsies performed: _____ 5a. Average cost per necropsy: $_____
6. Number of CWD tests performed: _____ 6a. Average cost per CWD test: $_____
7. Number of deer DNA certified: _____ 7a. Annual cost for DNA certification: $_____
8. Average annual number of sedations (per animal, per species):

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Males:										
Females:										

9. Annual number of females AI'd (per species):

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Females AI'd:										

VI. Labor

1. Number of employees: 1a. Paid salary: _____ 1b. Paid hourly: _____
2. Total annual wages paid: 2a. Salaries: $_____ 2b. Hourly: $_____
3. Annual expense from outsourced services: $_____

VII. Utilities

1. Annual cost of utilities: $_____
2. Annual cost of fuel: $_____

VIII. Miscellaneous Expenses

1. Annual advertising/marketing expense (includes taxidermy services): $_____
2. Annual regulatory expense (permits): $_____
3. Annual meat inspection/nutrition labeling expense: $_____
4. Annual insurance expense: $_____
5. Annual travel expense: $_____
6. Annual property tax: $_____
7. Annual cost of maintenance and repair: $_____

Cervid Breeding, continued

IX. Feeding

Fawns/Calves

1. Do you bottle feed? ☐ Yes (continue below) ☐ No (skip to 2)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Percent of all fawns/calves:										
Days fed until weaning:										
Product used:										
Product price per gal/bag/lb:										
Units fed until weaning:										

2. After weaning: (units are pounds per animal)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Daily protein feed rate:										
Daily hay feed rate:										

Adults

1. Feeding rates: (units are pounds per animal)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Males:										
Daily protein feed rate:										
Daily hay feed rate:										
Females:										
Daily feed rate:										
Daily hay feed rate:										

2. Protein feed price: $_____ (per bag/ton)
3. Hay price: $_____ (per bale) 3a. Average bale weight: _____ lbs
4. Annual protein feed purchase: _____ tons
5. Annual hay purchase: _____ bales
6. Approximate area of food plots: _____ acres
   6a. Annual cost of seed: $_____
   6b. Annual cost of fertilizer: $_____

X. Annual Sales

Annual receipts from breeding operation

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
1. Males sold:										
1a. Total Receipts:										
2. Females sold:										
2a. Total Receipts:										
3. Fawns/calves sold:										
3a. Total Receipts:										
4. Semen straws sold:										
4a. Total Receipts:										

Cervid Breeding, continued

Annual receipts from commercial venison production

	Elk	Fallow	Red Deer	Reindeer	Other:
1. Annual number processed:					
2. Average processing yield per animal (lbs):					
3. General processing cost per animal:					
4. Specialty processing cost – summer sausage, jerky, etc. (per pound):					
5. Amount of specialty processing per animal (lbs):					
6. Total receipts from all venison sales:					

7. Annual packaging, shipping, and labeling expense for venison: $_____
8. Annual number of animals used to collect velvet: _____
9. Annual amount of velvet processed: _____ lbs
10. Processing cost of velvet: $_____ (per pound)
11. Total receipts from velvet products: $_____
12. Annual packaging, shipping, and labeling expense for velvet products: $_____
13. Annual amount of shed/cut antlers sold: _____ lbs
    13a. Total receipts from antler sales: $_____
14. Total receipts from other by-products (hides, pizzles, etc.): $_____
15. Annual number of males sold as breeding stock: _____ 15a. Total receipts: $_____
16. Annual number of females sold as breeding stock: _____ 16a. Total receipts: $_____
17. Annual number of males sold to hunting preserves: _____ 17a. Total receipts: $_____
18. Annual number of females sold to hunting preserves: _____ 18a. Total receipts: $_____

Annual receipts from urine collection

1. Total number of males used for collection: _____
2. Annual amount of urine collected from males: _____ gal
   2a. Total receipts from male urine sales: $_____
3. Total number of females used for collection: _____
4. Annual amount of non-estrous urine collected from females: _____ gal
   4a. Total receipts from non-estrous urine sales: $_____
5. Annual amount of estrous urine collected from females: _____ gal
   5a. Total receipts from estrous urine sales: $_____
6. Annual packaging, shipping, and labeling expense for urine sales: $_____
7. Total receipts from other scent sales: $_____
8. Annual number of males sold as breeding stock: _____ 8a. Total receipts: $_____
9. Annual number of females sold as breeding stock: _____ 9a. Total receipts: $_____
10. Annual number of males sold to hunting preserves: _____ 10a. Total receipts: $_____
11. Annual number of females sold to hunting preserves: _____ 11a. Total receipts: $_____

Hunting

For combination hunting and breeding operations, please separate hunting operation expenses from breeding operation expenses. Include annualized 2005 figures where appropriate.

What is the purpose of your hunting operation? ☐ Personal use only ☐ Corporate clients, no fee ☐ Paying clients

I. Operation

1. Year started: _____ 2. State: _____
3. Total acreage: _____ acres 4. Land inherited: _____ acres
5. Land purchased: _____ acres 5a. Purchase value: $_____ (per acre)
6. Area of hunting operation: _____ acres

II. Facilities

1. Capital cost of lodge(s): $_____
2. Capital cost of fencing: $_____
3. Capital cost of improvements: $_____
4. Capital cost of buildings: $_____
5. Approximate area of food plots: _____ acres

National Cervid Industry - Economic Impact Survey
North American Deer Farmers Association Members

****All information collected in this survey will remain <u>confidential</u>****

Survey Instructions

1. This survey is to be completed by cervid breeding operations (including venison production and urine collection operations), combination cervid breeding and hunting operations, and hunting operations that utilize outside cervid breeding operations as a genetic supplement for their cervid herd. All other industry participants may disregard this survey.
2. For the sections and categories below, please provide annualized 2005 records of actual or accurate estimates of expenditures rather than a range estimate of expenditures.
3. **For combination breeding and hunting operations, please separate breeding operation records from hunting operation records. Contact us for additional surveys if you have multiple permitted breeding and/or hunting operations.**
4. **It is important to use the provided categories for records for each section, rather than combining records from breeding and hunting operations and submitting that in a breeding or hunting category. Please provide an accurate estimate when your records do not match these categories.**
5. If a question does not apply to your operation, please indicate this with an "N/A" response.
6. Please indicate units (lbs, tons, gals, etc.) where applicable.
7. For further explanation of general and selected lines of the survey, please refer to the information below.

Cervid Breeding (Breeding only, Venison production, Urine Collection)

Please indicate the purpose of your breeding operation by checking all boxes that apply.

<u>I. Operation</u>: This category provides for a general overview of your operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Herd Inventory</u>: This category refers to your final 2005 cervid inventory and final 2005 purchases (please include number purchased with total cost) towards this inventory. *Annual mortality rate* refers to the annual mortality loss on entire herd, including the loss of fawns/calves after weaning. *Birth rate* refers to the number of surviving fawns/calves born per bred female, specifically, the total number of live fawns/calves at weaning divided by the total number of bred females (i.e. 1.5, 2.3, etc.).

<u>III. Facilities</u>: This category refers to your operational specific facilities. *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc.

<u>IV. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>V. Veterinary & Supplies</u>: *Annual cost of operating supplies* refers to the yearly expense for all operating supplies, such as office supplies, sedation supplies, AI supplies, etc. *Annual cost of medical supplies* refers to the yearly expense for medicine, syringes, etc. *Average cost per sedation* refers to the average expense of supplies and labor to sedate or dart an animal. *Number of necropsies performed* refers to the number of post mortality veterinary examinations performed to determine the cause of death. *Average cost per necropsy* refers to the average labor and labwork expense of performing a necropsy on a single animal. *Average cost per CWD test* refers to the average labor and labwork expense of performing a CWD test.

<u>VI. Labor</u>: This category refers to the labor expense for your breeding operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if paid labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense from outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VII. Utilities</u>: This category refers to the annual utilities expense for electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for your breeding operation.

<u>VIII. Miscellaneous Expenses</u>: *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for genetic display (horn molds, shed mounts, deceased buck mounts, etc.). *Annual regulatory expense* refers to the annual cost of regulatory operating permits, if applicable to your state. *Annual meat inspection expense* refers to the annual cost to venison production operations for state or federal meat inspection. *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>IX. Feeding</u>: This category relates to feeding rates of fawns/calves and adults in your operation. For those who bottle feed fawns/calves, please indicate the percent of all fawns/calves that are bottle fed for, the number of days of bottle feeding until weaned, the product used (i.e. goat milk, milk replacer, etc.), the per unit product price (please indicate units-gal, bags, lbs), and the number of units of this product used per fawn until weaning for each cervid species in your operation.

<u>X. Annual Sales</u>: This category relates to the final 2005 revenue inflows of your operation. Receipts are categorized for breeding operations, commercial venison operations, and commercial urine operations. Please separate records for each these categories that apply to your operation.

Cervid Hunting

Please indicate the purpose of your hunting operation by checking all boxes that apply

<u>I. Operation</u>: *Area of hunting operation* refers to the total acreage dedicated to your hunting operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Facilities</u>: *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc.

<u>III. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your breeding operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>IV. Supplies</u>: This category relates to final 2005 expenses for supplemental feed, corn, operating, and food and beverage supplies.

<u>V. Labor</u>: This category refers to the labor expense for your hunting operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if paid labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense for outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VI. Utilities</u>: This category refers to the annual utilities expense for electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for your hunting operation.

<u>VII. Miscellaneous Expenses</u>: *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for display. *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>VIII. Hunters</u>: *Total expense* refers to the cost of purchasing, sedating, and transporting cervids for release into hunting operation. *Average processing cost* refers to the cost of processing each harvested cervid. If in-house processing occurs, please provide an accurate estimate of this cost based on local processor costs. *Percent of all harvested seeking taxidermy services* relates to the percentage of all harvested cervids that will have some type of taxidermy service performed, such as a shoulder or full body mount. *Average taxidermy cost, per cervid* allows for the average per cervid expense of this service for the hunter from your local taxidermist.

We thank you in advance for taking the time to complete this survey. Upon completion, please return the survey with the enclosed envelope. Questions or requests for additional surveys may be directed to Brian Frosch at 888-890-5663.

Appendix B: Economic Impact Survey

Economic Impact Survey

Please indicate type of operation

Scientific Breeding Only ☐ **Scientific Breeding and Hunting** ☐ **Hunting only** ☐

Scientific Breeding

Instructions and clarification are provided at the end of this survey. For Hunting only operations, please skip to the hunting section. Include annualized 2005 figures where appropriate.

I. Operation

1. Year started: _____ 2. Area of breeding operation: _____ (acres)
3. Land purchased: _____ (acres) 3a. Purchase value: $_____ (per acre)
4. Land inherited: _____ (acres)

II. Herd Inventory (Final 2005 Inventory)

1. Total number of deer: _____
2. Number of breeder bucks: _____ 3. Number of stocker bucks: _____ 4. Does: _____
5. Fawns, 2005: _____ 5a. Fawning rate (surviving at weaning): _____ (fawns per doe)
6. Fawns, 2006: _____ 6a. Fawning rate (surviving at weaning): _____ (fawns per doe)
7. Annual herd mortality rate (including fawns after weaning): _____ %
8. Annual sales (Final 2005 figures) 9. Annual purchases (Final 2005 figures)

Breeder bucks (#):	Total receipts: $	Breeder bucks (#):	Total cost: $
Stocker bucks (#):	Total receipts: $	Open does (#):	Total cost: $
Open does (#):	Total receipts: $	Bred does (#):	Total cost: $
Bred does (#):	Total receipts: $	Buck fawns (#):	Total cost: $
Buck fawns (#):	Total receipts: $	Doe fawns (#):	Total cost: $
Doe fawns (#):	Total receipts: $	Semen Straws (#):	Total cost: $
Semen Straws (#):	Total receipts: $		

III. Facilities

1. Number of pens: _____ 2. Area of pens: _____ (acres)
3. Capital cost of fencing: $_____ 4. Capital cost of shelters: $_____
5. Capital cost of improvements: $_____
6. Capital cost of buildings: $_____ 7. Capital cost of working pens: $_____
8. Do you have a handling facility? ☐ Yes ☐ No 8a. If yes, capital cost of handling facility: $_____
9. Approximate area of food plots: _____ (acres)
   9a. Annual cost of seed: $_____
   9b. Annual cost of fertilizer: $_____
10. Annual cost of maintenance and repair: $_____

IV. Equipment

1. Purchase price of all large equipment, combined (i.e. tractor + bobcat): $_____
2. Purchase price of all ATV(s), combined: $_____
3. Purchase price of all ranch vehicle(s), combined: $_____
4. Purchase price of all implements, combined: $_____
5. Purchase price of all trailer(s)/transport crate(s), combined: $_____
6. Purchase price of all bulk feed bin(s), combined: $_____
7. Purchase price of all feeding equipment, combined: $_____

Scientific Breeding, continued

8. Purchase price of all watering equipment, combined: $_____
9. Purchase price of all video equipment, combined: $_____
10. Annual cost of rental equipment: $_____
11. Purchase price of semen storage tank(s): $_____
12. Purchase price of dart gun/sedation equipment: $_____

V. Veterinary & Supplies

1. Annual cost of operating supplies: $_____ 2. Annual cost of feed and hay: $_____
3. Annual cost of medical supplies: $_____ 4. Annual veterinary expense: $_____
5. Annual number of sedations: _____ (per doe) 6. Annual number of sedations: _____ (per buck)
7. Average cost per sedation: $_____ 8. Number of does AI'd: _____
9. Number of necropsies performed: _____ 9a. Average cost per necropsy: $_____
10. Number of CWD tests performed: _____ 10a. Average cost per CWD test: $_____
11. Number of deer DNA certified: _____ 11a. Annual cost for DNA certification: $_____

VI. Labor

1. Number of employees: 1a. Paid salary: _____ 1b. Paid hourly: _____
2. Total wages paid: 2a. Salaries: $_____ 2b. Hourly: $_____
3. Annual expense from outsourced services: $_____

VII. Utilities

1. Annual cost of utilities: $_____
2. Annual cost of fuel: $_____

VIII. Miscellaneous Expenses

1. Annual insurance expense: $_____
2. Annual advertising/marketing expense (includes taxidermy services): $_____
3. Annual travel expense: $_____
4. Annual property tax: $_____

IX. Feeding

Fawns

1. Do you bottle feed your fawns? ☐ Yes (continue with 1a-1e) ☐ No (skip to 2)
   1a. If yes, what percent of all fawns? _____% 1b. Average bottle feeding days until weaning: _____
   1c. What product do you use? _____
   1d. Units fed per fawn until weaning: _____ (gal/bags/lbs) 1e. Product price: $_____ (per gal/bag/lb)
2. After weaning: 2a. Approximate daily feed rate: _____ (lbs per fawn) 2b. Feed price: $_____ (per bag/ton)
   2c. Approximate alfalfa/hay daily feed rate: _____ (lbs per fawn) 2d. Alfalfa/hay price: $_____ (per bale)
   2e. Average bale weight: _____lbs

Does

1. Approximate daily feed rate: _____ (lbs per doe) 2. Feed price: $_____ (per bag/ton)
3. Approximate alfalfa/hay daily feed rate: _____ (lbs per doe)

Bucks

1. Approximate daily feed rate: _____ (lbs per buck) 2. Feed price: $_____ (per bag/ton)
3. Approximate alfalfa/hay daily feed rate: _____ (lbs per buck)

Hunting

Instructions and clarification are provided at the end of this survey. For combination Scientific Breeding & Hunting operations, please separate hunting expenses from breeding expenses. Include annualized 2005 figures where appropriate.

What is the purpose of your hunting operation? ☐ Personal use only ☐ Corporate clients, no fee ☐ Paying clients

I. Operation

1. Year started: _____ 2. Area of hunting operation: _____ (acres)
3. Land purchased: _____ (acres) 3a. Purchase value: $_____ (per acre)
4. Land inherited: _____ (acres)

II. Facilities

1. Capital cost of lodge(s): $_____
2. Capital cost of fencing: $_____
3. Capital cost of improvements: $_____
4. Capital cost of buildings: $_____
5. Annual cost of maintenance and repair: $_____
6. Approximate area of food plots: _____ (acres)
   6a. Annual cost of seed: $_____
   6b. Annual cost of fertilizer: $_____

III. Equipment

1. Purchase price of all large equipment combined (i.e. tractor + bobcat): $_____
2. Purchase price of all ATV(s), combined: $_____
3. Purchase price of all ranch vehicle(s), combined: $_____
4. Purchase price of all implements, combined: $_____
5. Purchase price of all trailer(s)/transport crate(s), combined: $_____
6. Purchase price of all bulk feed bin(s), combined: $_____
7. Purchase price of all feeding equipment, combined: $_____
8. Purchase price of all watering equipment, combined: $_____
9. Purchase price of all video equipment, combined: $_____
10. Annual cost of rental equipment: $_____
11. Purchase price of dart gun/sedation equipment: $_____
12. Purchase price of cooler/freezer equipment: $_____
13. Purchase price of other equipment: $_____

IV. Supplies

1. Annual amount of protein feed purchased: _____ (tons) 1a. Protein feed unit price: $_____ (per bag/ton)
2. Annual amount of corn purchased: _____ (tons) 2a. Corn unit price: $_____ (per bag/ton)
3. Annual cost of operating supplies for lodge: $_____
4. Annual cost of food and beverages for lodge: $_____

V. Labor

1. Number of employees: 1a. Salary: _____ 1b. Hourly: _____
2. Total wages paid: 2a. Salaries: $_____ 2b. Hourly: $_____
3. Annual expense from outsourced services: $_____

Hunting, continued

VI. Utilities

1. Annual cost of utilities: $_____
2. Annual cost of fuel: $_____

VII. Miscellaneous Expenses

1. Annual insurance expense: $_____
2. Annual advertising/marketing expense (includes taxidermy services): $_____
3. Annual travel expenses: $_____
4. Annual property tax: $_____
5. Other annual miscellaneous expenses: $_____

VIII. Hunters

1. Annual number of hunters: _____
2. Total annual deer harvest: _____
3. Approximate total number of deer in hunting area: _____
   3a. Approximate percentage of total deer in the hunting area that are from breeding: _____
4. Annual number of stocker bucks released from breeding operation into hunting operation: _____
5. Annual number of does released from breeding operation into hunting operation: _____
6. Annual number of stocker bucks purchased for release into hunting operation: _____
   6a. Total expense: $_____
7. Annual number of does purchased for release: _____
   7a. Total expense: $_____
8. Annual number of does harvested: _____
   8a. Total receipts from doe hunts: $_____
9. Annual number of management bucks harvested: _____
   9a. Total receipts from management buck hunts: $_____
10. Annual number of trophy bucks harvested: _____
    10a. Total receipts from trophy buck hunts: $_____
11. Average processing cost: $_____ (per deer)
12. Approximate percentage of harvested bucks seeking taxidermy services: _____%
13. Average taxidermy cost: $_____ (per deer)

APPENDIX

Economic Impact Survey
Texas Deer Association Members

****All information collected in this survey will remain <u>confidential</u>****

Survey Instructions

1. This survey is to be completed by scientific breeding operations, combination scientific breeding and hunting operations, and hunting operations that utilize outside scientific breeding operations as a genetic supplement for their deer herd. All other industry participants may disregard this survey.
2. For the sections and categories below, please provide annualized 2005 records of actual or accurate estimates of expenditures rather than a range estimate of expenditures.
3. For those who have multiple facilities under separate permits (uniquely identified), please contact us for additional surveys for each operation.
4. **It is important to separate records for each facility, and between hunting and breeding operations. Contact us for additional surveys if you have multiple permitted breeding and/or hunting operations.**
5. **It is also important to use the provided categories for records for each section, rather than combining records from breeding and hunting operations and submitting that in a breeding or hunting category. Please provide an accurate estimate when your records do not match these categories.**
6. If a question does not apply to your operation, please indicate this with an "N/A" response.
7. Please indicate units (lbs, tons, gals, etc.) where applicable.
8. For further explanation of general and selected lines of the survey, please refer to the information below.

Scientific Breeding

<u>I. Operation</u>: *Area of breeding operation* refers to the total acreage dedicated to your breeding operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Herd Inventory</u>: This category refers to your herd inventory, fawning rate, purchases and sales towards your inventory for 2005, and number the of fawns born and fawning rate for 2006. *Annual herd mortality rate* refers to the annual mortality loss on the total breeding herd, including loss of fawns after weaning. *Fawning rate* refers to the number of surviving fawns born per doe, specifically, the total number of live fawns at weaning divided by the total number of bred does (i.e. 0.7, 1.5, 2.3, etc.).

<u>III. Facilities</u>: *Area of pens* refers to the total acreage enclosed by all pens combined. *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>IV. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your breeding operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>V. Veterinary & Supplies</u>: *Annual cost of operating supplies* refers to the yearly expense for all operating supplies, such as office supplies, sedation supplies, AI supplies, etc. *Annual cost of medical supplies* refers to the yearly expense for medicine, syringes, etc. *Annual number of sedations* refers to the average annual number of sedations on a per doe/buck basis. *Average cost per sedation* refers to the average expense of supplies and labor to sedate or dart a deer. *Number of necropsies performed* refers to the number of post mortality veterinary examinations performed to determine the cause of death. *Average cost per necropsy* refers to the average labor and labwork expense of performing a necropsy on a single deer. *Average cost per CWD test* refers to the average labor and labwork expense of performing a CWD test.

<u>VI. Labor</u>: This category refers to the labor expense for your breeding operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense from outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VII. Utilities</u>: This category refers to the annual utilities expense for the annual electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for breeding operations.

<u>VIII. Miscellaneous Expenses</u>: *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for genetic display (horn molds or shed mounts, or deceased buck mounts). *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc.

<u>IX. Feeding</u>: This category relates to feeding rates for fawns, bucks, and does. For those who bottle feed fawns, please indicate the percent of all fawns that are bottle fed, number of days of bottle feeding until weaning, the product used (i.e. goat milk, milk replacer, etc.), units of this product used per fawn until weaning, the per unit product price (please indicate units-gal, bags, lbs).

Hunting

<u>I. Operation</u>: *Area of hunting operation* refers to the total acreage dedicated to your hunting operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Facilities</u>: *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>III. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your breeding operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>IV. Supplies</u>: This category relates to supplemental feed, corn, operating, food, and beverage supplies for hunting operations on an annualized basis.

<u>V. Labor</u>: This category refers to the labor expense for your breeding operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense for outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VI. Utilities</u>: This category refers to the annual utilities expense for the annual electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for hunting operations.

<u>VII. Miscellaneous Expenses</u>: *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for display. *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc.

<u>VIII. Hunters</u>: This category relates to the annual number of hunters, number of deer harvested, number of deer purchased and/or released into hunting operation, and the expenses and receipts from hunting. *Total expense* in lines 6a & 7a refer to the cost of purchasing, sedating, and transporting deer for release into hunting operation. *Average processing cost* refers to the cost of processing each harvested deer. If it is processed in-house, please provide an accurate estimate of this cost from based on local processor costs. Line 12 relates to the percentage of harvested deer that will have some type of taxidermy service performed, such as a shoulder or full body mount. Line 13 allows for the average per deer expense of this service for the hunter.

We thank you in advance for taking the time to complete this survey. Upon completion, please return the survey with the enclosed envelope no later than November 10th. Questions or requests for additional surveys may also be directed to Brian Frosch at 888-890-5663.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated the proposed amendment would prohibit the shipment or transportation of big game species to or from Missouri

destinations, with certain exceptions. It gives the Missouri Conservation Commission primary authority over the regulation of privately owned big game species, including rulemaking authority. It also states that confined big game killing or the owning, possessing, confining, transporting, breeding or raising of privately owned big game species shall not be construed as hunting, farming or ranching for any purpose under the Constitution or any law. Information or data related to any program related to diseases of big game species is considered a public record and subject to disclosure.

Budget and Planning defers to the Missouri Conservation Commission for an estimate of the proposal's fiscal impact on the Commission or the Missouri Department of Conservation (MDC). Budget and Planning also defers to the Missouri Department of Agriculture (MDA) for an estimate of the proposal's potential fiscal impact on MDA. Budget and Planning does not have sufficient information to estimate the potential fiscal impact the proposal may have on state or local government revenues derived from practices that would be regulated, restricted, or prohibited under the proposal.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated the proposed amendment proposed in this petition will have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no anticipated fiscal impact for their college.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Metropolitan Zoological Park and Museum District** indicated they do not believe this initiative petition will have a financial impact on their district.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, University of Missouri, St. Louis Community College, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** and the **Missouri Joint Municipal Electric Utility Commission.**

Fiscal Note Summary

State governmental impact is unknown. Local governmental entities expect no costs or savings.

JOHN R. ASHCROFT

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Marc Ellinger regarding a proposed constitutional amendment to Article IV, version 2 (2018-187)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Marc Ellinger on March 28, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article IV is amended by adding one new section to be known as Section 40(c), to read as follows:

40(c). 1. The provisions of Section 40(c) shall be known as the Fair Chase Amendment, and its purpose is to prohibit confined big game killing in Missouri. It shall be the public policy of this state to protect the health of Missouri's livestock and wildlife by changing the requirements related to captive big game species. Confined big game killing does not provide any food, energy, health benefits or security to Missouri and presents significant threats to the safety, health and welfare of wildlife across Missouri. Confined big game killing, or owning, confining, transporting or possessing big game species for any purpose shall not be construed as hunting, farming or ranching for any purpose under this Constitution or any law.

2. No person shall engage in confined big game killing, except: any person with a valid permit in effect on November 6, 2018. Such person may renew such permit up to and through November 7, 2021, at which time all such permits shall expire and thereafter all confined big game killing shall be prohibited without exception.

3. In addition to the authority vested in it by Section 40(a) of Article IV, the Missouri Conservation Commission shall have primary authority over the regulation of privately-owned big game species, but excluding bison not raised, bred or held for confined big game killing. The Missouri Conservation Commission may make such rules and regulations as may be deemed necessary for the enforcement of this Amendment.

4. Information or data in either paper or electronic form regarding any voluntary or mandatory program related to diseases of big game species shall be considered a public record and subject to disclosure except as or expressly permitted or required to be closed by federal law or this constitution.

5. Definitions.

a. "Big game species" shall not include any livestock as defined in this Amendment and shall include all of the following animals, either as live animals or embryos, ova or semen: (a) all cervids and cervid hybrids including but not limited to white-tailed deer, elk, mule deer, red deer, fallow deer, sika deer and moose; (b) mountain goats, bighorn sheep, Dall's sheep, pronghorn, peccary, and javelina; and (c) any ungulate (hooved animal) confined or bred primarily for confined big game killing.

b. "Confined big game killing" shall mean an act in which an owner, operator or agent of a big game preserve obtains fees or other remuneration from another person for the killing or attempted killing of privately-owned big game species confined in or released from any man-made enclosure designed to prevent escape, but shall not include any act of a government employee or agent to control an animal population, to prevent or control diseases, or when government action is otherwise required or authorized by law.

c. "Livestock" as used in this Amendment, shall mean cattle, fully domesticated swine, fully domesticated sheep, fully domesticated goats, fully domesticated bison, fully domesticated ratite birds, fully domesticated rabbits, and fully domesticated horses, donkeys, mules, alpacas and llamas, where such fully domesticated animals are raised for human use or consumption and not for uses regulated by the Missouri Conservation Commission. Livestock shall also include semen or ova of any designated animal in this definition.

d. "Big game preserve" shall mean a facility confining privately-owned big game species via escape-resistant fencing which reduces the ability of such privately-owned big game species to evade or escape pursuit.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-187)

Subject

Initiative petition from Marc Ellinger regarding a proposed constitutional amendment to Article IV. (Received March 29, 2017)

Date

April 18, 2017

Description

This proposal would amend Article IV of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** the **Missouri Joint Municipal Electric Utility Commission,** and **Metropolitan Zoological Park and Museum District**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated this initiative petition will have a substantial negative impact on the cervid industry in Missouri.

The Agricultural and Food Policy Center at Texas A&M University conducted an economic impact study of the United States cervid farming industry in 2007 (attached) based on a survey of the deer farms in Texas and the elk producers located throughout the United States.

Based on the values provided by the Texas A&M study, and an estimated 225 cervid producers in Missouri, the industry has an estimated direct annual economic impact in Missouri of approximately $98 million. The number of people employed in the cervid industry in Missouri is estimated to be approximately 1,150 individuals. In addition, based on the study and 2007 property tax rates, the cervid industry pays approximately $700,000 annually in local property taxes.

They included the following information on the economic impact of the United States cervid farming industry:

Acknowledgements

In no way could the study have been completed without the outstanding efforts of the members and leadership of both the North American Deer Farmers Association (NADeFA®) and the Texas Deer Association (TDA). We truly appreciate all of the members who took the time to complete and return the survey. In addition, we sincerely thank all of those who took time out of their schedules to educate us and let us see your operations first hand. Specifically, from NADeFA®: Fred Huebner, Holly Johnson, Glenn Dice, Julie Getschmann, and Shelly Burns. From the TDA: Scott Bugai, Dick Cain, and Lisa Barton. The following people and operations: Robert Williams of RW Trophy Ranch, Buddy Jordan of Indian Creek Ranch, Trophy Ridge Ranch (Dick Cain), Buck Naked Trophy Whitetails (Scott Bugai), Stephen Frisina of Celebrity Ranch, Tom Malouf of Malouf's Trophy Whitetails, Robert Gegenheimer of Cotton Mesa, Dave McQuaig of Cougar Ridge Whitetails, Mike Hine of Timberghost Ranch, Pat Cooper, Russ Walk of Walk's Whitetails, Dean Borntrager of Sundance Whitetails, Levi Mast of Mast's Whitetails, Dave Griffith of Griffith Brothers Whitetail Ridge, and Tim Tague and Doug Berty of Double T Ranch.

Executive Summary

- The cervid farming industry is, perhaps, the fastest growing industry in rural America.
- Over 2,000 industry participants were surveyed, with a response rate of 14 percent.
- This survey, designed to estimate the economic impact of the industry, was performed in late 2006-early 2007.
- The average whitetail deer farm had 82 deer, composed of 28 males, 28 females, 26 fawns, and had an average birth rate of 1.31 fawns per doe in 2006.
- Breeding operations reported expenditures averaging $101,000 per year.
- The cervid farming industry has a direct economic impact of $893.5 million.
- When incorporating the indirect impacts of the industry, for example, the farm's expenditures on feed, veterinary supplies, fuel and other purchases, the total economic impact of the industry is $2.3 billion.
- One of the major customers of this industry is hunters. Estimating the impact of hunting dollars spent, with hunters as the consumer of cervid farming products, an additional $757 million is generated by the cervid farming industry.
- The total impact of the industry, combining the farming and hunting components, is $3.0 billion annually.
- The economic activity of the cervid farming industry supports 29,199 jobs, most of which are in rural America. If this industry did not exist, those jobs would have to be supported by some other economic activity.
- These results highlight the fact that the cervid farming industry is a growing and important industry in rural America.

Introduction

The cervid, or deer, farming industry is a vital and growing business in rural areas of the United States. As demographic and market forces tend to shift traditional revenue sources away from rural communities, their economies increasingly rely on new industries such as this one. As the industry has grown, participants and legislators have developed an interest in measuring the economic contribution of the industry on their respective communities. In addition, the industry is governed by a myriad of state and federal laws, regulations, and jurisdictions. Since the majority of industry regulation is left up to the states, a significant amount of variability in the regulations exists from state to state. This lack of consistency in laws and regulations may be a factor affecting future industry growth in some states. The rapid growth of the industry and an array of policy issues led the industry to request this study of the size and economic importance of the cervid farming industry. In 2006, the Agricultural and Food Policy Center (AFPC) at Texas A&M University was requested by former Texas Congressman Henry Bonilla to undertake this study. The primary objective of this study is to determine the economic impact of the United States cervid farming industry. Secondary objectives include providing a current description of typical industry participants and cost estimates for the major categories of expenses on cervid farming operations.

Cervid Industry

The term "cervid" refers to any one of the various members of the cervidae family. This family includes members such as whitetail deer, elk, fallow, reindeer, axis, sika, and red deer among others.[1]

Like any industry, the cervid farming industry involves producers and consumers. In general, the production side of the industry is comprised of breeding stock producers, trophy hunting preserves, commercial venison producers, and commercial scent collection. Some commercial production operations may take on a single segment, such as one producing and selling only breeding stock. Others may consist of any combination of these, such as an operation producing venison and velvet, while also collecting urine for scent sales. Consumers of the industry include hunters (for scent products and hunting) other breeders, and consumers of venison and related products (hides, velvet, shed antlers, etc.).

Figure 1 displays the estimated number of cervid farms per state. This inventory was compiled by the administrative staff at the North American Deer Farmers Association (NADeFA®) through contact with the appropriate state agency. Those states that did not have an exact count provided their best estimate. Across the nation, the total number of cervid farms was 7,828, with Pennsylvania and Texas home to around 1,000 farms each. The total number of hunting preserves is estimated at 2,639, yet this only represents an estimate of those that are related to the cervid farming industry. As an example of the growth the cervid farming industry is experiencing, there were 946 permitted breeding facilities in Texas in late summer 2006. However, when the analysis took place early in the spring of 2007, there were 1,006 permitted facilities. In addition, it is important to note that there are approximately 1,600 Amish operations included in the national total. For many in the Amish communities, deer breeding is another way to diversify their operations. A number of industry participants find that this form of farming provides an opportunity to turn a greater profit on a relatively small amount of acreage than traditional farming or ranching enterprises.

The trophy hunting segment of this industry relates only to those operations that purchase outright or release their own cervids into a hunting preserve. This segment represents the primary end market for the breeding stock industry. Trophy hunting, in this sense, involves hunting trophy cervids within high fenced hunting preserves. This generally occurs via 3-6 day hunt packages, where the hunter is provided lodging, meals, and a guided hunt for a set fee. Hunter expenditures included in this study only include those hunters that are related to this industry. In other words, hunters, in the context of this study, are only those that hunt at operations that either purchase or release deer from breeding operations into their hunting operations. Breeding operations represent the largest segment of the cervid farming industry. These operations raise and sell breeding stock to other industry breeders as well as hunting preserves. The commercial venison segment is similar to other food animal production operations, with fallow, elk, and red deer being the primary species reared. Cervids are raised to market age, processed, and the resulting venison is sold. In addition to venison, these operations may sell other co-products such as velvet, hides, and antlers. The last segment is the commercial urine, or scent, collection operations. These operations are found to stand alone or co-exist with other operational segments, where the urine is collected from males and females to sell as a hunting attractant.

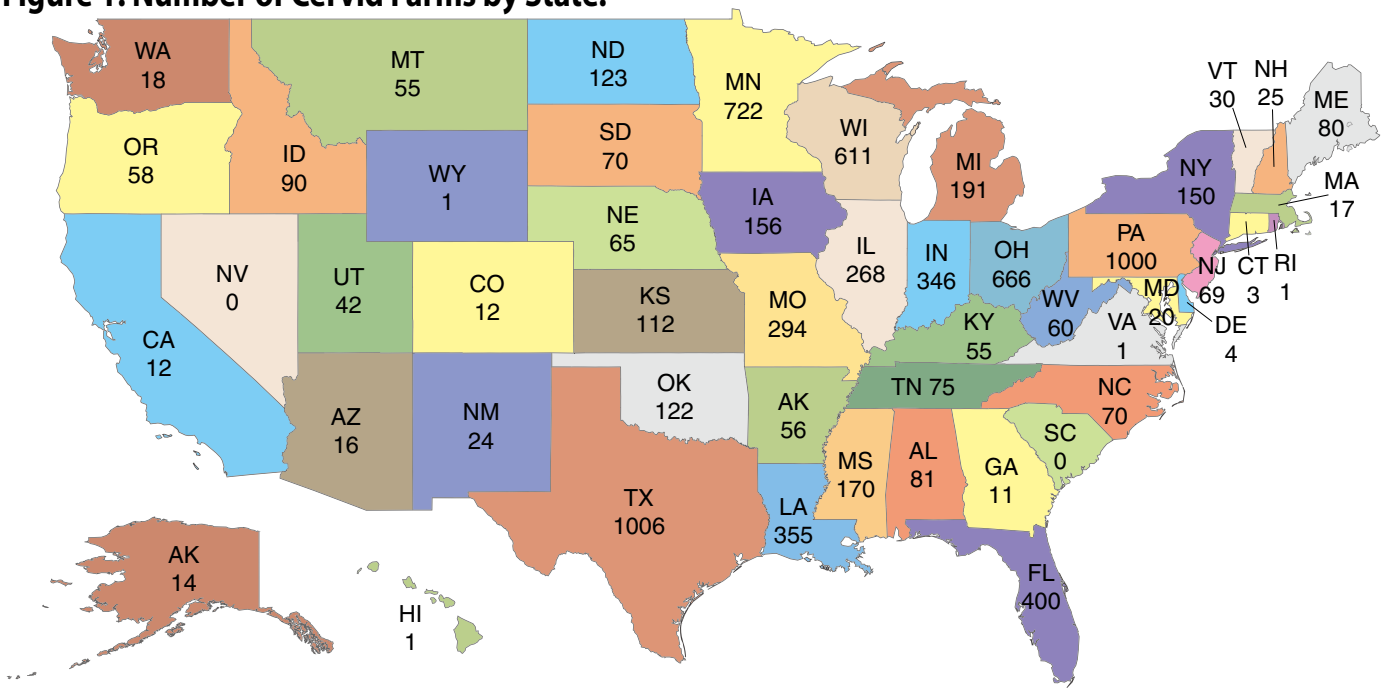
Figure 1: Number of Cervid Farms by State.



Methodology

As previously mentioned, the primary objective of this study is to estimate the economic impact of the United States cervid farming industry. In order to do this, a survey instrument was developed to collect detailed operational information from industry participants. This information was then combined with the inventory of cervid farms to analyze the production side of the industry. In addition, an analysis was performed to determine the impact of hunters, but only the portion of hunters who are related to the cervid farming industry. The production and hunting components were then combined to estimate the economic impact of the cervid farming industry.

Data Collection

During the late summer and early fall of 2006, background information to develop the survey was gained through site visits to cervid farms across the nation. Interviews from these visits provided a base set of information that was then utilized to develop the survey instrument. The survey was then reviewed by industry participants, revised, and sent to over 700 members of NADeFA® and 1,300 members of the Texas Deer Association (TDA) over the fall of 2006 to early 2007. Overall, the extensive survey achieved a response rate of 14 percent. These memberships were selected to participate in this study because they represent all facets of the cervid farming industry.

Survey Development

The actual survey instruments are contained in Appendix A (NADeFA®) and Appendix B (TDA). For the purposes of the survey, the cervid farming industry was segmented into three operational structures: breeding only, breeding and hunting, and hunting only operations. Breeding only operations were defined as those that only involve the scientific breeding and rearing of cervids for the purpose(s) of breeding stock, commercial venison, or commercial urine collection. Hunting only operations relate to only those hunting preserves that purchase cervids from breeding operations as stockers or as breeding stock for release into the preserve. Operations that manage their deer populations by selective harvest and nutritional supplements, rather than supplementing the natural genetics with deer released from breeding operations, are not included in this category. Breeding and hunting operations represent those that engage in breeding activities while also utilizing their own breeding stock, or purchased breeding stock, to supplement the genetics and/or populate their hunting preserve.

While a majority of the industry are whitetail deer producers, a variety of cervid species are raised as well, including elk, red deer, mule deer, sika, pere david's, reindeer, axis, fallow, and muntjak. The surveys proved to be quite extensive, as they were designed to represent producers of all of these cervid species and operational segments. For breeding operations, the survey included questions regarding the operation in general, herd inventory, purchases, sales, capital expenditures, veterinary expenditures, labor, feeding rates and expenditures, utilities, and other miscellaneous expenses. For hunting operations, the base operational questions remained the same, however, hunting related questions were included as well, such as the number of hunters, harvest rate, percentage of herd from breeding operations, hunt revenues, processing, and taxidermy.

Figure 2: Typical Fenced Paddock.

Survey Results

General Operations

Of the 302 respondents, 61 percent were breeding only operations, 32 percent were breeding and hunting operations, and 7 percent were hunting only operations. Respondents represented 26 of the 48 states that have some type of cervid operation. When combining all survey respondents, operations have been in business, on average, since 1999.

From the NADeFA® survey results, the average whitetail deer breeding operation reported a total of 82 deer, on close to 25 acres. Of these, 28 were bucks, 28 were does, and 26 were fawns. In 2005, bred does had an average of 1.24 fawns each, which increased to 1.31 for the 2006 fawning season. Average annual mortality rate was reported to be 9.6 percent. For comparison, whitetail breeding operations from the Texas survey were slightly larger, averaging 114 head, on a little more than 64 acres. Of these, 42 were bucks, 44 were does, with the remainder being fawns. Bred does averaged 1.27 fawns each in 2005 and 1.37 in 2006, slightly higher than the national results. Overall herd mortality rate was reported to be 5.7 percent.

Table 1 above contains a summary of the average operational costs across all survey respondents. A quick glance through the table reveals expected differences across operations for general expenditures. Breeding and hunting operations displayed the largest footprint, around 1,700 acres, as expected. Breeding only operations were the smallest, averaging around 20 acres in pens. Pens, in this sense, are typically described as a high fenced paddock, as shown in Figure 2. For those pens holding bucks or bulls, a protective screening is often used in conjunction with the fence to keep an antler from hooking in the fence accidentally. In addition, screening may be used as a visual barrier, particularly if the operation is near a road, to shield the deer from view from passers-by.

Breeding and hunting operations had more area devoted to breeding pens, more pens overall, and more deer (Table 2) than breeding only operations. This was expected as the breeding and hunting operations supply their hunting operation from their breeding operation, and are not necessarily relying on sales or transfers to move deer off the operation.

The results indicate expenditures on lodges, fencing, and improvements were the top three in terms of the capital cost for both breeding and hunting and hunting only operations, while breeding operations spent the most on fencing, buildings, and improvements. The category of improvements includes expenditures on land clearing, roads, tanks/ponds, and forage development among others. Large equipment, ranch vehicles, and implements were reported as the highest equipment expenditures across all three types of operations. Of all the respondents, 49 percent reported hiring labor, while 43 percent reported outsourcing labor and/or consulting needs. Breeding and hunting operations reported using four times the amount of outsourced services than breeding only operations, or $16,456 versus $4,042. Examples of outsourced services include those of operational management and or nutritional consulting, bottle feeding services for newborns, annual herd maintenance/vaccination services, and accounting services.

Figure 3 provides a summary of expenditures for a typical breeding operation. Survey categories, such as those shown in Table 1, were combined into four primary expense categories: capital, operational, feed, and general. Figure 3 illustrates the annual expenses for breeding operations. Operational expenditures include items such as supplies, labor,

utilities, insurance, advertising, and travel. Capital expenses refer to annualized capital costs for items such as land, improvements, fencing, buildings, breeding stock, feeding equipment, ATV's, and implements. Feed refers to the annual feed costs, including supplemental feed, hay, and bottle feeding supplies. Lastly, General costs cover the remainder of expenditures on items such as food plots, artificial insemination, veterinary, and disease monitoring.

Production

Table 2 contains a summary of production data across all respondents. Feed represents a little over 11 percent of total annual expenditures for breeding operations. From venison production to breeding stock operations, proper nutrition is essential to the physical health, development, and overall well being of all cervids. For breeding only operations with whitetails, 53 percent of respondents indicated bottle feeding their fawns, while only 29 percent of breeding and

* Insufficient results

hunting operations did. Of all species, bottle feeding is primarily practiced with whitetail fawns. Other species will not typically incur such management practices, where bottle feeding may only be utilized for orphaned or sick young.

On average, adult whitetail males were fed close to 4 pounds of supplemental feed per day, while elk consumed slightly over 6 pounds. All of the reported species were fed a protein concentrate and hay. Hay costs were extremely high during the study period due to severe drought conditions across most of the southern plains. In addition to purchased feed, 74 percent of all respondents reported planting food plots on their operations, ranging from half an acre to 500 acres.

When combining results, 70 percent of all breeding or breeding and hunting operation respondents indicated some type of breeding stock purchase. This would include purchases of breeder males, stocker males, bred females, open females, fawns, or semen straws. For whitetail, breeder bucks were the highest dollar expense, costing close to $21,000 each on average.

Hunting Operations

Operations with hunting reported other expenses in addition to those of breeding operations. Seventy-six percent of all respondents of operations that reported to be involved in hunting had a lodge on the premises for their clients. In addition to the roughly $170,000 cost of the lodge, these operations also accrued expenses to maintain and supply the lodge. Labor costs were reported to be higher than those of breeding operations due to an overall larger operation, as well as seasonal hunting guides. Food plots in the hunting areas tended to be larger, along with more feeders, waterers, and fencing, all contributing to the higher reported expenses. Although the majority of hunting operations accepted paying clients and corporate clients, 14 percent reported their hunting operation as personal use only. Of the whitetail hunting operations reporting, respondents estimated an average of 49 percent of the deer in their hunting areas are from breeding operations. Of all the respondents, 49 percent reported hiring labor, while 43 percent reported outsourcing labor and/or consulting needs. For breeding operations, those hiring salaried employees reported an annual expense in the mid $20,000 range. This expense increased to the mid $30,000 range for breeding and hunting operations. On the whole, labor hired on an hourly basis tended to be more prevalent than salaried labor.

Feed was the third largest expense category, representing a little over 11 percent of annual expenditures for breeding operations. Although it's not the largest expense category, feeding is considered to be one of the most important aspects of all operations. From venison production to breeding stock operations, proper nutrition is essential to the physical health, development, and overall well being of all cervid operations. For fawns, 45 percent of respondents indicated bottle feeding their young. Typical products used for bottle feeding ranged from goat's milk to different brands of milk replacer. On average, adult whitetail males were fed close to 4 pounds of supplemental feed per day, while elk consumed slightly over 6 pounds. Respondents indicated paying a little over $300 per ton for supplemental feed, while hay costs averaged around $240 per ton. In addition to purchased feed, 74 percent of all respondents reported planting food plots on their operations, ranging from half an acre to 500 acres.

Economic Impact

IMPLAN® (Impact Analysis for Planning), an input/output model, was used to estimate the economic impact of the cervid farming industry on the national economy. Originally developed by the USDA Forest Service, the IMPLAN model is now managed and maintained by the Minnesota IMPLAN Group (MIG). The model is, arguably, the most used and cited model for performing economic impact analyses in the United States.

The IMPLAN model is driven by purchases of final goods and services in a certain region, such as a state, a group of states, or the entire nation. These purchases represent the dollar value of the increase in finished goods and services demanded, and create an impact that ripples throughout the economy.

Industries produce goods and services for final use and purchase goods and services from other industries. These other producers and industries buy goods and services as well, which IMPLAN designates as indirect purchases. In addition, each step along the cycle pays wages and salaries to employees, who, in turn, make additional expenditures into the economy of the region.[2]

In determining the overall economic impact of an industry, the IMPLAN model uses a set of multipliers, separated by sector, to estimate the direct, indirect, and induced effects (induced being effects of household spending) of the economic cycle. Over 500 sector codes are included in the IMPLAN model, where each code represents a unique industrial sector that a specific product or category of products is represented by. The multipliers that are derived for each sector quantify the ripple effects of a dollar increase in final demand, thus resulting in an estimation of the economic impact.[3]

Cervid Industry

In determining the economic impact of the cervid farming industry, the categories of the survey were prepared for input into the IMPLAN model. This was accomplished by extrapolating the survey results against the inventory of operations to arrive at total industry expenditures for each category. These totals represent the value of final goods and services demanded by the industry, and were the baseline inputs for the IMPLAN model. Categories from the extrapolated survey results, such as supplemental feed or fencing, are then assigned a sector code according to the underlying industry the category relates to. Table 3 provides an example of category inputs and their multipliers from IMPLAN, with each category belonging to a different sector. Differences between the multipliers for each category demonstrate how dollars move throughout different industries. For instance, a $1 million change in final demand for supplemental feed will generate a total of $2.67 million in total industry output, $1.53 million in value added economic activity, and will support 24.34 jobs. In this example, total industry output would include the output generated by the supplemental feed industry and those industries that supply it. Value added from this industry includes employee compensation, proprietary income, other proprietor income, and indirect business taxes that are generated.[4] The employment multiplier represents the number of jobs that are supported per million dollar change in final demand.

Large equipment	3.02	1.29	15.79
ATV's	2.73	1.59	22.96

Hunter Expenditures

An additional component in determining the economic impact of the industry is to evaluate and include the role of hunter expenditures in the consumption of industry products. Not all hunting is related to cervid farming, but some is, therefore it is important to include only that which is related to this industry. In other words, the hunting product of cervid farming is a small part of overall cervid hunting in the United States. Yet the hunting component or economic activity associated with deer farming is an important part of the economic activity generated by the cervid farming industry. While overall hunter numbers in the United States are down, the demand for trophy hunting appears to be increasing. Dollars spent on hunting, assorted gear, and travel continue to grow. Time is increasingly the limiting factor for many industry participants, as they have the money to participate, but not the time to invest in traditional hunting. The growth of this segment of the industry is expected to continue, therefore, it is important to include this aspect of the industry in this study.

In order to determine this impact, the number of hunters per operation was taken from the survey, extrapolated against all hunting operations, and combined with a report that outlines hunting expenditures on a per hunter basis. This report, entitled the "Economic Importance of Hunting in America",[5] was based on the 2001 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation survey conducted by the U.S. Fish and Wildlife Service and the U.S. Census Bureau. These retail expenditures were then combined with other hunt related expenditures, such as trophy and processing fees, and assigned sector codes for the IMPLAN model. When totaled, less than 1 percent of the report's estimated 11 million deer hunters are related to the cervid farming industry. However, this small percentage of hunters account for over 2 percent of the report's estimated $10 billion in retail, travel, and hunt related expenditures.

Results

Table 4 below provides a summary of the economic impact of the industry. Cervid operations generate an estimated $893.5 million in direct expenditures into the U.S. economy. This value represents the estimated increase in final demand of all goods and services consumed by the industry. As these direct expenditures ripple throughout the economy, the cervid farming industry generates an estimated $2.3 billion of total industry output for all industries that supply the cervid farming industry. These industries include feed suppliers, farm and ranch supply stores, veterinary services, medical and sedation product suppliers, construction, utilities, advertising, insurance, and numerous others. Hunters contribute an additional $241 million in direct economic impacts through retail and hunt related expenditures, which generates a total of $756.9 million of total industry output.

When combined, the cervid farming industry generates $3 billion of economic activity and output in the U.S. economy. The industry provides the economic activity that supports 29,199 jobs in the economy, most of which are located in rural areas of the nation. If this industry were to disappear, these jobs would have to find support from some other sector of the economy. Unfortunately, not every segment of the industry could be analyzed. Insufficient industry and survey data limited analysis to only the operational aspects of both the venison and scent collection industries, as production and retail revenues were excluded from the analysis.

[5] "Economic Importance of Hunting in America." Produced by Southwick Associates, Inc. for the International Association of Fish and Wildlife Agencies, 2002. Available online, accessed August 10, 2006. http://www.southwickassociates.com/freereports/default.aspx

Table 4: Economic Impact of the Cervid Farming Industry.

	Direct	Output	Value Added	Employment
All Operations	893,501,559	2,333,462,511	1,276,311,405	21,070
Hunters	241,042,970	756,897,725	358,602,855	8,129
Total	1,134,544,528	3,090,360,236	1,634,914,260	29,199

Conclusion

With over 7,000 operations and 2,000 hunting preserves, the cervid farming industry has an established presence across the nation. The majority of these operations are located in rural areas of the nation. In addition, while traditional forms overwhelmingly dominate the hunting industry, the small niche of hunters this market serves continues to increase. This increase in demand is fueling the growth in the breeding industry. Over $1.1 billion in direct expenditures are poured into the U.S. economy each year by commercial farming operations and sportsmen related to this industry. In turn, this generates $3 billion of economic activity while supporting 29,199 jobs. All told, these results highlight the fact that the cervid farming industry continues to be a vital contributor to the rural economies of the United States.

Appendix A: National Cervid Industry Survey

National Cervid Industry - Economic Impact Survey

Instructions are provided at the end of this survey. Include annualized 2005 figures where appropriate.

Please indicate type of operation (check all that apply)
Cervid Breeding (includes venison and urine collection) ☐ **Cervid Hunting** ☐ **Cervid Breeding and Hunting** ☐

Cervid Breeding

***Please select type of cervid breeding operation*:** **Breeding only** ☐ **Commercial Venison** ☐ **Commercial Urine Collection** ☐

I. Operation

1. Year started: _____ 2. State: _____
3. Total acreage: _____ acres 4. Area under high fence: _____ acres
5. Area of land purchased: _____ acres 5a. Purchase value: $_____ (per acre)
6. Area of land inherited: _____ acres

II. Herd Inventory

1. Inventory (Final 2005 figures)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Males:										
Females:										
Fawns/calves:										
Birth rate (2005):										
Birth rate (2006):										
Annual mortality rate (%):										

2. Annual Purchases (Final 2005 figures)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Males (#):										
Total Cost:										
Females (#):										
Total Cost:										
Fawns/calves (#):										
Total Cost:										
Semen straws (#):										
Total Cost:										

III. Facilities

1. Area of breeding operation: _____ acres 1a. Number of pens: _____
2. Area of venison operation: _____ acres 2a. Number of pens: _____
3. Area of urine collection operation: _____ acres 3a. Number of pens: _____
4. Capital cost of fencing: $_____ 5. Capital cost of shelters: $_____
6. Capital cost of improvements: $_____ 7. Capital cost of additional buildings: $_____
8. Capital cost of working pens: $_____
9. Do you have a handling facility? ☐ Yes ☐ No 9a. If yes, capital cost of this facility: $_____
10. Do you have a venison processing facility? ☐ Yes ☐ No 10a. If yes, capital cost of this facility: $_____
11. Do you have a cooler/freezer for venison? ☐ Yes ☐ No 11a. If yes, capital cost of this equipment: $_____
12. Do you have a urine collection facility? ☐ Yes ☐ No 12a. If yes, capital cost of this facility: $_____
13. Do you have a cooler/freezer for urine? ☐ Yes ☐ No 13a. If yes, capital cost of this equipment: $_____

Cervid Breeding, continued

IV. Equipment

1. Purchase price of all large equipment, combined (i.e. tractor + bobcat): $_____
2. Purchase price of all ATVs, combined: $_____
3. Purchase price of all ranch vehicles, combined: $_____
4. Purchase price of all implements, combined: $_____
5. Purchase price of all trailers/transport crates, combined: $_____
6. Purchase price of all bulk feed bins, combined: $_____
7. Purchase price of all feeding equipment, combined: $_____
8. Purchase price of all watering equipment, combined: $_____
9. Purchase price of all video equipment, combined: $_____
10. Annual cost of rental equipment: $_____
11. Purchase price of semen storage tank(s): $_____
12. Purchase price of dart gun/sedation equipment: $_____
13. Purchase price of packaging equipment (venison and urine products): $_____

V. Veterinary & Supplies

1. Annual cost of operating supplies: $_____ 2. Annual cost of medical supplies: $_____
3. Annual veterinary expense: $_____ 4. Average cost per sedation: $_____
5. Number of necropsies performed: _____ 5a. Average cost per necropsy: $_____
6. Number of CWD tests performed: _____ 6a. Average cost per CWD test: $_____
7. Number of deer DNA certified: _____ 7a. Annual cost for DNA certification: $_____
8. Average annual number of sedations (per animal, per species):

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Males:										
Females:										

9. Annual number of females AI'd (per species):

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Females AI'd:										

VI. Labor

1. Number of employees: 1a. Paid salary: _____ 1b. Paid hourly: _____
2. Total annual wages paid: 2a. Salaries: $_____ 2b. Hourly: $_____
3. Annual expense from outsourced services: $_____

VII. Utilities

1. Annual cost of utilities: $_____
2. Annual cost of fuel: $_____

VIII. Miscellaneous Expenses

1. Annual advertising/marketing expense (includes taxidermy services): $_____
2. Annual regulatory expense (permits): $_____
3. Annual meat inspection/nutrition labeling expense: $_____
4. Annual insurance expense: $_____
5. Annual travel expense: $_____
6. Annual property tax: $_____
7. Annual cost of maintenance and repair: $_____

Cervid Breeding, continued

IX. Feeding

Fawns/Calves

1. Do you bottle feed? ☐ Yes (continue below) ☐ No (skip to 2)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Percent of all fawns/calves:										
Days fed until weaning:										
Product used:										
Product price per gal/bag/lb:										
Units fed until weaning:										

2. After weaning: (units are pounds per animal)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Daily protein feed rate:										
Daily hay feed rate:										

Adults

1. Feeding rates: (units are pounds per animal)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Males:										
Daily protein feed rate:										
Daily hay feed rate:										
Females:										
Daily feed rate:										
Daily hay feed rate:										

2. Protein feed price: $_____ (per bag/ton)
3. Hay price: $_____ (per bale) 3a. Average bale weight: _____ lbs
4. Annual protein feed purchase: _____ tons
5. Annual hay purchase: _____ bales
6. Approximate area of food plots: _____ acres
   6a. Annual cost of seed: $_____
   6b. Annual cost of fertilizer: $_____

X. Annual Sales

Annual receipts from breeding operation

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
1. Males sold:										
1a. Total Receipts:										
2. Females sold:										
2a. Total Receipts:										
3. Fawns/calves sold:										
3a. Total Receipts:										
4. Semen straws sold:										
4a. Total Receipts:										

Cervid Breeding, continued

Annual receipts from commercial venison production

	Elk	Fallow	Red Deer	Reindeer	Other:
1. Annual number processed:					
2. Average processing yield per animal (lbs):					
3. General processing cost per animal:					
4. Specialty processing cost – summer sausage, jerky, etc. (per pound):					
5. Amount of specialty processing per animal (lbs):					
6. Total receipts from all venison sales:					

7. Annual packaging, shipping, and labeling expense for venison: $_____
8. Annual number of animals used to collect velvet: _____
9. Annual amount of velvet processed: _____ lbs
10. Processing cost of velvet: $_____ (per pound)
11. Total receipts from velvet products: $_____
12. Annual packaging, shipping, and labeling expense for velvet products: $_____
13. Annual amount of shed/cut antlers sold: _____ lbs
    13a. Total receipts from antler sales: $_____
14. Total receipts from other by-products (hides, pizzles, etc.): $_____
15. Annual number of males sold as breeding stock: _____ 15a. Total receipts: $_____
16. Annual number of females sold as breeding stock: _____ 16a. Total receipts: $_____
17. Annual number of males sold to hunting preserves: _____ 17a. Total receipts: $_____
18. Annual number of females sold to hunting preserves: _____ 18a. Total receipts: $_____

Annual receipts from urine collection

1. Total number of males used for collection: _____
2. Annual amount of urine collected from males: _____ gal
   2a. Total receipts from male urine sales: $_____
3. Total number of females used for collection: _____
4. Annual amount of non-estrous urine collected from females: _____ gal
   4a. Total receipts from non-estrous urine sales: $_____
5. Annual amount of estrous urine collected from females: _____ gal
   5a. Total receipts from estrous urine sales: $_____
6. Annual packaging, shipping, and labeling expense for urine sales: $_____
7. Total receipts from other scent sales: $_____
8. Annual number of males sold as breeding stock: _____ 8a. Total receipts: $_____
9. Annual number of females sold as breeding stock: _____ 9a. Total receipts: $_____
10. Annual number of males sold to hunting preserves: _____ 10a. Total receipts: $_____
11. Annual number of females sold to hunting preserves: _____ 11a. Total receipts: $_____

Hunting

For combination hunting and breeding operations, please separate hunting operation expenses from breeding operation expenses. Include annualized 2005 figures where appropriate.

What is the purpose of your hunting operation? ☐ Personal use only ☐ Corporate clients, no fee ☐ Paying clients

National Cervid Industry - Economic Impact Survey
North American Deer Farmers Association Members

****All information collected in this survey will remain <u>confidential</u>****

Survey Instructions

1. This survey is to be completed by cervid breeding operations (including venison production and urine collection operations), combination cervid breeding and hunting operations, and hunting operations that utilize outside cervid breeding operations as a genetic supplement for their cervid herd. All other industry participants may disregard this survey.
2. For the sections and categories below, please provide annualized 2005 records of actual or accurate estimates of expenditures rather than a range estimate of expenditures.
3. **For combination breeding and hunting operations, please separate breeding operation records from hunting operation records. Contact us for additional surveys if you have multiple permitted breeding and/or hunting operations.**
4. **It is important to use the provided categories for records for each section, rather than combining records from breeding and hunting operations and submitting that in a breeding or hunting category. Please provide an accurate estimate when your records do not match these categories.**
5. If a question does not apply to your operation, please indicate this with an "N/A" response.
6. Please indicate units (lbs, tons, gals, etc.) where applicable.
7. For further explanation of general and selected lines of the survey, please refer to the information below.

Cervid Breeding (Breeding only, Venison production, Urine Collection)

Please indicate the purpose of your breeding operation by checking all boxes that apply.

<u>I. Operation</u>: This category provides for a general overview of your operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Herd Inventory</u>: This category refers to your final 2005 cervid inventory and final 2005 purchases (please include number purchased with total cost) towards this inventory. *Annual mortality rate* refers to the annual mortality loss on entire herd, including the loss of fawns/calves after weaning. *Birth rate* refers to the number of surviving fawns/calves born per bred female, specifically, the total number of live fawns/calves at weaning divided by the total number of bred females (i.e. 1.5, 2.3, etc.).

<u>III. Facilities</u>: This category refers to your operational specific facilities. *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc.

<u>IV. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>V. Veterinary & Supplies</u>: *Annual cost of operating supplies* refers to the yearly expense for all operating supplies, such as office supplies, sedation supplies, AI supplies, etc. *Annual cost of medical supplies* refers to the yearly expense for medicine, syringes, etc. *Average cost per sedation* refers to the average expense of supplies and labor to sedate or dart an animal. *Number of necropsies performed* refers to the number of post mortality veterinary examinations performed to determine the cause of death. *Average cost per necropsy* refers to the average labor and labwork expense of performing a necropsy on a single animal. *Average cost per CWD test* refers to the average labor and labwork expense of performing a CWD test.

<u>VI. Labor</u>: This category refers to the labor expense for your breeding operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if paid labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense from outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VII. Utilities</u>: This category refers to the annual utilities expense for electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for your breeding operation.

<u>VIII. Miscellaneous Expenses</u>: *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for genetic display (horn molds, shed mounts, deceased buck mounts, etc.). *Annual regulatory expense* refers to the annual cost of regulatory operating permits, if applicable to your state. *Annual meat inspection expense* refers to the annual cost to venison production operations for state or federal meat inspection. *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>IX. Feeding</u>: This category relates to feeding rates of fawns/calves and adults in your operation. For those who bottle feed fawns/calves, please indicate the percent of all fawns/calves that are bottle fed for, the number of days of bottle feeding until weaned, the product used (i.e. goat milk, milk replacer, etc.), the per unit product price (please indicate units-gal, bags, lbs), and the number of units of this product used per fawn until weaning for each cervid species in your operation.

<u>X. Annual Sales</u>: This category relates to the final 2005 revenue inflows of your operation. Receipts are categorized for breeding operations, commercial venison operations, and commercial urine operations. Please separate records for each these categories that apply to your operation.

Cervid Hunting

Please indicate the purpose of your hunting operation by checking all boxes that apply

<u>I. Operation</u>: *Area of hunting operation* refers to the total acreage dedicated to your hunting operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Facilities</u>: *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc.

<u>III. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your breeding operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>IV. Supplies</u>: This category relates to final 2005 expenses for supplemental feed, corn, operating, and food and beverage supplies.

<u>V. Labor</u>: This category refers to the labor expense for your hunting operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if paid labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense for outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VI. Utilities</u>: This category refers to the annual utilities expense for electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for your hunting operation.

<u>VII. Miscellaneous Expenses</u>: *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for display. *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>VIII. Hunters</u>: *Total expense* refers to the cost of purchasing, sedating, and transporting cervids for release into hunting operation. *Average processing cost* refers to the cost of processing each harvested cervid. If in-house processing occurs, please provide an accurate estimate of this cost based on local processor costs. *Percent of all harvested seeking taxidermy services* relates to the percentage of all harvested cervids that will have some type of taxidermy service performed, such as a shoulder or full body mount. *Average taxidermy cost, per cervid* allows for the average per cervid expense of this service for the hunter from your local taxidermist.

We thank you in advance for taking the time to complete this survey. Upon completion, please return the survey with the enclosed envelope. Questions or requests for additional surveys may be directed to Brian Frosch at 888-890-5663.

3. Land purchased: _____ (acres) 3a. Purchase value: $_____ (per acre)
4. Land inherited: _____ (acres)

II. Facilities

1. Capital cost of lodge(s): $_____
2. Capital cost of fencing: $_____
3. Capital cost of improvements: $_____
4. Capital cost of buildings: $_____
5. Annual cost of maintenance and repair: $_____
6. Approximate area of food plots: _____ (acres)
   6a. Annual cost of seed: $_____
   6b. Annual cost of fertilizer: $_____

III. Equipment

1. Purchase price of all large equipment combined (i.e. tractor + bobcat): $_____
2. Purchase price of all ATV(s), combined: $_____
3. Purchase price of all ranch vehicle(s), combined: $_____
4. Purchase price of all implements, combined: $_____
5. Purchase price of all trailer(s)/transport crate(s), combined: $_____
6. Purchase price of all bulk feed bin(s), combined: $_____
7. Purchase price of all feeding equipment, combined: $_____
8. Purchase price of all watering equipment, combined: $_____
9. Purchase price of all video equipment, combined: $_____
10. Annual cost of rental equipment: $_____
11. Purchase price of dart gun/sedation equipment: $_____
12. Purchase price of cooler/freezer equipment: $_____
13. Purchase price of other equipment: $_____

IV. Supplies

1. Annual amount of protein feed purchased: _____ (tons) 1a. Protein feed unit price: $_____ (per bag/ton)
2. Annual amount of corn purchased: _____ (tons) 2a. Corn unit price: $_____ (per bag/ton)
3. Annual cost of operating supplies for lodge: $_____
4. Annual cost of food and beverages for lodge: $_____

V. Labor

1. Number of employees: 1a. Salary: _____ 1b. Hourly: _____
2. Total wages paid: 2a. Salaries: $_____ 2b. Hourly: $_____
3. Annual expense from outsourced services: $_____

Hunting, continued

VI. Utilities

1. Annual cost of utilities: $_____
2. Annual cost of fuel: $_____

VII. Miscellaneous Expenses

1. Annual insurance expense: $_____
2. Annual advertising/marketing expense (includes taxidermy services): $_____
3. Annual travel expenses: $_____
4. Annual property tax: $_____
5. Other annual miscellaneous expenses: $_____

VIII. Hunters

1. Annual number of hunters: _____
2. Total annual deer harvest: _____
3. Approximate total number of deer in hunting area: _____
   3a. Approximate percentage of total deer in the hunting area that are from breeding: _____
4. Annual number of stocker bucks released from breeding operation into hunting operation: _____
5. Annual number of does released from breeding operation into hunting operation: _____
6. Annual number of stocker bucks purchased for release into hunting operation: _____
   6a. Total expense: $_____
7. Annual number of does purchased for release: _____
   7a. Total expense: $_____
8. Annual number of does harvested: _____
   8a. Total receipts from doe hunts: $_____
9. Annual number of management bucks harvested: _____
   9a. Total receipts from management buck hunts: $_____
10. Annual number of trophy bucks harvested: _____
    10a. Total receipts from trophy buck hunts: $_____
11. Average processing cost: $_____ (per deer)
12. Approximate percentage of harvested bucks seeking taxidermy services: _____%
13. Average taxidermy cost: $_____ (per deer)

APPENDIX

Economic Impact Survey
Texas Deer Association Members

****All information collected in this survey will remain <u>confidential</u>****

Survey Instructions

1. This survey is to be completed by scientific breeding operations, combination scientific breeding and hunting operations, and hunting operations that utilize outside scientific breeding operations as a genetic supplement for their deer herd. All other industry participants may disregard this survey.
2. For the sections and categories below, please provide annualized 2005 records of actual or accurate estimates of expenditures rather than a range estimate of expenditures.
3. For those who have multiple facilities under separate permits (uniquely identified), please contact us for additional surveys for each operation.
4. **It is important to separate records for each facility, and between hunting and breeding operations. Contact us for additional surveys if you have multiple permitted breeding and/or hunting operations.**
5. **It is also important to use the provided categories for records for each section, rather than combining records from breeding and hunting operations and submitting that in a breeding or hunting category. Please provide an accurate estimate when your records do not match these categories.**
6. If a question does not apply to your operation, please indicate this with an "N/A" response.
7. Please indicate units (lbs, tons, gals, etc.) where applicable.
8. For further explanation of general and selected lines of the survey, please refer to the information below.

Scientific Breeding

<u>I. Operation</u>: *Area of breeding operation* refers to the total acreage dedicated to your breeding operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Herd Inventory</u>: This category refers to your herd inventory, fawning rate, purchases and sales towards your inventory for 2005, and number the of fawns born and fawning rate for 2006. *Annual herd mortality rate* refers to the annual mortality loss on the total breeding herd, including loss of fawns after weaning. *Fawning rate* refers to the number of surviving fawns born per doe, specifically, the total number of live fawns at weaning divided by the total number of bred does (i.e. 0.7, 1.5, 2.3, etc.).

<u>III. Facilities</u>: *Area of pens* refers to the total acreage enclosed by all pens combined. *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>IV. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your breeding operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>V. Veterinary & Supplies</u>: *Annual cost of operating supplies* refers to the yearly expense for all operating supplies, such as office supplies, sedation supplies, AI supplies, etc. *Annual cost of medical supplies* refers to the yearly expense for medicine, syringes, etc. *Annual number of sedations* refers to the average annual number of sedations on a per doe/buck basis. *Average cost per sedation* refers to the average expense of supplies and labor to sedate or dart a deer. *Number of necropsies performed* refers to the number of post mortality veterinary examinations performed to determine the cause of death. *Average cost per necropsy* refers to the average labor and labwork expense of performing a necropsy on a single deer. *Average cost per CWD test* refers to the average labor and labwork expense of performing a CWD test.

<u>VI. Labor</u>: This category refers to the labor expense for your breeding operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense from outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VII. Utilities</u>: This category refers to the annual utilities expense for the annual electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for breeding operations.

<u>VIII. Miscellaneous Expenses</u>: *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for genetic display (horn molds or shed mounts, or deceased buck mounts). *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc.

<u>IX. Feeding</u>: This category relates to feeding rates for fawns, bucks, and does. For those who bottle feed fawns, please indicate the percent of all fawns that are bottle fed, number of days of bottle feeding until weaning, the product used (i.e. goat milk, milk replacer, etc.), units of this product used per fawn until weaning, the per unit product price (please indicate units-gal, bags, lbs).

Hunting

<u>I. Operation</u>: *Area of hunting operation* refers to the total acreage dedicated to your hunting operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Facilities</u>: *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>III. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your breeding operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>IV. Supplies</u>: This category relates to supplemental feed, corn, operating, food, and beverage supplies for hunting operations on an annualized basis.

<u>V. Labor</u>: This category refers to the labor expense for your breeding operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense for outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VI. Utilities</u>: This category refers to the annual utilities expense for the annual electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for hunting operations.

<u>VII. Miscellaneous Expenses</u>: *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for display. *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc.

<u>VIII. Hunters</u>: This category relates to the annual number of hunters, number of deer harvested, number of deer purchased and/or released into hunting operation, and the expenses and receipts from hunting. *Total expense* in lines 6a & 7a refer to the cost of purchasing, sedating, and transporting deer for release into hunting operation. *Average processing cost* refers to the cost of processing each harvested deer. If it is processed in-house, please provide an accurate estimate of this cost from based on local processor costs. Line 12 relates to the percentage of harvested deer that will have some type of taxidermy service performed, such as a shoulder or full body mount. Line 13 allows for the average per deer expense of this service for the hunter.

We thank you in advance for taking the time to complete this survey. Upon completion, please return the survey with the enclosed envelope no later than November 10th. Questions or requests for additional surveys may also be directed to Brian Frosch at 888-890-5663.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact. This initiative petition prohibits confined big game hunting in Missouri. There are no criminal penalties proposed for violating the Fair Chase Amendment.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated the proposed amendment would authorize the Missouri Conservation Commission to regulate confined, privately owned big game species. It would also restrict or prohibit certain activities relating to such species. Budget and Planning defers to the Missouri Conservation Commission for an estimate of the proposal's fiscal impact on the Commission or the Missouri Department of Conservation (MDC). Budget and Planning also defers to the Missouri Department of Agriculture (MDA) for an estimate of the proposal's potential fiscal impact on MDA. Budget and Planning does not have sufficient information to estimate the potential fiscal impact the proposal may have on state or local government revenues derived from practices that would be regulated, restricted, or prohibited under the proposal.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated the constitutional amendment proposed in this initiative petition will have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no anticipated fiscal impact for their college.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Metropolitan Zoological Park and Museum District** indicated they do not believe this initiative petition will have a financial impact on their district.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, University of Missouri, St. Louis Community College, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** and the **Missouri Joint Municipal Electric Utility Commission.**

Fiscal Note Summary

State governmental impact is unknown. Local governmental entities expect no costs or savings.

JOHN R. ASHCROFT

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Marc Ellinger regarding a proposed constitutional amendment to Article IV, version 1 (2018-186)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Marc Ellinger on March 28, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article IV is amended by adding one new section to be known as Section 40(c), to read as follows:

40(c). 1. The right to hunt shall be guaranteed to all Missourians and shall not be infringed by law, except as expressly authorized in this Constitution. This section shall not be a basis to challenge any rule, regulation or permit requirements established by the Missouri Conservation Commission pursuant to its authority under Sections 40(a) through 46 of this Article, nor shall it authorize any person to hunt with any weapon such person may not legally possess, nor shall it authorize trespassing.

2. The provisions of Section 40(c) shall be known as the Native Missouri Wildlife Conservation Amendment, and its purpose is to prohibit the shipment or transportation of big game species to or from Missouri destinations. It shall be the public policy of this state to protect the health of Missouri's livestock and wildlife by changing the requirements related to the transport of captive big game species. Transport of big game species into and inside Missouri presents a significant threat to the safety, health and welfare of wildlife across Missouri due to the risk of introducing disease. Confined big game killing or the owning, possessing, confining, transporting, breeding, or raising of privately owned big game species shall not be construed as hunting, farming or ranching for any purpose under this Constitution or any law.

3. Upon the effective date of this Amendment the delivery, receipt, shipping, or transportation of any big game species to or from any destination within Missouri shall be prohibited. The only exceptions to this general prohibition are as follows:

a. Prior to and on November 7, 2019, a Missouri facility legally confining big game species with all required permits in place on November 6, 2018, and which continuously maintains all required permits, may deliver, ship or transport any big game species for which such facility maintains such permits, and any person engaged in the shipping to or from any such excepted facility however the shipping of such big game species into Missouri shall not be permitted under this exception;

b. When such big game species are being transported to or from any facility and will be held under the authority of the Missouri Conservation Commission or under the supervision of an authorized representative of: governmentally owned zoos or wildlife or research organizations; American Zoo and Aquariums Association accredited not-for-profit facilities; nationally accredited universities, colleges or, schools; incorporated cities, states or federal agencies for scientific research;

c. When such big game species are transported through Missouri in compliance with federal regulations, with both origin and destination outside of Missouri;

d. When such big game species are transported to any commercial slaughter facility operating under state or federal inspection for commercial meat production; or

e. When such big game species are transported, for treatment of illness or injury, between a veterinary facility and a facility authorized to possess privately owned big game species.

4. In addition to the authority vested in it by Section 40(a) of Article IV, the Missouri Conservation Commission shall have primary authority over the regulation of privately-owned big game species. The Missouri Conservation Commission may make such rules and regulations as may be deemed necessary for the enforcement of this Amendment.

5. Information or data in either paper or electronic form regarding any voluntary or mandatory program related to diseases of big game species shall be considered a public record and subject to disclosure except as or expressly permitted or required to be closed by federal law or this constitution.

6. Definitions.

a. "Big game species" as used in this amendment shall not include any livestock as defined in this Amendment, and shall include all of the following animals, either as live animals, embryos, ova, or semen: (a) all cervids and cervid hybrids including but not limited to white-tailed deer, elk, mule deer, red deer, fallow deer, sika deer and moose; (b) mountain goats, bighorn sheep, Dall's sheep, pronghorn, peccary, and javelina; and (c) any other ungulate (hooved animal) confined or bred primarily for confined big game killing and not for commercial meat production or other human use.

b. "Confined big game killing" as used in this amendment shall mean an act in which an owner, operator or agent of a big game preserve permits, allows, enables or facilitates the killing or attempted killing of big game species inside a big game preserve, but shall not include any act of a government employee or agent to control an animal population, to prevent or control diseases, or when government action is otherwise required or authorized by law.

c. "Livestock" as used in this Amendment, shall mean cattle, fully domesticated swine, fully domesticated sheep, fully domesticated goats, fully domesticated bison, fully domesticated ratite birds, fully domesticated rabbits, and fully domesticated horses, donkeys, mules, alpacas and llamas, where such fully domesticated animals are raised primarily for human use or consumption not including confined big game killing. Livestock shall also include embryos, ova, and semen of any designated animal in this definition.

d. "Big game preserve" as used in this amendment shall mean a facility confining privately-owned big game species within fencing designed or intended to reduce the ability of such privately-owned big game species to escape or to evade pursuit.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-186)

Subject

Initiative petition from Marc Ellinger regarding a proposed constitutional amendment to Article IV. (Received March 29, 2017)

Date

April 18, 2017

Description

This proposal would amend Article IV of the Missouri Constitution.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** the **Missouri Joint Municipal Electric Utility Commission,** and **Metropolitan Zoological Park and Museum District**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated this initiative petition will have a substantial negative impact on the cervid industry in Missouri.

The Agricultural and Food Policy Center at Texas A&M University conducted an economic impact study of the United States cervid farming industry in 2007 (attached) based on a survey of the deer farms in Texas and the elk producers located throughout the United States.

Based on the values provided by the Texas A&M study, and an estimated 225 cervid producers in Missouri, the industry has an estimated direct annual economic impact in Missouri of approximately $98 million. The number of people employed in the cervid industry in Missouri is estimated to be approximately 1,150 individuals. In addition, based on the study and 2007 property tax rates, the cervid industry pays approximately $700,000 annually in local property taxes.

They included the following information on the economic impact of the United States cervid farming industry:

ECONOMIC IMPACT OF THE UNITED STATES CERVID FARMING INDUSTRY

Acknowledgements

In no way could the study have been completed without the outstanding efforts of the members and leadership of both the North American Deer Farmers Association (NADeFA®) and the Texas Deer Association (TDA). We truly appreciate all of the members who took the time to complete and return the survey. In addition, we sincerely thank all of those who took time out of their schedules to educate us and let us see your operations first hand. Specifically, from NADeFA®: Fred Huebner, Holly Johnson, Glenn Dice, Julie Getschmann, and Shelly Burns. From the TDA: Scott Bugai, Dick Cain, and Lisa Barton. The following people and operations: Robert Williams of RW Trophy Ranch, Buddy Jordan of Indian Creek Ranch, Trophy Ridge Ranch (Dick Cain), Buck Naked Trophy Whitetails (Scott Bugai), Stephen Frisina of Celebrity Ranch, Tom Malouf of Malouf's Trophy Whitetails, Robert Gegenheimer of Cotton Mesa, Dave McQuaig of Cougar Ridge Whitetails, Mike Hine of Timberghost Ranch, Pat Cooper, Russ Walk of Walk's Whitetails, Dean Borntrager of Sundance Whitetails, Levi Mast of Mast's Whitetails, Dave Griffith of Griffith Brothers Whitetail Ridge, and Tim Tague and Doug Berty of Double T Ranch.

Executive Summary

- The cervid farming industry is, perhaps, the fastest growing industry in rural America.
- Over 2,000 industry participants were surveyed, with a response rate of 14 percent.
- This survey, designed to estimate the economic impact of the industry, was performed in late 2006-early 2007.
- The average whitetail deer farm had 82 deer, composed of 28 males, 28 females, 26 fawns, and had an average birth rate of 1.31 fawns per doe in 2006.
- Breeding operations reported expenditures averaging $101,000 per year.
- The cervid farming industry has a direct economic impact of $893.5 million.
- When incorporating the indirect impacts of the industry, for example, the farm's expenditures on feed, veterinary supplies, fuel and other purchases, the total economic impact of the industry is $2.3 billion.
- One of the major customers of this industry is hunters. Estimating the impact of hunting dollars spent, with hunters as the consumer of cervid farming products, an additional $757 million is generated by the cervid farming industry.
- The total impact of the industry, combining the farming and hunting components, is $3.0 billion annually.
- The economic activity of the cervid farming industry supports 29,199 jobs, most of which are in rural America. If this industry did not exist, those jobs would have to be supported by some other economic activity.
- These results highlight the fact that the cervid farming industry is a growing and important industry in rural America.

Introduction

The cervid, or deer, farming industry is a vital and growing business in rural areas of the United States. As demographic and market forces tend to shift traditional revenue sources away from rural communities, their economies increasingly rely on new industries such as this one. As the industry has grown, participants and legislators have developed an interest in measuring the economic contribution of the industry on their respective communities. In addition, the industry is governed by a myriad of state and federal laws, regulations, and jurisdictions. Since the majority of industry regulation is left up to the states, a significant amount of variability in the regulations exists from state to state. This lack of consistency in laws and regulations may be a factor affecting future industry growth in some states. The rapid growth of the industry and an array of policy issues led the industry to request this study of the size and economic importance of the cervid farming industry. In 2006, the Agricultural and Food Policy Center (AFPC) at Texas A&M University was requested by former Texas Congressman Henry Bonilla to undertake this study. The primary objective of this study is to determine the economic impact of the United States cervid farming industry. Secondary objectives include providing a current description of typical industry participants and cost estimates for the major categories of expenses on cervid farming operations.

Cervid Industry

The term "cervid" refers to any one of the various members of the cervidae family. This family includes members such as whitetail deer, elk, fallow, reindeer, axis, sika, and red deer among others.[1]

Like any industry, the cervid farming industry involves producers and consumers. In general, the production side of the industry is comprised of breeding stock producers, trophy hunting preserves, commercial venison producers, and commercial scent collection. Some commercial production operations may take on a single segment, such as one producing and selling only breeding stock. Others may consist of any combination of these, such as an operation producing venison and velvet, while also collecting urine for scent sales. Consumers of the industry include hunters (for scent products and hunting) other breeders, and consumers of venison and related products (hides, velvet, shed antlers, etc.).

Figure 1 displays the estimated number of cervid farms per state. This inventory was compiled by the administrative staff at the North American Deer Farmers Association (NADeFA®) through contact with the appropriate state agency. Those states that did not have an exact count provided their best estimate. Across the nation, the total number of cervid farms was 7,828, with Pennsylvania and Texas home to around 1,000 farms each. The total number of hunting preserves is estimated at 2,639, yet this only represents an estimate of those that are related to the cervid farming industry. As an example of the growth the cervid farming industry is experiencing, there were 946 permitted breeding facilities in Texas in late summer 2006. However, when the analysis took place early in the spring of 2007, there were 1,006 permitted facilities. In addition, it is important to note that there are approximately 1,600 Amish operations included in the national total. For many in the Amish communities, deer breeding is another way to diversify their operations. A number of industry participants find that this form of farming provides an opportunity to turn a greater profit on a relatively small amount of acreage than traditional farming or ranching enterprises.

The trophy hunting segment of this industry relates only to those operations that purchase outright or release their own cervids into a hunting preserve. This segment represents the primary end market for the breeding stock industry. Trophy hunting, in this sense, involves hunting trophy cervids within high fenced hunting preserves. This generally occurs via 3-6 day hunt packages, where the hunter is provided lodging, meals, and a guided hunt for a set fee. Hunter expenditures included in this study only include those hunters that are related to this industry. In other words, hunters, in the context of this study, are only those that hunt at operations that either purchase or release deer from breeding operations into their hunting operations. Breeding operations represent the largest segment of the cervid farming industry. These operations raise and sell breeding stock to other industry breeders as well as hunting preserves. The commercial venison segment is similar to other food animal production operations, with fallow, elk, and red deer being the primary species reared. Cervids are raised to market age, processed, and the resulting venison is sold. In addition to venison, these operations may sell other co-products such as velvet, hides, and antlers. The last segment is the commercial urine, or scent, collection operations. These operations are found to stand alone or co-exist with other operational segments, where the urine is collected from males and females to sell as a hunting attractant.

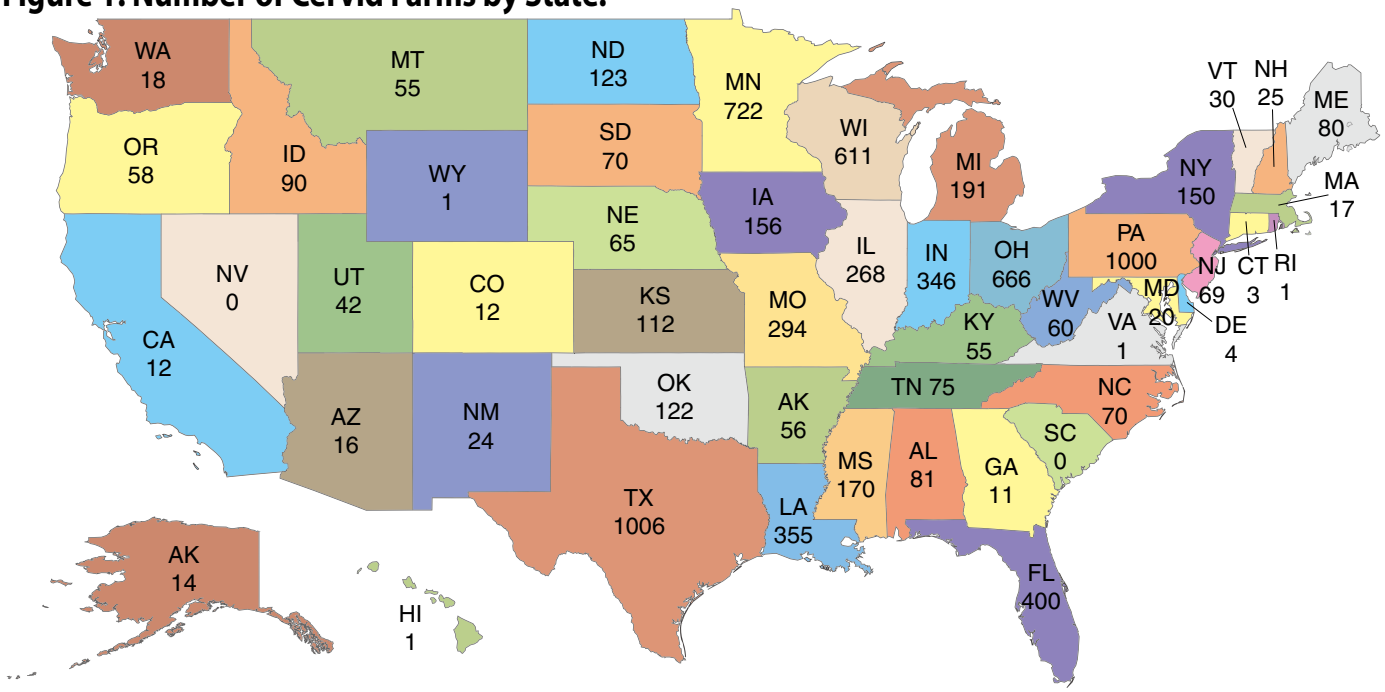
Figure 1: Number of Cervid Farms by State.



Methodology

As previously mentioned, the primary objective of this study is to estimate the economic impact of the United States cervid farming industry. In order to do this, a survey instrument was developed to collect detailed operational information from industry participants. This information was then combined with the inventory of cervid farms to analyze the production side of the industry. In addition, an analysis was performed to determine the impact of hunters, but only the portion of hunters who are related to the cervid farming industry. The production and hunting components were then combined to estimate the economic impact of the cervid farming industry.

Data Collection

During the late summer and early fall of 2006, background information to develop the survey was gained through site visits to cervid farms across the nation. Interviews from these visits provided a base set of information that was then utilized to develop the survey instrument. The survey was then reviewed by industry participants, revised, and sent to over 700 members of NADeFA® and 1,300 members of the Texas Deer Association (TDA) over the fall of 2006 to early 2007. Overall, the extensive survey achieved a response rate of 14 percent. These memberships were selected to participate in this study because they represent all facets of the cervid farming industry.

Survey Development

The actual survey instruments are contained in Appendix A (NADeFA®) and Appendix B (TDA). For the purposes of the survey, the cervid farming industry was segmented into three operational structures: breeding only, breeding and hunting, and hunting only operations. Breeding only operations were defined as those that only involve the scientific breeding and rearing of cervids for the purpose(s) of breeding stock, commercial venison, or commercial urine collection. Hunting only operations relate to only those hunting preserves that purchase cervids from breeding operations as stockers or as breeding stock for release into the preserve. Operations that manage their deer populations by selective harvest and nutritional supplements, rather than supplementing the natural genetics with deer released from breeding operations, are not included in this category. Breeding and hunting operations represent those that engage in breeding activities while also utilizing their own breeding stock, or purchased breeding stock, to supplement the genetics and/or populate their hunting preserve.

While a majority of the industry are whitetail deer producers, a variety of cervid species are raised as well, including elk, red deer, mule deer, sika, pere david's, reindeer, axis, fallow, and muntjak. The surveys proved to be quite extensive, as they were designed to represent producers of all of these cervid species and operational segments. For breeding operations, the survey included questions regarding the operation in general, herd inventory, purchases, sales, capital expenditures, veterinary expenditures, labor, feeding rates and expenditures, utilities, and other miscellaneous expenses. For hunting operations, the base operational questions remained the same, however, hunting related questions were included as well, such as the number of hunters, harvest rate, percentage of herd from breeding operations, hunt revenues, processing, and taxidermy.

Figure 2: Typical Fenced Paddock.

Survey Results

General Operations

Of the 302 respondents, 61 percent were breeding only operations, 32 percent were breeding and hunting operations, and 7 percent were hunting only operations. Respondents represented 26 of the 48 states that have some type of cervid operation. When combining all survey respondents, operations have been in business, on average, since 1999.

From the NADeFA® survey results, the average whitetail deer breeding operation reported a total of 82 deer, on close to 25 acres. Of these, 28 were bucks, 28 were does, and 26 were fawns. In 2005, bred does had an average of 1.24 fawns each, which increased to 1.31 for the 2006 fawning season. Average annual mortality rate was reported to be 9.6 percent. For comparison, whitetail breeding operations from the Texas survey were slightly larger, averaging 114 head, on a little more than 64 acres. Of these, 42 were bucks, 44 were does, with the remainder being fawns. Bred does averaged 1.27 fawns each in 2005 and 1.37 in 2006, slightly higher than the national results. Overall herd mortality rate was reported to be 5.7 percent.

Table 1 above contains a summary of the average operational costs across all survey respondents. A quick glance through the table reveals expected differences across operations for general expenditures. Breeding and hunting operations displayed the largest footprint, around 1,700 acres, as expected. Breeding only operations were the smallest, averaging around 20 acres in pens. Pens, in this sense, are typically described as a high fenced paddock, as shown in Figure 2. For those pens holding bucks or bulls, a protective screening is often used in conjunction with the fence to keep an antler from hooking in the fence accidentally. In addition, screening may be used as a visual barrier, particularly if the operation is near a road, to shield the deer from view from passers-by.

Breeding and hunting operations had more area devoted to breeding pens, more pens overall, and more deer (Table 2) than breeding only operations. This was expected as the breeding and hunting operations supply their hunting operation from their breeding operation, and are not necessarily relying on sales or transfers to move deer off the operation.

The results indicate expenditures on lodges, fencing, and improvements were the top three in terms of the capital cost for both breeding and hunting and hunting only operations, while breeding operations spent the most on fencing, buildings, and improvements. The category of improvements includes expenditures on land clearing, roads, tanks/ponds, and forage development among others. Large equipment, ranch vehicles, and implements were reported as the highest equipment expenditures across all three types of operations. Of all the respondents, 49 percent reported hiring labor, while 43 percent reported outsourcing labor and/or consulting needs. Breeding and hunting operations reported using four times the amount of outsourced services than breeding only operations, or $16,456 versus $4,042. Examples of outsourced services include those of operational management and or nutritional consulting, bottle feeding services for newborns, annual herd maintenance/vaccination services, and accounting services.

Figure 3 provides a summary of expenditures for a typical breeding operation. Survey categories, such as those shown in Table 1, were combined into four primary expense categories: capital, operational, feed, and general. Figure 3 illustrates the annual expenses for breeding operations. Operational expenditures include items such as supplies, labor,

utilities, insurance, advertising, and travel. Capital expenses refer to annualized capital costs for items such as land, improvements, fencing, buildings, breeding stock, feeding equipment, ATV's, and implements. Feed refers to the annual feed costs, including supplemental feed, hay, and bottle feeding supplies. Lastly, General costs cover the remainder of expenditures on items such as food plots, artificial insemination, veterinary, and disease monitoring.

Production

Table 2 contains a summary of production data across all respondents. Feed represents a little over 11 percent of total annual expenditures for breeding operations. From venison production to breeding stock operations, proper nutrition is essential to the physical health, development, and overall well being of all cervids. For breeding only operations with whitetails, 53 percent of respondents indicated bottle feeding their fawns, while only 29 percent of breeding and

* Insufficient results

hunting operations did. Of all species, bottle feeding is primarily practiced with whitetail fawns. Other species will not typically incur such management practices, where bottle feeding may only be utilized for orphaned or sick young.

On average, adult whitetail males were fed close to 4 pounds of supplemental feed per day, while elk consumed slightly over 6 pounds. All of the reported species were fed a protein concentrate and hay. Hay costs were extremely high during the study period due to severe drought conditions across most of the southern plains. In addition to purchased feed, 74 percent of all respondents reported planting food plots on their operations, ranging from half an acre to 500 acres.

When combining results, 70 percent of all breeding or breeding and hunting operation respondents indicated some type of breeding stock purchase. This would include purchases of breeder males, stocker males, bred females, open females, fawns, or semen straws. For whitetail, breeder bucks were the highest dollar expense, costing close to $21,000 each on average.

Hunting Operations

Operations with hunting reported other expenses in addition to those of breeding operations. Seventy-six percent of all respondents of operations that reported to be involved in hunting had a lodge on the premises for their clients. In addition to the roughly $170,000 cost of the lodge, these operations also accrued expenses to maintain and supply the lodge. Labor costs were reported to be higher than those of breeding operations due to an overall larger operation, as well as seasonal hunting guides. Food plots in the hunting areas tended to be larger, along with more feeders, waterers, and fencing, all contributing to the higher reported expenses. Although the majority of hunting operations accepted paying clients and corporate clients, 14 percent reported their hunting operation as personal use only. Of the whitetail hunting operations reporting, respondents estimated an average of 49 percent of the deer in their hunting areas are from breeding operations. Of all the respondents, 49 percent reported hiring labor, while 43 percent reported outsourcing labor and/or consulting needs. For breeding operations, those hiring salaried employees reported an annual expense in the mid $20,000 range. This expense increased to the mid $30,000 range for breeding and hunting operations. On the whole, labor hired on an hourly basis tended to be more prevalent than salaried labor.

Feed was the third largest expense category, representing a little over 11 percent of annual expenditures for breeding operations. Although it's not the largest expense category, feeding is considered to be one of the most important aspects of all operations. From venison production to breeding stock operations, proper nutrition is essential to the physical health, development, and overall well being of all cervid operations. For fawns, 45 percent of respondents indicated bottle feeding their young. Typical products used for bottle feeding ranged from goat's milk to different brands of milk replacer. On average, adult whitetail males were fed close to 4 pounds of supplemental feed per day, while elk consumed slightly over 6 pounds. Respondents indicated paying a little over $300 per ton for supplemental feed, while hay costs averaged around $240 per ton. In addition to purchased feed, 74 percent of all respondents reported planting food plots on their operations, ranging from half an acre to 500 acres.

Economic Impact

IMPLAN® (Impact Analysis for Planning), an input/output model, was used to estimate the economic impact of the cervid farming industry on the national economy. Originally developed by the USDA Forest Service, the IMPLAN model is now managed and maintained by the Minnesota IMPLAN Group (MIG). The model is, arguably, the most used and cited model for performing economic impact analyses in the United States.

The IMPLAN model is driven by purchases of final goods and services in a certain region, such as a state, a group of states, or the entire nation. These purchases represent the dollar value of the increase in finished goods and services demanded, and create an impact that ripples throughout the economy.

Industries produce goods and services for final use and purchase goods and services from other industries. These other producers and industries buy goods and services as well, which IMPLAN designates as indirect purchases. In addition, each step along the cycle pays wages and salaries to employees, who, in turn, make additional expenditures into the economy of the region.[2]

In determining the overall economic impact of an industry, the IMPLAN model uses a set of multipliers, separated by sector, to estimate the direct, indirect, and induced effects (induced being effects of household spending) of the economic cycle. Over 500 sector codes are included in the IMPLAN model, where each code represents a unique industrial sector that a specific product or category of products is represented by. The multipliers that are derived for each sector quantify the ripple effects of a dollar increase in final demand, thus resulting in an estimation of the economic impact.[3]

Cervid Industry

In determining the economic impact of the cervid farming industry, the categories of the survey were prepared for input into the IMPLAN model. This was accomplished by extrapolating the survey results against the inventory of operations to arrive at total industry expenditures for each category. These totals represent the value of final goods and services demanded by the industry, and were the baseline inputs for the IMPLAN model. Categories from the extrapolated survey results, such as supplemental feed or fencing, are then assigned a sector code according to the underlying industry the category relates to. Table 3 provides an example of category inputs and their multipliers from IMPLAN, with each category belonging to a different sector. Differences between the multipliers for each category demonstrate how dollars move throughout different industries. For instance, a $1 million change in final demand for supplemental feed will generate a total of $2.67 million in total industry output, $1.53 million in value added economic activity, and will support 24.34 jobs. In this example, total industry output would include the output generated by the supplemental feed industry and those industries that supply it. Value added from this industry includes employee compensation, proprietary income, other proprietor income, and indirect business taxes that are generated.[4] The employment multiplier represents the number of jobs that are supported per million dollar change in final demand.

Fencing	3.02	1.61	25.36
Large equipment	3.02	1.29	15.79
ATV's	2.73	1.59	22.96

Hunter Expenditures

An additional component in determining the economic impact of the industry is to evaluate and include the role of hunter expenditures in the consumption of industry products. Not all hunting is related to cervid farming, but some is, therefore it is important to include only that which is related to this industry. In other words, the hunting product of cervid farming is a small part of overall cervid hunting in the United States. Yet the hunting component or economic activity associated with deer farming is an important part of the economic activity generated by the cervid farming industry. While overall hunter numbers in the United States are down, the demand for trophy hunting appears to be increasing. Dollars spent on hunting, assorted gear, and travel continue to grow. Time is increasingly the limiting factor for many industry participants, as they have the money to participate, but not the time to invest in traditional hunting. The growth of this segment of the industry is expected to continue, therefore, it is important to include this aspect of the industry in this study.

In order to determine this impact, the number of hunters per operation was taken from the survey, extrapolated against all hunting operations, and combined with a report that outlines hunting expenditures on a per hunter basis. This report, entitled the "Economic Importance of Hunting in America",[5] was based on the 2001 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation survey conducted by the U.S. Fish and Wildlife Service and the U.S. Census Bureau. These retail expenditures were then combined with other hunt related expenditures, such as trophy and processing fees, and assigned sector codes for the IMPLAN model. When totaled, less than 1 percent of the report's estimated 11 million deer hunters are related to the cervid farming industry. However, this small percentage of hunters account for over 2 percent of the report's estimated $10 billion in retail, travel, and hunt related expenditures.

Results

Table 4 below provides a summary of the economic impact of the industry. Cervid operations generate an estimated $893.5 million in direct expenditures into the U.S. economy. This value represents the estimated increase in final demand of all goods and services consumed by the industry. As these direct expenditures ripple throughout the economy, the cervid farming industry generates an estimated $2.3 billion of total industry output for all industries that supply the cervid farming industry. These industries include feed suppliers, farm and ranch supply stores, veterinary services, medical and sedation product suppliers, construction, utilities, advertising, insurance, and numerous others. Hunters contribute an additional $241 million in direct economic impacts through retail and hunt related expenditures, which generates a total of $756.9 million of total industry output.

When combined, the cervid farming industry generates $3 billion of economic activity and output in the U.S. economy. The industry provides the economic activity that supports 29,199 jobs in the economy, most of which are located in rural areas of the nation. If this industry were to disappear, these jobs would have to find support from some other sector of the economy. Unfortunately, not every segment of the industry could be analyzed. Insufficient industry and survey data limited analysis to only the operational aspects of both the venison and scent collection industries, as production and retail revenues were excluded from the analysis.

[5] "Economic Importance of Hunting in America." Produced by Southwick Associates, Inc. for the International Association of Fish and Wildlife Agencies, 2002. Available online, accessed August 10, 2006. http://www.southwickassociates.com/freereports/default.aspx

Table 4: Economic Impact of the Cervid Farming Industry.

	Direct	Output	Value Added	Employment
All Operations	893,501,559	2,333,462,511	1,276,311,405	21,070
Hunters	241,042,970	756,897,725	358,602,855	8,129
Total	1,134,544,528	3,090,360,236	1,634,914,260	29,199

Conclusion

With over 7,000 operations and 2,000 hunting preserves, the cervid farming industry has an established presence across the nation. The majority of these operations are located in rural areas of the nation. In addition, while traditional forms overwhelmingly dominate the hunting industry, the small niche of hunters this market serves continues to increase. This increase in demand is fueling the growth in the breeding industry. Over $1.1 billion in direct expenditures are poured into the U.S. economy each year by commercial farming operations and sportsmen related to this industry. In turn, this generates $3 billion of economic activity while supporting 29,199 jobs. All told, these results highlight the fact that the cervid farming industry continues to be a vital contributor to the rural economies of the United States.

11. Do you have a cooler/freezer for venison? ☐ Yes ☐ No 11a. If yes, capital cost of this equipment: $_____
12. Do you have a urine collection facility? ☐ Yes ☐ No 12a. If yes, capital cost of this facility: $_____
13. Do you have a cooler/freezer for urine? ☐ Yes ☐ No 13a. If yes, capital cost of this equipment: $_____

Cervid Breeding, continued

IV. Equipment

1. Purchase price of all large equipment, combined (i.e. tractor + bobcat): $_____
2. Purchase price of all ATVs, combined: $_____
3. Purchase price of all ranch vehicles, combined: $_____
4. Purchase price of all implements, combined: $_____
5. Purchase price of all trailers/transport crates, combined: $_____
6. Purchase price of all bulk feed bins, combined: $_____
7. Purchase price of all feeding equipment, combined: $_____
8. Purchase price of all watering equipment, combined: $_____
9. Purchase price of all video equipment, combined: $_____
10. Annual cost of rental equipment: $_____
11. Purchase price of semen storage tank(s): $_____
12. Purchase price of dart gun/sedation equipment: $_____
13. Purchase price of packaging equipment (venison and urine products): $_____

V. Veterinary & Supplies

1. Annual cost of operating supplies: $_____ 2. Annual cost of medical supplies: $_____
3. Annual veterinary expense: $_____ 4. Average cost per sedation: $_____
5. Number of necropsies performed: _____ 5a. Average cost per necropsy: $_____
6. Number of CWD tests performed: _____ 6a. Average cost per CWD test: $_____
7. Number of deer DNA certified: _____ 7a. Annual cost for DNA certification: $_____
8. Average annual number of sedations (per animal, per species):

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Males:										
Females:										

9. Annual number of females AI'd (per species):

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Females AI'd:										

VI. Labor

1. Number of employees: 1a. Paid salary: _____ 1b. Paid hourly: _____
2. Total annual wages paid: 2a. Salaries: $_____ 2b. Hourly: $_____
3. Annual expense from outsourced services: $_____

VII. Utilities

1. Annual cost of utilities: $_____
2. Annual cost of fuel: $_____

VIII. Miscellaneous Expenses

1. Annual advertising/marketing expense (includes taxidermy services): $_____
2. Annual regulatory expense (permits): $_____
3. Annual meat inspection/nutrition labeling expense: $_____
4. Annual insurance expense: $_____
5. Annual travel expense: $_____
6. Annual property tax: $_____
7. Annual cost of maintenance and repair: $_____

Cervid Breeding, continued

IX. Feeding

Fawns/Calves

1. Do you bottle feed? ☐ Yes (continue below) ☐ No (skip to 2)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Percent of all fawns/calves:										
Days fed until weaning:										
Product used:										
Product price per gal/bag/lb:										
Units fed until weaning:										

2. After weaning: (units are pounds per animal)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Daily protein feed rate:										
Daily hay feed rate:										

Adults

1. Feeding rates: (units are pounds per animal)

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Males:										
Daily protein feed rate:										
Daily hay feed rate:										
Females:										
Daily feed rate:										
Daily hay feed rate:										

2. Protein feed price: $_____ (per bag/ton)
3. Hay price: $_____ (per bale) 3a. Average bale weight: _____ lbs
4. Annual protein feed purchase: _____ tons
5. Annual hay purchase: _____ bales
6. Approximate area of food plots: _____ acres
   6a. Annual cost of seed: $_____
   6b. Annual cost of fertilizer: $_____

X. Annual Sales

Annual receipts from breeding operation

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
1. Males sold:										
1a. Total Receipts:										
2. Females sold:										
2a. Total Receipts:										
3. Fawns/calves sold:										
3a. Total Receipts:										
4. Semen straws sold:										
4a. Total Receipts:										

Cervid Breeding, continued

Annual receipts from commercial venison production

	Elk	Fallow	Red Deer	Reindeer	Other:
1. Annual number processed:					
2. Average processing yield per animal (lbs):					
3. General processing cost per animal:					
4. Specialty processing cost – summer sausage, jerky, etc. (per pound):					
5. Amount of specialty processing per animal (lbs):					
6. Total receipts from all venison sales:					

7. Annual packaging, shipping, and labeling expense for venison: $_____
8. Annual number of animals used to collect velvet: _____
9. Annual amount of velvet processed: _____ lbs
10. Processing cost of velvet: $_____ (per pound)
11. Total receipts from velvet products: $_____
12. Annual packaging, shipping, and labeling expense for velvet products: $_____
13. Annual amount of shed/cut antlers sold: _____ lbs
    13a. Total receipts from antler sales: $_____
14. Total receipts from other by-products (hides, pizzles, etc.): $_____
15. Annual number of males sold as breeding stock: _____ 15a. Total receipts: $_____
16. Annual number of females sold as breeding stock: _____ 16a. Total receipts: $_____
17. Annual number of males sold to hunting preserves: _____ 17a. Total receipts: $_____
18. Annual number of females sold to hunting preserves: _____ 18a. Total receipts: $_____

Annual receipts from urine collection

1. Total number of males used for collection: _____
2. Annual amount of urine collected from males: _____ gal
   2a. Total receipts from male urine sales: $_____
3. Total number of females used for collection: _____
4. Annual amount of non-estrous urine collected from females: _____ gal
   4a. Total receipts from non-estrous urine sales: $_____
5. Annual amount of estrous urine collected from females: _____ gal
   5a. Total receipts from estrous urine sales: $_____
6. Annual packaging, shipping, and labeling expense for urine sales: $_____
7. Total receipts from other scent sales: $_____
8. Annual number of males sold as breeding stock: _____ 8a. Total receipts: $_____
9. Annual number of females sold as breeding stock: _____ 9a. Total receipts: $_____
10. Annual number of males sold to hunting preserves: _____ 10a. Total receipts: $_____
11. Annual number of females sold to hunting preserves: _____ 11a. Total receipts: $_____

Hunting

For combination hunting and breeding operations, please separate hunting operation expenses from breeding operation expenses. Include annualized 2005 figures where appropriate.

What is the purpose of your hunting operation? ☐ Personal use only ☐ Corporate clients, no fee ☐ Paying clients

I. Operation

1. Year started: _____ 2. State: _____
3. Total acreage: _____ acres 4. Land inherited: _____ acres
5. Land purchased: _____ acres 5a. Purchase value: $_____ (per acre)
6. Area of hunting operation: _____ acres

II. Facilities

1. Capital cost of lodge(s): $_____
2. Capital cost of fencing: $_____
3. Capital cost of improvements: $_____
4. Capital cost of buildings: $_____
5. Approximate area of food plots: _____ acres
   - 5a. Annual cost of seed: $_____
   - 5b. Annual cost of fertilizer: $_____

III. Equipment

1. Purchase price of all large equipment combined (i.e. tractor + bobcat): $_____
2. Purchase price of all ATVs, combined: $_____
3. Purchase price of all ranch vehicles, combined: $_____
4. Purchase price of all implements, combined: $_____
5. Purchase price of all trailers/transport crates, combined: $_____
6. Purchase price of all bulk feed bins, combined: $_____
7. Purchase price of all feeding equipment, combined: $_____
8. Purchase price of all watering equipment, combined: $_____
9. Purchase price of all video equipment, combined: $_____
10. Annual cost of rental equipment: $_____
11. Purchase price of cooler/freezer equipment: $_____
12. Purchase price of other equipment: $_____

IV. Supplies

1. Annual amount of protein feed purchased: _____ tons 1a. Protein feed unit price: $_____ (per bag/ton)
2. Annual amount of corn purchased: _____ tons 2a. Corn unit price: $_____ (per bag/ton)
3. Annual cost of operating supplies for lodge: $_____
4. Annual cost of food and beverages for lodge: $_____

V. Labor

1. Number of employees: 1a. Salary: _____ 1b. Hourly: _____
2. Total annual wages paid: 2a. Salaries: $_____ 2b. Hourly: $_____
3. Annual expense from outsourced services: $_____

Hunting, continued

VI. Utilities

1. Annual cost of utilities: $_____
2. Annual cost of fuel: $_____

VII. Miscellaneous Expenses

1. Annual insurance expense: $_____
2. Annual advertising/marketing expense (includes taxidermy services): $_____
3. Annual travel expenses: $_____
4. Annual property tax: $_____
5. Annual cost of maintenance and repair: $_____
6. Other annual miscellaneous expenses: $_____

VIII. Hunters

	Whitetail	Elk	Mule Deer	Axis	Fallow	Red Deer	Reindeer	Sika	Pere David's	Muntjak
Annual number of hunters, per cervid:										
Total cervids in hunting area :										
Percentage of total cervids that are from breeding:										
Number of males released from breeding area into hunting area:										
Number of females released from breeding area into hunting area:										
Number of males purchased for release into hunting area:										
Total expense:										
Number of females purchased for release into hunting area:										
Total expense:										
Annual trophy male harvest:										
Total receipts:										
Annual management male harvest:										
Total receipts:										
Annual female harvest:										
Total receipts:										
Average processing cost, per cervid:										
Percent of all harvested males seeking taxidermy services:										
Average taxidermy cost:										

National Cervid Industry - Economic Impact Survey
North American Deer Farmers Association Members

****All information collected in this survey will remain <u>confidential</u>****

Survey Instructions

1. This survey is to be completed by cervid breeding operations (including venison production and urine collection operations), combination cervid breeding and hunting operations, and hunting operations that utilize outside cervid breeding operations as a genetic supplement for their cervid herd. All other industry participants may disregard this survey.
2. For the sections and categories below, please provide annualized 2005 records of actual or accurate estimates of expenditures rather than a range estimate of expenditures.
3. **For combination breeding and hunting operations, please separate breeding operation records from hunting operation records. Contact us for additional surveys if you have multiple permitted breeding and/or hunting operations.**
4. **It is important to use the provided categories for records for each section, rather than combining records from breeding and hunting operations and submitting that in a breeding or hunting category. Please provide an accurate estimate when your records do not match these categories.**
5. If a question does not apply to your operation, please indicate this with an "N/A" response.
6. Please indicate units (lbs, tons, gals, etc.) where applicable.
7. For further explanation of general and selected lines of the survey, please refer to the information below.

Cervid Breeding (Breeding only, Venison production, Urine Collection)

Please indicate the purpose of your breeding operation by checking all boxes that apply.

<u>I. Operation</u>: This category provides for a general overview of your operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Herd Inventory</u>: This category refers to your final 2005 cervid inventory and final 2005 purchases (please include number purchased with total cost) towards this inventory. *Annual mortality rate* refers to the annual mortality loss on entire herd, including the loss of fawns/calves after weaning. *Birth rate* refers to the number of surviving fawns/calves born per bred female, specifically, the total number of live fawns/calves at weaning divided by the total number of bred females (i.e. 1.5, 2.3, etc.).

<u>III. Facilities</u>: This category refers to your operational specific facilities. *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc.

<u>IV. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>V. Veterinary & Supplies</u>: *Annual cost of operating supplies* refers to the yearly expense for all operating supplies, such as office supplies, sedation supplies, AI supplies, etc. *Annual cost of medical supplies* refers to the yearly expense for medicine, syringes, etc. *Average cost per sedation* refers to the average expense of supplies and labor to sedate or dart an animal. *Number of necropsies performed* refers to the number of post mortality veterinary examinations performed to determine the cause of death. *Average cost per necropsy* refers to the average labor and labwork expense of performing a necropsy on a single animal. *Average cost per CWD test* refers to the average labor and labwork expense of performing a CWD test.

<u>VI. Labor</u>: This category refers to the labor expense for your breeding operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if paid labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense from outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VII. Utilities</u>: This category refers to the annual utilities expense for electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for your breeding operation.

<u>VIII. Miscellaneous Expenses</u>: *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for genetic display (horn molds, shed mounts, deceased buck mounts, etc.). *Annual regulatory expense* refers to the annual cost of regulatory operating permits, if applicable to your state. *Annual meat inspection expense* refers to the annual cost to venison production operations for state or federal meat inspection. *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>IX. Feeding</u>: This category relates to feeding rates of fawns/calves and adults in your operation. For those who bottle feed fawns/calves, please indicate the percent of all fawns/calves that are bottle fed for, the number of days of bottle feeding until weaned, the product used (i.e. goat milk, milk replacer, etc.), the per unit product price (please indicate units-gal, bags, lbs), and the number of units of this product used per fawn until weaning for each cervid species in your operation.

<u>X. Annual Sales</u>: This category relates to the final 2005 revenue inflows of your operation. Receipts are categorized for breeding operations, commercial venison operations, and commercial urine operations. Please separate records for each these categories that apply to your operation.

Cervid Hunting

Please indicate the purpose of your hunting operation by checking all boxes that apply

<u>I. Operation</u>: *Area of hunting operation* refers to the total acreage dedicated to your hunting operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Facilities</u>: *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc.

<u>III. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your breeding operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>IV. Supplies</u>: This category relates to final 2005 expenses for supplemental feed, corn, operating, and food and beverage supplies.

<u>V. Labor</u>: This category refers to the labor expense for your hunting operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if paid labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense for outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VI. Utilities</u>: This category refers to the annual utilities expense for electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for your hunting operation.

<u>VII. Miscellaneous Expenses</u>: *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for display. *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>VIII. Hunters</u>: *Total expense* refers to the cost of purchasing, sedating, and transporting cervids for release into hunting operation. *Average processing cost* refers to the cost of processing each harvested cervid. If in-house processing occurs, please provide an accurate estimate of this cost based on local processor costs. *Percent of all harvested seeking taxidermy services* relates to the percentage of all harvested cervids that will have some type of taxidermy service performed, such as a shoulder or full body mount. *Average taxidermy cost, per cervid* allows for the average per cervid expense of this service for the hunter from your local taxidermist.

We thank you in advance for taking the time to complete this survey. Upon completion, please return the survey with the enclosed envelope. Questions or requests for additional surveys may be directed to Brian Frosch at 888-890-5663.

Appendix B: Economic Impact Survey

Economic Impact Survey

Please indicate type of operation

Scientific Breeding Only ☐ **Scientific Breeding and Hunting** ☐ **Hunting only** ☐

Scientific Breeding

Instructions and clarification are provided at the end of this survey. For Hunting only operations, please skip to the hunting section. Include annualized 2005 figures where appropriate.

I. Operation

1. Year started: _____ 2. Area of breeding operation: _____ (acres)
3. Land purchased: _____ (acres) 3a. Purchase value: $_____ (per acre)
4. Land inherited: _____ (acres)

II. Herd Inventory (Final 2005 Inventory)

1. Total number of deer: _____
2. Number of breeder bucks: _____ 3. Number of stocker bucks: _____ 4. Does: _____
5. Fawns, 2005: _____ 5a. Fawning rate (surviving at weaning): _____ (fawns per doe)
6. Fawns, 2006: _____ 6a. Fawning rate (surviving at weaning): _____ (fawns per doe)
7. Annual herd mortality rate (including fawns after weaning): _____ %
8. Annual sales (Final 2005 figures) 9. Annual purchases (Final 2005 figures)

Breeder bucks (#):	Total receipts: $	Breeder bucks (#):	Total cost: $
Stocker bucks (#):	Total receipts: $	Open does (#):	Total cost: $
Open does (#):	Total receipts: $	Bred does (#):	Total cost: $
Bred does (#):	Total receipts: $	Buck fawns (#):	Total cost: $
Buck fawns (#):	Total receipts: $	Doe fawns (#):	Total cost: $
Doe fawns (#):	Total receipts: $	Semen Straws (#):	Total cost: $
Semen Straws (#):	Total receipts: $		

III. Facilities

1. Number of pens: _____ 2. Area of pens: _____ (acres)
3. Capital cost of fencing: $_____ 4. Capital cost of shelters: $_____
5. Capital cost of improvements: $_____
6. Capital cost of buildings: $_____ 7. Capital cost of working pens: $_____
8. Do you have a handling facility? ☐ Yes ☐ No 8a. If yes, capital cost of handling facility: $_____
9. Approximate area of food plots: _____ (acres)
   9a. Annual cost of seed: $_____
   9b. Annual cost of fertilizer: $_____
10. Annual cost of maintenance and repair: $_____

IV. Equipment

1. Purchase price of all large equipment, combined (i.e. tractor + bobcat): $_____
2. Purchase price of all ATV(s), combined: $_____
3. Purchase price of all ranch vehicle(s), combined: $_____
4. Purchase price of all implements, combined: $_____
5. Purchase price of all trailer(s)/transport crate(s), combined: $_____
6. Purchase price of all bulk feed bin(s), combined: $_____
7. Purchase price of all feeding equipment, combined: $_____

Scientific Breeding, continued

8. Purchase price of all watering equipment, combined: $_____
9. Purchase price of all video equipment, combined: $_____
10. Annual cost of rental equipment: $_____
11. Purchase price of semen storage tank(s): $_____
12. Purchase price of dart gun/sedation equipment: $_____

V. Veterinary & Supplies

1. Annual cost of operating supplies: $_____ 2. Annual cost of feed and hay: $_____
3. Annual cost of medical supplies: $_____ 4. Annual veterinary expense: $_____
5. Annual number of sedations: _____ (per doe) 6. Annual number of sedations: _____ (per buck)
7. Average cost per sedation: $_____ 8. Number of does AI'd: _____
9. Number of necropsies performed: _____ 9a. Average cost per necropsy: $_____
10. Number of CWD tests performed: _____ 10a. Average cost per CWD test: $_____
11. Number of deer DNA certified: _____ 11a. Annual cost for DNA certification: $_____

VI. Labor

1. Number of employees: 1a. Paid salary: _____ 1b. Paid hourly: _____
2. Total wages paid: 2a. Salaries: $_____ 2b. Hourly: $_____
3. Annual expense from outsourced services: $_____

VII. Utilities

1. Annual cost of utilities: $_____
2. Annual cost of fuel: $_____

VIII. Miscellaneous Expenses

1. Annual insurance expense: $_____
2. Annual advertising/marketing expense (includes taxidermy services): $_____
3. Annual travel expense: $_____
4. Annual property tax: $_____

IX. Feeding

Fawns

1. Do you bottle feed your fawns? ☐ Yes (continue with 1a-1e) ☐ No (skip to 2)
   1a. If yes, what percent of all fawns? _____% 1b. Average bottle feeding days until weaning: _____
   1c. What product do you use? _____
   1d. Units fed per fawn until weaning: _____ (gal/bags/lbs) 1e. Product price: $_____ (per gal/bag/lb)
2. After weaning: 2a. Approximate daily feed rate: _____ (lbs per fawn) 2b. Feed price: $_____ (per bag/ton)
   2c. Approximate alfalfa/hay daily feed rate: _____ (lbs per fawn) 2d. Alfalfa/hay price: $_____ (per bale)
   2e. Average bale weight: _____lbs

Does

1. Approximate daily feed rate: _____ (lbs per doe) 2. Feed price: $_____ (per bag/ton)
3. Approximate alfalfa/hay daily feed rate: _____ (lbs per doe)

Bucks

1. Approximate daily feed rate: _____ (lbs per buck) 2. Feed price: $_____ (per bag/ton)
3. Approximate alfalfa/hay daily feed rate: _____ (lbs per buck)

Hunting

Instructions and clarification are provided at the end of this survey. For combination Scientific Breeding & Hunting operations, please separate hunting expenses from breeding expenses. Include annualized 2005 figures where appropriate.

What is the purpose of your hunting operation? ☐ Personal use only ☐ Corporate clients, no fee ☐ Paying clients

I. Operation

1. Year started: _____ 2. Area of hunting operation: _____ (acres)
3. Land purchased: _____ (acres) 3a. Purchase value: $_____ (per acre)

4. Annual number of stocker bucks released from breeding operation into hunting operation: _____
5. Annual number of does released from breeding operation into hunting operation: _____
6. Annual number of stocker bucks purchased for release into hunting operation: _____
   6a. Total expense: $_____
7. Annual number of does purchased for release: _____
   7a. Total expense: $_____
8. Annual number of does harvested: _____
   8a. Total receipts from doe hunts: $_____
9. Annual number of management bucks harvested: _____
   9a. Total receipts from management buck hunts: $_____
10. Annual number of trophy bucks harvested: _____
    10a. Total receipts from trophy buck hunts: $_____
11. Average processing cost: $_____ (per deer)
12. Approximate percentage of harvested bucks seeking taxidermy services: _____%
13. Average taxidermy cost: $_____ (per deer)

APPENDIX

Economic Impact Survey
Texas Deer Association Members

****All information collected in this survey will remain <u>confidential</u>****

Survey Instructions

1. This survey is to be completed by scientific breeding operations, combination scientific breeding and hunting operations, and hunting operations that utilize outside scientific breeding operations as a genetic supplement for their deer herd. All other industry participants may disregard this survey.
2. For the sections and categories below, please provide annualized 2005 records of actual or accurate estimates of expenditures rather than a range estimate of expenditures.
3. For those who have multiple facilities under separate permits (uniquely identified), please contact us for additional surveys for each operation.
4. **It is important to separate records for each facility, and between hunting and breeding operations. Contact us for additional surveys if you have multiple permitted breeding and/or hunting operations.**
5. **It is also important to use the provided categories for records for each section, rather than combining records from breeding and hunting operations and submitting that in a breeding or hunting category. Please provide an accurate estimate when your records do not match these categories.**
6. If a question does not apply to your operation, please indicate this with an "N/A" response.
7. Please indicate units (lbs, tons, gals, etc.) where applicable.
8. For further explanation of general and selected lines of the survey, please refer to the information below.

Scientific Breeding

<u>I. Operation</u>: *Area of breeding operation* refers to the total acreage dedicated to your breeding operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Herd Inventory</u>: This category refers to your herd inventory, fawning rate, purchases and sales towards your inventory for 2005, and number the of fawns born and fawning rate for 2006. *Annual herd mortality rate* refers to the annual mortality loss on the total breeding herd, including loss of fawns after weaning. *Fawning rate* refers to the number of surviving fawns born per doe, specifically, the total number of live fawns at weaning divided by the total number of bred does (i.e. 0.7, 1.5, 2.3, etc.).

<u>III. Facilities</u>: *Area of pens* refers to the total acreage enclosed by all pens combined. *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>IV. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your breeding operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>V. Veterinary & Supplies</u>: *Annual cost of operating supplies* refers to the yearly expense for all operating supplies, such as office supplies, sedation supplies, AI supplies, etc. *Annual cost of medical supplies* refers to the yearly expense for medicine, syringes, etc. *Annual number of sedations* refers to the average annual number of sedations on a per doe/buck basis. *Average cost per sedation* refers to the average expense of supplies and labor to sedate or dart a deer. *Number of necropsies performed* refers to the number of post mortality veterinary examinations performed to determine the cause of death. *Average cost per necropsy* refers to the average labor and labwork expense of performing a necropsy on a single deer. *Average cost per CWD test* refers to the average labor and labwork expense of performing a CWD test.

<u>VI. Labor</u>: This category refers to the labor expense for your breeding operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense from outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VII. Utilities</u>: This category refers to the annual utilities expense for the annual electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for breeding operations.

<u>VIII. Miscellaneous Expenses</u>: *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for genetic display (horn molds or shed mounts, or deceased buck mounts). *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc.

<u>IX. Feeding</u>: This category relates to feeding rates for fawns, bucks, and does. For those who bottle feed fawns, please indicate the percent of all fawns that are bottle fed, number of days of bottle feeding until weaning, the product used (i.e. goat milk, milk replacer, etc.), units of this product used per fawn until weaning, the per unit product price (please indicate units-gal, bags, lbs).

Hunting

<u>I. Operation</u>: *Area of hunting operation* refers to the total acreage dedicated to your hunting operation. *Purchase value* refers to the cost per acre for the initial purchase of the land.

<u>II. Facilities</u>: *Capital cost* refers to the overall cost of construction for each of the items listed, including clearing, foundation, electrical, plumbing, etc. *Capital cost of improvements* refers to land clearing, roads, forage, water (well drilling, ponds), etc. *Annual cost of maintenance and repair* refers to all maintenance and repair for facilities, equipment, fencing, roads, etc.

<u>III. Equipment</u>: *Purchase price* refers to the original cost of the equipment at purchase, not an annualized loan payment. *Large equipment* refers to tractors, bobcats, dozers, etc., used in your breeding operation. Please combine all applicable equipment into one figure for lines 1-9.

<u>IV. Supplies</u>: This category relates to supplemental feed, corn, operating, food, and beverage supplies for hunting operations on an annualized basis.

<u>V. Labor</u>: This category refers to the labor expense for your breeding operation. Owners, spouses, and children must be accounted for in this category as an employee(s) and in total wages, if labor is performed by these individuals. *Total wages paid* refers to annual wages for all employees. Owner/operators must include amount allotted or withdrawn for family living for line 2a. *Annual expense for outsourced services* refers to all additional contracted labor from those not on the payroll, including consulting services, accounting services, legal services, herd survey services, etc.

<u>VI. Utilities</u>: This category refers to the annual utilities expense for the annual electric, phone, water, sewage, refuse disposal, etc., and the annual fuel expense for hunting operations.

<u>VII. Miscellaneous Expenses</u>: *Annual insurance expense* refers to the yearly cost of auto, property, liability, health, etc. insurance. *Annual advertising/marketing expense* refers to the annual cost of advertising and marketing materials, which includes taxidermy services for display. *Annual travel expense* refers to the annual cost of travel, such as fuel, food, lodging, airfare, etc.

<u>VIII. Hunters</u>: This category relates to the annual number of hunters, number of deer harvested, number of deer purchased and/or released into hunting operation, and the expenses and receipts from hunting. *Total expense* in lines 6a & 7a refer to the cost of purchasing, sedating, and transporting deer for release into hunting operation. *Average processing cost* refers to the cost of processing each harvested deer. If it is processed in-house, please provide an accurate estimate of this cost from based on local processor costs. Line 12 relates to the percentage of harvested deer that will have some type of taxidermy service performed, such as a shoulder or full body mount. Line 13 allows for the average per deer expense of this service for the hunter.

We thank you in advance for taking the time to complete this survey. Upon completion, please return the survey with the enclosed envelope no later than November 10th. Questions or requests for additional surveys may also be directed to Brian Frosch at 888-890-5663.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated the proposed amendment would prohibit the shipment or transportation of big game species to or from Missouri

destinations, with certain exceptions. It gives the Missouri Conservation Commission primary authority over the regulation of privately owned big game species, including rulemaking authority. It also states that confined big game killing or the owning, possessing, confining, transporting, breeding or raising of privately owned big game species shall not be construed as hunting, farming or ranching for any purpose under the Constitution or any law. Information or data related to any program related to diseases of big game species is considered a public record and subject to disclosure.

Budget and Planning defers to the Missouri Conservation Commission for an estimate of the proposal's fiscal impact on the Commission or the Missouri Department of Conservation (MDC). Budget and Planning also defers to the Missouri Department of Agriculture (MDA) for an estimate of the proposal's potential fiscal impact on MDA. Budget and Planning does not have sufficient information to estimate the potential fiscal impact the proposal may have on state or local government revenues derived from practices that would be regulated, restricted, or prohibited under the proposal.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated the constitutional amendment proposed in this initiative petition will have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no anticipated fiscal impact for their college.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from **Missouri Western State University** indicated this will not have a fiscal impact on their university.

Officials from the **Metropolitan Zoological Park and Museum District** indicated they do not believe this initiative petition will have a financial impact on their district.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, University of Missouri, St. Louis Community College, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University,** and the **Missouri Joint Municipal Electric Utility Commission.**

Fiscal Note Summary

State governmental impact is unknown. Local governmental entities expect no costs or savings.

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Timothy Gilio regarding a proposed constitutional amendment to Article IV, version 3 (2018-185)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Timothy Gilio on March 20, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
a. Medical cannabis refers to a Physician's written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis product's use not necessarily recommended by a Physician.
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares, manufactures, packages, transports, or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21, with the exception of persons falling under the dictates of item 3c.
b. Anyone under the age of 18 shall have legal access to cannabis through a Physician's written recommendation, and parental or a legal guardian's supervision for medical conditions or diseases that cannabis might help with.
c. Anyone under the age of 21, but age 18 and over shall have legal access to cannabis through a Physician's written recommendation for medical conditions or diseases that cannabis might help with.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs. There shall be no plant quantity limitations.
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying, or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvesting, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs a through d of this section

5. Patient's rights: cannabis shall be available to all patients regardless of age, race, or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court of law for a nonviolent cannabis related crime shall immediately be released. This shall not apply to those prisoners that have any additional charges other than a nonviolent cannabis related crime. All charges for nonviolent cannabis related crimes shall be immediately expunged from all prisoner's records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, or city employees, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri Constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.
b. An additional tax, not to exceed 5% without additional voter approval, will be added to all personal / recreational sales of Cannabis not to include any Hemp or Hemp by products sold within the boundaries of Missouri in addition to any established state, county or city sales tax already set in place to be collected by the State of Missouri Sales Taxation Division. Cannabis products sold under the guidelines listed in Section 3b and 3c of this document shall be exempt from this tax. The additional sales tax monies collected will be collected by the State of Missouri Sales Taxation Division, divided and distributed as directed in this paragraph on a quarterly basis as follows: 1/2 will go to Missouri Public Schools that teach Preschool or K through 12 grade or any combination of the Aforementioned. The remaining 1/2 will be directed to the Missouri Veterans Commission to help with housing, clothing, food and medical needs for our multitude of Missouri veterans as the Missouri Veterans Commission sees fit to best utilize those funds.

8. Cannabis farmers, manufacturer's, processors, and distributors shall not be subjected to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of Physicians or Veterinarians. No Physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-185)

Subject

Initiative petition from Timothy Gilio regarding a proposed constitutional amendment to Article IV. (Received March 21, 2017)

Date

April 10, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal could require their office to develop and issue an order providing for the destruction of "all cannabis related nonviolent civil and criminal records in Missouri." Moreover, the proposal purports to supersede federal law.

They expect that the enactment of this proposal would result in increased litigation. They assume they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** estimated increased operating costs of $0 in fiscal year 2018, $109,353 in fiscal year 2019, and $169,098 in fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated retail marijuana, cultivation facilities, products manufacturer, and testing facilities may be established as small businesses.

A tax, not to exceed five percent without additional voter approval, will be added to all personal/recreational sales of Cannabis. The tax will be collected by the State of Missouri Sales Taxation Division. The tax collected is to be directed to Missouri Public Schools and to the Missouri Veterans Commission.

This proposal does not require them to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through 196.298, RSMo, gives them responsibility for the regulation of food to include such

duties as ensuring food safety, sanitation, and proper labeling, etc. Therefore, they would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated cost avoidance of $7,178,073 in fiscal year 2019 (7 months), $7,511,746 in fiscal year 2020, $10,011,383 in fiscal year 2021, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will no discharges from expungement but the reduction in the prison population will increase to 214. The field

reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated increased costs of $150,012 in fiscal year 2018, $30,752 in fiscal year 2019, and $31,521 in fiscal year 2020.

This petition opens up the possibility of additional business opportunities in cannabis farming, manufacturing, and distribution of products.

Fiscal Note	IP 18-129			ITSD - DOR

	Federal		-	-	-
	Other		-	-	-
	Total		150,012	30,752	31,521

This would create an unknown positive impact on Total State Revenue.

This petition increases state revenues by an unknown amount.

The provisions of section 7b add an additional five percent tax to all personal/recreational sales of cannabis not including hemp or hemp by-products sold in Missouri. This tax is in addition to any state, county, or city sales taxes already in place. This section also requires the division and distribution of these collections on a quarterly basis to Missouri public schools and the Missouri Veterans' Administration.

This Article states that the tax is to be collected by the State of Missouri Sales Tax Division. There is no State of Missouri Sales Tax Division and their department assumes that the taxpayer will remit the tax to their department. Because there are no enforcement provisions, it may be difficult for their department to enforce the collection of the

additional tax under current sales tax statutes. Their department will not be able to make refunds to taxpayers as the article is currently drafted.

Administrative Impact:

Business Tax Processing:
Although the legislation bases the additional five percent tax on retail sales, it is in addition to and separate from state, county, or city sales tax, and must therefore be reported and deposited separately.

If this money needs to remain in a non-state account, either it would need to stay in the sales suspense holding account until distribution, or new bank accounts would need to be established for each.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated they expect increased operating costs of $474,311 for the first year implemented, $538,337 for the second year implemented, and $544,128 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 5 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division
The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094

RECURRING COSTS

Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Division

Currently, there are 111,977 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 17 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 5 FTE's. However, if a large number of these expungements were to be granted with even five FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 45 FTE's to complete this task in approximately one year.

The addition of 45 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 111,977 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 111,977 x .10 = 11,198 / 2,485 = 5 FTE's
50% = 111,977 x .50 = 55,989 / 2,485 = 23 FTE's
100% = 111,977 / 2,485 = 45 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

5 Quality Control Clerks ($1,015 x 24)	$121,800
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require the Highway Patrol to rent office space for 5 FTE's to process the expungement requests. The Office of Administration states that 1,500 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other

entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a “non-violent cannabis-only offense” needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is expunged or does the “court,” whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Changes to Missouri's state driving laws could impact some federal commercial drivers' license laws.

Failure to comply with 49 C.F.R. 384.225 & 384.226 could result in a withholding of Missouri’s federal-aid highway funds apportioned to it under each of Title 23, United States Code (U.S.C.), sections 104(b)(1), (b)(3), and (b)(4). The federal funds impacted consist of national highway performance program funds, highway safety improvement program funds and congestion mitigation and air quality improvement funds. The

withholding amount would be 4 percent for the first year of non-compliance and 8 percent for the second and subsequent years.

Officials from the **Office of Administration** (OA) indicated:

Section 54 of Article IV would allow the medical and recreational use of marijuana and hemp, as well as the cultivation, production, transportation and retail sale of marijuana and hemp and their related products. Subsection 3 allows the sale of marijuana to individuals under the age of 21 only with physician or parental permission. Subsection 6 requires that all prisoners that have been convicted in Missouri of a nonviolent cannabis related crime shall be immediately released and all related charges shall be expunged from their records. Subsection 7 states that no Missouri law enforcement personnel, state, county, or city employees, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting MO laws that are no longer illegal under this initiative petition. The section also include language that creates an excise tax of five percent on all retail sales of marijuana, in addition to any established state or local sales taxes. The 2.5 percent of the revenue shall be distributed to PreK-12 public schools and 2.5 percent be distributed to the Missouri Veterans Commission. Subsection 5, however, allows all medical marijuana users, with recommendation by a physician, to purchase cannabis without taxation. Subsection 10 provides that the provisions in the amendment take effect no later than January 31st, following the election that placed the initiative before the people of Missouri.

B&P estimates that subsection 7 of this initiative petition could increase Total State Revenue by as much as $17.2M and GR by as much as $16.5M once fully implemented in FY 2021. The Substance Abuse and Mental Health Services Administration (SAMHSA) reports that 9.95% of Missouri population age 18 and older use marijuana. For the purposes of this analysis, B&P assumes the same percentage for marijuana users over the age of 21. The U.S. Census (2010) reports the population of Missouri residents over the age of 21 as 4,300,988 people. Multiplying the percentage of Missouri residents who use marijuana by the population of Missouri residents over the age of 21 gives an estimate of the number of Missouri residents who use marijuana:

	4,300,988	(MO residents over the age of 21)
X	9.95%	(% of MO residents who use marijuana)
	427,948	(MO residents who use marijuana)

However, B&P estimates that of those who use marijuana, roughly 65,000 would be medical users. SAMHSA reports that the total number of U.S. population age 18 and older use marijuana is 27,169,000 people. B&P assumes dividing the number of MO residents who use marijuana by the U.S. population that uses marijuana will provide an estimate of the percentage of the U.S. market that is attributable to Missouri.

	427,948	(MO residents who use marijuana)
÷	27,169,000	(Number of U.S. marijuana users)
	1.58%	(% U.S. market that is attributable to MO)

Using the estimate above for medical users, of that 1.58 percent approximately 0.24% could be considered medical. Therefore, B&P estimates that the size of the U.S. market that is attributable to Missouri, less medical marijuana users, is 1.33 percent. Using an established estimate[1] for the U.S. market of $14.0B and multiplying by the percentage of the U.S. market that is attributable to Missouri, B&P estimates that Missouri's marijuana market, less medical marijuana use, could be worth $186.7M. Assuming Missouri's marijuana market is worth $186.7M, an excise tax of five percent could increase TSR and GR by as much as $9.3M once fully implemented. Table 1 shows a breakdown of revenue increases by tax type.

Table 1: Revenue Generated by Marijuana Taxes

Tax	FY 2020 (5 months)	Fully Implemented (FY 2021)
Sales Tax		
General Revenue	3,002,000	7,206,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
Marijuana Excise Tax		
General Revenue	3,890,000	9,337,000
Total		
General Revenue	6,893,000	16,543,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
TSR	7,178,000	17,228,000

[1] http://scholar.harvard.edu/files/miron/files/budget_2010_final_0.pdf

Officials from the **Office of State Courts Administrator** indicated:

The proposed initiative petition would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of eighteen to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri

Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

DenverDA
Mitchell R. Morrissey, District Attorney - Second Judicial District
201 W. Colfax Avenue, Dept. 801, Denver, CO 80202
Bus. Phone: 720-913-900
Fax: 720-913-903

October 12, 2016

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated this constitutional amendment would have no fiscal impact on their city.

Officials from the **City of St. Joseph** indicated this initiative petition would not have a fiscal impact on their local government.

Officials from the **Missouri Veterans Commission** indicated they defer fiscal impact to the Department of Revenue/Tax. They are pleased to receive any funding which appropriately comes to them to support the Veterans Programs currently administered by the Commission.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

Officials from **Missouri Western State University** indicated this fiscal note will not have a fiscal impact on their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Missouri Southern State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

State revenues could increase by $17 million annually and the state could avoid costs of $11 million annually when the proposal is fully implemented, but an annual unknown loss of federal funding could occur. Additional state costs are estimated at $750,000 annually with one-time costs of $150,000. Local law enforcement costs could increase.

Jefferson City, MO 65101

RE: Petition approval request from Timothy Gilio regarding a proposed constitutional amendment to Article IV, version 2 (2018-184)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Timothy Gilio on March 20, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
a. Medical cannabis refers to a Physician's written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis product's use not necessarily recommended by a Physician.
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares, manufactures, packages, transports, or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21, with the exception of persons falling under the dictates of item 3c.
b. Anyone under the age of 18 shall have legal access to cannabis through a Physician's written recommendation, and parental or a legal guardian's supervision for medical conditions or diseases that cannabis might help with.
c. Anyone under the age of 21, but age 18 and over shall have legal access to cannabis through a Physician's written recommendation for medical conditions or diseases that cannabis might help with.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs. There shall be no plant quantity limitations without voter approval.
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying, or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvesting, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs a through d of this section

5. Patient's rights: cannabis shall be available to all patients regardless of age, race, or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court of law for a nonviolent cannabis related crime shall immediately be released. This shall not apply to those prisoners that have any additional charges other than a nonviolent cannabis related crime. All charges for nonviolent cannabis related crimes shall be immediately expunged from all prisoner's records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, or city employees, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri Constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.
b. An additional tax, not to exceed 5% without additional voter approval, will be added to all personal / recreational sales of Cannabis not to include any Hemp or Hemp by products sold within the boundaries of Missouri in addition to any established state, county or city sales tax already set in place to be collected by the State of Missouri Sales Taxation Division. Cannabis products sold under the guidelines listed in Section 3b and 3c of this document shall be exempt from this tax. The additional sales tax monies collected will be collected by the State of Missouri Sales Taxation Division, divided and distributed as directed in this paragraph on a quarterly basis as follows: 1/2 will go to Missouri Public Schools that teach Preschool or K through 12 grade or any combination of the Aforementioned. The remaining 1/2 will be directed to the Missouri Veterans Commission to help with housing, clothing, food and medical needs for our multitude of Missouri veterans as the Missouri Veterans Commission sees fit to best utilize those funds.

8. Cannabis farmers, manufacturer's, processors, and distributors shall not be subjected to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of Physicians or Veterinarians. No Physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-184)

Subject

Initiative petition from Timothy Gilio regarding a proposed constitutional amendment to Article IV. (Received March 21, 2017)

Date

April 10, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal could require their office to develop and issue an order providing for the destruction of "all cannabis related nonviolent civil and criminal records in Missouri." Moreover, the proposal purports to supersede federal law.

They expect that the enactment of this proposal would result in increased litigation. They assume they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** estimated increased operating costs of $0 in fiscal year 2018, $109,353 in fiscal year 2019, and $169,098 in fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated retail marijuana, cultivation facilities, products manufacturer, and testing facilities may be established as small businesses.

A tax, not to exceed five percent without additional voter approval, will be added to all personal/recreational sales of Cannabis. The tax will be collected by the State of Missouri Sales Taxation Division. The tax collected is to be directed to Missouri Public Schools and to the Missouri Veterans Commission.

This proposal does not require them to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through 196.298, RSMo, gives them responsibility for the regulation of food to include such

duties as ensuring food safety, sanitation, and proper labeling, etc. Therefore, they would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated cost avoidance of $7,178,073 in fiscal year 2019 (7 months), $7,511,746 in fiscal year 2020, $10,011,383 in fiscal year 2021, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will no discharges from expungement but the reduction in the prison population will increase to 214. The field

reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated increased costs of $150,012 in fiscal year 2018, $30,752 in fiscal year 2019, and $31,521 in fiscal year 2020.

This petition opens up the possibility of additional business opportunities in cannabis farming, manufacturing, and distribution of products.

	Federal		-	-	-
	Other		-	-	-
	Total		150,012	30,752	31,521

This would create an unknown positive impact on Total State Revenue.

This petition increases state revenues by an unknown amount.

The provisions of section 7b add an additional five percent tax to all personal/recreational sales of cannabis not including hemp or hemp by-products sold in Missouri. This tax is in addition to any state, county, or city sales taxes already in place. This section also requires the division and distribution of these collections on a quarterly basis to Missouri public schools and the Missouri Veterans' Administration.

This Article states that the tax is to be collected by the State of Missouri Sales Tax Division. There is no State of Missouri Sales Tax Division and their department assumes that the taxpayer will remit the tax to their department. Because there are no enforcement provisions, it may be difficult for their department to enforce the collection of the

additional tax under current sales tax statutes. Their department will not be able to make refunds to taxpayers as the article is currently drafted.

Administrative Impact:

Business Tax Processing:
Although the legislation bases the additional five percent tax on retail sales, it is in addition to and separate from state, county, or city sales tax, and must therefore be reported and deposited separately.

If this money needs to remain in a non-state account, either it would need to stay in the sales suspense holding account until distribution, or new bank accounts would need to be established for each.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated they expect increased operating costs of $474,311 for the first year implemented, $538,337 for the second year implemented, and $544,128 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 5 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division
The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094

RECURRING COSTS

Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Division

Currently, there are 111,977 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 17 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 5 FTE's. However, if a large number of these expungements were to be granted with even five FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 45 FTE's to complete this task in approximately one year.

The addition of 45 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 111,977 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 111,977 x .10 = 11,198 / 2,485 = 5 FTE's
50% = 111,977 x .50 = 55,989 / 2,485 = 23 FTE's
100% = 111,977 / 2,485 = 45 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

5 Quality Control Clerks ($1,015 x 24)	$121,800
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require the Highway Patrol to rent office space for 5 FTE's to process the expungement requests. The Office of Administration states that 1,500 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other

entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a “non-violent cannabis-only offense” needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is expunged or does the “court,” whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Changes to Missouri's state driving laws could impact some federal commercial drivers' license laws.

Failure to comply with 49 C.F.R. 384.225 & 384.226 could result in a withholding of Missouri’s federal-aid highway funds apportioned to it under each of Title 23, United States Code (U.S.C.), sections 104(b)(1), (b)(3), and (b)(4). The federal funds impacted consist of national highway performance program funds, highway safety improvement program funds and congestion mitigation and air quality improvement funds. The

withholding amount would be 4 percent for the first year of non-compliance and 8 percent for the second and subsequent years.

Officials from the **Office of Administration** (OA) indicated:

Section 54 of Article IV would allow the medical and recreational use of marijuana and hemp, as well as the cultivation, production, transportation and retail sale of marijuana and hemp and their related products. Subsection 3 allows the sale of marijuana to individuals under the age of 21 only with physician or parental permission. Subsection 6 requires that all prisoners that have been convicted in Missouri of a nonviolent cannabis related crime shall be immediately released and all related charges shall be expunged from their records. Subsection 7 states that no Missouri law enforcement personnel, state, county, or city employees, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting MO laws that are no longer illegal under this initiative petition. The section also include language that creates an excise tax of five percent on all retail sales of marijuana, in addition to any established state or local sales taxes. The 2.5 percent of the revenue shall be distributed to PreK-12 public schools and 2.5 percent be distributed to the Missouri Veterans Commission. Subsection 5, however, allows all medical marijuana users, with recommendation by a physician, to purchase cannabis without taxation. Subsection 10 provides that the provisions in the amendment take effect no later than January 31st, following the election that placed the initiative before the people of Missouri.

B&P estimates that subsection 7 of this initiative petition could increase Total State Revenue by as much as $17.2M and GR by as much as $16.5M once fully implemented in FY 2021. The Substance Abuse and Mental Health Services Administration (SAMHSA) reports that 9.95% of Missouri population age 18 and older use marijuana. For the purposes of this analysis, B&P assumes the same percentage for marijuana users over the age of 21. The U.S. Census (2010) reports the population of Missouri residents over the age of 21 as 4,300,988 people. Multiplying the percentage of Missouri residents who use marijuana by the population of Missouri residents over the age of 21 gives an estimate of the number of Missouri residents who use marijuana:

	4,300,988	(MO residents over the age of 21)
X	9.95%	(% of MO residents who use marijuana)
	427,948	(MO residents who use marijuana)

However, B&P estimates that of those who use marijuana, roughly 65,000 would be medical users. SAMHSA reports that the total number of U.S. population age 18 and older use marijuana is 27,169,000 people. B&P assumes dividing the number of MO residents who use marijuana by the U.S. population that uses marijuana will provide an estimate of the percentage of the U.S. market that is attributable to Missouri.

	427,948	(MO residents who use marijuana)
÷	27,169,000	(Number of U.S. marijuana users)
	1.58%	(% U.S. market that is attributable to MO)

Using the estimate above for medical users, of that 1.58 percent approximately 0.24% could be considered medical. Therefore, B&P estimates that the size of the U.S. market that is attributable to Missouri, less medical marijuana users, is 1.33 percent. Using an established estimate[1] for the U.S. market of $14.0B and multiplying by the percentage of the U.S. market that is attributable to Missouri, B&P estimates that Missouri's marijuana market, less medical marijuana use, could be worth $186.7M. Assuming Missouri's marijuana market is worth $186.7M, an excise tax of five percent could increase TSR and GR by as much as $9.3M once fully implemented. Table 1 shows a breakdown of revenue increases by tax type.

Table 1: Revenue Generated by Marijuana Taxes

Tax	FY 2020 (5 months)	Fully Implemented (FY 2021)
Sales Tax		
General Revenue	3,002,000	7,206,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
Marijuana Excise Tax		
General Revenue	3,890,000	9,337,000
Total		
General Revenue	6,893,000	16,543,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
TSR	7,178,000	17,228,000

Officials from the **Office of State Courts Administrator** indicated:

The proposed initiative petition would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of eighteen to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri

Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated this constitutional amendment would have no fiscal impact on their city.

Officials from the **City of St. Joseph** indicated this initiative petition would not have a fiscal impact on their local government.

Officials from the **Missouri Veterans Commission** indicated they defer fiscal impact to the Department of Revenue/Tax. They are pleased to receive any funding which appropriately comes to them to support the Veterans Programs currently administered by the Commission.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

Officials from **Missouri Western State University** indicated this fiscal note will not have a fiscal impact on their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Missouri Southern State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

State revenues could increase by $17 million annually and the state could avoid costs of $11 million annually when the proposal is fully implemented, but an annual unknown loss of federal funding could occur. Additional state costs are estimated at $750,000 annually with one-time costs of $150,000. Local law enforcement costs could increase.

RE: Petition approval request from Timothy Gilio regarding a proposed constitutional amendment to Article IV, version 1 (2018-183)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Timothy Gilio on March 20, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1,577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1.Cannabis aka marijuana and cannabis hemp shall immediately be removed from Missouri's list of controlled substances and shall no longer be listed among Missouri's drugs schedules.

2. Definitions of terms used in this Act: cannabis and cannabis hemp refer to cannabis marijuana, cannabis sativa, cannabis indica, cannabis ruderalis or any variety of cannabis including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
a. Medical cannabis refers to a Physician's written recommended use of cannabis or any form of cannabis derivative, concentrate, extract, flower, stem, stalk, root, leaf, or any Cannabis product thereof.
b. Personal aka recreational use refers to any cannabis product's use not necessarily recommended by a Physician.
c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging or storing of cannabis or hemp or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into or onto the human body with any vehicle or what could be construed as a dangerous device.
d. Establishment refers to cannabis cultivating facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares, manufactures, packages, transports, or sells cannabis or hemp products or accessories.

3. Minors refers to anyone under the age of 21
a. Cannabis or its products shall not be sold to anyone under the age of 21, with the exception of persons falling under the dictates of item 3c.
b. Anyone under the age of 18 shall have legal access to cannabis through a Physician's written recommendation, and parental or a legal guardian's supervision for medical conditions or diseases that cannabis might help with.
c. Anyone under the age of 21, but age 18 and over shall have legal access to cannabis through a Physician's written recommendation for medical conditions or diseases that cannabis might help with.

4. The following acts are not unlawful and shall not be an offense under these revised Missouri law's
a. Possession or cultivation of cannabis for personal or medical use in an area sufficient to produce the quantity necessary to address one's personal or medical needs. No plant limitations may be imposed by any other legislation.
b. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying, or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri. No special licensing will be required beyond that which is applicable for the cultivation, harvesting, processing, manufacturing, packaging, distribution, transferal, display, or possessing of any non-toxic food or food product.
c. Providing cannabis, aka marijuana and or any part of the cannabis plant thereof to be sold to the public must be tested by an accredited testing facility and all packaging labeled accordingly to reflect said testing.
d. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs a through d of this section

5. Patient's rights: cannabis shall be available to all patients regardless of age, race, or gender without taxation when recommended by a physician as a medicine.
a. All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means.

6. All prisoners that have been found guilty in a Missouri Court of law for a nonviolent cannabis related crime shall immediately be released. This shall not apply to those prisoners that have any additional charges other than a nonviolent cannabis related crime. All charges for nonviolent cannabis related crimes shall be immediately expunged from all prisoner's records.
a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related nonviolent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No Missouri law enforcement personnel, state, county, or city employees, state or federal funds shall be used to assist or aid in the enforcement of federal or preexisting Missouri cannabis or hemp laws involving acts which are no longer illegal in the state of Missouri under this amendment to the Missouri Constitution.
a. Any person who impedes the lawful exercise of these provisions is guilty of a class A misdemeanor and is subject to all penalties or fines thereof.
b. An additional tax, not to exceed 5% without additional voter approval, will be added to all personal / recreational sales of Cannabis not to include any Hemp or Hemp by products sold within the boundaries of Missouri in addition to any established state, county or city sales tax already set in place to be collected by the State of Missouri Sales Taxation Division. Cannabis products sold under the guidelines listed in Section 3b and 3c of this document shall be exempt from this tax. The additional sales tax monies collected will be collected by the State of Missouri Sales Taxation Division, divided and distributed as directed in this paragraph on a quarterly basis as follows: 1/2 will go to Missouri Public Schools that teach Preschool or K through 12 grade or any combination of the Aforementioned. The remaining 1/2 will be directed to the Missouri Veterans Commission to help with housing, clothing, food and medical needs for our multitude of Missouri veterans as the Missouri Veterans Commission sees fit to best utilize those funds.

8. Cannabis farmers, manufacturer's, processors, and distributors shall not be subjected to any special zoning requirements, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor of agricultural products.

9. Pursuant to the ninth and tenth amendments to the constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.
a. The state of Missouri will honor all legally obtained patients medical cards regardless of the state where issued and Missouri shall become reciprocity with all legal states where Cannabis is considered legalized by law for medical or recreational use.
b. Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of Physicians or Veterinarians. No Physician or Veterinarian shall be subject to any professional license review or hearing as a result of recommending or approving medical cannabis therapy.
c. Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis, hemp or any derivatives or parts thereof.

10. All provisions of this section are self-executing and serviceable. Except where otherwise indicated in the text of this document this constitutional amendment shall supersede any and all conflicting city, county, state or federal statutory, local charter, ordinance or resolution and shall be implemented no later than January 31st, following the election that placed this initiative before the people of Missouri.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-183)

Subject

Initiative petition from Timothy Gilio regarding a proposed constitutional amendment to Article IV. (Received March 21, 2017)

Date

April 10, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Veterans Commission, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal could require their office to develop and issue an order providing for the destruction of "all cannabis related nonviolent civil and criminal records in Missouri." Moreover, the proposal purports to supersede federal law.

They expect that the enactment of this proposal would result in increased litigation. They assume they could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** estimated increased operating costs of $0 in fiscal year 2018, $109,353 in fiscal year 2019, and $169,098 in fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and recreational purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated retail marijuana, cultivation facilities, products manufacturer, and testing facilities may be established as small businesses.

A tax, not to exceed five percent without additional voter approval, will be added to all personal/recreational sales of Cannabis. The tax will be collected by the State of Missouri Sales Taxation Division. The tax collected is to be directed to Missouri Public Schools and to the Missouri Veterans Commission.

This proposal does not require them to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through 196.298, RSMo, gives them responsibility for the regulation of food to include such

duties as ensuring food safety, sanitation, and proper labeling, etc. Therefore, they would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than January 31 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin January 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated cost avoidance of $7,178,073 in fiscal year 2019 (7 months), $7,511,746 in fiscal year 2020, $10,011,383 in fiscal year 2021, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will no discharges from expungement but the reduction in the prison population will increase to 214. The field

reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated increased costs of $150,012 in fiscal year 2018, $30,752 in fiscal year 2019, and $31,521 in fiscal year 2020.

This petition opens up the possibility of additional business opportunities in cannabis farming, manufacturing, and distribution of products.

		Other		-	-	-
		Total		150,012	30,752	31,521

This would create an unknown positive impact on Total State Revenue.

This petition increases state revenues by an unknown amount.

The provisions of section 7b add an additional five percent tax to all personal/recreational sales of cannabis not including hemp or hemp by-products sold in Missouri. This tax is in addition to any state, county, or city sales taxes already in place. This section also requires the division and distribution of these collections on a quarterly basis to Missouri public schools and the Missouri Veterans' Administration.

This Article states that the tax is to be collected by the State of Missouri Sales Tax Division. There is no State of Missouri Sales Tax Division and their department assumes that the taxpayer will remit the tax to their department. Because there are no enforcement provisions, it may be difficult for their department to enforce the collection of the

additional tax under current sales tax statutes. Their department will not be able to make refunds to taxpayers as the article is currently drafted.

Administrative Impact:

Business Tax Processing:
Although the legislation bases the additional five percent tax on retail sales, it is in addition to and separate from state, county, or city sales tax, and must therefore be reported and deposited separately.

If this money needs to remain in a non-state account, either it would need to stay in the sales suspense holding account until distribution, or new bank accounts would need to be established for each.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Public Safety, Division of Missouri State Highway Patrol** indicated they expect increased operating costs of $474,311 for the first year implemented, $538,337 for the second year implemented, and $544,128 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 5 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division
The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094

RECURRING COSTS

Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Division

Currently, there are 111,977 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest and arrest/disposition records pertaining to individuals the age of 17 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require 5 FTE's. However, if a large number of these expungements were to be granted with even five FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 45 FTE's to complete this task in approximately one year.

The addition of 45 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 111,977 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 111,977 x .10 = 11,198 / 2,485 = 5 FTE's
50% = 111,977 x .50 = 55,989 / 2,485 = 23 FTE's
100% = 111,977 / 2,485 = 45 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

5 Quality Control Clerks ($1,015 x 24)	$121,800
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require the Highway Patrol to rent office space for 5 FTE's to process the expungement requests. The Office of Administration states that 1,500 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other

entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a "non-violent cannabis-only offense" needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the individual just complete and file a document with a circuit clerk and the record is expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Changes to Missouri's state driving laws could impact some federal commercial drivers' license laws.

Failure to comply with 49 C.F.R. 384.225 & 384.226 could result in a withholding of Missouri's federal-aid highway funds apportioned to it under each of Title 23, United States Code (U.S.C.), sections 104(b)(1), (b)(3), and (b)(4). The federal funds impacted consist of national highway performance program funds, highway safety improvement program funds and congestion mitigation and air quality improvement funds. The

withholding amount would be 4 percent for the first year of non-compliance and 8 percent for the second and subsequent years.

Officials from the **Office of Administration** (OA) indicated:

Section 54 of Article IV would allow the medical and recreational use of marijuana and hemp, as well as the cultivation, production, transportation and retail sale of marijuana and hemp and their related products. Subsection 3 allows the sale of marijuana to individuals under the age of 21 only with physician or parental permission. Subsection 6 requires that all prisoners that have been convicted in Missouri of a nonviolent cannabis related crime shall be immediately released and all related charges shall be expunged from their records. Subsection 7 creates an excise tax of five percent on all retail sales of marijuana, in addition to any established state or local sales taxes. The 2.5 percent of the revenue shall be distributed to PreK-12 public schools and 2.5 percent be distributed to the Missouri Veterans Commission. Subsection 5, however, allows all medical marijuana users, with recommendation by a physician, to purchase cannabis without taxation. Subsection 10 provides that the provisions in the amendment take effect no later than January 31st, following the election that placed the initiative before the people of Missouri.

B&P estimates that subsection 7 of this initiative petition could increase Total State Revenue by as much as $17.2M and GR by as much as $16.5M once fully implemented in FY 2021. The Substance Abuse and Mental Health Services Administration (SAMHSA) reports that 9.95% of Missouri population age 18 and older use marijuana. For the purposes of this analysis, B&P assumes the same percentage for marijuana users over the age of 21. The U.S. Census (2010) reports the population of Missouri residents over the age of 21 as 4,300,988 people. Multiplying the percentage of Missouri residents who use marijuana by the population of Missouri residents over the age of 21 gives an estimate of the number of Missouri residents who use marijuana:

	4,300,988	(MO residents over the age of 21)
X	9.95%	(% of MO residents who use marijuana)
	427,948	(MO residents who use marijuana)

However, B&P estimates that of those who use marijuana, roughly 65,000 would be medical users. SAMHSA reports that the total number of U.S. population age 18 and older use marijuana is 27,169,000 people. B&P assumes dividing the number of MO residents who use marijuana by the U.S. population that uses marijuana will provide an estimate of the percentage of the U.S. market that is attributable to Missouri.

	427,948	(MO residents who use marijuana)
÷	27,169,000	(Number of U.S. marijuana users)
	1.58%	(% U.S. market that is attributable to MO)

Using the estimate above for medical users, of that 1.58 percent approximately 0.24% could be considered medical. Therefore, B&P estimates that the size of the U.S. market that is attributable to Missouri, less medical marijuana users, is 1.33 percent. Using an established estimate[1] for the U.S. market of $14.0B and multiplying by the percentage of the U.S. market that is attributable to Missouri, B&P estimates that Missouri's marijuana market, less medical marijuana use, could be worth $186.7M. Assuming Missouri's marijuana market is worth $186.7M, an excise tax of five percent could increase TSR and GR by as much as $9.3M once fully implemented. Table 1 shows a breakdown of revenue increases by tax type.

Table 1: Revenue Generated by Marijuana Taxes

Tax	FY 2020 (5 months)	Fully Implemented (FY 2021)
Sales Tax		
General Revenue	3,002,000	7,206,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
Marijuana Excise Tax		
General Revenue	3,890,000	9,337,000
Total		
General Revenue	6,893,000	16,543,000
Education	233,000	559,000
Conservation	29,000	70,000
Parks, Soil, Water	23,000	56,000
Local	120,000	287,000
TSR	7,178,000	17,228,000

[1] http://scholar.harvard.edu/files/miron/files/budget_2010_final_0.pdf

Officials from the **Office of State Courts Administrator** indicated:

The proposed initiative petition would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of eighteen to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. We are unable to determine what number of these charges were for someone over the age of twenty-one.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri

Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track their cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes they contract all conflicts to private attorneys, which they are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

October 12, 2016

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of Kansas City** indicated this constitutional amendment would have no fiscal impact on their city.

Officials from the **City of St. Joseph** indicated this initiative petition would not have a fiscal impact on their local government entity.

Officials from the **Missouri Veterans Commission** indicated they defer fiscal impact to the Department of Revenue/Tax. They are pleased to receive any funding which appropriately comes to them to support the Veterans Programs currently administered by the Commission.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

Officials from **Missouri Western State University** indicated this fiscal note will not have a fiscal impact on their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Missouri Southern State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

State revenues could increase by $17 million annually and the state could avoid costs of $11 million annually when the proposal is fully implemented, but an annual unknown loss of federal funding could occur. Additional state costs are estimated at $750,000 annually with one-time costs of $150,000. Local law enforcement costs could increase.

RE: Petition approval request from Doug Burlison regarding a proposed constitutional amendment to Article IV (2018-182)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Doug Burlison on March 20, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals, in part or in whole, and Amends various statutes and subsections including but not necessarily limited to RSMo 87.400.1(6), 87.400.1(7), 87.505.1(12), 87.505.1(13), 105.1108.1, 105.1112.1, 192.945.1, 195.010.1(17)(g), 195.010.1(l), 195.010.1(24), 195.010.1(40), 195.017.1(4)(w), 195.017.1(4)(ee), 195.017.2(4)(w), 195.017.2(ee), 195.140.2, 195.207.1, 195.211.1, 195.222.1(7), 195.223.1(7), 195.223.1(8), 261.265.1, 263.250.1, 261.265.1, 306.110.1(2), 579.015.1(2), 579.015.1(3), 579.015.1(4), 579.015.1(5), 579.020.1(2), 579.020.1(3), 579.020.1(4), 579.020.1(5), 577.024.1(2), 579.030.1, 579.055.1(3), 579.055.1(4), 579.068.1(7), 579.068.1(9)3.(7), 579.068.1(9)3.(8), 579.105.1.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1. Cannabis shall immediately be removed from the Missouri Revised Statutes list of controlled substances and shall no longer be listed among Missouri's drug schedules. Cannabis shall no longer be considered a controlled substance or a drug hence forth by Missouri law.

2. Definition of terms, as used in this Act:
(a) "Cannabis" and "Cannabis hemp" refer to the Cannabis, marihuana, marijuana, Cannabis sativa, Cannabis sativa L., Cannabis Americana, Cannabis Gigantea, Cannabis indica, Cannabis ruderalis, or any variety of Cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
(b) "Medical Cannabis" refers to Cannabis used to prevent or to treat a medical condition.
(c) "Personal use" refers to the personal use or consumption of Cannabis.
(d) "Cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing Cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing Cannabis into and/or onto the human body.
(e) "Establishment" refers to a Cannabis cultivation facility, a Cannabis testing facility, a Cannabis product manufacturing facility, or a retail store, Cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells Cannabis, Cannabis products and/or Cannabis accessories.

3. The following acts are not unlawful and shall not be an offense under Missouri law:
(a) Possession of Cannabis for personal or medical use.
(b) Cultivating Cannabis for personal or medical use.
(c) Cultivation, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing Cannabis, Cannabis accessories, and Cannabis products for commercial purposes, provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display or possessing of any non-toxic food or food product.
(d) Providing Cannabis, Cannabis accessories, and Cannabis products for sale to consumers.
(e) Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs (a) through (d) of this subsection.
(f) No one shall be denied housing solely based on their use of Cannabis.
(g) No one shall be denied employment solely based on their use of Cannabis.
(h) The use and/or possession of Cannabis shall not be grounds for issuing a "Driving under the influence" (DUI) stop, charge, arrest or fines when operating a motor vehicle.

4. Medical Cannabis shall be available to patients without taxation who have a physician's recommendation for its use.
(a) All patients engaged in Cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means, whether or not under the care of a physician.
(b) Licensed physicians shall not be penalized for, nor restricted from recommending Cannabis for medical purposes to any person under their care.
(c) Veterinarians shall not be penalized nor restricted from recommending Cannabis for medical purposes for any creature under their care.
(d) Opinions pertaining to, and willingness to recommend medical Cannabis therapy shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical Cannabis therapy.
(e) Any individual who is a Cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri Cannabis patient.
(f) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of Cannabis.

5. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, Cannabis-only offenses which are no longer illegal in the State of Missouri under this Act shall be immediately released.
(a) The Court shall order the immediate expungement of civil and criminal records pertaining to all non-violent Cannabis only offenses which are no longer illegal in the State of Missouri under this Act.
(b) Within 60 days of the passage of this Act, a legal document shall be developed and made available to the public ordering the immediate destruction of all Cannabis-related non-violent civil and criminal records in Missouri and for any offense covered by this amendment which is no longer illegal in the State of Missouri under this Act. This document shall be distributed to all pertinent parties throughout the state.

6. No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal Cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.
(a) Asset Forfeiture shall no longer be justified or used by any Missouri law enforcement through association with Cannabis, Cannabis cultivation, it's use and/or possession.

7. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

8. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

9. Pursuant to the Ninth and Tenth Amendments to the Constitution of the United States, the people of Missouri hereby repudiate and challenge federal Cannabis prohibitions that conflict with this Act.

10. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

11. The dictates of this Initiative shall be implemented no later than January 31st, following the election that placed this initiative before the people.

Be it enacted by the people of the state of Missouri

Section 115.457. is amended by deleting all matters within the enclosed brackets and adding all the underlined matters as required pursuant to Section 116.050 RSMo.

115.427. 1. Persons seeking to vote in a public election shall establish their identity and eligibility to vote at the polling place by presenting a form of personal identification to election officials. No form of personal identification other than the forms listed in this section shall be accepted to establish a voter's qualifications to vote. Forms of personal identification that satisfy the requirements of this section are any one of the following:

(1) Nonexpired Missouri driver's license;

(2) Nonexpired or nonexpiring Missouri nondriver's license;

(3) A document that satisfies all of the following requirements:

(4) A student ID from a Missouri institution of higher education.

(a) The document contains the name of the individual to whom the document was issued, and the name substantially conforms to the most recent signature in the individual's voter registration record;

(b) The document shows a photograph of the individual;

(c) The document includes an expiration date, and the document is not expired, or, if expired, the document expired after the date of the most recent general election; and

(d) The document was issued by the United States or the state of Missouri; or

(4) Any identification containing a photograph of the individual which is issued by the Missouri National Guard, the United States Armed Forces, or the United States Department of Veteran Affairs to a member or former member of the Missouri National Guard or the United States Armed Forces and that is not expired or does not have an expiration date.

2. (1) An individual who appears at a polling place without a form of personal identification described in subsection 1 of this section and who is otherwise qualified to vote at that polling place may execute a statement, under penalty of perjury, averring that the individual is the person listed in the precinct register; averring that the individual does not possess a form of personal identification described in subsection 1 of this section; acknowledging that the individual is eligible to receive a Missouri nondriver's license free of charge if desiring it in order to vote; and acknowledging that the individual is required to present a form of personal identification, as described in subsection 1 of this section, in order to vote. Such statement shall be executed and sworn to before the election official receiving the statement. Upon executing such statement, the individual may cast a regular ballot, provided such individual presents one of the following forms of identification:

(a) Identification issued by the state of Missouri, an agency of the state, or a local election authority of the state;

(b) Identification issued by the United States government or agency thereof;

(c) Identification issued by an institution of higher education, including a university, college, vocational and technical school, located within the state of Missouri;

(d) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that contains the name and address of the individual;

(e) Other identification approved by the secretary of state under rules promulgated pursuant to this section.

(2) For any individual who appears at a polling place without a form of personal identification described in subsection 1 of this section and who is otherwise qualified to vote at that polling place, the election authority may take a picture of such individual and keep it as part of that individual's voter registration file at the election authority.

(3) Any individual who chooses not to execute the statement described in subdivision (1) of this subsection may cast a provisional ballot. Such provisional ballot shall be counted, provided that it meets the requirements of subsection 4 of this section.

(4) For the purposes of this section, the term "election official" shall include any person working under the authority of the election authority.

3. The statement to be used for voting under subdivision (1) of subsection 2 of this section shall be substantially in the following form:

"State of .....

County of .....

I do solemnly swear (or affirm) that my name is .....; that I reside at .....; that I am the person listed in the precinct register under this name and at this address; and that, under penalty of perjury, I do not possess a form of personal identification approved for voting. As a person who does not possess a form of personal identification approved for voting, I acknowledge that I am eligible to receive free of charge a Missouri nondriver's license at any fee office if desiring it in order to vote. I furthermore acknowledge that I am required to present a form of personal identification, as prescribed by law, in order to vote.

I understand that knowingly providing false information is a violation of law and subjects me to possible criminal prosecution.

.....

Signature of voter

Subscribed and affirmed before me this ..... day of ....., 20....

.....

Signature of election official"

4. A voter shall be allowed to cast a provisional ballot under section 115.430 even if the election judges cannot establish the voter's identity under this section. The election judges shall make a notation on the provisional ballot envelope to indicate that the voter's identity was not verified. The provisional ballot cast by such voter shall not be counted unless:

(1) (a) The voter returns to the polling place during the uniform polling hours established by section115.407 and provides a form of personal identification that allows the election judges to verify the voter's identity as provided in subsection 1 of this section; or

(b) The election authority verifies the identity of the individual by comparing that individual's signature to the signature on file with the election authority and determines that the individual was eligible to cast a ballot at the polling place where the ballot was cast; and

(2) The provisional ballot otherwise qualifies to be counted under section 115.430.

5. The secretary of state shall provide advance notice of the personal identification requirements of subsection 1 of this section in a manner calculated to inform the public generally of the requirement for forms of personal identification as provided in this section. Such advance notice shall include, at a minimum, the use of advertisements and public service announcements in print, broadcast television, radio, and cable television media, as well as the posting of information on the opening pages of the official state internet websites of the secretary of state and governor.

6. (1) Notwithstanding the provisions of section 136.055 and section 302.181 to the contrary, the state and all fee offices shall provide one nondriver's license at no cost to any otherwise qualified voter who does not already possess such identification and who desires the identification in order to vote.

(2) This state and its agencies shall provide one copy of each of the following, free of charge, if needed by an individual seeking to obtain a form of personal identification described in subsection 1 of this section in order to vote:

(a) A birth certificate;
(b) A marriage license or certificate;
(c) A divorce decree;
(d) A certificate of decree of adoption;
(e) A court order changing the person's name;
(f) A Social Security card reflecting an updated name; and
(g) Naturalization papers or other documents from the United States Department of State proving citizenship.

Any individual seeking one of the above documents in order to obtain a form of personal identification described in subsection 1 of this section in order to vote may request the secretary of state to facilitate the acquisition of such documents. The secretary of state shall pay any fee or fees charged by another state or its agencies, or any court of competent jurisdiction in this state or any other state, or the federal government or its agencies, in order to obtain any of the above documents from such state or the federal government.

(3) All costs associated with the implementation of this section shall be reimbursed from the general revenue of this state by an appropriation for that purpose. If there is not a sufficient appropriation of state funds, then the personal identification requirements of subsection 1 of this section shall not be enforced.

(4) Any applicant who requests a nondriver's license for the purpose of voting shall not be required to pay a fee if the applicant executes a statement, under penalty of perjury, averring that the applicant does not have any other form of personal identification that meets the requirements of this section. The state of Missouri shall pay the legally required fees for any such applicant. The director of the department of revenue shall design a statement to be used for this purpose. The total cost associated with nondriver's license photo identification under this subsection shall be borne by the state of Missouri from funds appropriated to the department of revenue for that specific purpose. The department of revenue and a local election authority may enter into a contract that allows the local election authority to assist the department in issuing nondriver's license photo identifications.

7. The director of the department of revenue shall, by January first of each year, prepare and deliver to each member of the general assembly a report documenting the number of individuals who have requested and received a nondriver's license photo identification for the purposes of voting under this section. The report shall also include the number of persons requesting a nondriver's license for purposes of voting under this section, but not receiving such license, and the reason for the denial of the nondriver's license.

8. The precinct register shall serve as the voter identification certificate. The following form shall be printed at the top of each page of the precinct register:

VOTER'S IDENTIFICATION CERTIFICATE
Warning: It is against the law for anyone to vote, or attempt to vote, without having a lawful right to vote.
PRECINCT
WARD OR TOWNSHIP .....
GENERAL (SPECIAL, PRIMARY) ELECTION
Held ....., 20....
Date

I hereby certify that I am qualified to vote at this election by signing my name and verifying my address by signing my initials next to my address.

9. The secretary of state shall promulgate rules to effectuate the provisions of this section.

10. Any rule or portion of a rule, as that term is defined in section 536.010, that is created under the authority delegated in this section shall become effective only if it complies with and is subject to all of the provisions of chapter 536 and, if applicable, section 536.028. This section and chapter 536 are nonseverable and if any of the powers vested with the general assembly pursuant to chapter 536 to review, to delay the effective date or to disapprove and annul a rule are subsequently held unconstitutional, then the grant of rulemaking authority and any rule proposed or adopted after August 28, 2002, shall be invalid and void.

11. If any voter is unable to sign his name at the appropriate place on the certificate or computer printout, an election judge shall print the name and address of the voter in the appropriate place on the precinct register, the voter shall make his mark in lieu of signature, and the voter's mark shall be witnessed by the signature of an election judge.

12. This section shall become effective only upon the passage and approval by the voters of a constitutional amendment submitted to them by the general assembly regarding the authorization of photo identification requirements for elections by general law. If such constitutional amendment is approved by the voters, this section shall become effective June 1, 2017.

(L. 1977 H.B. 101 § 11.045, A.L. 1983 S.B. 234, A.L. 1993 S.B. 31, A.L. 2002 S.B. 675, A.L. 2006 S.B. 1014 & 730, A.L. 2016 H.B. 1631 §§ 115.427 and B)

*Contingent effective date, see subsection 12 of this section. H.B. 1631 was vetoed July 7, 2016. The veto was overridden on September 14, 2016.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article I (2018-180)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on March 15, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

35 of Article I of the Constitution of Missouri is amended by modifying section 35. The existing section 35 is set forth hereinafter with the new matter bold and deleted matter in brackets,

Definitions of terms, as used in this Act:

A) Cannabis: refers to the cannabis, marihuana, marijuana, cannabis, sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including but not limited to, derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof

B) Hemp: The fiber of this plant, extracted from the stem and used to make rope, fabrics, fiberboard, clothing, and paper. The sister plant of cannabis

That agriculture which provides food, energy, health benefits, and security is the foundation and stabilizing force of Missouri's economy. To protect this vital sector of Missouri's economy, the right of farmers and ranchers to engage in farming and ranching practices, including but not limited to the right to grow cannabis and hemp, shall be forever guaranteed in this state, subject to duly authorized powers, if any, conferred by article VI of the Constitution of Missouri.

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1, 577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1. Cannabis shall immediately be removed from the Missouri list of controlled substances and shall no longer be listed among Missouri's drug schedules.

2. Definitions: cannabis and cannabis hemp refer to Cannabis, Marijuana, Cannabis Sativa, Cannabis Indica, Cannabis Ruderalis or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
   a. Medical cannabis refers to physician recommended use.
   b. Personal use refers to any use not recommended by physician.
   c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use planting, propagating, cultivating, growing, harvesting, manufacturing, compounding , converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into or onto the human body.
   d. Establishment refers to a cannabis cultivation facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares, manufactures, packages, transports, or sells cannabis products or accessories.
   e. Minor refers to anyone under the age 18.

3. Cannabis or its products shall not be sold to anyone under the age 18. Anyone under the age of 18 shall have access to cannabis through physician recommendation or consent from parent/legal guardian.
   a. No minor shall be criminally prosecuted for possession of cannabis or its products.

4. The following acts are not unlawful and shall not be an offense under Missouri law
   a. Possession of cannabis for personal or medical use.
   b. Cultivating cannabis for personal or medical use, to obey zoning restrictions.
   c. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri.
   d. Providing cannabis, cannabis accessories and products for sale to consumers. Any product to be sold to public must be tested for purity and weight.
   e. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs (a) through (e) of this section.
   f. The possession of cannabis is not to be the sole reason for issuing a D.U.I. (driving under the influence), arrest or fines when operating a motor vehicle.

5. Patient rights: Cannabis shall be available to all patients regardless of age, without taxation when physician recommended.

6. All prisoners that have been incarcerated for nonviolent cannabis related crimes shall immediately be released and all charges for cannabis crimes expunged.
   a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related non-violent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No state funds shall be used to enforce federal laws which are no longer illegal in the state of Missouri.
   a. Any person who willfully impedes the lawful exercise of these provisions is guilty of a class A misdemeanor.

8. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirements, licensing fee that is discriminant, prohibitive, or in any way contrary to that which is relative to any other commercial or agriculture farmer, manufacturer, processor or distributor.

9. Pursuant to the ninth and tenth amendments to the Constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.

10. All provisions of this section are self-executing and severable and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance or resolution.

11. The dictates of this Initiative shall be implemented no later than April 20th following the election that placed this initiative before the people.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-179)

Subject

Initiative petition from Charles Jones regarding a proposed constitutional amendment to Article IV. (Received March 15, 2017)

Date

April 4, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated among other provisions, this proposal could require their office to develop and issue "a legal document ordering the immediate destruction of all cannabis related non-violent civil and criminal records in Missouri." Moreover, the proposal purports to supersede federal law and to restrict federal expenditures.

They expect that the enactment of this proposal would result in increased litigation. They assume that it could absorb costs associated with the increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated estimated increased operating costs of $0 in fiscal year 2018, unknown>$72,713 in fiscal year 2019, and unknown>$169,098 in fiscal year 2020.

Section 192.945, RSMo, allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for both medical and personal purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated retail marijuana, cultivation facilities, products manufacturer, dispensary, and testing facilities may be established as small businesses.

This proposal does not require their department to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through 196.298, RSMo, gives their department responsibility for the regulation of food to include such duties as ensuring food safety, sanitation, proper labeling, etc. Therefore, their department would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. States which have legalized retail marijuana have seen a significant demand for edible marijuana products. For the purposes of this fiscal note, they estimate that at least 300 food manufacturing facilities would be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two Environmental Public Health Specialist IV staff (A27, $44,352, Step G). This law shall be implemented no later than April 20 following the November 2018 election. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin April 1, 2019.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of $7,178,073 in fiscal year 2019 (7 Months), $7,511,746 in fiscal year 2020, $10,011,383 in fiscal year 2021, $10,741,186 in fiscal year 2022 and thereafter.

Legalizing the possession and use of marijuana would remove from the criminal statutes all controlled substance offenses for marijuana, including possession, distribution and trafficking. If the legislation that removed marijuana from the list of controlled substances was retrospective then there would be two reductions in the cost of incarceration: the release of offenders serving a marijuana offense and fewer admissions to prison. The legalization of marijuana will largely impact offenders who are only serving a marijuana offense. Offenders serving multiple concurrent sentences will continue to be required to serve the other sentences after legalization and no estimate is made for offenders serving multiple sentences.

The reduction in the offender population is the total of reductions from the expungement of sentences and fewer admissions and probations. The cost avoidance is based upon a direct prison cost per year in FY17 of $6,085 and an average cost of $2,234 per year for offenders on field supervision. In the first year after the enactment of the legislation that legalizes marijuana there is an estimated reduction of 633 offenders in prison and 3,676 offenders on field supervision. In the next year (FY20) there will no discharges from expungement but the reduction in the prison population will increase to 214. The field reduction will continue into FY21 because the marijuana offenders are estimated to serve 2.5 years on supervision.

The estimate is qualified by the use of an expansion factor that assumes that the drug distribution in the sentences where the drug is not known will be similar to that where the drug is known.

The estimated cost avoidance in the first year is $7,178,073 and will be $10,741,186 after the 4th year.

If marijuana usage becomes legal it could impact the safety and security of our prisons as it is not believed that there is a means for testing whether an employee is under the influence of marijuana. Impaired prison employees or visitors can impact the safe and secure operation of our prisons.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department.

Officials from the **Department of Public Safety -Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Missouri State Highway Patrol** indicated they expect increased operating costs of $426,235 for the first year implemented, $487,385 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division
The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Divison

Currently, there are 109,072 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest records with or without a court conviction pertaining to individuals the age of 18 years and older with an NCIC modifier of 60-64 that relate to marijuana offenses. Given this, if only ten percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require four FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 44 FTE's to complete this task in approximately one year. The addition of 44 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 109,072 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

10% = 109,072 x .10 = 10,907 / 2,485 = 4 FTE's
50% = 109,072 x .50 = 54,536 / 2,485 = 22 FTE's
100% = 109,072 / 2,485 = 44 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing ten percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094

RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require the Highway Patrol to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 1,500 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft

Utility Costs $2/Sq Ft

The agency provided the following additional comments:
It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. The definition of a “non-violent cannabis-only offense” needs to be added. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes. Does the

individual just complete and file a document with a circuit clerk and the record is expunged or does the "court," whomever that is, order the immediate expungement of all civil and criminal records pertaining to non-violent cannabis only offenses?

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Changes to Missouri's state driving laws could impact some federal commercial drivers' license laws.

Failure to comply with 49 C.F.R. 384.225 & 384.226 could result in a withholding of Missouri's federal-aid highway funds apportioned to it under each of Title 23, United States Code (U.S.C.), sections 104(b)(1), (b)(3), and (b)(4). The federal funds impacted consist of national highway performance program funds, highway safety improvement program funds and congestion mitigation and air quality improvement funds. The withholding amount would be 4 percent for the first year of non-compliance and 8 percent for the second and subsequent years.

Officials from the **Office of Administration** (OA) indicated:

This proposal enacts one new section in Article IV, Section 54 which:

- Legalizes cannabis under certain circumstances.
- Orders the release of those convicted of nonviolent cannabis-related crimes and requires the expungement of those criminal records.
- Prohibits the use of state funds to enforce federal laws that are no longer illegal in Missouri.
- Prohibits special zoning requirements or licensing fees for cannabis farmers, manufacturers, processors, and distributors.
- Repudiates and challenges federal cannabis prohibitions that conflict with this initiative petition.
- Sets an effective date of no later than April 20th following the election.

This proposal should not have a fiscal impact for their office.

Officials from the **Office of State Courts Administrator** indicated:

The proposed initiative petition would create a new section of the Missouri Constitution to be known as Article IV, section 54. This section would allow citizens over the age of eighteen to have the right to engage in the production, sale, distribution and consumption of marijuana and the manufacture of goods from hemp, subject to reasonable regulations adopted by the state pursuant to this section.

The average of all marijuana related charge codes from 2011 to 2015 for Circuit case types is 14,122 per year. The average of all marijuana related charge codes from 2011 to 2015 for Associate case types is 10,982. They are unable to determine what number of these charges were for someone over the age of eighteen.

The following Criminal Court Costs would be affected by this petition:

Criminal Court Costs		
Felony Case Costs	**Amount of Cost**	**Disburse to State/County**
Basic Civil Legal Services Fund surcharge	$10.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$45.00	State of Missouri - General Revenue $36, County $9
County Fee	$75.00	County
Court Automation Fund Fee	$7.00	State of Missouri -Statewide Court Automation Fund
Court Reporter fee (All Circuit Division Cases)	$15.00	State of Missouri - General Revenue
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$30.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Head Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards & Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	State of Missouri - Prosecuting Attorney Training Fund
Sheriffs' Fee	$75.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement Fund
Spinal Cord Injury Fund surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$279.50**	
Misdemeanor Case Costs		
Basic Civil Legal Services Fund surcharge	$8.00	State of Missouri - Basic Civil Legal Services Fund
Clerk Fee	$15.00	$12 State of Missouri / $3 County
County Fee	$25.00	County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
DNA Profiling Analysis Fund surcharge	$15.00	State of Missouri - DNA Profiling Analysis Fund
Brain Injury Fund surcharge	$2.00	State of Missouri - Brain Injury Fund
Independent Living Center Fund surcharge	$1.00	State of Missouri - Independent Living Center Fund
Motorcycle Safety Trust Fund surcharge	$1.00	State of Missouri - Motorcycle Safety Trust Fund

Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Prosecuting Attorney and Circuit Attorneys' Retirement Fund	$4.00	Pros. Attorney Retirement Fund
Prosecuting Attorney Training Fund surcharge	$1.00	$0.50 State of Missouri / $0.50 County
Sheriffs' fee	$10.00	County
Sheriffs' Retirement Fund surcharge (except 21st Circuit)	$3.00	Sheriffs' Retirement fund
Spinal Cord Injury Fund Surcharge	$2.00	State of Missouri - Spinal Cord Injury Fund
Total	**$102.50**	
Municipal Case (Filed in Associate Division) Costs		
Clerk Fee	$15.00	$12 State of Missouri / $3 County
Court Automation Fund Fee	$7.00	State of Missouri - Court Automation Fund
Crime Victims' Compensation Fund surcharge	$7.50	State of Missouri - Crime Victims' Compensation Fund
Peace Officer Standards and Training (POST) Commission surcharge	$1.00	State of Missouri - Peace Officer Standards & Training Fund
Sheriffs' Retirement Fund surcharge	$3.00	Sheriffs' Retirement Fund
Total	**$33.50**	
Criminal Costs Not Included Above		
Drug Testing by a State Lab	$150.00	State of Missouri

Drug Testing by a Private Lab	Actual Costs	County Reimbursement
Law Enforcement Arrest Costs:		
Highway Patrol		Amt. Approved by the Court
Local (County)		Amt. Approved by the Court
Municipal		Amt. Approved by the Court

The decrease in the court fees, depending on the number of cases, will result in an unknown loss to the courts.

They also assume there will be an unknown decrease in caseload for the courts because the courts will no longer process these cases; however, at this time they are unable to calculate the decrease.

Any significant increase or decrease will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of the Missouri State Public Defender, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because they track cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, the Missouri State Public Defender already is significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes we contract all conflicts to private attorneys, which we are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of the Missouri State Public Defender, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to their budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of St. Joseph** indicated this initiative petition could have a fiscal impact on the local government.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from the **Missouri Western State University** indicated this article will not have a fiscal impact on their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City**, the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

This proposal is estimated to result in annual state savings of $11 million. Additional state operating costs resulting from this proposal are estimated at $700,000 annually. Local law enforcement costs could increase.

Jefferson City, MO 65101

RE: Petition approval request from Damien Johnson regarding a proposed statutory amendment to Chapter 115 (2018-178)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Damien Johnson on March 13, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Section 115.457. is amended by deleting all matters within the enclosed brackets and adding all the underlined matters as required pursuant to Section 116.050 RSMo.

115.427. 1. Persons seeking to vote in a public election shall establish their identity and eligibility to vote at the polling place by presenting a form of personal identification to election officials. No form of personal identification other than the forms listed in this section shall be accepted to establish a voter's qualifications to vote. Forms of personal identification that satisfy the requirements of this section are any one of the following:

(1) Nonexpired Missouri driver's license;

(2) Nonexpired or nonexpiring Missouri nondriver's license;

(3) A document that satisfies all of the following requirements:

(4) A student ID from a Missouri institution of higher education.

(a) The document contains the name of the individual to whom the document was issued, and the name substantially conforms to the most recent signature in the individual's voter registration record;

(b) The document shows a photograph of the individual;

(c) The document includes an expiration date, and the document is not expired, or, if expired, the document expired after the date of the most recent general election; and

(d) The document was issued by the United States or the state of Missouri; or

(4) Any identification containing a photograph of the individual which is issued by the Missouri National Guard, the United States Armed Forces, or the United States Department of Veteran Affairs to a member or former member of the Missouri National Guard or the United States Armed Forces and that is not expired or does not have an expiration date.

2. (1) An individual who appears at a polling place without a form of personal identification described in subsection 1 of this section and who is otherwise qualified to vote at that polling place may execute a statement, under penalty of perjury, averring that the individual is the person listed in the precinct register; averring that the individual does not possess a form of personal identification described in subsection 1 of this section; acknowledging that the individual is eligible to receive a Missouri nondriver's license free of charge if desiring it in order to vote; and acknowledging that the individual is required to present a form of personal identification, as described in subsection 1 of this section, in order to vote. Such statement shall be executed and sworn to before the election official receiving the statement. Upon executing such statement, the individual may cast a regular ballot, provided such individual presents one of the following forms of identification:

(a) Identification issued by the state of Missouri, an agency of the state, or a local election authority of the state;

(b) Identification issued by the United States government or agency thereof;

(c) Identification issued by an institution of higher education, including a university, college, vocational and technical school, located within the state of Missouri;

(d) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that contains the name and address of the individual;

(e) Other identification approved by the secretary of state under rules promulgated pursuant to this section.

(2) For any individual who appears at a polling place without a form of personal identification described in subsection 1 of this section and who is otherwise qualified to vote at that polling place, the election authority may take a picture of such individual and keep it as part of that individual's voter registration file at the election authority.

(3) Any individual who chooses not to execute the statement described in subdivision (1) of this subsection may cast a provisional ballot. Such provisional ballot shall be counted, provided that it meets the requirements of subsection 4 of this section.

(4) For the purposes of this section, the term "election official" shall include any person working under the authority of the election authority.

3. The statement to be used for voting under subdivision (1) of subsection 2 of this section shall be substantially in the following form:

"State of .....

County of .....

I do solemnly swear (or affirm) that my name is .....; that I reside at .....; that I am the person listed in the precinct register under this name and at this address; and that, under penalty of perjury, I do not possess a form of personal identification approved for voting. As a person who does not possess a form of personal identification approved for voting, I acknowledge that I am eligible to receive free of charge a Missouri nondriver's license at any fee office if desiring it in order to vote. I furthermore acknowledge that I am required to present a form of personal identification, as prescribed by law, in order to vote.

I understand that knowingly providing false information is a violation of law and subjects me to possible criminal prosecution.

.....

Signature of voter

Subscribed and affirmed before me this ..... day of ....., 20....

.....

Signature of election official"

4. A voter shall be allowed to cast a provisional ballot under section 115.430 even if the election judges cannot establish the voter's identity under this section. The election judges shall make a notation on the provisional ballot envelope to indicate that the voter's identity was not verified. The provisional ballot cast by such voter shall not be counted unless:

(1) (a) The voter returns to the polling place during the uniform polling hours established by section115.407 and provides a form of personal identification that allows the election judges to verify the voter's identity as provided in subsection 1 of this section; or

(b) The election authority verifies the identity of the individual by comparing that individual's signature to the signature on file with the election authority and determines that the individual was eligible to cast a ballot at the polling place where the ballot was cast; and

(2) The provisional ballot otherwise qualifies to be counted under section 115.430.

5. The secretary of state shall provide advance notice of the personal identification requirements of subsection 1 of this section in a manner calculated to inform the public generally of the requirement for forms of personal identification as provided in this section. Such advance notice shall include, at a minimum, the use of advertisements and public service announcements in print, broadcast television, radio, and cable television media, as well as the posting of information on the opening pages of the official state internet websites of the secretary of state and governor.

6. (1) Notwithstanding the provisions of section 136.055 and section 302.181 to the contrary, the state and all fee offices shall provide one nondriver's license at no cost to any otherwise qualified voter who does not already possess such identification and who desires the identification in order to vote.

(2) This state and its agencies shall provide one copy of each of the following, free of charge, if needed by an individual seeking to obtain a form of personal identification described in subsection 1 of this section in order to vote:

(a) A birth certificate;
(b) A marriage license or certificate;
(c) A divorce decree;
(d) A certificate of decree of adoption;
(e) A court order changing the person's name;
(f) A Social Security card reflecting an updated name; and
(g) Naturalization papers or other documents from the United States Department of State proving citizenship.

Any individual seeking one of the above documents in order to obtain a form of personal identification described in subsection 1 of this section in order to vote may request the secretary of state to facilitate the acquisition of such documents. The secretary of state shall pay any fee or fees charged by another state or its agencies, or any court of competent jurisdiction in this state or any other state, or the federal government or its agencies, in order to obtain any of the above documents from such state or the federal government.

(3) All costs associated with the implementation of this section shall be reimbursed from the general revenue of this state by an appropriation for that purpose. If there is not a sufficient appropriation of state funds, then the personal identification requirements of subsection 1 of this section shall not be enforced.

(4) Any applicant who requests a nondriver's license for the purpose of voting shall not be required to pay a fee if the applicant executes a statement, under penalty of perjury, averring that the applicant does not have any other form of personal identification that meets the requirements of this section. The state of Missouri shall pay the legally required fees for any such applicant. The director of the department of revenue shall design a statement to be used for this purpose. The total cost associated with nondriver's license photo identification under this subsection shall be borne by the state of Missouri from funds appropriated to the department of revenue for that specific purpose. The department of revenue and a local election authority may enter into a contract that allows the local election authority to assist the department in issuing nondriver's license photo identifications.

7. The director of the department of revenue shall, by January first of each year, prepare and deliver to each member of the general assembly a report documenting the number of individuals who have requested and received a nondriver's license photo identification for the purposes of voting under this section. The report shall also include the number of persons requesting a nondriver's license for purposes of voting under this section, but not receiving such license, and the reason for the denial of the nondriver's license.

8. The precinct register shall serve as the voter identification certificate. The following form shall be printed at the top of each page of the precinct register:

VOTER'S IDENTIFICATION CERTIFICATE
Warning: It is against the law for anyone to vote, or attempt to vote, without having a lawful right to vote.
PRECINCT
WARD OR TOWNSHIP .....
GENERAL (SPECIAL, PRIMARY) ELECTION
Held ....., 20....
Date

I hereby certify that I am qualified to vote at this election by signing my name and verifying my address by signing my initials next to my address.

9. The secretary of state shall promulgate rules to effectuate the provisions of this section.

10. Any rule or portion of a rule, as that term is defined in section 536.010, that is created under the authority delegated in this section shall become effective only if it complies with and is subject to all of the provisions of chapter 536 and, if applicable, section 536.028. This section and chapter 536 are nonseverable and if any of the powers vested with the general assembly pursuant to chapter 536 to review, to delay the effective date or to disapprove and annul a rule are subsequently held unconstitutional, then the grant of rulemaking authority and any rule proposed or adopted after August 28, 2002, shall be invalid and void.

11. If any voter is unable to sign his name at the appropriate place on the certificate or computer printout, an election judge shall print the name and address of the voter in the appropriate place on the precinct register, the voter shall make his mark in lieu of signature, and the voter's mark shall be witnessed by the signature of an election judge.

12. This section shall become effective only upon the passage and approval by the voters of a constitutional amendment submitted to them by the general assembly regarding the authorization of photo identification requirements for elections by general law. If such constitutional amendment is approved by the voters, this section shall become effective June 1, 2017.

(L. 1977 H.B. 101 § 11.045, A.L. 1983 S.B. 234, A.L. 1993 S.B. 31, A.L. 2002 S.B. 675, A.L. 2006 S.B. 1014 & 730, A.L. 2016 H.B. 1631 §§ 115.427 and B)

*Contingent effective date, see subsection 12 of this section. H.B. 1631 was vetoed July 7, 2016. The veto was overridden on September 14, 2016.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article X, version 4 (2018-177)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on March 13, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends the Missouri Constitution by adding Section 54 to Article 4. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105, 105.1108, 105.1112, 195.010.(10)(b)c,195.010.(10)(d), 195.010.(17)(m)(b), 195.010.(17)(g), 195.010.(17)(l),195.010(24), 195.015.4, 195.017.2(4)(r), 195.017.2(4)(z), 195.017.2(4)(ii),195.140.2(2), 195.202.2, 195.202.3, 195.211.2, 195.211.3, 195.211.4, 195.222.7,195.223.7, 195.223.8, 263.250.1.

1.The following shall be called the Cannabis Treatment Amendment

2. Definition of terms, as used in this Act:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof. This Amendment shall apply to all rsmo mentioning marijuana.

b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis

c) "medical cannabis" refers to the medical use of cannabis.

d) "personal use" refers to the non-medical consumption of cannabis.

e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.

f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.

g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

3.The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizer or forfeiture.

a) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.

b) Cultivation, harvesting processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display or possessing of any non-toxic food or food product.

4. The Missouri legislature may pass laws that doesn't conflict with this amendment. Medical cannabis, commonly known as marijuana, shall be available to patients who with a doctor's recommendation and Missouri Controlled Substance relating to marijuana schedule list shall change to reflect that cannabis as defined in Section two; clause a of this amendment, shall be available with a doctor's recommendation. The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture:

a) All Missouri patients engaged in cannabis treatment shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means.

b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of 18 with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.

c) Licensed physicians shall not be penalized for nor restricted from recommending cannabis for medical purposes to any person.

d) Opinions pertaining to, and willingness to recommend medical cannabis treatment shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.

e) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

f) Primary caregiver shall not be subjected to criminal or civil charges for providing cannabis to patients who been given a doctor's a medical professional.

5. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.

b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.

c) Permit the transfer or sale of cannabis intended for medical treatment to a person engaged in personal use.

6. Medical dispensaries shall verify the following:

a) The patient has a notarized letter from medical professional recommendation cannabis for medical treatment.

b) If, primary caregiver, the dispensary verifies the patient and the primary caregiver.

c) The patient's 9 digit random alphabet. Dispensaries my issue a random alphabet after verifying the Doctor's Recommendation.

d) Retail cannabis products for medical use shall contain appropriate labeling, which outlines the weight and estimated potency of the product, lists all pesticides used in production, and summarizes the safe and effective use of cannabis. Labels shall not be false or misleading, and should be based on data derived from scientific study and prevailing human experience

7. The Department of Health and Human Services shall issue 9 digit random alphabet out to patients and keep records of the alphabet on a state wide registry. The registry is to verify it's a patient and it shall not be subjected to Sunshine request under rsmo chapter 610. No law enforcement agency my access the list without a warrant. Law enforcement agencies my only view a printed list but not electronically. Dispensaries shall the Register with the the Department of Health and Human Services for:

a) licensing and regulations

b) paying fees of no more than $100.00

c) to assist with the 9 digit random alphabet registry.

8. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, cannabis-only offenses which are no longer illegal for medical treatment in the State of Missouri under this Act and been convicted prior to this Act shall be immediately released and their civil and criminal records shall be expunge by the Court.

9. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

10. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor. Patients are are allowed to grow cannabis for medical treatment for self. Primary caregiver are allowed to grow for their patients.

11. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.This shall
12. become effective on December 6th 2018.

13. In the November general of 2020, voters shall vote to repeal the above sections 1 through 12 & replace it with the below section 14 through 26. A yes vote approve the repeal above sections 1 through 12 and replace with below sections 14 through 26. If voters fail shall to vote yes, the above sections 1 though 12 remains and voters shall vote again every four years until voters vote yes.

14.The following shall be called the Cannabis Legalization Amendment

15.Definition of terms, as used in this Act:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.

b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis

c) "medical cannabis" refers to the medical use of cannabis.

d) "personal use" refers to the non-medical consumption of cannabis.

e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.

f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.

g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

16. The Missouri legislature my pass laws that doesn't conflict with this amendment. Marijuana shall shall not be listed in Missouri Controlled Substance to reflect the change that cannabis as defined in section 14; clause a, are permitted for personal use for persons 21 of age or older and shall be available with a doctor's recommendation without an age limit. The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture.

a) Adult Possession of cannabis for personal at 21 years or older.

b) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.

c) Providing cannabis, cannabis accessories, and products for sale to consumers. Retail cannabis products for medical or personal use shall contain appropriate labeling, which outlines the weight and estimated potency of the product, lists all pesticides used in production, and summarizes the safe and effective use of cannabis. Labels shall not be false or misleading, and should be based on data derived from scientific study and prevailing human experience

17. Medical cannabis shall be available to patients who have a physician's recommendation.

a) All patients engaged in cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means.

b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of twenty-one with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.

c) Licensed physicians shall not be penalized for, nor restricted from recommending cannabis for medical purposes to any person.

d) Opinions pertaining to, and willingness to recommend medical cannabis therapy shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.

e) Any individual who is a legal cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri cannabis patient.

Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

18. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.

b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.

c) Permit the transfer or sale of cannabis intended for adult use to a person younger than twenty-one years of age.

19. Forbid any individual, corporate property owner, elementary education institutions, and secondary education institutions from prohibiting the distribution, sale or cultivation of cannabis within their dwelling for medical treatment

20. The dictates of this Initiative shall be implemented no later than January 1, following the election that placed this Initiative before the people.

21. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for nonviolent, cannabis-only offenses which are no longer illegal in the State of Missouri under this Act shall be immediately released.

(a) The Court shall order the immediate expungement of civil and criminal records pertaining to all non-violent cannabis only offenses which are no longer illegal in the State of Missouri under this Act.

(b) Within 60 days of the passage of this Act, The Attorney General shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis-related nonviolent civil and criminal records in Missouri and for any offense covered by this amendment. This document shall be distributed to all Circuit Court clerks within the State.

22. No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.

23. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

24. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

25. Taxes and regulations not conflicting with sections may be imposed on the production, distribution, cultivation and possession of cannabis, marijuana and hemp shall be subjected to duly authorized powers, if any, conferred by article III and VI of the Constitution of Missouri:

26. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article IV, version 1 (2018-172)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on March 13, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends the Missouri Constitution by adding Section 54 to Article 4. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105, 105.1108, 105.1112, 195.010.(10)(b)c,195.010.(10)(d), 195.010.(17)(m)(b), 195.010.(17)(g), 195.010.(17)(l),195.010(24), 195.015.4, 195.017.2(4)(r), 195.017.2(4)(z), 195.017.2(4)(ii),195.140.2(2), 195.202.2, 195.202.3, 195.211.2, 195.211.3, 195.211.4, 195.222.7,195.223.7, 195.223.8, 263.250.1.

1.The following shall be called the Cannabis Treatment Amendment

2. Definition of terms, as used in this Act:

a) "cannabis" and "cannabis hemp" refer to the cannabis, marihuana, marijuana, cannabis sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof. This Amendment shall apply to all rsmo mentioning marijuana.

b) "hemp": the fiber of this plant, extracted from the stem and used to make rope, stout fabrics, fiberboard, and paper. the sister plant of cannabis

c) "medical cannabis" refers to the medical use of cannabis.

d) "personal use" refers to the non-medical consumption of cannabis.

e) "Expungeable marijuana offense" are any convictions committed prior to this amendment.

f) "cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into and/or onto the human body.

g) "establishment" refers to a cannabis cultivation facility, a cannabis testing facility, a cannabis product manufacturing facility, or a retail cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells cannabis, cannabis products and/or cannabis accessories.

3.The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizer or forfeiture.

a) Possession, production, cultivation and distribution of hemp, marijuana and cannabis.

b) Cultivation, harvesting processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display or possessing of any non-toxic food or food product.

4. The Missouri legislature may pass laws that doesn't conflict with this amendment. Medical cannabis, commonly known as marijuana, shall be available to patients who with a doctor's recommendation and Missouri Controlled Substance relating to marijuana schedule list shall change to reflect that cannabis as defined in Section two; clause a of this amendment, shall be available with a doctor's recommendation. The following acts are not unlawful and shall not be an offense under Missouri law or be a basis for seizure or forfeiture:

a) All Missouri patients engaged in cannabis treatment shall be afforded the same rights and privileges afforded to any patient treated through other pharmaceutical means.

b) Cannabis acquisition, possession, and consumption shall be permitted to patients under the age of 18 with the consent of a parent or legal guardian and through the supervision of a parent or legal custodian and a licensed physician.

c) Licensed physicians shall not be penalized for nor restricted from recommending cannabis for medical purposes to any person.

d) Opinions pertaining to, and willingness to recommend medical cannabis treatment shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical cannabis therapy.

e) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of cannabis.

f) Primary caregiver shall not be subjected to criminal or civil charges for providing cannabis to patients who been given a doctor's a medical professional.

5. Nothing in this section shall:

a) Require an employer to retain an employee who is impaired on the job by his use of cannabis.

b) Permit operation of a motor vehicle, watercraft, aircraft, train, or any transportation device of vehicle by anyone who is impaired by marijuana, cannabis or any other controlled substance.

c) Permit the transfer or sale of cannabis intended for medical treatment to a person engaged in personal use.

6. Medical dispensaries shall verify the following:

a) The patient has a notarized letter from medical professional recommendation cannabis for medical treatment.

b) If, primary caregiver, the dispensary verifies the patient and the primary caregiver.

c) The patient's 9 digit random alphabet. Dispensaries my issue a random alphabet after verifying the Doctor's Recommendation.

d) Retail cannabis products for medical use shall contain appropriate labeling, which outlines the weight and estimated potency of the product, lists all pesticides used in production, and summarizes the safe and effective use of cannabis. Labels shall not be false or misleading, and should be based on data derived from scientific study and prevailing human experience

7. The Department of Health and Human Services shall issue 9 digit random alphabet out to patients and keep records of the alphabet on a state wide registry. The registry is to verify it's a patient and it shall not be subjected to Sunshine request under rsmo chapter 610. No law enforcement agency my access the list without a warrant. Law enforcement agencies my only view a printed list but not electronically. Dispensaries shall the Register with the the Department of Health and Human Services for:

a) licensing and regulations b) paying fees of no more than $100.00 c) to assist with the 9 digit random alphabet registry.

8. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, cannabis-only offenses which are no longer illegal for medical treatment in the State of Missouri under this Act and been convicted prior to this Act shall be immediately released and their civil and criminal records shall be expunge by the Court.

9. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

10. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor. Patients are are allowed to grow cannabis for medical treatment for self. Primary caregiver are allowed to grow for their patients.

11. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.This shall

12. become effective on December 6th 2018.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-172)

Subject

Initiative petition from Damien Johnson regarding a proposed constitutional amendment to Article IV. (Received March 14, 2017)

Date

April 3, 2017

Description

This proposal would amend Article IV of the Constitution of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** estimated increased fund costs (General Revenue) of $0 in fiscal year 2018, Unknown>$121,565 in fiscal year 2019, and Unknown>$169,098 in fiscal year 2020.

Section 192.945, RSMo allows their department to issue a hemp extract registration card for persons suffering from intractable epilepsy. The hemp extract registration card allows for the legal possession and use of cannabidiol (CBD) oil. This proposal allows for the legal use of marijuana for medical purposes. Therefore, persons with intractable epilepsy would not need to apply for a hemp extract registration card in order to legally use the CBD oil.

They expect rental space for two staff located in Jefferson City would be required: 2 staff x 230 sq.ft./FTE x $21.00 = $9,660.

They indicated marijuana cultivation facilities, products manufacturer, dispensary, and testing facilities may be established as small businesses.

This proposal does not require their department to issue any licenses or conduct inspections to ensure the safety of marijuana infused food products. However, sections 196.010 through 196.298, RSMo gives their department responsibility for the regulation of food to include such duties as ensuring food safety, sanitation, and proper labeling, etc. Therefore, they would have responsibility to assure that facilities manufacturing foods containing marijuana and marijuana products are regulated the same as other food manufacturers.

Section 54.6 of Article 4 of the proposal delineates responsibility to the Department of Health and Human Services It is unknown if this section was intended to refer to the Department of Health and Senior Services (Missouri state agency) instead of the

Department of Health and Human Services (federal agency). It is unclear if and how this section would affect DHSS. .

Due to the broad parameters of this proposal, it is difficult to determine how many food manufacturing facilities would be established. For the purposes of this fiscal note, they estimate that there will be at least 300 food manufacturing facilities that will be established as a result of this proposal. In order to properly inspect these manufacturing facilities, DCPH would require a minimum of two additional Environmental Public Health Specialist IV staff ($44,352, A27, Step G). This proposal is to be effective December 6, 2018. Therefore, DCPH assumes that the two Environmental Public Health Specialist IV positions would begin December 6, 2018.

Because of the ambiguity of the language and terms used in Section 54.6 of the proposed, it is unknown if and how DHSS is affected. Therefore, the estimated costs are unknown.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated their department would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated a fiscal impact of $1,272,435 in fiscal year 2019 (6 Months), $6,295,004 in fiscal year 2020, $9,991,237 in fiscal year 2021, $11,037,904 in fiscal year 2023 and thereafter.

This proposed initiative amends Article 4 of the Missouri Constitution by the addition of Section 54. IP 18-172 is identical to the first part of FY17 IP 18-118 which decriminalizes the medicinal and recreational use of cannabis for all ages. The petition lists the old Chapter 195 codes for repeal or revision rather than the current Chapter 579 drug offenses; however, the petition contains a caveat that the list is not exhaustive.

The author of IP 18-172 names the petition the “Cannabis Treatment Amendment.” This new proposal retains cannabis and hemp on the Missouri Revised Statutes list of controlled substances. Section 4 makes cannabis available for medical use for persons including those under age 18 years with parent/guardian consent and physician recommendation. However, section 3 removes the penalty for possession, production, cultivation, processing, and distribution without stipulating any age limitations. The petition protects caregivers from prosecution for providing medical marijuana to patient under age 18 years (Section 4f). Patients are extended all rights to medical care while on cannabis treatment. Physician’s rights are protected. Department of Health and Social Services is responsible for the following concerning medical cannabis dispensing: create statewide registry; creating licensing, regulations and fees; and issue a “9 digit random

alphabet" [sic] to replace patient's name. Current offenders, under their supervision, are released and records are expunged for nonviolent, medically-related cannabis offenses. A class A misdemeanor is imposed for those who prevent implementation of the law (section 9). Zoning requirements for cultivation or manufacturing of cannabis are prohibited. The effective date is December 6, 2018.

As enumerated in previous FY17 Fiscal Notes, this proposed amendment criminalizes impediments to its provisions with a class A misdemeanor charge (sections 9). Their department currently has no jurisdiction over class A misdemeanor and thus this aspect of the IP 18-172 does not affect their department.

Beginning December 6, 2018, cannabis/hemp possession is legal for everyone, usage for medical cannabis is legal for those under age 18, and nonviolent offenders with medically-related cannabis violations are released with records expunged (section 8). No data exists for the number of offenders with medically-related cannabis offenses; therefore, in regard to section 8, no release from prison or field population is expected during this time frame. Their department will experience a drop in admissions to incarceration and field supervision with the decriminalization of cannabis/hemp possession, cultivation, manufacture, and distribution at any age and for medical use for those under age 18. The yearly impact of removing cannabis violations from Missouri statutes is a decrease in 237 offenders admitted to prison and a decrease of 1269 admitted to probation. For felony cannabis offenses, persons incarcerated serve 1.1 years in prison and 2.5 years on parole. For those sent to probation the average time served is 2.5 years.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this petition will have no fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Missouri State Highway Patrol** indicated they expect increased operating costs of $426,235 for the first year implemented, $487,385 for the second year implemented, and $492,597 for the third year implemented.

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests.

The proposed legislation would order the immediate destruction of all cannabis-related non-violent civil and criminal records in Missouri.

Two different divisions within their agency will be impacted by this legislation. Here is a breakdown for each division:

Criminal Justice Information Services Division

The Criminal Justice Information Services Division (CJIS) states that there are currently 95,550 arrest charges in the Central Repository. The current expungement process, pursuant to Chapter 610, takes approximately 90 minutes to process. One FTE can handle 1,243 expungements per year. Conservatively, at least five FTE's would be required to initially handle the expungments created by this legislation. A significant processing backlog would occur if sufficient FTE's are not assigned to accommodate the number of expungements ordered.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 90 minutes. Therefore, one FTE can handle 1,243 expungements per year = 111,840 / 90.

These FTE's (CJIS Technicians, Range 16) would be necessary to process all expungement requests, review criminal history records, contact any agency associated with the arrests or convictions, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE at $55,495 and the ability of that employee to process 1,243 expungements per year, the cost alone per expungement is $55,495 \ 1,243 = $44.64. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories, as well as contacting of the various agencies associated with the arrests. In researching other states with similar expungement requirements, they all charge a fee to offset the cost of the time required to process the expungements. Their fees ranged from $50 to $450 per petition per arrest date.

These FTE will most likely be 2nd and 3rd shift employees so they would not require any equipment. However, there would be recurring costs of $650 per year per FTE for office supplies and phone charges. If any FTE were placed on the 1st shift, standard equipment would be required at a one-time cost of $6,094 per FTE.

5 CJIS Technicians ($1,232.50 x 24)	$147,900
Office Equipment/HW/SW	$6,094
RECURRING COSTS	
Phone Charges per FTE	$350
Office Supplies per FTE	$300

Patrol Records Divison

Currently, there are 31,132 records in the Patrol's Traffic Arrest System (TAS) pertaining to arrests completed by the Missouri Highway Patrol that could possibly meet the requirements of this proposed constitutional amendment. These are arrest records with a court conviction and an NCIC modifier of 60-64 that relate to marijuana offenses. Given

this, if only 30 percent of the individuals who qualify to have his or her record expunged sought to do so, the Patrol Records Division (PRD) would require four FTE's. However, if a large number of these expungements were to be granted with even four FTE's, the backlog would compound greatly to the point it may take several years to catch up. If 100 percent of the individuals who qualify to have their record expunged sought to do so, the Patrol Records Division would require 13 FTE's to complete this task in approximately one year. The addition of 13 FTE's would require additional supervisory personnel. However, due to the vague and uncertain nature of this proposed amendment, the Patrol Records Division has no true way to determine the actual effect or costs.

1 FTE = 1,864 hours (average work hours per year) x 60 minutes per hour = 111,840 minutes per year.

The current average time per petition to log, process, research, review, create related correspondences, and to expunge the information when the order is received is 45 minutes. Therefore, one FTE can handle 2,485 expungements per year = 111,840 / 45.

With the current estimate of 31,132 records that potentially meet the requirements of this proposed amendment and would potentially be eligible for expungement, the following percentages of persons actually requesting an expungement will directly relate to the number of PRD FTE's required:

15% = 31,132 x .15 =4,670 / 2,485 = 2 FTE's
30% = 31,132 x .30 = 9,340 / 2,485 = 4 FTE's
50% = 31,132 x .50 = 15,566 / 2,485 = 6 FTE's
100% = 31,132 / 2,485 = 13 FTE's

These FTE's (Quality Control Clerks, Range 10) would be necessary to process all expungement requests, review records, contact agencies, and collect the necessary data for the court orders.

Based on the average yearly salary and benefit rate per FTE of $45,702 and the ability of that employee to process 2,485 expungements per year, the cost per expungement is $45,702 \ 2,485 = $18.39. It is suggested that a fee, similar to the criminal history background check fee, be implemented for the cost of researching and reviewing the criminal histories.

Processing 30 percent of the possible expungements would require additional workspace. The physical requirements would increase with the number of FTE's required to meet the demand for expungements. There will be recurring costs of $650 per year per FTE for office supplies and phone charges. Standard equipment and office furniture would be required at a one-time cost of $6,094 per FTE.

4 Quality Control Clerks ($1,015 x 24)	$97,440
Equipment/Office Furniture	$6,094

RECURRING COSTS

Phone Charges per FTE	$350
Office Supplies per FTE	$300

The provisions of this petition would require their agency to rent office space for 4 FTE's to process the expungement requests. The Office of Administration states that 920 square feet of office space would be required. The following costs apply per square foot:

Office Space	$14/Sq Ft
Janitorial/Trash Costs	$1.50/Sq Ft
Utility Costs	$2/Sq Ft

The agency provided the following additional comments:

It is suggested to add this additional language to provide for the collection of a fee to offset the costs of the expungements:

43.530. 1. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than nine dollars per request for criminal history record information not based on a fingerprint search. In each year beginning on or after January 1, 2010, the superintendent may increase the fee paid by requesting entities by an amount not to exceed one dollar per year, however, under no circumstance shall the fee paid by requesting entities exceed fifteen dollars per request.

2. For each request requiring the payment of a fee received by the central repository, the requesting entity shall pay a fee of not more than twenty dollars per request for criminal history record information based on a fingerprint search, unless the request is required under the provisions of subdivision (6) of section 210.481, section 210.487, or section 571.101, in which case the fee shall be fourteen dollars.

3. A request made under subsections 1 and 2 of this section shall be limited to check and search on one individual. Each request shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. The highway patrol may establish procedures for receiving requests for criminal history record information for classification and search for fingerprints, from courts and other entities, and for the payment of such requests. There is hereby established by the treasurer of the state of Missouri a fund to be entitled as the "Criminal Record System Fund". Notwithstanding the provisions of section 33.080 to the contrary, if the moneys collected and deposited into this fund are not totally expended annually for the purposes set forth in sections 43.500 to 43.543, the unexpended moneys in such fund shall remain in the fund and the balance shall be kept in the fund to accumulate from year to year.

4. For all petitions for expungement under the provisions of Chapter 610, Section 577.054, or any other created expungement requirement under statute, excluding Section 610.122, the applicant shall pay a fee of seventy-five dollars per arrest date

listed on the petition. Each petition shall be accompanied by a check, warrant, voucher, money order, or electronic payment payable to the state of Missouri-criminal record system or payment shall be made in a manner approved by the highway patrol. For expungements that require removal from the Traffic Arrest System twenty dollars of the seventy-five dollar fee will be deposited in the Highway Patrol Traffic Records Fund.

There are numerous uncertainties associated with this proposed constitutional amendment. For example, it is uncertain what a cannabis related non-violent civil and criminal record is. It is unclear if individuals with the aforementioned conviction records are required to abide by the expungement process mandated by various other state statutes or are the records just automatically expunged?

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's Office** indicated there should be no added costs or savings to their office.

Officials from the **House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated unknown fiscal impact.

Changes to Missouri's state driving laws could impact some federal commercial drivers' license laws.

Failure to comply with 49 C.F.R. 384.225 & 384.226 could result in a withholding of Missouri's federal-aid highway funds apportioned to it under each of Title 23, United States Code (U.S.C.), sections 104(b)(1), (b)(3), and (b)(4). The federal funds impacted consist of national highway performance program funds, highway safety improvement program funds and congestion mitigation and air quality improvement funds. The withholding amount would be 4 percent for the first year of non-compliance and 8 percent for the second and subsequent years.

Officials from the **Office of Administration** (OA) indicated:
Section 54 of Article IV would:

- Allow the use of marijuana, as well as the cultivation, production, transportation and retail sale of medical marijuana and related products.
- Prohibit any special zoning or licensing requirements for marijuana facilities, farmers, manufacturers, etc.
- Allow the sale of marijuana to individuals under the age of 18 with physician and parental permission.

- Allow the Missouri Legislature to pass laws that do not conflict with this amendment.
- Require the Department of Health and Human Services to issue patients a 9-digit random identification. However, B&P notes that there is no Department of Health and Human Services in Missouri. B&P assumes this reference is to the Missouri Department of Health and Senior Services.
- Allow registration fees up to $100 for dispensaries. B&P does not have enough information to estimate the potential revenue impact from these fees.
- Require the immediate release of all prisoners that have been convicted in Missouri of a nonviolent cannabis related crime and the expungement of all related charges from their records.
- Require the provisions of Section 54 to begin December 6, 2018.

B&P does not have enough information to estimate any potential revenue impact from this initiative petition.

There should be no impact to their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated if passed, this constitutional amendment would have a positive impact on the workload of their office, since possession, manufacture, distribution, etc. of cannabis would no longer be unlawful, offenses that the Public Defender currently uses resources to defend and no longer would need to.

The exact positive impact is difficult to predict because we track our cases by statutory offense and most drug offenses are not limited to marijuana.

However, their best estimate, using FY2014 MSPD data, is that this would reduce their caseload by 3,523 cases (685 A/B felonies, 1,797 C/D felonies, 1,041 misdemeanors, and 1,140 probation violations).

In *The Missouri Project: A Study of the Missouri Public Defender System and Attorney Workload Standards*, prepared by RubinBrown on behalf of the American Bar Association's Standing Committee on Legal Aid and Indigent Defendants, the relevant workload standards are: A/B felonies, 47.6 hours per case; C/D felonies, 25.0 hours per case; misdemeanors, 11.7 hours per case; and probation violations, 9.8 hours per case). (The workload standards include only case related tasks over which an attorney has some control (they exclude, for example, in court and travel time) and thereby reflect a conservative estimate.)

Applying those workload standards to the 2,858 cases, those cases require 100,882.7 attorney hours. With 2,080 hours per attorney available each year, that represents the work of 48.5 attorneys.

While in theory they might also handle fewer appeals of guilty verdicts after trial, the fact is that only a very small percentage of their cases proceed to trial and it's likely that only a small percentage of those cases are appeals from marijuana convictions. Therefore this minimal positive impact is not being taken into account in this estimate.

However, they are already significantly understaffed by 333 attorneys under the workload standards developed in *The Missouri Project*. (The 333 attorneys is a conservative estimate of the under-staffing in that it assumes we contract all conflicts to private attorneys, which we are not able to do for budgetary reasons).

Therefore, despite the positive impact on the workload of their office, because they are already understaffed that savings in attorney time would not allow the Public Defender to reduce its workforce and therefore would not translate into an actual cost savings. However it does reduce by the cost of 48.5 attorneys how much money needs to be added to our budget in order to meet *The Missouri Project*'s workload standards.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there is anticipated costs for this initiative petition. Unfortunately there is not enough time given in the response to provide an actual estimated costs.

County Prosecutor, Dan Patterson provided the following information:

No on 64 Campaign and SAM Action

California voters are being told that they will see the crime rate go down if they vote to legalize marijuana commercially; this has not been the case in the state of Colorado or the city of Denver. Since the legalization of recreational marijuana in Colorado in 2013 traffic related marijuana deaths have increased 48%, marijuana related emergency room visits have increased 49%, and marijuana related calls to the poison center have increased 100%. According to the Colorado Bureau of Investigations in 2015 statewide homicides in Colorado rose 14.7 % over the previous year. Pueblo, Colorado had the highest homicide rate in the state with 11.1 killings per 100,000 residents. Aurora, Colorado's homicide rate more than doubled from 2014. Additionally more places in Colorado were robbed and more thefts occurred, especially cars, as 193,115 motor vehicles were reported stolen, up 27.7 % in 2015 from the previous year. In 2015, sexual assaults rose 10% in Colorado with Denver, Aurora, Lakewood, Westminster and Pueblo all reporting higher numbers as well.

In the city of Denver since the legalization of recreational marijuana the number of crimes in Denver has grown by about 44 %, according to annual figures the city reported to the National Incident Based Reporting System. In 2015 in Denver alone crime rose in every neighborhood in the city. The murder rate hit a decade high, 1059 more cars were broken into, there were 903 more auto thefts, 321 more aggravated assaults and 231 more homes were broken into compared to 2014.

California voters are also being told that legalizing recreational marijuana will free up law enforcement to work on other criminal activities. Again that has not been the case in Denver. Besides the overall increases in crime we have experience, the Denver police department is dealing with a 900% increase in the unlawful cultivation and manufacture of marihuana concentrate, and a 99% increase in the unlawful distribution of marijuana and marijuana concentrate. The quantity of illegal marijuana seized by the Denver police has increased 3,424% on average per case. The volume of marijuana seized per case has increased from an average of 162 pounds to 5724 pounds. In Denver unlawful public consumption of marijuana citations has increased over 300% per year since the legalization of recreational marijuana. The Denver police department is busier enforcing marijuana laws and investigating crimes directly related to marijuana, including murderers, robberies, and home invasions, than any other time in the history of the city.

Sincerely,

Mitchell R. Morrissey
Denver District Attorney

Officials from the **City of St. Joseph** indicated this initiative petition will not have a fiscal impact.

Officials from the **University of Central Missouri** indicated they estimate no fiscal impact from this initiative petition.

Officials from the **Missouri State University** indicated in response to this initiative petition, no fiscal impact to their university.

Officials from the **Missouri Southern State University** indicated they do not anticipate any fiscal impact from this initiative petition.

Officials from the **Missouri Western State University** indicated this article will not have a fiscal impact on their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City**, the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, The Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

This proposal is estimated to result in annual state cost savings of $6.3 million. State government entities estimate increased annual operating costs of $662,000 with the potential for additional increase. State government entities expect an unknown change in revenue. Local law enforcement costs could increase.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article I (2018-171)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on March 13, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

35 of Article I of the Constitution of Missouri is amended by modifying section 35. The existing section 35 is set forth hereinafter with the new matter bold and deleted matter in brackets,

Definitions of terms, as used in this Act:

a) Cannabis: refers to the cannabis, marihuana, marijuana, cannabis, sativa, cannabis indica, cannabis ruderalis, or any variety of cannabis, including but not limited to, derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof

b) Hemp: The fiber of this plant, extracted from the stem and used to make rope, fabrics, fiberboard, clothing, and paper. The sister plant of cannabis

That agriculture which provides food, energy, health benefits, and security is the foundation and stabilizing force of Missouri's economy. To protect this vital sector of Missouri's economy, the right of farmers and ranchers to engage in farming and ranching practices, including but not limited to the right to grow cannabis and hemp, shall be forever guaranteed in this state, subject to duly authorized powers, if any, conferred by article VI of the Constitution of Missouri.

AN ACT

To repeal section 320.271, RSMo, and to enact in lieu thereof one new section relating to information filed with the state fire marshal.

BE IT ENACTED BY THE PEOPLES OF THE STATE OF MISSOURI, AS FOLLOWS:

Section A. Section 320.271, RSMo, is repealed and one new section enacted in lieu thereof, to be known as section 320.271, to read as follows:

320.271. All fire protection districts, fire departments, and all volunteer fire protection associations as defined in section 320.300 shall complete and file with the state fire marshal within sixty days after January 1, 2008, and annually thereafter, a fire department registration form provided by the state fire marshal. The state fire marshal may issue a fire department identification number to each registered fire protection district, fire department, or volunteer fire protection association based upon such registration. [The state fire marshal may conduct periodic reviews of the information provided on each fire department registration form[, and may deny or revoke a fire department identification number based upon the information provided]].

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III (2018-168)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on February 23, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

My commission expires: _____

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Section 9 and amending Section 2, 5, and 7 to read as follows:

Section 2. **[**Election of representatives—apportionment commission, appointment, duties, compensation.**]** Beginning with the selection of candidates and election of representatives in the general election to be held in November of 2020, **[**The**]** the house of representatives shall consist of **[**one hundred sixty-three**]** ten members from each congressional district elected at each general election. **[**and apportioned in the following manner: Within sixty days after the population of this state is reported to the President for each decennial census of the United States and, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days after notification by the governor that such a ruling has been made, the congressional district committee of each of the two political parties casting the highest vote for at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state representative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.

The commissioners so selected shall on the fifteenth day, excluding Sundays and holidays, after all members have been selected, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary and shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission shall reapportion the representatives by dividing the population of the state by the number one hundred sixty-three and shall establish each district so that the population of that district shall, as nearly as possible, equal that figure.

Each district shall be composed of contiguous territory as compact as may be.

Not later than five months after the appointment of the commission, the commission shall file with the secretary of state a tentative plan of apportionment and map of the proposed districts and during the ensuing fifteen days shall hold such public hearings as may be necessary to hear objections or testimony of interested persons.

Not later than six months after the appointment of the commission, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts, and no statement shall be valid unless approved by at least seven-tenths of the members.

After the statement is filed members of the house of representatives shall be elected according to such districts until a reapportionment is made as herein provided, except that if the statement is not filed within six months of the time fixed for the appointment of the commission, it shall stand discharged and the house of representatives shall be apportioned by a commission of six members appointed from among the judges of the appellate courts of the state of Missouri by the state supreme court, a majority of whom shall sign and file its apportionment plan and map with the secretary of state within ninety days of the date of the discharge of the apportionment commission. Thereafter members of the house of representatives shall be elected according to such districts until a reapportionment is made as herein provided.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.**]**

Section 5. The senate shall consist of thirty-four members, divided in two groups of seventeen each, elected by the qualified voters of the **[**respective districts**]** state of Missouri for four years. **[**For the election of senators, the state shall be divided into convenient districts of contiguous territory, as compact and nearly equal in population as may be.**]**

Section 7. **[**Within sixty days after the population of this state is reported to the President for each decennial census of the United States, and within sixty days after notification by the governor that a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts. If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

The commissioners so selected shall on the fifteenth day, excluding Sundays and holidays, after all members have been selected, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary and shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission shall reapportion the senatorial districts by dividing the population of the state by the number thirty-four and shall establish each district so that the population of that district shall, as nearly as possible, equal that figure; no county lines shall be crossed except when necessary to add sufficient population to a multi-district county or city to complete only one district which lies partly within such multi-district county or city so as to be as nearly equal as practicable in population. Any county with a population in excess of the quotient obtained by dividing the population of the state by the number thirty-four is hereby declared to be a multi-district county.

Not later than five months after the appointment of the commission, the commission shall file with the secretary of state a tentative plan of apportionment and map of the proposed districts and during the ensuing fifteen days shall hold such public hearings as may be necessary to hear objections or testimony of interested persons.

Not later than six months after the appointment of the commission, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts, and no statement shall be valid unless approved by at least seven members.
After the statement is filed senators shall be elected according to such districts until a reapportionment is made as herein provided, except that if the statement is not filed within six months of the time fixed for the appointment of the commission, it shall stand discharged and the senate shall be apportioned by a commission of six members appointed from among the judges of the appellate courts of the state of Missouri by the state supreme court, a majority of whom shall sign and file its apportionment plan and map with the secretary of state within ninety days of the date of the discharge of the apportionment commission. Thereafter senators shall be elected according to such districts until a reapportionment is made as herein provided.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.
No reapportionment shall be subject to the referendum.]

An ordered list of candidates, ranked by number of votes received, from most to last, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, the number of members to be elected. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions to be delivered to the secretary of state no later than ninety days preceding the general election. At the time the petitions are presented, the political party will also notify the secretary of state of the method to be used by said party in nominating a slate of candidates.

The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

In each general election, each voter will cast a single vote for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

To determine how many seats in the house of representatives and the senate will be assigned to each political party and which independent or write-in candidates will be assigned seats (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number is then to be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate is then to be divided by that number and each party is awarded that number of seats, with any remaining votes for each party above the number needed to win that many seats calculated as "surplus votes" for that party. Any independent candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

The surplus votes of any political party or independent candidate having surplus votes, but not having enough surplus votes to win an additional seat, or a seat, may have those surplus votes transferred to another political party or independent candidate by notifying the Secretary of State in writing at least fourteen days before the date of the general election.

The number of seats thus assigned is calculated and subtracted from the total number of seats to be awarded. Any remaining seats are then awarded, in order, to the party or independent candidate with the highest number of surplus votes.

In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate would have been elected had there been one more member elected using the prescribed method for tabulating votes.

[Section 9. Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965.]

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I, Section 2 of the Constitution is amended to read as follows:

Section 2. That all constitutional government is intended to promote the general welfare of the people; that all persons have a natural right to life, liberty, the pursuit of happiness and the enjoyment of the gains of their own industry; that all persons are created equal and are entitled to equal rights and opportunity under the law; that to give security to these things is the principal office of government, and that when government does not confer this security, it fails in its chief design.

To secure these rights, governments are instituted among people, deriving their just powers from the consent of the governed. Artificial entities, such as corporations, limited liability companies, and other entities formed primarily as a form of business organization, established by law, enjoy the advantages of unlimited life, the ability to raise large sums of money, and limited liability. Contributions and expenditures by such artificial entities, made directly or indirectly through political action committees, intended to influence in various ways the election of candidates for public office or ballot measures, all too often evince a design to gain unfair advantages for these artificial entities, often at the expense of the general welfare of natural persons.

The rights protected by the Constitution of the State of Missouri are the rights of natural persons only. Artificial entities, such as corporations, limited liability companies, and other entities formed primarily as forms of business organization, established by the laws of any State, the United States, or any foreign state are subject to regulation by the People of Missouri, through State, or local law, and shall have only those rights under this Constitution that are specifically granted to them by the People of Missouri, through State, or local law, and shall not be construed to be inherent or inalienable.

The state of Missouri, to give security to the rights of natural persons, may, and hereby does, limit the right to make contributions or expenditures to influence the election of any candidate or ballot measure to natural persons and associations of natural persons that prohibit and exclude direct or indirect contributions from artificial entities, such as corporations, limited liability companies, and other entities formed primarily as forms of business organization.

Be it enacted by the people of the state of Missouri:

Sections 128.346 and 128.348 of the Revised Missouri Statutes are hereby amended, to read as follows:

128.346. The districts established by the provisions of sections 128.400 to 128.440 for the election of representatives to the Congress of the United States shall be effective beginning with election to the 108th Congress and through the election of the 112th Congress. The districts established by sections 128.451 to 128.458 for the election of representatives to the Congress of the United States shall be effective beginning with the election to the 113th Congress. Effective beginning with the election of representatives to the 117th Congress, representatives to the Congress of the United States shall be elected at large, in the manner prescribed by section 128.348.

128.348. 1. The state of Missouri is hereby divided into nine congressional districts. Effective with the election for the 113th Congress, the state of Missouri shall consist of eight congressional districts. **[**The legal voters of each district shall elect one member of Congress of the United States.**]** Effective with the election for the 117th Congress, representatives to the Congress of the United States shall be elected according to the method described herein.

2. Each political party shall nominate an ordered list of candidates, including a number no greater than the number of representatives (members) to which the state of Missouri is entitled.

3. Each political party may determine its ordered list of candidates through a primary election, caucuses, a statewide party nominating convention, or a combination of caucuses and a statewide party nominating convention.

4. A primary election will be the default method for parties to select an ordered list of candidates. Should a political party determine that they will select candidates by caucuses, statewide party convention, or a combination of caucuses and a statewide party convention, a legally designated representative of the party will notify the secretary of state, in writing, of the method to be used, no later than the first day of April of an election year.

5. If a political party elects to use a primary election as the means of determining its candidates for the general election, all qualified candidates who file for said party's nominations will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and for one, and only one, candidate from that party.

6. An ordered list of candidates for each party, including a number of candidates totally up to two more than the number of seats in Congress to which the state of Missouri is entitled, will be placed on the ballot in the general election, based on the number of votes received by each candidate in the primary election for each party.

7. Should a party elect to nominate candidates for the general election by means of caucuses and/or a statewide party convention, an ordered list of that party's candidates shall be filed with the secretary of state's office no less than 90 days before the general election date in election years.

8. To qualify for a place on the ballot, an independent candidate must present petitions signed by one-quarter of one percent of the legal votes cast for the sum of all candidates for the United States House of Representatives from Missouri in the general election last preceding. Said petitions must be delivered to the secretary of state no later than one-hundred and twenty days before the general election.

9. The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

10.) In each general election, each voter will cast a single vote for a political party, and its ordered list of candidates, or for an independent candidate for Congress appearing on the ballot, or a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

11. The following method of tabulation shall be used to determine how many representatives (electors) will be awarded to each political party and which independent candidates will be elected (if any):

(1) The total number of valid votes cast for all parties and independent candidates will be divided by the number of representatives to be elected. The resulting number is then to be rounded to the nearest whole number. The total number of votes cast for each party or independent candidate is then to be divided by that number and each party is awarded that number of representatives and the candidates from that parties ordered list are elected. Any independent or valid write-in candidate receiving at least the number of votes needed to be elected is elected.

(2) Any remaining votes for each party above the number needed to elect those representatives are "surplus votes" for that party. The votes for any party or independent candidate or valid write-in candidate falling short of the number needed to be elected are also treated as surplus votes.

(3) The number of representatives thus elected is subtracted from the total number of representatives to be elected. If the number of representatives thus elected is fewer than the number to which the state of Missouri is entitled, additional representative will be elected, in order, based on the highest number of surplus votes. The next candidate(s) from the ordered list of a party that has already had some candidates elected, the first candidate from the ordered list of a party that has not had a candidate elected, or the independent or valid write-in candidate, with the most surplus votes is elected.

(4) In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

12. If a representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, she or he will be replaced by the next nominee from her or his party's ordered list of candidates, or in the case of an independent candidate, by the candidate with the next greatest number of surplus votes.

13. All subsections and all clauses of this statute, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

RE: Petition approval request from Winston Apple regarding a proposed statutory amendment to Chapter 128, Section 005 (2018-164)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Winston Apple on February 23, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

My commission expires: _____

Be it enacted by the people of the state of Missouri:

Section A. Chapter 128, RSMo, is amended by adding thereto one new section, to be known as Section 128.005, to read as follows:

128.005. 1. This section shall be known and may be cited as the "Interstate Compact on the Agreement Among the States to Elect the President by National Popular Vote Act."

2. The State of Missouri ratifies and approves the following compact: Agreement Among the States to Elect the President by National Popular Vote.

Article I – Membership. Any State of the United States and the District of Columbia may become a member of this agreement by enacting this agreement.

Article II – Right of the People in Member State to Vote for President and Vice President. Each member state shall conduct a statewide popular election for President and Vice President of the United States.

Article III – Manner of Appointing Presidential Electors in Member States

1. Prior to the time set by law for the meeting and voting by the presidential electors, the chief election official of each member state shall determine the number of votes for each presidential slate in each state of the United States and in the District of Columbia in which votes have been cast in a statewide popular election and shall add such votes together to produce a "national popular vote total" for each presidential slate.

2. The chief election official of each member state shall designate the presidential slate with the largest national popular vote total as the "national popular vote winner."

3. The presidential elector certifying official of each member state shall certify the appointment in that official's own state of the elector slate nominated in that state in association with the national popular vote winner.

4. At least six days before the day fixed by law for the meeting and voting by the presidential electors, each member state shall make a final determination of the number of popular votes cast in the state for each presidential slate and shall communicate an official statement of such determination within 24 hours to the chief election official in each other member state.

5. The chief election official of each member state shall treat as conclusive an official statement containing the number of popular votes in a state for each presidential slate made by the day established by federal law for making a state's final determination conclusive as to the counting of electoral votes by Congress.

6. In event of a tie for the national popular vote winner, the presidential elector certifying official of each member state shall certify the appointment of the elector slate nominated in association with the presidential slate receiving the largest number of popular votes within that official's own state.

7. If for any reason, the number of presidential electors nominated in a member state in association with the national popular vote winner is less than or greater than that state's number of electoral votes, the presidential candidate on the presidential slate that has been designated as the national popular vote winner shall have the power to nominate the presidential electors for that state and that state's presidential elector certifying official shall certify the appointment of such nominees. The chief election official of each member state shall immediately release to the public all vote counts or statements of votes as they are determined or obtained.

8. This article shall govern the appointment of presidential electors in each member state in any year in which this agreement is, on July 20, in effect in states cumulatively possessing a majority of the electoral votes.

Article IV – Other Provisions

1. This agreement shall take effect when states cumulatively possessing a majority of the electoral votes have enacted this agreement in substantially the same form and the enactments by such states have taken effect in each state.

2. Any member state may withdraw from this agreement, except that a withdrawal occurring six months or less before the end of a President's term shall not become effective until a President or Vice President shall have been qualified to serve the next term.

3. The chief executive of each member state shall promptly notify the chief executive of all other states of when this agreement has been enacted and has taken effect in that official's state, when the state has withdrawn from this agreement, and when this agreement takes effect generally.

4. This agreement shall terminate if the electoral college is abolished.

5. In any provision of this agreement is held invalid, the remaining provisions shall not be affected.

Article V – Definitions. For purposes of this agreement:

1. "Chief Executive" shall mean the Governor of s State of the United States or the Mayor of the District of Columbia;

2. "Elector slate" shall mean a slate of candidates who have been nominated in a state for the position of presidential elector in association with a presidential slate;

3. "Chief election official" shall mean the state official or body that is authorized to certify the total number of popular votes for each presidential slate;

4. "Presidential elector" shall mean an elector for President and Vice President of the United States;

5. "Presidential elector certifying official" shall mean the state official or body that is authorized to certify the appointment of the state's presidential electors;

6. "Presidential slate" shall mean a slate of two persons, the first of whom has been nominated as a candidate for President of the United States and the second of whom has been nominated as a candidate for Vice President of the United States, or any legal successors to such persons, regardless of whether both names appear on the ballot presented to the voter in a particular state;

7. "State" shall mean a State of the United States and the District of Columbia; and

8. "Statewide popular election" shall mean a general election in which votes are cast for presidential slates by individual voters and counted on a statewide basis.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-164)

Subject

Initiative petition from Winston Apple regarding a proposed amendment to Chapter 128 of the Revised Statutes of Missouri. (Received February 23, 2017)

Date

March 15, 2017

Description

This proposal would amend Chapter 128 of the Revised Statutes of Missouri.

The amendment is to be voted on in November, 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the

costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their agency.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no impact.

Officials from the **Office of Administration** indicated this proposal amends Section 128.005 RSMo to ratify and approve the "Interstate Compact on the Agreement Among the States to Elect the President by National Popular Vote Act". This Agreement would become effective when states cumulatively possessing a majority of the electoral votes have enacted it in substantially the same form.

This should not impact their office and they defer to the Secretary of State for any fiscal impact of the proposed changes.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their agency.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any substantial impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from the **City of St. Joseph** indicated this initiative petition should not have a fiscal impact on the local government.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia**, the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College**.

Fiscal Note Summary

It is estimated this proposal will result in no costs or savings for state and local governmental entities.

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals, in part or in whole, and Amends various statutes and subsections including but not necessarily limited to RSMo 87.400.1(6), 87.400.1(7), 87.505.1(12), 87.505.1(13), 105.1108.1, 105.1112.1, 192.945.1, 195.010.1(17)(g), 195.010.1(l), 195.010.1(24), 195.010.1(40), 195.017.1(4)(w), 195.017.1(4)(ee), 195.017.2(4)(w), 195.017.2(ee), 195.140.2, 195.207.1, 195.211.1, 195.222.1(7), 195.223.1(7), 195.223.1(8), 261.265.1, 263.250.1, 261.265.1, 306.110.1(2), 579.015.1(2), 579.015.1(3), 579.015.1(4), 579.015.1(5), 579.020.1(2), 579.020.1(3), 579.020.1(4), 579.020.1(5), 577.024.1(2), 579.030.1, 579.055.1(3), 579.055.1(4), 579.068.1(7), 579.068.1(9)3.(7), 579.068.1(9)3.(8), 579.105.1.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1. Cannabis shall immediately be removed from the Missouri Revised Statutes list of controlled substances and shall no longer be listed among Missouri's drug schedules. Cannabis shall no longer be considered a controlled substance or a drug hence forth by Missouri law.

2. Definition of terms, as used in this Act:
(a) "Cannabis" and "Cannabis hemp" refer to the Cannabis, marihuana, marijuana, Cannabis sativa, Cannabis sativa L., Cannabis Americana, Cannabis Gigantea, Cannabis indica, Cannabis ruderalis, or any variety of Cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
(b) "Medical Cannabis" refers to Cannabis used to prevent or to treat a medical condition.
(c) "Personal use" refers to the personal use or consumption of Cannabis.
(d) "Cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing Cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing Cannabis into and/or onto the human body.
(e) "Establishment" refers to a Cannabis cultivation facility, a Cannabis testing facility, a Cannabis product manufacturing facility, or a retail store, Cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells Cannabis, Cannabis products and/or Cannabis accessories.

3. The following acts are not unlawful and shall not be an offense under Missouri law:
(a) Possession of Cannabis for personal or medical use.
(b) Cultivating Cannabis for personal or medical use.
(c) Cultivation, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing Cannabis, Cannabis accessories, and Cannabis products for commercial purposes, provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivation, harvest, processing, manufacturing, packaging, distribution, transferal, display or possessing of any non-toxic food or food product.
(d) Providing Cannabis, Cannabis accessories, and Cannabis products for sale to consumers.
(e) Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs (a) through (d) of this subsection.
(f) No one shall be denied housing solely based on their use of Cannabis.
(g) No one shall be denied employment solely based on their use of Cannabis.
(h) The use and/or possession of Cannabis shall not be grounds for issuing a "Driving under the influence" (DUI) stop, charge, arrest or fines when operating a motor vehicle.

4. Medical Cannabis shall be available to patients without taxation who have a physician's recommendation for its use.
(a) All patients engaged in Cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means, whether or not under the care of a physician.
(b) Licensed physicians shall not be penalized for, nor restricted from recommending Cannabis for medical purposes to any person under their care.
(c) Veterinarians shall not be penalized nor restricted from recommending Cannabis for medical purposes for any creature under their care.
(d) Opinions pertaining to, and willingness to recommend medical Cannabis therapy shall not be a criteria for the licensure of physicians; no physician shall be subject to any professional licensing review or hearing as a result of recommending or approving medical Cannabis therapy.
(e) Any individual who is a Cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri Cannabis patient.
(f) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of Cannabis.

5. Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, Cannabis-only offenses which are no longer illegal in the State of Missouri under this Act shall be immediately released.
(a) The Court shall order the immediate expungement of civil and criminal records pertaining to all non-violent Cannabis only offenses which are no longer illegal in the State of Missouri under this Act.
(b) Within 60 days of the passage of this Act, a legal document shall be developed and made available to the public ordering the immediate destruction of all Cannabis-related non-violent civil and criminal records in Missouri and for any offense covered by this amendment which is no longer illegal in the State of Missouri under this Act. This document shall be distributed to all pertinent parties throughout the state.

6. No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal Cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.
(a) Asset Forfeiture shall no longer be justified or used by any Missouri law enforcement through association with Cannabis, Cannabis cultivation, it's use and/or possession.

7. Any person who willfully impedes the lawful exercise of these provisions is guilty of a Class A misdemeanor.

8. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

9. Pursuant to the Ninth and Tenth Amendments to the Constitution of the United States, the people of Missouri hereby repudiate and challenge federal Cannabis prohibitions that conflict with this Act.

10. If any rival or conflicting initiative regulating any matter addressed by this act receives the higher affirmative vote, then all non-conflicting parts shall become operative.

11. All provisions of this section are self-executing and severable, and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

12. The dictates of this Initiative shall be implemented no later than January 31st,, following the election that placed this initiative before the people.

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III (2018-162)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on February 15, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by amending Section 52(b) to read as follows:

Section 52(b). The veto power of the governor shall not extend to measures referred to the people. All elections on measures referred to the people shall be had at the general state elections, except when the general assembly shall order a special election. Any measure referred to the people shall take effect when approved by a majority of the votes cast thereon, and not otherwise. This section shall not be construed to deprive any member of the general assembly of the right to introduce any measure, except that any measure introduced by a member of the general assembly and passed by the general assembly that alters, amends, or repeals a measure proposed through the initiative and subsequently approved by the people shall not take effect unless and until it is also approved by the people.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-162)

Subject

Initiative petition from Winston Apple regarding a proposed constitutional amendment to Article III. (Received February 15, 2017)

Date

March 7, 2017

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November, 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the

costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this legislation will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their agency.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated this proposal amends Section 52(b) of the Missouri Constitution to require a vote of the people on any measure passed by the General Assembly that alters, amends, or repeals a measure proposed through the initiative and subsequently approved by the people. The General Assembly's measure would not take effect unless it is approved by the people.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their agency.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this constitutional amendment will have no fiscal impact on their city.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia**, the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College**.

Fiscal Note Summary

The proposal is estimated to result in no costs or savings to state and local governmental entities.

BE IT ENACTED BY THE PEOPLE OF THE STATE OF MISSOURI:

The proposed initiative will amend Chapter 191 of Missouri Revised Statutes by adding twenty-two new sections.

These twenty-two sections shall be known and cited as the "Missouri Death with Dignity Act".

Section 1.

In said sections, the following terms shall mean:

(1) "Adult", any individual who is eighteen years of age or older.

(2) "Attending physician", the physician who has primary responsibility for the care of the patient and treatment of the patient's terminal disease.

(3) "Capable", in the opinion of a court or in the opinion of the patient's attending physician or consulting physician, psychiatrist or psychologist, a patient has the ability to make and communicate health care decisions to health care providers, including communication through persons familiar with the patient's manner of communicating if those persons are available.

(4) "Consulting physician", a physician who is qualified by specialty or experience to make a professional diagnosis and prognosis regarding the patient's disease.

(5) "Counseling", one or more consultations as necessary between a state licensed psychiatrist or psychologist and a patient for the purpose of determining that the patient is capable and not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

(6) "Health care provider", a person licensed, certified or otherwise authorized or permitted by the law of this state to administer health care or dispense medication in the ordinary course of business or practice of a profession, and includes a health care facility.

(7) "Informed decision", a decision by a qualified patient, to request and obtain a prescription to end his or her life in a humane and dignified manner, that is based on an appreciation of the relevant facts and after being fully informed by the attending physician of:

a. His or her medical diagnosis;

b. His or her prognosis;

c. The potential risks associated with taking the medication to be prescribed;

d. The probable result of taking the medication to be prescribed; and

e. The feasible alternatives, including, but not limited to, comfort care, hospice care and pain control.

(8) "Medically confirmed", the medical opinion of the attending physician has been confirmed by a consulting physician who has examined the patient and the patient's relevant medical records.

(9) "Patient", a person who is under the care of a physician.

(10) "Physician", a doctor of medicine or osteopathy licensed to practice medicine in the state of Missouri

(11) "qualified patient", a capable adult who is a resident of this state and has satisfied the requirements of this initiative in order to obtain a prescription for medication to end his or her life in a humane and dignified manner.

(12) "Terminal disease", an incurable and irreversible disease that has been medically confirmed and shall, within reasonable medical judgment, produce death within six months.

Section 2.

1. An adult who:
   a. Is capable;
   b. Is a residence of this state;
   c. Has been determined by the attending physician and consulting physician to be suffering from a terminal disease; and
   d. Has voluntarily expressed his or her wish to die;

may make a written request for medication for the purpose of ending his or her life in a humane and dignified manner in accordance with this initiative.

2. No person shall qualify under this initiative solely because of age or disability.

Section 3.

1. A valid request for medication under this initiative shall be in substantially the form described in section 20, signed and dated by the patient, and witnessed by at least two individuals who, in the presence of the patient, attest that to the best of their knowledge and belief the patient is capable, acting voluntarily, and is not being coerced to sign the request.
2. One of the witnesses shall be a person who is not:
   a. A relative of the patient by blood, marriage, or adoption;
   b. A person, who at the time the request is signed, would be entitled to any portion of the estate of the qualified patient upon death under any will or by operation of law; or
   c. An owner, operator, or employee of a health care facility where the qualified patient is receiving medical treatment or is a resident
3. The patient's attending physician at the time the request is signed shall not be a witness.

If the patient is in a long-term care facility at the time the written request is made, one of the witnesses shall be an individual designated by the facility and having the qualifications specified by the department of health and senior services by rule.

Section 4

1. The attending physician shall:
   A. Make the initial determination of whether a patient has a terminal disease, is capable, and has made the request voluntarily;
   B. Request that the patient demonstrate Missouri state residency under section 13;
   C. To ensure that the patient is making an informed decision, inform the patient of:
      a. His or her medical diagnosis;
      b. His or her prognosis;
      c. The potential risks associated with taking the medication to be prescribed;
      d. The probable result of taking the medication to be prescribed; and
      e. The feasible alternatives including, but not limited to, comfort care, hospice care, and pain control;
   D. Refer the patient to a consulting physician for medical confirmation of the diagnosis and for a determination that the patient is capable and acting voluntarily;
   E. Refer the patient for counseling if appropriate under section 6;
   F. Recommend that the patient notify next of kin;
   G. Counsel the patient about the importance of having another person present when the patient takes the medication prescribed under this legislation and of not taking the medication in a public place;
   H. Inform the patient that he or she has an opportunity to rescind the request at any time and in any manner, and offer the patient an opportunity to rescind at the end of the fifteen-day waiting period under section 9;
   I. Verify, immediately before writing the prescription for medication under this initiative, that the patient is making an informed decision;
   J. Fulfill the medical record documentation requirements of section 12;
   K. Ensure that all appropriate steps are carried out in accordance with this initiative prior to writing a prescription for medication to enable a qualified patient to end his or her life in a humane and dignified manner; and
   L. I. Dispense medications directly, including ancillary medications intended to facilitate the desired effect to minimize the patient's discomfort, provided that the attending physician is authorized under state law and rule to dispense, has a current drug enforcement administration certificate, and complies with any applicable administrative rule; or
      II. With the patient's written consent:
         a. Contact a pharmacist and inform the pharmacist of the prescription; and
         b. Deliver the written prescription personally, by mail, or facsimile to the pharmacist, who shall dispense the medications to either the patient, the attending physician, or an expressly identified agent of the patient.

2. Notwithstanding any other provision of law, the attending physician may sign the patient's death certificate.

Section 5

Before a patient is qualified under this initiative, a consulting physician shall examine the patient and his or her relevant medical records and confirm in writing the attending physician's diagnosis that the patient is suffering from a terminal disease and verify that the patient is capable, is acting voluntarily, and has made an informed decision.

Section 6

If, in the opinion of the attending physician or the consulting physician, a patient may be suffering from a psychiatric or psychological disorder or depression causing impaired judgment, either physician shall refer the patient for counseling. No medication to end a patient's life in a humane and dignified manner shall be prescribed until the person performing the counseling determines that the patient is not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

Section 7

No person shall receive a prescription for medication to end his or her life in a humane and dignified manner unless he or she has made an informed decision, as defined in section 1. Immediately prior to writing a prescription for medication under this initiative, the attending physician shall verify that the qualified patient is making an informed decision.

Section 8

The attending physician shall recommend that the patient notify the next of kin of his or her request for medication under this initiative. A patient who declines or is unable to notify next of kin shall not have his or her request denied for that reason.

Section 9

In order to receive a prescription for medication to end his or her life in a humane and dignified manner, a qualified patient shall have made an oral request and a written request and reiterate the oral request to his or her attending physician at least fifteen days after making the initial oral request. At the time the qualified patient makes his or her second oral request, the attending physician shall offer the qualified patient an opportunity to rescind the request.

Section 10

A patient may rescind his or her request at any time and in any manner without regard to his or her mental state. No prescription for medication under this initiative shall be written without the attending physician offering the qualified patient an opportunity to rescind the request.

Section 11

No less than fifteen days shall elapse between the patient's initial oral request and the writing of a prescription under this initiative. No less than forty-eight hours shall elapse between the date of the patient's written request and the writing of a prescription under this initiative.

Section 12

The following shall be documented or filed in the patient's medical record:

(1) All oral requests made by the patient for medication to end his or her life in a humane and dignified manner;

(2) All written requests made by the patient for medication to end his or her life in a humane and dignified manner;

(3) The attending physician's diagnosis and prognosis and determination that the patient is capable, is acting voluntarily, and has made an informed decision;

(4) The consulting physician's diagnosis and prognosis and verification that the patient is capable, is acting voluntarily, and has made an informed decision;

(5) A report of the outcome and determinations made during counseling, if performed;

(6) The attending physician's offer to the patient to rescind his or her request at the time of the patient's second oral request under section 9; and

(7) A note by the attending physician indicating that all requirements under this initiative have been met and indicating the steps taken to carry out the request including a notation of the medication prescribed.

Section 13

Only requests made by Missouri residents under this initiative shall be granted. Factors demonstrating Missouri residency include, but are not limited to:

(1) Possession of a Missouri driver's license;

(2) Registration to vote in Missouri;

(3) Evidence that the person owns or leases property in Missouri; or

(4) Filing of a Missouri tax return for the most recent tax year.

Section 14

1. a. The department of health and senior services shall annually review all records maintained under this initiative.
   b. The department of health and senior services shall require any health care provider upon dispensing medication under this initiative to file a copy of the dispensing record with the department.

2. The department of health and senior services shall adopt rules to facilitate the collection of information regarding compliance with this initiative. Except as otherwise required by law, the information collected shall not be a public record and shall not be made available for inspection by the public.

3. The department of health and senior services shall generate and make available to the public an annual statistical report of information collected under subsection 2 of this section.

Section 15

1. No provision in a contract, will, or other agreement, whether written or oral, to the extent the provision would affect whether a person may make or rescind a request for medication to end his or her life in a humane and dignified manner, shall be valid.

2. No obligation owing under any currently existing contract shall be conditioned or affected by the making or rescinding of a request by a person for medication to end his or her life in a humane and dignified manner.

Section 16

The sale, procurement, or issuance of any life, health, or accident insurance or annuity policy or the rate charged for any policy shall not be conditioned upon or affected by the making or rescinding of a request by a person for medication to end his or her life in a humane and dignified manner. A qualified patient's act of ingesting medication to end his or her life in a humane and dignified manner shall not have an effect upon a life, health, or accident insurance or annuity policy.

Section 17

Nothing is this initiative shall be construed to authorize a physician or any other person to end a patient's life by lethal injection, mercy killing, or active euthanasia. Actions taken in accordance with this initiative shall not for any purpose constitute suicide, assisted suicide, mercy killing, or homicide under the law.

Section 18

1. Except as provided in subsection 2 of this section and section 20:
   a. No person shall be subject to civil or criminal liability or professional disciplinary action for participating in good faith compliance with this initiative including being present when a qualified patient takes the prescribed medication to end his or her life in a humane and dignified manner;
   b. No professional organization or association or health care provider shall subject a person to censure, discipline, suspension, loss of license, loss of privileges, loss of membership, or other penalty for participating or refusing to participate in good faith compliance with this initiative;
   c. No request by a patient for or provision by an attending physician of medication in good faith compliance with this initiative shall constitute neglect for any purpose of law or provide the sole basis for the appointment of a guardian or conservator; and
   d. No health care provider shall be under any duty, whether by contract, statute, or any other legal requirement to participate in the provision to a qualified patient of medication to end his or her life in a humane and dignified manner. If a health care provider is unable or unwilling to carry out a patient's request under this initiative and the patient transfers his or her care to a new health care provider, the prior health care provider shall, upon request, transfer a copy of the patient's relevant medical records to the new health care provider.

2. (1) Notwithstanding any other provision of law, a health care provider may prohibit another health care provider from participating under the Missouri death with dignity act on the premises of the prohibiting provider if the prohibiting provider has notified the health care provider of the prohibiting provider's policy regarding participation in the Missouri death with dignity act. Nothing in this subdivision shall prevent a health care provider from providing health care services to a patient that do not constitute participation in the Missouri death with dignity act.
   (2) Notwithstanding the provisions of subsection 1 of this section, a health care provider may subject another health care provider to the following sanctions if the sanctioning health care provider has notified the sanctioning provider prior to participation under this initiative that it prohibits participation in the Missouri death with dignity act:
   (a) Loss of privileges, loss of membership, or other sanctions provided under the medical staff bylaws, policies, and procedures of the sanctioning health care provider if the sanctioned provider is a member of the sanctioning provider's medical staff and participates under the Missouri death with dignity act while on the health care facility premises of the sanctioning health care provider, but not including the private medical office of a physician or other provider;
   (b) Termination of a lease or other property contract or other nonmonetary remedies provided by a lease contract, not including loss or restriction of medical staff privileges or exclusion from a provider panel, if the sanctioned provider participates under the Missouri death with dignity act while on the premises of the sanctioning health care provider or on property that is owned by or under the direct control of the sanctioning health care provider; or

(c) Termination of a contract or other nonmonetary remedies provided by contract if the sanctioned provider participates under the Missouri death with dignity act while acting in the course and scope of the sanctioned provider's capacity as an employee or independent contractor of the sanctioning health care provider. Nothing in this paragraph shall be construed to prevent:

a. A health care provider from participating under the Missouri death with dignity act while acting outside the course and scope of the provider's capacity as an employee or independent contractor; or

b. A patient from contracting with his or her attending physician and consulting physician to act outside the course and scope of the provider's capacity as an employee or independent contractor of the sanctioning health care provider.

(3) A health care provider that imposes sanctions under subdivision (2) of this subsection shall follow all due process and other procedures the sanctioning health care provider may have that are related to the imposition of sanctions on another health care provider.

(4) For the purposes of this subsection, the following terms shall mean:

(a) "Notify", a separate statement in writing to the health care provider specifically informing the health care provider before the provider's participation under the Missouri death with dignity act of the sanctioning health care provider's policy about participation in activities covered by the Missouri death with dignity act;

(b) "Participate under the Missouri death with dignity act", to perform the duties of an attending physician under section 5, the consulting physician function under section 5, or the counseling function under section 6. Participate under the Missouri death with dignity act does not include:

a. Making an initial determination that a patient has a terminal disease and informing the patient of the medical prognosis;

b. Providing information about the Missouri death with dignity act to a patient upon the request of the patient;

c. Providing a patient, upon the request of the patient, with a referral to another physician; or

d. A patient contracting with his or her attending physician and consulting physician to act outside of the course and scope of the provider's capacity as an employee or independent contractor of the sanctioning health care provider.

3. Suspension or termination of staff membership or privileges under subsection 2 of this section is not reportable to the department or state board of registration for the healing arts. Action taken under sections 3 to 6 shall not be the sole basis for a report of unprofessional conduct.

4. No provision of this initiative shall be construed to allow a lower standard of care for patients in the community where the patient is treated or a similar community.

Section 19

1. A person, who without authorization of the patient, willfully alters or forges a request for medication or conceals or destroys a rescission of that request with the intent or effect of causing the patient's death is guilty of a class A felony.

2. A person who coerces or exerts undue influence on a patient to request medication to end the patient's life or to destroy a rescission of a request is guilty of a class A felony.

3. Nothing in this initiative shall limit further liability for civil damages resulting from other negligent conduct or intentional misconduct by any person.

4. The penalties in this initiative do not preclude criminal penalties applicable under other law for conduct that is inconsistent with this initiative.

Section 20

Any governmental entity that incurs costs resulting from a person terminating his or her life under this initiative in a public place has a claim against the estate of the person to recover such costs and reasonable attorneys' fees related to enforcing the claim.

Section 21

A request for a medication as authorized by this initiative shall be in substantially the following form:

REQUEST FOR MEDICATION TO END MY LIFE

IN A HUMANE AND DIGNIFIED MANNER

I, ..., am an adult of sound mind.

I am suffering from ....., which my attending physician has determined is a terminal disease and which has been medically confirmed by a consulting physician. I have been fully informed of my diagnosis, prognosis, the nature of medication to be prescribed and potential associated risks, the expected result, and the feasible

alternatives, including comfort care, hospice care, and pain control. I request that my attending physician prescribe medication that will end my life in a humane and dignified manner.

INITIAL ONE:

..... I have informed my family of my decision and taken their opinions into consideration.

..... I have decided not to inform my family of my decision.

..... I have no family to inform of my decision.

I understand that I have the right to rescind this request at any time.

I understand the full import of this request and I expect to die when I take the medication to be prescribed. I further understand that although most deaths occur within three hours, my death may take longer, and my physician has counseled me about this possibility.

I make this request voluntarily and without reservation, and I accept full moral responsibility for my actions.

Signed: .....

Dated: .....

DECLARATION OF WITNESSES

We declare that the person making and signing the above request:

(1) Is personally known to us or has provided proof of identity;

(2) Signed this request in our presence on the date of the person's signature;

(3) Appears to be of sound mind and not under duress, fraud, or undue influence;

and

(4) Is not a patient for whom either of us is the attending physician.

..... Witness 1/Date

..... Witness 2/Date

NOTE: One witness shall not be a relative (by blood, marriage, or adoption) of the person signing this request, shall not be entitled to any portion of the person's estate upon death, and shall not own, operate, or be employed at a health care facility where the person is a patient or resident. If the patient is an inpatient at a health care facility, one of the witnesses shall be an individual designated by the facility.

Section 22

1. Any person who, without authorization of the principal, willfully alters, forges, conceals, or destroys an instrument, the reinstatement or revocation of an instrument, or any other evidence or document reflecting the principal's desires and interests with the intent and effect of causing a withholding or withdrawal of life-sustaining procedures or of artificially administered nutrition and hydration which hastens the death of the principal is guilty of a class A felony.

2. Except as provided in subsection 1 of this section, any person who, without authorization of the principal, willfully alters, forges, conceals, or destroys an instrument, the reinstatement or revocation of an instrument, or any other evidence or document reflecting the principal's desires and interests with the intent and effect of affecting a health care decision is guilty of a class A misdemeanor.

RE: Petition approval request from Winston Apple regarding a proposed statutory amendment to Chapters 130 & 143 (2018-160)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Winston Apple on February 6, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri:

Two new sections of the Missouri Revised Statutes, to be known as sections 130.230 and 143.990, are enacted to read as follows:

130.230. 1. "The Missouri Elections Trust Fund" is hereby created to provide public financing for candidates for office in Missouri who agree to accept the conditions specified herein, and who subsequently meet those conditions.
2. The Missouri Elections Trust Fund will be administered by a board, to be known as the "Missouri Elections Trust Fund Commission" consisting of seven members, to be nominated by the governor and approved by the senate. The Missouri Electors Trust Fund Commission shall, within one (1) calendar year of the effective date of this section, promulgate rules necessary for the administration of this section, including a method for the expenditure of the funds collected.
(1) No individual may be appointed to the Missouri Elections Trust Fund Commission who is:
(a) a government employee;
(b) a registered lobbyist, or who has been a registered lobbyist at any time during the 5-year period preceding their appointment to the commission;
(c) an officer or employee of a political party or political campaign;
(d) an elected official, senator, or representative.
(2) Members of the Missouri Elections Trust Fund Commission shall be appointed for a term of five years; except the second and third classes of the first seven members to be appointed, who shall be divided into three classes, as follows;
(a) The first three members to be confirmed shall serve a full five-year term;
(b) The fourth and fifth members to be confirmed shall serve a three-year term;
(c) The sixth and seventh members to be confirmed shall serve a one-year term.
(3) Members of the commission may be removed from office if convicted of fraud or mismanagement of funds administered by the commission, or conviction of a felony.
3. Members of the commission will be reimbursed for travel and other expenses at the prevailing rate for other employees and officers of the state of Missouri.
4. The funds collected under this program will be distributed only to candidates who accept and meet the conditions required to qualify for public financing.
5. Candidates accepting public funds must agree to and meet the following conditions:
(1) Not to accept contributions from corporations or political action committees that accept corporate contributions;
(2) Not to accept donations totaling more than $1000 from any individual or other source, excluding a political party of which they are a member, during an election cycle ("election cycle" is defined as the period between two general elections for the same office); and
(3) That at least one-half of the money raised, or in-kind contributions received, by the candidate will come from individual contributors who contribute a total of $100 or less to the candidate during an election cycle.
6. The funding provided to eligible candidates will be in the form of matching funds, with the ratio of the match relative to the amount of money raised by candidates to be determined by the commission based on the total amount of money raised by all candidates who have elected to accept public funds and the total amount of money available from the fund during each election year.
(1) Thirty-five percent of the funds available shall be distributed on the first day of June of each general election year, based on total monetary contributions received during the election cycle up to the date of the quarterly report filed with the Missouri Ethics Commission for the quarter ending on the thirty-first day of March. (In-kind contributions are not eligible for matching funds.)
(2) The balance of available funds shall be distributed on the third Monday in September of each general election year to eligible candidates in the general election, based on total monetary contributions received and reported through the thirtieth day of August.
7. When a candidate or committee files a termination statement and disclosure report with the Missouri Ethics Commission, any and all funds remaining after repaying any debts owed by the campaign committee are to be paid over to the Missouri Elections Trust Fund, up to and including an amount equal to the full amounts of matching funds received by said candidate.
8. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

143.990. 1. In each taxable year beginning on or after January 1, 2018, each individual or corporation having paid state income taxes in the amount of twenty-five dollars or more may designate that five dollars of the tax paid shall be paid over to the Missouri elections trust fund as provided in section 130.230. In the case of a husband and wife with a filing status of married filing combined having paid state income tax in the amount of fifty dollars or more, each spouse may designate that five dollars shall be paid to the fund.
2. The option to contribute to this fund, as authorized by this section, shall be clearly and unambiguously printed on the same page of each income tax return form provided by the state upon which the amount of the amount of tax owed is indicated, and shall include the following statement: "Contributing to the Missouri Elections Trust Fund will not increase the amount of tax owed or reduce the amount of overpayment to be refunded."
3. The department of revenue shall deposit the contributions made pursuant to this statute into the Missouri Election Trust Fund as created in section 130.230.
4. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-160)

Subject

Initiative petition from Winston Apple regarding a proposed amendment to Chapters 130 and 143 of the Revised Statutes of Missouri. (Received February 6, 2017)

Date

February 27, 2017

Description

This proposal would amend Chapters 130 and 143 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** and **Missouri Ethics Commission.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb

the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact for their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have a fiscal impact on their department.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated no fiscal impact on their department.

Officials from the **Department of Revenue** indicated the total estimated costs would be $381,264 for fiscal year 2018, $110,394 for fiscal year 2019, and $111,328 for fiscal year 2020.

The petition specifically allows “corporations” to designate five dollars to the Missouri Elections Trust Fund.

This legislation reduces Total State Revenue by an unknown amount.

Section 143.990
This petition establishes a check-off for individuals and corporations that pay twenty-five dollars ($25) or more, the ability to designate $5.00 to the Missouri elections trust fund, $10.00 if filing combined. For each donation to the trust fund Total State Revenue would be decreased by the same amount.

Administrative Impact:
The Department requires form and programming changes to personal and corporate tax systems.

Personal Tax:
Personal Tax requires two (2) Temporary Tax Employees for keying returns and one (1) Revenue Processing Technician I (Range 10, Step L) for processing returns.

Corporate Tax:
Corporate tax requires one (1) Revenue Processing Technician I (Range 10, Step L).

Integrated Tax System:
The Integrated Tax System requires an additional $275,746 for programming costs associated with Personal and Corporate income tax systems. Additional first year equipment costs are estimated at $14,292.

Officials from the **Department of Public Safety-Director's Office** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated this proposal requires the Governor to nominate the seven members of the Missouri Elections Trust Fund Commission. This can be completed by existing staff so there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** indicated:

The proposal enacts two new sections of law.

Section 130.230 creates the Missouri Elections Trust Fund to provide public financing for candidates who agree to meet certain conditions and limitations.
Section 143.990 allows individuals and corporations to designate five dollars of their taxes paid to be deposited in the Missouri Elections Trust Fund instead of into the General Revenue Fund. This will be a cost to general revenue of an unknown amount.

This proposal will have no impact on their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated their local government estimates the fiscal impact of the above-referenced constitutional amendment for fiscal years 2018, 2019 and 2020 to be as follows:

(reminder: 2018 will likely be a portion of a fiscal year, depending on effective date of amendment)
Revenues: (explain amount per fiscal year and source or reason for increase)
This constitutional amendment will have no fiscal impact on their city.

Savings: (explain amount per fiscal year, reason for savings and area where savings will occur)
This constitutional amendment will have no fiscal impact on their city.

Costs:(explain what type of costs will be incurred, amount per fiscal year and reason)
This constitutional amendment will have no fiscal impact on their city.

Losses:(explain why revenue losses would be expected and amount per fiscal year)
This constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **Missouri Ethics Commission** indicated the proposed language does not have fiscal impact on their office.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia**, the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College**.

Fiscal Note Summary

State government entities expect implementation costs of $290,000 and annual costs of $110,000. Also, an unknown amount of revenue will not be available for state General Revenue Fund spending. Local governmental entities expect no costs or savings from this proposal.

RE: Petition approval request from Winston Apple regarding a proposed statutory amendment to Chapters 286 & 143, version 2 (2018-159)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Winston Apple on February 6, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

My commission expires: _____

Be it enacted by the people of the state of Missouri:

Two new sections of the Missouri Revised Statutes are hereby enacted, to be known as sections 286.131 and 143.012, to read as follows:

286.131. 1. A program to be known as "The Renewable Energy Project" is hereby created within the Missouri Department of Labor and Industrial Relations.
2. Funding for The Renewable Energy Project will be provided through revenues from a tax on long-term capital gains and qualified dividends, as provided for in Section 143.012.
3. The Missouri Department of Labor and Industrial Relations shall, within one (1) calendar year of the effective date of this section, promulgate rules necessary for the administration of this section, including a method for the expenditure of the funds collected pursuant to section 143.012 in a manner that balances cost-effectiveness, amount of carbon emissions to be avoided, economic development, and employment.
4. Funds collected pursuant to this section and section 143.012 shall be used only for the purposes of improving energy efficiency in buildings, constructing and installing renewable energy resources as defined by section 386.890.2(6), modernizing public infrastructure to utilize energy from renewable energy resources, and planting trees on public lands.
5. a. The compensation provided for, and other specific policies related to, work done through jobs created by this project shall be determined and set by the labor and industrial relations commission, but, at a minimum, shall be set at a level that provides a living wage, which is hereby defined as putting a worker, and her or his dependents, at least ten percent above the poverty threshold based on the poverty guidelines published by the Department of Health and Human Services, provided a worker is present and working 40 hours per week.
b. If a household has two or more adult members and no children or other dependents, meeting this level of compensation may be based on all adults working 40 hours per week, if a household has children between five and sixteen years of age, compensation will be based on one adult member working full time and any additional adult members working during school hours. However, in no event shall the hourly wage paid under this program be less than the applicable minimum wage.
c. Management and administrative positions will pay a reasonable salary based on the prevailing salaries for positions with similar responsibilities elsewhere within the government of the state of Missouri.
6. Once the state of Missouri is producing 90% or more of its electricity from clean, renewable sources, the funds generated by this tax on long-term capital gains and qualified dividends may be used, as directed by appropriate legislation, to replace funds generated by the state sales tax so that sales taxes may be reduced or eliminated.
7. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

143.012. 1. Beginning with the 2019 calendar year, a tax on capital gains and qualified dividends will be imposed, with the funds collected dedicated to providing funding for The Renewable Energy Project. The amount of the tax will be the difference, expressed as a percentage, of the rate paid to the federal government on the long-term capital gain or qualified dividend, and the tax paid for an equal amount of ordinary income.
2. Any taxpayer whose total family income is less than 110 percent of the dollar amount of the poverty threshold based on the poverty guidelines published by the Department of Health and Human Services is exempt from this tax.
3. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-159)

Subject

Initiative petition from Winston Apple regarding a proposed amendment to Chapters 286 and 143 of the Revised Statutes of Missouri. (Received February 6, 2017)

Date

February 27, 2017

Description

This proposal would amend Chapters 286 and 143 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the

costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have an impact on their department. It could have a positive impact on institutions of higher education who apply to DOLIR to pay for upgrades out of the Renewable Energy Project, but that impact cannot be measured.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated:

This proposal could affect Department of Revenue, Office of Administration, or Department of Economic Development.

Space will be required for six administrative full time employees (FTE) in Jefferson City.

It is possible that the proposal could impact small businesses in several ways including imposition of the capital gains tax.

A tax on capital gains would be imposed beginning with the 2019 calendar year. However, since a tax rate is not specified, a revenue estimate is unavailable.

This petition seeks to create a new section 286.131 requiring their department to create a program called "The Renewable Energy Project." Funds would be generated from a tax on capital gains as stated in section 143.012. As funds are available, their department would begin awarding contracts for projects which meet the requirements of the program.

They estimate it would need six FTE to provide administrative services for the program. There would also be FTE or a third-party contract required to ensure contractors who are awarded contracts under this program meet the wage requirements specified in the language. It is uncertain how many contracts would be awarded, nor how many employee wage records would require review; therefore, they cannot provide an estimate for this portion of the petition.

If revenues increase or decrease in a given year, the number of participants in the program would rise or fall proportionally. The remaining funding would be used to award contracts for projects that meet program specifications.

Proceeds from a capital gains tax would be used to fund the program. Because revenue can fluctuate from year to year, projects would increase or decrease based on the availability of funding. The proposed language is unclear regarding the long-range implications.

Revenue Projections

A revenue projection cannot be made since a rate for the capital gains tax is unspecified.

Cost Estimates

Administrative Costs and Management of Projects

They estimate that $474,415 will be needed to administer the program.

One time - $45,156; Ongoing - $429,259, plus the Unknown amount for contracts; Total: Unknown, >$474,415

There would also be FTE or a third-party contract required to ensure contractors who are awarded contracts under this program meet the wage requirements specified in the language. It is uncertain how many contracts would be awarded, nor how many employee wage records would require review; therefore, they cannot provide an estimate for this portion of the petition. There is also no method whereby the State of Missouri could recoup any payments that were found to have been made either by error or by fraud within the program.

In addition, they assume it would award contracts for projects that meet the requirements set forth in 266.131 and the rules promulgated by the department.

Because the capital gains tax begins with tax year 2019, collections are not expected until calendar year 2020. They assume that the fund will require several months to build; therefore expenses would not begin until FY 2020 (July 1, 2019). Depending on the

types and number of projects, costs will vary significantly. The scope of this statute revision is very broad and the long-range implications are unknown.

Officials from the **Department of Public Safety-Director's Office** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Revenue** indicated total fund costs for General Revenue will be $231,141 for fiscal year 2019, $235,545 for fiscal year 2020, and $237,472 for fiscal year 2021.

Small businesses in the areas designated for expenditures from the new fund may benefit.

This will increase Total State Revenue by unknown amount.

Section 286.131
This section creates the renewable energy project in the Department of Labor and Industrial Relations. The Department of Labor uses the revenues generated from the tax in Section 143.012 for the purposes outlined in the Renewable Energy Project created within the Department of Labor and Industrial Relations.

Section 143.012
This petition taxes long-term capital gains and qualified dividends to fund the renewable energy projects created in section 286.131. The legislation exempts households with an income of less than 110% of the poverty threshold. The Department is unable to determine the amount of revenue that will be generated from this tax.

Administrative Impact:
The Department requires form updates and programming changes.
Personal Tax:
Personal Tax requires two (2) Revenue Processing Technicians I (Range 10, Step L); one for every 19,000 error corrections and one for every 2,400 pieces of correspondence.

Corporate Tax:
Corporate Tax requires one (1) Revenue Processing Technicians I (Range 10, Step L); one for every 2,600 pieces of correspondence.

Collection & Tax Assistance:
Collection & Tax Assistance will see additional customer contacts from this additional tax and from notice of adjustments. This section requires two (2) Tax Collection Technicians I (Range 10, Step L); one for every additional 15,000 contacts annually on the non-delinquent tax line and one for every additional 15,000 contacts annually on the delinquent tax line. Each technician requires CARES equipment and license.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact.

Officials from the **Office of Administration** (OA) indicated the proposal adds Sections 143.012 and 286.131, RSMo. which creates the "Renewable Energy Project" in the Department of Labor and Industrial Relations. A tax on long-term capital gains and qualified dividends would be imposed on certain taxpayers to raise the revenue needed to support this program. After the state of Missouri is producing 90% or more of its electricity from clean, renewable sources, the funds generated by the new tax may be used to reduce or eliminate the state sales tax.

This proposal would have a positive impact on total and general revenue for the state in Fiscal Year 2020, however, Budget and Planning is unable to estimate the specific fiscal impact.

This proposal should have no impact on their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the

full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal will have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **University of Missouri** indicated they do not believe that this initiative will have a significant impact on their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia**, the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College,** and **St. Louis Community College**.

Fiscal Note Summary

State governmental entities estimate unknown annual revenue increases to fund the proposed program, one-time costs of approximately $45,000, and annual operating costs of approximately $665,000. Local governmental entities indicate no fiscal impact.

JOHN R. ASHCROFT

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Winston Apple regarding a proposed statutory amendment to Chapters 286 & 143, version 1 (2018-158)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Winston Apple on February 6, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

My commission expires: _____

Be it enacted by the people of the state of Missouri:

Two new sections of the Missouri Revised Statutes are hereby enacted, to be known as sections 286.131 and 143.012, to read as follows:

286.131. 1. A program to be known as "The Renewable Energy Project" is hereby created within the Missouri Department of Labor and Industrial Relations.
2. Funding for The Renewable Energy Project will be provided through revenues from a tax on long-term capital gains and qualified dividends, as provided for in Section 143.012.
3. The Missouri Department of Labor and Industrial Relations shall, within one (1) calendar year of the effective date of this section, promulgate rules necessary for the administration of this section, including a method for the expenditure of the funds collected pursuant to section 143.012 in a manner that balances cost-effectiveness, amount of carbon emissions to be avoided, economic development, and employment.
4. Funds collected pursuant to this section and section 143.012 shall be used only for the purposes of improving energy efficiency in buildings, constructing and installing renewable energy resources as defined by section 386.890.2(6), modernizing public infrastructure to utilize energy from renewable energy resources, and planting trees on public lands.
5. Once the state of Missouri is producing 90% or more of its electricity from clean, renewable sources, the funds generated by this tax on long-term capital gains and qualified dividends may be used, as directed by appropriate legislation, to replace funds generated by the state sales tax so that sales taxes may be reduced or eliminated.
6. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

143.012. 1. Beginning with the 2019 calendar year, a tax on capital gains and qualified dividends will be imposed, with the funds collected dedicated to providing funding for The Renewable Energy Project. The amount of the tax will be the difference, expressed as a percentage, of the rate paid to the federal government by each taxpayer on long-term capital gains and qualified dividends earned, and the tax rate that would have been paid for an equal amount of marginal ordinary income, based on each taxpayer's tax bracket.
2. Any taxpayer whose total family income is less than 110 percent of the dollar amount of the poverty threshold, based on the poverty guidelines published by the Department of Health and Human Services, is exempt from this tax.
3. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (18-158)

Subject

Initiative petition from Winston Apple regarding a proposed amendment to Chapters 286 and 143 of the Revised Statutes of Missouri. (Received February 6, 2017)

Date

February 27, 2017

Description

This proposal would amend Chapters 286 and 143 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2018.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the

costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Higher Education** indicated this initiative petition would not have an impact on their department. It could have a positive impact on institutions of higher education who apply to DOLIR to pay for upgrades out of the Renewable Energy Project, but that impact cannot be measured.

Officials from the **Department of Health and Senior Services** indicated no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated:

This proposal could affect Department of Revenue, Office of Administration, or Department of Economic Development.

Space will be required for 6 administrative full time employees (FTE) in Jefferson City.

It is possible that the proposal could impact small businesses in several ways including imposition of the capital gains tax.

A tax on capital gains would be imposed beginning with the 2019 calendar year. However, since a tax rate is not specified, a revenue estimate is unavailable.

This petition seeks to create a new section 286.131 requiring their department to create a program called "The Renewable Energy Project." Funds would be generated from a tax on capital gains as stated in section 143.012. As funds are available, their department would begin awarding contracts for projects which meet the requirements of the program.

They estimate it would need six FTE to provide administrative services for the program. If revenues increase or decrease in a given year, the number of participants in the program would rise or fall proportionally. The remaining funding would be used to award contracts for projects that meet program specifications.

Proceeds from a capital gains tax would be used to fund the program. Because revenue can fluctuate from year to year, projects would increase or decrease based on the availability of funding. The proposed language is unclear regarding the long-range implications.

Revenue Projections

A revenue projection cannot be made since a rate for the capital gains tax is unspecified.

Cost Estimates

Administrative Costs and Management of Projects

They estimate that $474,415 will be needed to manage the program.

One time - $45,156; Ongoing - $429,259, plus the Unknown amount for contracts; Total: Unknown, >$474,415

In addition, they assumes it would award contracts for projects that meet the requirements set forth in 266.131 and the rules promulgated by the department.

Because the capital gains tax begins with tax year 2019, collections are not expected until calendar year 2020. They assume that the fund will require several months to build; therefore expenses would not begin until FY 2020 (July 1, 2019). Depending on the types and number of projects, costs will vary significantly. The scope of this statute revision is very broad and the long-range implications are unknown.

Officials from the **Department of Public Safety-Director's Office** indicated they see no fiscal impact due to this petition.

Officials from the **Department of Revenue** indicated increased operating costs for General Revenue will be $231,141 for fiscal year 2019, $235,545 for fiscal year 2020 and $237,472 for fiscal year 2021.

Small businesses in the areas designated for expenditures from the new fund may benefit.

This will increase Total State Revenue by unknown amount.

Section 286.131
This section creates the renewable energy project in the Department of Labor and Industrial Relations. The Department of Labor uses the revenues generated from the tax in Section 143.012 for the purposes outlined in the Renewable Energy Project created within the Department of Labor and Industrial Relations.

Section 143.012
This petition taxes long-term capital gains and qualified dividends to fund the renewable energy projects created in section 286.131. The legislation exempts households with an income of less than 110% of the poverty threshold. The Department is unable to determine the amount of revenue that will be generated from this tax.

Administrative Impact:
The Department requires form updates and programming changes.
Personal Tax:
Personal Tax requires two (2) Revenue Processing Technicians I (Range 10, Step L); one for every 19,000 error corrections and one for every 2,400 pieces of correspondence.

Corporate Tax:
Corporate Tax requires one (1) Revenue Processing Technicians I (Range 10, Step L); one for every 2,600 pieces of correspondence.

Collection & Tax Assistance:
Collection & Tax Assistance will see additional customer contacts from this additional tax and from notice of adjustments. This section requires two (2) Tax Collection Technicians I (Range 10, Step L); one for every additional 15,000 contacts annually on the non-delinquent tax line and one for every additional 15,000 contacts annually on the delinquent tax line. Each technician requires CARES equipment and license.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no impact.

Officials from the **Office of Administration** (OA) indicated the proposal adds Sections 143.012 and 286.131, RSMo. which creates the “Renewable Energy Project” in the Department of Labor and Industrial Relations. A tax on long-term capital gains and

qualified dividends would be imposed on certain taxpayers to raise the revenue needed to support this program. After the state of Missouri is producing 90% or more of its electricity from clean, renewable sources, the funds generated by the new tax may be used to reduce or eliminate the state sales tax.

This proposal would have a positive impact on total and general revenue for the state in Fiscal Year 2020, however, Budget and Planning is unable to estimate the specific fiscal impact.

This proposal should have no impact on their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated no fiscal impact on their office.

Officials from the **Secretary of State's office** indicated their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. Funding for this item is adjusted each year depending upon the election cycle with $1.3 million historically appropriated in odd numbered fiscal years and $100,000 appropriated in even numbered fiscal years to meet these requirements. Through FY (fiscal year) 2013, the appropriation had historically been an estimated appropriation because the final cost is dependent upon the number of ballot measures approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2015, the General Assembly changed the appropriation so that it was no longer an estimated appropriation. In FY 2017 their office was appropriated $2.6 million to publish the full text of the measures. In FY 2017, at the August and November elections, there were 6 statewide Constitutional Amendments or ballot propositions that cost $2.4 million to publish (an average of $400,000 per issue). Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal will have no impact on their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this constitutional amendment will have no fiscal impact on their city.

Officials from the **City of Raymore** indicated no fiscal impact.

Officials from the **University of Missouri** indicated they do not believe that this initiative will have a significant impact on their university.

The State Auditor's office did not receive a response from the **Department of Elementary and Secondary Education, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia**, the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, State Technical College of Missouri, Metropolitan Community College,** and **St. Louis Community College**.

Fiscal Note Summary

State governmental entities estimate unknown annual revenue increases to fund the proposed program, one-time costs of approximately $45,000, and annual operating costs of approximately $665,000. Local governmental entities indicate no fiscal impact.

RE: Petition approval request from Charles Jones regarding a proposed constitutional amendment to Article IV (2018-157)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Charles Jones on February 6, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

This measure amends the Missouri Constitution by adding Section 54 to Article IV. This amendment implicitly repeals, in part or in whole, and amends various statutes and subsections including but not necessarily limited to RSMo 105.1105.1, 105.1108.1, 105.1112.1, 195.0010.1, 196.0100.1, 263.0250.1, 577.0024.1, 579.0015.1, 579.0020.1, 579.0030.1, 579.0055.1, 579.0065.1, 579.0068.1, and 579.0105.1.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section is adopted to be known as Article IV, Section 54 and to read as follows:

1. Cannabis shall immediately be removed from the Missouri list of controlled substances and shall no longer be listed among Missouri's drug schedules.

2. Definitions: cannabis and cannabis hemp refer to Cannabis, Marijuana, Cannabis Sativa, Cannabis Indica, Cannabis Ruderalis or any variety of cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
   a. Medical cannabis refers to physician recommended use.
   b. Personal use refers to any use not recommended by physician.
   c. Cannabis accessories means any equipment, products or materials of any kind that are used or intended for use planting, propagating, cultivating, growing, harvesting, manufacturing, compounding , converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing cannabis or for ingesting, inhaling, vaporizing, smoking or otherwise introducing cannabis into or onto the human body.
   d. Establishment refers to a cannabis cultivation facility, a cannabis manufacturing facility or retail store or other entity that cultivates, prepares, manufactures, packages, transports, or sells cannabis products or accessories.
   e. Minor refers to anyone under the age 18.

3. Cannabis or its products shall not be sold to anyone under the age 18. Anyone under the age of 18 shall have access to cannabis through physician recommendation or consent from parent/legal guardian.
   a. No minor shall be criminally prosecuted for possession of cannabis or its products.

4. The following acts are not unlawful and shall not be an offense under Missouri law
   a. Possession of cannabis for personal or medical use.
   b. Cultivating cannabis for personal or medical use, to obey zoning restrictions.
   c. Cultivating, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing cannabis, cannabis accessories, and cannabis products for commercial purposes, provided the person has current applicable licenses to run a business in Missouri.
   d. Providing cannabis, cannabis accessories and products for sale to consumers. Any product to be sold to public must be tested for purity and weight.
   e. Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs (a) through (e) of this section.
   f. The possession of cannabis is not to be the sole reason for issuing a D.U.I. (driving under the influence), arrest or fines when operating a motor vehicle.

5. Patient rights: Cannabis shall be available to all patients regardless of age, without taxation when physician recommended.

6. All prisoners that have been incarcerated for nonviolent cannabis related crimes shall immediately be released and all charges for cannabis crimes expunged.
   a. Within 60 days of passage of this act, the attorney general's office shall develop and make available to the public a legal document ordering the immediate destruction of all cannabis related non-violent civil and criminal records in Missouri, to be distributed to all circuit court judges within the state.

7. No state or federal funds shall be used to enforce federal laws which are no longer illegal in the state of Missouri.
   a. Any person who willfully impedes the lawful exercise of these provisions is guilty of a class A misdemeanor.

8. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirements, licensing fee that is discriminant, prohibitive, or in any way contrary to that which is relative to any other commercial or agriculture farmer, manufacturer, processor or distributor.

9. Pursuant to the ninth and tenth amendments to the Constitution of the United States, the people of Missouri hereby repudiate and challenge federal cannabis prohibitions that conflict with this act.

10. All provisions of this section are self-executing and severable and, except where otherwise indicated in the text of this document, shall supersede conflicting city, county, state or federal statutory, local charter, ordinance or resolution.

11. If any rival or conflicting initiative regulating any matter addressed by this act receives the higher affirmative vote, then all non-conflicting parts shall become operative.

12. The dictates of this Initiative shall be implemented no later than April 20th following the election that placed this initiative before the people.

Be it enacted by the people of the state of Missouri:

Section A. Chapter 128, RSMo, is amended by adding thereto one new section, to be known as Section 128.005, to read as follows:

128.005. 1. This section shall be known and may be cited as the "Interstate Compact on the Agreement Among the States to Elect the President by National Popular Vote Act."

2. The State of Missouri ratifies and approves the following compact: Agreement Among the States to Elect the President by National Popular Vote.

Article I – Membership. Any State of the United States and the District of Columbia may become a member of this agreement by enacting this agreement.

Article II – Right of the People in Member State to Vote for President and Vice President. Each member state shall conduct a statewide popular election for President and Vice President of the United States.

Article III – Manner of Appointing Presidential Electors in Member States

1. Prior to the time set by law for the meeting and voting by the presidential electors, the chief election official of each member state shall determine the number of votes for each presidential slate in each state of the United States and in the District of Columbia in which votes have been cast in a statewide popular election and shall add such votes together to produce a "national popular vote total" for each presidential slate.

2. The chief election official of each member state shall designate the presidential slate with the largest national popular vote total as the "national popular vote winner."

3. The presidential elector certifying official of each member state shall certify the appointment in that official's own state of the elector slate nominated in that state in association with the national popular vote winner.

4. At least six days before the day fixed by law for the meeting and voting by the presidential electors, each member state shall make a final determination of the number of popular votes cast in the state for each presidential slate and shall communicate an official statement of such determination within 24 hours to the chief election official in each other member state.

5. The chief election official of each member state shall treat as conclusive an official statement containing the number of popular votes in a state for each presidential slate made by the day established by federal law for making a state's final determination conclusive as to the counting of electoral votes by Congress.

6. In event of a tie for the national popular vote winner, the presidential elector certifying official of each member state shall certify the appointment of the elector slate nominated in association with the presidential slate receiving the largest number of popular votes within that official's own state.

7. If for any reason, the number of presidential electors nominated in a member state in association with the national popular vote winner is less than or greater than that state's number of electoral votes, the presidential candidate on the presidential slate that has been designated as the national popular vote winner shall have the power to nominate the presidential electors for that state and that state's presidential elector certifying official shall certify the appointment of such nominees. The chief election official of each member state shall immediately release to the public all vote counts or statements of votes as they are determined or obtained.

8. This article shall govern the appointment of presidential electors in each member state in any year in which this agreement is, on July 20, in effect in states cumulatively possessing a majority of the electoral votes.

Article IV – Other Provisions

1. This agreement shall take effect when states cumulatively possessing a majority of the electoral votes have enacted this agreement in substantially the same form and the enactments by such states have taken effect in each state.

2. Any member state may withdraw from this agreement, except that a withdrawal occurring six months or less before the end of a President's term shall not become effective until a President or Vice President shall have been qualified to serve the next term.

3. The chief executive of each member state shall promptly notify the chief executive of all other states of when this agreement has been enacted and has taken effect in that official's state, when the state has withdrawn from this agreement, and when this agreement takes effect generally.

4. This agreement shall terminate if the electoral college is abolished.

5. In any provision of this agreement is held invalid, the remaining provisions shall not be affected.

Article V – Definitions. For purposes of this agreement:

1. "Chief Executive" shall mean the Governor of s State of the United States or the Mayor of the District of Columbia;

2. "Elector slate" shall mean a slate of candidates who have been nominated in a state for the position of presidential elector in association with a presidential slate;

3. "Chief election official" shall mean the state official or body that is authorized to certify the total number of popular votes for each presidential slate;

4. "Presidential elector" shall mean an elector for President and Vice President of the United States;

5. "Presidential elector certifying official" shall mean the state official or body that is authorized to certify the appointment of the state's presidential electors;

6. "Presidential slate" shall mean a slate of two persons, the first of whom has been nominated as a candidate for President of the United States and the second of whom has been nominated as a candidate for Vice President of the United States, or any legal successors to such persons, regardless of whether both names appear on the ballot presented to the voter in a particular state;

7. "State" shall mean a State of the United States and the District of Columbia; and

8. "Statewide popular election" shall mean a general election in which votes are cast for presidential slates by individual voters and counted on a statewide basis.

Jefferson City, MO 65101

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article I, version 1 (2018-153)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on January 31, 2017.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

County _____

Page No. _____

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

INITIATIVE PETITION

To the Honorable John R. Ashcroft, Secretary of State for the State of Missouri:

We, the undersigned, registered voters of the state of Missouri and _____ County (or city of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 6th day of November, 2018, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the State of Missouri and _____ County (or city of St. Louis); my registered voting address and name of the city, town or village in which I live are correctly written after my name.
